nation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are s corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 17TH OF NOVEMBER 1894.

DURING the second half of the previous week fine settled weather of ordinary north-east monsoon character had set in rapidly over the province, and the disturbed conditions brought about by the storm at the commencement of the month had disappeared. An unusually rapid fall of temperature had also occurred, and at the close of the week temperature had became rather largely in defect.

Ordinary north-east monsoon weather has prevailed over the whole of Bengal for the whole of the present week, and the changes which have occurred from day to day have been small and of the kind which usually accompany fine settled weather. Thus on the 11th temperature and pressure were increasing slowly, and while pressure was still moderately in excess, the mean temperature was below the normal by amounts ranging between about 6° at the extreme southern stations to a nearly normal temperature in parts of Bihar. Almost similar changes to those on the 11th occurred on the 12th, 13th, 14th, 15th and 16th; and on the 16th pressure had become in excess of the normal by amounts which usually ranged between 0·13″ and 0·14″, while on the other hand the deficiency of temperature had practically disappeared, and temperature for the whole province was nearly normal, slight to moderate excess amounts being registered over the western half and similar defects over the eastern half of the province. On the 17th these changes practically ceased and were almost reversed, and pressure and temperature began to fall slowly, and in the case of the mean temperature slight to moderate defects were registered over practically the whole province. Light to moderate north-westerly, westerly and northerly winds have also prevailed over the province throughout the week, while skies have been either lightly to moderately clouded, or in the western districts almost cloudless. Humidity has also been generally only moderate in amount, and rainfall has been entirely absent from the whole province throughout the week.

Pressure has been above the normal for the whole week, and the excess has averaged from about 0·10″ up to 0·12″, the excess being fairly equally distributed in all districts.

Temperature has been below the normal for the greater part of the week, the defect ranging from 1·7° in North-West Bengal and Chota Nagpur to a defect of only 0·2° in Bihar. For the whole province the defect has equalled 1·1°.

The actual temperatures registered during the week and their variations from the normal temperature for the present season are most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been rather large in both the day and night temperatures, and at the great majority of stations considerable defects have been registered:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 17th of November 1894.

	Normal mean maximum temperature for the week ending 17th November.	Actual mean maximum temperature for the week ending 17th November 1894.	Variation of actual mean from the normal. APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, NOVEMBER 21, 1894.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 225.

[First Publication.]

BAY OF BENGAL—ORISSA COAST.

False Point harbour—Universal system of buoyage.

WITH reference to Notice to Mariners No. 19, dated 4th February 1893, issued by this office, the Port Officer, False Point, has given further notice that the following alterations have been made in the position of buoys marking the *Port hand* of the harbour, entering from seaward :—

Reddie Head sand spit inner buoy has been shifted 250 feet N. E. by N., and now lies moored in 24 feet water reduced.

Reddie Head flat buoy has been shifted 1,100 feet N. by W., and now lies moored in 13 feet water reduced.

The Port hand upper end of Harbour buoy has been shifted 1,200 feet north, and now lies moored in 11 feet 6 inches of water reduced.

The bearings are magnetic.

The buoys on the *Starboard hand* of the harbour will have to be shifted also, of which due notice will be given.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

[First Publication.]

AUSTRALIA, SOUTH COAST—GIPPS LAND.

Gipps Land lakes entrance—Signal lights on east pier.

THE British Admiralty has given notice (No. 564 of 1894) that on 5th September 1894, the undermentioned signal lights would be shown from the extremity of the platform on east pier entrance to Gipps Land lakes:—

A *white* light will indicate that the entrance is safely navigable.

A *red* light will indicate that the entrance is dangerous.

Approximate position, lat. 37° 53′ 35″ S., long. 147° 58′ 30″ E.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 228.

[First Publication.]

JAPAN—(1) GULF OF TOKIO—(2) KOREA STRAIT—(3) KIUSIU, WEST COAST.

Gulf of Tokio—Alterations in lights.

THE British Admiralty has given notice (No. 569 of 1894) that on 10th September 1894, the sector of *red* light, hitherto shown from Kannon saki lighthouse over Futsu saki, and visible between the bearings of S. 5° E. and S. 22° W., would be discontinued.

Approximate position, lat. 35° 15′ 20″ N., long. 139° 44′ 10″ E.

Also, that a light would be exhibited from the west side of Fort No. 2 in course of construction at the west extreme of Futsu saki.

Fort No. 2 light is a *fixed white* light, elevated 45 feet above the sea, and visible from a distance of six miles in clear weather. It is shown from a staff, painted white and 35 feet high.

Approximate position on Chart No. 2657, lat. 35° 18′ 40″ N., long. 139° 43′ 55″ E.

(2) *Korea strait—Tsu sima—red and white light on Ko saki.*

Also that, on 5th September 1894, a light was exhibited from a lighthouse recently erected on Ko saki (Koo saki), south point of Tsu sima:—

Ko saki light is a *fixed* light, showing *white* from N. 85° W., through north and east, to S. 83° E.; and *red* from S. 83° E. to S. 63° E. (over the reefs off Tsuzu (Mame) saki). It is elevated 192 feet above the sea, and visible in clear weather from a distance of 15 miles.

The lighthouse, 22 feet high, is a rectangular wooden tower, painted white.

Approximate position on Chart No. 358, lat. 34° 5′ 30″ N., long. 129° 12″ E.

(3) *Kiusiu, west coast—Amended arc of red light at Shirase lighthouse.*

Also, with reference to Notice to Mariners No. 556 (2) of 1894:—

That Shirase (Shiro se) light shows *red* between the bearings of N. 63° W., through north, to N. 77° E.; and *white* in other directions; and not as stated in Notice to Mariners No. 556 (2) of 1894.

Approximate position on Chart No. 359, lat. 33° 5′ 30″ N., long. 129° 37′ 30″ E.

[Second Publication.]

BAY OF BENGAL—BURMA COAST.

Wreckage on Oyster island.

Caution.—The Port Officer, Rangoon, has given notice, dated the 25th October last, that the Master of the R. I. M. S. *Minto* reports that on his last visit to Oyster island a piece of wreckage, which apparently had formed a portion of a steamer's fore-and-aft bridge, was laying on the island. The wreckage in question is made of 4″ pine, is about 3 to 4 feet broad and 10 to 12 feet long, and had two iron stanchions fitted to it on one side only. The underneath part is painted white and the upper side holystoned. Mariners are accordingly cautioned.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

[Second Publication.]

AUSTRALIA—MORETON BAY.

Amended limits of the Pilot vessels' cruising ground.

THE Port Master, Brisbane, has given notice (No. 18 of 1894), with reference to Notice to Mariners No. 18, issued on the 27th October 1892, that the outer limits of the Pilot vessels' cruising ground at the Northern Entrance to Moreton bay, as therein defined, have been extended to the northward and eastward.

The cruising ground is therefore now defined as follows:—Inside an imaginary line drawn from Cape Cliff N by E. ¾ E. (Mount Tempest in line with Cape Cliff) seven and three-quarter miles; thence to the Fairway buoy at the entrance to the North Channel; thence along the eastern edge of the East and Venus Banks to the outer entrance to Freeman channel; thence to cape Moreton.

[Second Publication.]

AUSTRALIA—CAPE MORETON, NORTH POINT, AND MORETON ISLAND.

Exhibition of additional lights.

THE Port Master, Brisbane, has given notice (No. 19 of 1894) that on and after 15th October, the following lights will be exhibited to assist in marking the fairway between cape Moreton and Smith Rock:—

North Point Hummock.—A small light in a square light-room painted white on the summit of the hummock, showing a sector of white light to the eastward between the bearings of S. 54° W. and S. 82° W., visible about seven miles.

Secondary Light, Cape Moreton,—Bearing N. 18° E., and distant 180 yards from the main light. This light in line with the main light indicates the direction of Smith Rock.

Directions.—Vessels passing between Smith Rock and Moreton island must cross the line of lights at cape Moreton whilst in the sector of white light shown from North Point Hummock.

Charts affected—Nos. 1029, 1068, and 1670A; and Australia Directory, volume 2.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 222.

[Second Publication.]

JAPAN—KOREA STRAIT—TSU SIMA.

(1) *Fixed white light on Mitsu Misou sima.*

THE British Admiralty has given notice (No. 556 of 1894) that a light is exhibited from a tower recently erected on Mitsu (Misou) sima, off the northern extreme of Tsu sima, Korea strait:—

Mitsu sima light is *fixed white*, elevated 52 feet above high water, and visible in clear weather from a distance of 8 miles, between the bearings N.E. ⅞ E. (N. 55° E.) and N.W. ¼ N. (N. 42° W.).

The light-house is a square wood tower, 18 feet high, painted blak.

Approximate position on Admiralty Chart No. 358, lat. 34° 43′ 20″ N., long. 129° 24′ 45″ E.

KIUSIU—WEST COAST.

2. *Fixed white and red light on Shirase (Shiro se).*

Also, that a light is exhibited from a tower on Shirase (Shiro se), west coast of Kiusiu:—

Shirase (Shiro se) light is *fixed*, shows *white* between the bearings E. ⅜ N. (N. 86° E.), through South, to N.W. ¾ W. (N. 54° W.), and *red* to the southward over the shoals Ganashe and Nakashe. It is elevated 45 feet above high water, and visible in clear weather from a distance of 6 miles.

The light-house is a square wood tower, 11 feet high, painted white.

Approximate position on Admiralty Chart No. 359, lat. 33° 5′ 30″ N., long. 129° 37′ 30″ E.

3. *Fixed white and red light on Odate (Oötate).*

Also, that a light is exhibited from a tower on Odate (Oötate).

Odate (Oötate) light is *fixed white*, with two *red* sectors showing respectively between the bearings S.E. ¼ S. (S. 43° E.) and S.S.E. ⅝ E. (S. 27° E.), and between N.W. ⅝ W. (N. 53° W.) and N.N.W. ¼ W. (N. 28° W.). It is elevated 200 feet above the sea, and visible in clear weather from a distance of 6 miles.

The light-house is a square wood tower 22 feet high, painted white.

Approximate position on Admiralty Chart No. 140, lat. 33° 1′ 20″ N., long. 129° 26′ 10″ E.

JAPAN—GULF OF TOKIO OR YEDO.

Portion of the gulf obstructed by torpedoes.

THE British Admiralty has given notice (No. 518 of 1894) that the undermentioned area in the gulf of Tokio would be obstructed by torpedoes:—

The area is comprised westward of an imaginary line drawn from Hasiri mizu point (Rubicon point) to Honmoku (Treaty point) buoy, and southward of a line joining Oshiba saki (Fillmore point) with Hitomi-yama.

This area will be marked by two buoys on the line joining Honmoku buoy and Hasiri mizu point, and a *red* light on the point.

Vessels must pass eastward of the above-mentioned area, giving it a wide berth.

Approximate position of Rubicon point, lat. 35° 16′ N., long. 139° 43′ E.

CHINA.

Hongkong—Pescadores islands—Yung river approaches, &c.

THE following information received from the British Admiralty (No. 530 of 1894) is republished :—

(1) *Hongkong—Shoal in Stonecutter's anchorage.*

The British steamship *Trocas* grounded on a patch of rock having 3 fathoms over it, situated 3-cables N. by E. (N. 11° E.) from the eastern extreme of Stonecutter's island Hongkong harbour.

A conical white buoy has been temporarily moored in 4½ fathoms close southward of the patch.

Approximate position, lat. 22° 19′ 40″ N., long. 114° 8′ 55″ E.

(2) *Pescadores islands—Caution when approaching.*

Also, that all vessels, whether ships of war or otherwise, approaching the Pescadores islands, should fly their national flags during the day, or sound the whistle and exibit lights at night. Signals made from the shore must be answered in order to prevent errors.

(3) *Yung river approaches—Temporary discontinuance of lights, beacons, and buoys.*

Also, that the lights respectively on Tse le (Square island) and Tiger island have been temporarily discontinued.

The beacons on Blonde rock and Tiger's tail, also the buoys on Nemesis rock, Siau yu spit, and Sesostris rock have been temporarily removed.

Torpedoes have been laid down at the entrance to Yung river, and vessels should not enter without a torpedo pilot, nor anchor inside Tiger islsnd. It is dangerous to approach Chinhai forts at night.

(4) *Approaches to Liau Ho and Newchwang.*

Also, that vessels should not enter Newchwang by night, and must show flags or lights when approaching the port.

JAPAN—YATSUSHIRO SEA—OGASAWARA (BONIN ISLANDS).

(1) *Sunken reef in Zozo no-seto.*

THE British Admiralty has given notice (No. 536 of 1894) that a sunken rock lies in Zozo no-seto, in Yatsushiro sea.

This rock, having a depth of about 6 feet over it at low water, lies approximately in lat. 32° 34′ 40″ N., long. 130° 28′ 55″ E.

(2) *Sunken reef in Matsusaki-Wan, Hachiman seto.*

Also, that a rock with 2 fathoms over it at low water lies approximately in lat. 32° 13 45″ N., long. 130° 4′ 40″ E.

OGASAWARA (BONIN ISLANDS).

(3) *Sunken reefs off Futami Kau (Port Lloyd), and leading mark into the harbour.*

Also, that the undermentioned rocks lie off Minami jima, Ogasawara (Bonin islands):—

A rock with 5 fathoms over it lies approximately in lat. 27° 3′ N., long. 142° 8′ 50″ E.; and another rock with 6 feet over it lies about 4 cables E.N.E. from the above.

A triangular white beacon stands 3¼ cables East of Kaname iwa (Castle rock), which, kept in line with a white patch on Kaname iwa, leads into port Lloyd.

JAPAN—Gulf of Tokyo or Yedo.

1. *Light and buoys marking area obstructed by torpedoes.*

With reference to Notice to Mariners No. 202, dated the 27th October last, issued by this office, the British Admiralty has given further notice (No. 543 of 1894) that the undermentioned light and buoys are placed to mark the area obstructed by torpedoes in Tokyo gulf:—

Hashirimidzu (Hasiri mizu) point light is *fixed red*, showing over an arc of 5°, or between the bearings S. 12° E. and S. 17° E., elevated 91 feet above the sea, and visible in clear weather from a distance of 6 miles.

The lighthouse is a square framework 15 feet high and painted white.

Approximate position on Admiralty chart No. 2657, lat. 35° 15′ 55″ N., long. 139° 43′ 10″ E.

A conical buoy, with black and white horizontal stripes, and surmounted by a globe, is moored in 28 fathoms, 1½ miles N. 12° W. from Hashirimidzu light.

A conical buoy painted red, and surmounted by a globe, is moored in 28 fathoms, 5 miles, N. 12° W., from Hashirimidzu light.

The area obstructed is westward of a line drawn from the above light and the red buoy, and soutward of a line drawn from the red buoy to Fillmore point.

2. *Light-buoy altered in position.*

Also, that the light-buoy in Uraga channel has been moved 9½ cables S. 14° W., and now lies in 37 fathoms, 4½ cables N. 33° E., from Hashirimidzu light above mentioned.

3. *Regulations.*

Vessels are not permitted to enter or leave the gulf of Tokyo without the conduct of a Pilot vessel having on board an officer of the Imperial Japanese Navy, and no vessel will be permitted to enter or leave between sunset and sunrise.

Vessels arriving from distant places will be informed of these regulations by the Pilot vessel referred to.

Dated $\frac{\text{31st August}}{\text{3rd September}}$ 1894.

GENTLEMEN,

WE have the honour to report that the Cash and Store Accounts maintained in your office for the year ending 31st March 1894 have been audited under our supervision and by our direction, and to certify that they have been found correct.

We append Statements (1) of Receipts and Expenditure during the year under audit, and (2) of Assets and Liabilities on the 31st March 1894, as obtained from your books.

We have also to invite your attention to some apparent irregularities of procedure, as detailed in the accompanying note, and to suggest that they should be avoided in future.

We have the honour to be,

GENTLEMEN,

Your most obedient Servants,

G. E. MANISTY,
Offg. Accountant-General, Bengal.

Note on the accounts of the Commissioners for making improvements in the Port of Calcutta, for the year 1893-94.

In examining twelve establishment bills selected at random, the following irregularities were noticed. In Part VI, cash voucher No. 230 of January 1894, the pay of—

	Rs.	A.	P.
Jharoo Tindal	11	9	9
Issup Duftry	8	0	0
	19	9	9

has been debited against estimate No. 30-4, Tramway Contingencies.

This is not only erroneous classification, but a contravention of section 75 of the Calcutta Port Act, which requires distinct provision for salaries in the estimates.

Again, in the same bill the pay of two tindals have been included, viz.,—

	Rs.	A.	P.
Noorkur Tindal	11	9	9
Mader Bux	11	9	9
	23	3	6

but debited against Part VIII, Kidderpore Dock extra establishment for further expansion, without any such provision being made either under estimate No. 38 of the regular budget or in Appendix G, the supplementary budget for the Kidderpore Docks, dated 21st August 1893.

2. The same difficulty was experienced in examining the establishment bills this year as last, owing to the suggestion in paragraph 12 of the audit note of last year not having been acted on by your office.

3. The comparison between your budget estimates and the actuals for the year 1893-94 is as follows :—

Part I.—Jetties.

Expenditure.	Estimate.	Actual.	Excess of actual over estimate.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	26,369	26,917	548
Working expenses	1,57,112	1,60,234	3,122
			3,670

The excess of Rs. 3,670 was, however, more than met from savings under other heads.

4. *Part II.—Inland Vessels' Wharves.*

Expenditure.	Estimate.	Actual.	Excess of actual over estimate.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	13,184	13,458	274
Repairs	37,800	38,582	782
Seebpore Chur Lands ...	5,700	8,409	2,709
Renewal and improvements ..	.....	8,000	8,000
Gross excess	.....	.....	11,765

This gross excess of Rs. 11,765 was only partly met from savings under other heads to the extent of Rs. 7,011, leaving a nett excess of Rs. 4,754, as follows:—

	Rs.
Total expenditure, actual	3,90,564
Ditto, estimated...	3,85,810
Nett excess of expenditure over the budget estimate ...	4,754

Out of the Rs. 7,011 savings under other heads, Rs. 6,300 is due to savings under the following heads:—

	Estimate.	Actual.	Excess.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of dredger expenses ...	17,690	15,353	2,337
Salaries	57,732	55,182	2,550
Working expenses	8,440	7,027	1,413
			6,300

5. *Part III.—Strand Bank Lands.*

	Estimate.	Actual.	Excess of actual over estimate.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	6,592	6,729	137
Municipal taxes	16,637	16,937	300
Insurance	41	88	47
			484

This excess of Rs. 484 was, however, more than met from savings under other heads.

6. *Part IV.—Harbour Masters' Department.*

Expenditure.	Estimate.	Actual.	Excess of actual over estimate.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	26,368	26,917	549
Salaries and working expenses *Hetty.*	4,320	7,819	3,499
Depreciation on block ...	34,890	55,110	20,220
Salaries	1,82,536	1,82,902	366
Pensions	15,500	16,798	1,298
Renewal and improvements ...	.....	21,000	21,000
Gross excess ...	.....	.....	46,932

This gross excess of Rs. 46,932 was only partly met from savings under other heads to the extent of Rs. 25,413, leaving a nett excess of Rs. 21,519, as follows:—

	Rs.
Total expenditure—	
Actual	5,34,871
Estimated	5,13,352
Nett excess of expenditure over the budget estimate ...	21,519

Out of the total of Rs 25,413 (savings under other heads), Rs. 25,148 is due to reduced expenditure under the following heads:—

	Estimate.	Actual.	Excess.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of working expenses and repairs to dredgers.	17,690	15,353	2,337
Proportion of municipal taxes and repairs to officers' quarters.	3,336	2,468	868
River Police establishment ...	41,586	27,139	14,447
Repairs to boats, vessels, &c. ...	34,800	31,242	3,558
Working expenses	35,044	32,084	2,960
Establishment for licensing boats	11,484	10,506	978
Estimates in excess of the amounts actually spent.	.....	.....	25,148

7. *Part VI.—Tramway.*

Expenditure.	Estimate.	Actual.	Excess.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	6,592	6,729	137
Working expenses	74,743	82,527	7,784
Gross excess ...	.....	.....	7,921

This gross excess of Rs. 7,921 was only partly met from savings under other heads to the extent of Rs. 1,249, leaving a nett excess of Rs. 6,672, as follows:—

	Rs.
Total expenditure—	
Actual	2,42,354
Estimated	2,35,682
Nett excess of expenditure over the budget estimate ...	6,672

8. *Part VII.—Port approaches.*

Expenditure.	Estimate.	Actual.	Excess.
1	2	3	4
	Rs.	Rs.	Rs.
Proportion of salaries—Control ...	13,184	13,458	274

Working expenses	2,83,610	3,18,863	35,253
Deposit of special toll ...	.....	3,373	3,373
Gross excess ...	.....	.....	43,969

This gross excess of Rs. 43,969 was only partly met from savings under other heads to the extent of Rs. 6,343 leaving a nett excess of Rs. 37,626, as follows:—

Total Expenditure—

	Rs.
Actual	16,07,502
Estimated	15,69,876
Nett excess of expenditure over the budget estimate ...	37,626

No supplementary estimates allotting funds to cover the above-noted excesses appear to have been submitted to Government for sanction. In this connection we would invite your special attention to the provisions of sections 69 to 74 regarding the preparation of original and supplementary estimates, and report to Government when expenditure exceeding any budget estimate by more than Rs. 5,000 is made in cases of pressing emergency, and would point out that it is incumbent on the Commissioners to strictly follow these directions.

G. E. Manisty,
Offg. Accountant-General, Bengal.

J. E. Robertson,
Examiner of Local Accounts.

Note.—Excess expenditure subsequently sanctioned by Government under section 72 of Act III of 1890.

Published under the provisions of section 76 of Act III of 1890.

AUDITORS' REPORT ON HOOGHLY BRIDGE ACCOUNTS FOR THE YEAR ENDING 31ST MARCH 1894.

No. $\frac{\text{L. A.}}{254}$.

FROM

THE AUDITORS OF THE ACCOUNTS OF THE COMMISSIONERS OF THE HOWRAH BRIDGE,

To

THE COMMISSIONERS OF THE HOWRAH BRIDGE, CALCUTTA.

Dated Calcutta, the 3rd September 1894.

GENTLEMEN,

WE have the honour to report that the accounts of the Howrah Bridge for the year ending 31st March 1894 have been audited under our supervision and by our direction, and to certify that they have been found correct.

We append statements of (1) Income and Expenditure during the year under audit, and (2) Assets and Liabilities on the 31st March 1894, as obtained from your books.

A note is added comparing the receipts and expenditure with the estimates for the year.

We have the honour to be,

GENTLEMEN,

Your most obedient servants,

G. E. MANISTY,

Offg. Accountant-General, Bengal.

J. A. ROBERTSON,

Examiner of Local Accounts.

The 2nd August 1894.

Note on the accounts of the Howrah Bridge for the year 1893-94.

THE comparison between the budget estimates and the actual receipts and expenditure is as follows :—

Receipts.

PARTICULARS.	Estimate for 1893-94.	Actuals for 1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs. A. P.	Rs. A. P.	Rs.
Receipts from Railway traffic	1,23,000	1,24,638 9 0	1,638 9 0	.....
Earnings of Howrah Bridge steamer *Helvetia* ...	50	64 0 0	14 0 0	.....
Proportion of earnings of steam-tug *Hetty* ...	9,000	5,625 0 0	.....	3,375
Interest on Government securities for Reserve Fund.	24,000	24,404 0 0	404 0 0	.....
Salaries	Nil	490 9 10	490 9 10	.....
Interest on Government securities for Pontoon Reserve Fund.	Nil	2,000 0 0	2,000 0 0	.....
	.....	.....	4,542 2 10	3,375

		Rs. A. P.
Increase		4,542 2 10
Decrease		3,375 0 0
	Nett increase ...	1,167 2 10

thus showing a nett increase of actuals over estimates of Rs. 1,167-2-10.

Expenditure.

PARTICULARS.	Estimate of 1893-94.	Actuals for 1893-94.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs. A P.	Rs. A. P.	Rs. A. P.
Proportion of control establishments ...	13,184	13,458 13 7	274 13 7	.....
Proportion of interest and sinking fund on Trust loan	10,856	10,855 12 0	.....	0 4 0
Proportion of municipal taxes and repairs to officers' quarters	1,334	987 4 11	.....	346 11 1
Proportion of municipal taxes, Dockyard ...	6,427	6,272 15 2	.....	154 0 10
Proportion of establishment of steam-tug *Hetty*	12,960	5,072 12 5	.....	7,887 3 7
Salaries of establishment	32,489	31,418 8 10	.....	1,070 7 2
Working expenses	17,808	21,556 0 2	3,748 0 2	.....
Repairs	38,200	38,735 14 4	535 14 4	.....
Establishment of ferry steamer *Buckland* ...	18,368	15,357 14 3	.....	3,010 1 9
Renewals	1,200	Nil	.....	1,200 0 0
Municipal taxes on quarters for Howrah Bridge Police	478	164 3 6	.....	313 12 6
	.....	.....	4,558 12 1	13,982 8 11

		Rs. A. P.
Decrease		13,982 8 11
Increase		4,558 12 1
	Net decrease ...	9,423 12 10

thus showing a net decrease of actuals under estimates of Rs. 9,423-12-10.

In last year's report it was pointed out that sections 21 and 23 of Act IX of 1871 prohibited the expenditure of money in excess of the estimates without obtaining the sanction of Government to a supplementary estimate. We would now draw your attention to the fact that a similar procedure appears to be necessary when the provision is exceeded

under any of the heads shown in the form of budget prescribed by the Lieutenant-Governor under section 19, even though there may be saving on the total of the budget estimates.

In auditing the establishment bills it was noticed that stamped receipts had not been taken from the payees in the following cases :—

Cash voucher No. 1670 of September 1893—

			Rs.
Pay of Deen Khan, serang	...	...	22
„ Munshi, stoker	...	...	30
„ Maithuzuddy, fireman	...	...	22

RESOLUTION REVIEWING THE REPORTS OF COMMISSIONERS OF DIVISIONS ON THE WORKING OF DISTRICT AND LOCAL BOARDS IN BENGAL DURING 1893-94

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERNMENT.

Calcutta, the 26th November 1894.

RESOLUTION No. 5497L.S-G.

READ—

The Reports from the several Commissioners of Divisions on the working of District Boards in Bengal during the year 1893-94.

Read again—

The Resolution reviewing the Divisional Reports on the working of District Boards in Bengal during the year 1892-93.

The date fixed for the submission of Divisional Reports to Government is the 31st July. The Lieutenant-Governor notes with satisfaction that this year all the reports were received within a week of that date, except two, which were respectively eleven and twenty days late. This result is a considerable improvement on the experience of some previous years.

2. The number of District Boards in existence during 1893-94 remained the same as in previous years. The extension of the Bengal Local Self-Government Act to Darjeeling and to the districts of the Chota Nagpur Division, where now the Cess Act of 1880 only is in force, was under consideration during the year, but after perusing the reports and opinions of local officers on the subject,

the Lieutenant-Governor decided that, for the present at least, it was inadvisable to extend the Act to those districts. The area under District Boards, therefore, remained unchanged, except for some trifling variations in the figures for Faridpur and for some of the districts in the Burdwan Division; these are due in the former case to a mistake in last year's figures, while in the latter the explanation required by Government has not been given. The number of Local Boards was reduced during the current year from 104 to 102 by the abolition of the sub-divisions, and with them the Local Boards at Barrackpore and Dum-Dum: the area formerly under these two Local Boards was added to the jurisdiction of Barasat.

3. *Constitution of District Boards.*—The number of members of District Boards amounted to 794, or one greater than in the previous year. Of this number 171 were appointed *ex-officio*, 314 were nominated, and 309 were elected by Local Boards. To take another classification, 242 were officials and 552 non-officials; and again, 200 were Europeans and Eurasians and 594 were natives of the country. The variations from the previous year are slight and call for no special comment. In every district the District Magistrate was reappointed Chairman of the Board.

4. During the year 622 meetings were summoned—a number two less than in 1892-93. The District Board of Bhagalpur was convened twenty-five times, the largest number attained by any Board in any year since the Act was introduced. In Darbhanga twenty-four meetings were held, and in Gaya, Champaran, Jessore, Backergunge, Dinajpur, and Puri the number reached twenty or more. In Monghyr, Bankura, and Midnapore there was less than one meeting a month. The Chairman of the Monghyr District Board urges, in explanation of these infrequent meetings, that the Board is purely a consultative body, and as such relies almost entirely on its Chairman. He adds that local self-government is not cared for in the district, and that all the work could have been done as well in an even smaller number of meetings. It is no doubt true that in the Bihar districts so much interest is not taken in matters of local self-government as in the Bengali-speaking districts; but having regard to the very considerable sum annually disbursed by the Monghyr District Board, and to the fact that in the neighbouring and similar districts of Darbhanga and Bhagalpur there was enough business to lay before a large number of meetings, the Lieutenant-Governor cannot altogether accept the Chairman's contention. The Local Self-Government Act was not intended merely to facilitate the spending of money by the Chairman, but to insure its expenditure in the most advantageous manner after consultation with the Board, and the Chairman who fails to associate his Board with himself as far as possible in the administration of the affairs of the district, does not carry out the intentions of the Act, and voluntarily deprives himself of assistance which he is entitled to receive. The Lieutenant-Governor does not advocate the holding of a large number of meetings merely for their own sake, but he desires that business should not be delayed through neglect to hold a meeting, and that every opportunity should be given for the discussion of matters of importance and proposals for new expenditure; if this is done—in ordinary circumstances one meeting a month should suffice for the purpose—nothing is gained by more frequent gatherings.

5. The number of meetings that had to be adjourned, together with those that were entirely abortive owing to the absence of a quorum, amounted to 94—a considerable improvement on the record of the previous year; but even so, these failures were far too frequent in several districts, as the statement in the margin shows. Every effort should be made to avoid the great delay in the despatch of business, and the waste of labour involved by these unproductive meetings. The inconvenience which they cause is well illustrated by the proceedings of a certain District Board in the matter of a Steam Tramway. It was necessary to obtain the sanction of the District Board to a change in the site of the Terminus: application was made by the Company at the end of August 1893, and a special meeting of the District Board was called to consider the matter, but it was not until the 9th of March 1894, after several unsuccessful attempts

District.	Number of abortive and adjourned meetings.
Cuttack ...	... 9
Bhagalpur ...	... 9
Puri ...	... 6
Dinajpur ...	... 6
Jessore ...	... 5
Mymensingh	... 5
Tippera ...	... 5
Champaran ...	... 5
Malda ...	... 5

to obtain a quorum, that the matter was disposed of: the completion of the whole project was thus delayed for seven months.

6. On an average 9·8 members, or 46·9 per cent. of the total number, were present at each meeting. This is a slight improvement on the figures for 1892-93. The attendance was worst at Monghyr, Bhagalpur, and Dinajpur, where more than two-thirds of the members were usually absent. In several instances the prolonged absence of some of the members from the district is put forward as an excuse for the low average attendance. When a member is about to leave the district for any length of time, the Chairman, in order to avoid detriment to the public service, should be careful to obtain his resignation before his departure; but if this is impossible, it should be considered in each case whether his name should not be reported to Government for action under section 18 of the Act, which empowers the Lieutenant-Governor to remove from the Board any person who, owing to absence from the district or from any other cause, has become incapable of acting.

7. The Commissioners of the Presidency and Chittagong Divisions point out that, apart from general meetings, very much good work is done in their Divisions by the Standing Committees for Finance, Education, and other branches of the administration. The Lieutenant-Governor desires cordially to acknowledge the usefulness of these committees, and the value of the work which they do: and he has no doubt that, though no reference is made to them in the reports of other Commissioners except in regard to Monghyr and the districts of Orissa, the system is being successfully worked elsewhere. The Commissioner of Orissa reports that in Balasore and Puri the sub-committees of the Boards are doing good work, but that in Cuttack the meetings are few, the attendance bad, and the members apathetic. The Lieutenant-Governor was constrained, in the Resolution for 1892-93, to notice unfavourably in some respects the work of the Cuttack District Board, but he is glad to find from papers recently laid before him that a sensible improvement has taken place of late.

8. *Constitution of Local Boards.*—The 102 Local Boards comprised 1,222 members, or eight less than in the previous year; of these 46 were *ex-officio* members, 741 were nominated, and 435 elected. There were 151 officials and 1,071 non-officials on the Boards, and dividing them by race, 114 members were Europeans or Eurasians, and the rest 1,108 natives of this country.

9. There was a noticeable improvement in the activity of Local Boards; 1,113 meetings were held, a total which is higher by 65 than that for 1892-93; of these meetings 164, as compared with 197 in the previous year, had to be adjourned or proved abortive from want of a quorum. The attendance of members, both official and non-official, also showed an improvement, the figures for the two years being as follows:—

Year.	Average attendance.			Av perc of atte
	Official.	Non-official.	Total.	
1	2	3	4	
1892-93	·77	4·46	5·24	44·4
1893-94	·9	4·6	5·5	45·9

Thirty-three Local Boards, as against twenty-six in the previous year, held more than 12 meetings, the Sadar Local Board at Howrah heading the list with 22 meetings, none of which were abortive or adjourned. Only three Local Boards, viz., Basirhat, Naugaon, and Khurda, held so few as four meetings or less during the year: in 1892-93 six Local Boards attained this unenviable distinction.

10. *Elections.*—General elections were held only in Mymensingh and Backergunge. In Mymensingh no general interest was aroused: in eleven out of the eighteen thanas the attendance was less than 15 per cent., and nowhere did it reach one-third of the number of qualified voters. In Backergunge more interest was shown; the elections nowhere failed for lack of voters,

and at Matbaria, under the Pirojpur Local Board, 44·8 of the electors recorded their votes. Bye-elections were held in some other districts, but they call for no special comment.

11. *Occupations of members of District and Local Boards.*—As there have been general elections in few districts, the occupations of the members of District and Local Boards show but little change. The figures for this year are as follows:—

	Government servants.		Zamindars, &c.		Pleaders and mukhtears.		Planters.		Missionaries.		Government pensioners.		Other classes.		Total number of members.
	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
District Boards	240	30·24	237	29·84	182	22·92	66	8·31	9	1·13	15	1·89	45	5·67	794
Local Boards	150	12·27	541	44·27	327	26·76	57	4·66	3	·25	15	1·23	129	10·56	1,222

12. *Powers of Local Boards.*—The powers now exercised by Local Boards may be shortly summarized thus:—

i. *Village roads.*—All Local Boards are entrusted with the care of village roads. In the Midnapore district they have been again made over to the Local Boards as recommended in last year's Resolution.

ii. *Pounds.*—All Local Boards have charge of pounds except the Sadar Local Boards of Monghyr and Purnea, and all the Local Boards in the districts of Birbhum, Bankura, Murshidabad, Faridpur, and Patna.

iii. *Ferries.*—All Local Boards have charge of ferries except those in the districts of Birbhum, Bankura, 24-Parganas, Murshidabad, Dacca, Faridpur, and Cuttack, and those in the Divisions of Bhagalpur and Patna, with the single exception of the Local Board of Jahanabad in Gaya.

iv. *Primary education.* Powers in regard to this branch of administration are exercised by the Local Boards in the districts of Burdwan, Bankura, Hooghly, Nadia, Murshidabad, Jessore, Rajshahi, Pabna, Mymensingh, Arrah, and by the Local Boards in the Orissa Division. Certain modified powers are also possessed by the Local Boards in the districts of Khulna, Patna, and Darbhanga.

Dispensaries are under the charge of Local Boards in the districts of Nadia, Bhagalpur, Purnea, and Balasore; also of the Local Boards of Arraria in Purnea, of Jamalpur and Kishoreganj in Mymensingh, and of Bhola in Backergunge. The Gaya Local Boards also have some modified powers over dispensaries.

vi *Sanitation.*—In Dacca, Faridpur, and Mymensingh the care of village wells and tanks has been entrusted to Local Boards, and so has the sanitation of a local fair in the latter district. The Local Boards of Shahabad and Monghyr have charge of village sanitation.

vii. *District roads* are entrusted to the Local Board only in the Pabna district and at Bhadrak in Balasore; the question of the control of the district roads in Pabna has been separately submitted to Government for orders and is now under consideration.

viii. *Secondary education.*—In the Resolution on Local Self-Government for 1891-92, and again in that for 1892 93, the Lieutenant-Governor intimated his decided opinion that Local Boards should have no concern with secondary education, and in the recent Resolution on the Report of the Director of Public Instruction for 1893-94 he has reiterated that conviction. He is therefore glad to observe that in compliance with the views expressed in paragraph 10 of the Resolution of 1891-92, the Local Boards of Cuttack, Puri, Balasore, Nadia, and Jessore were relieved of all connection with secondary education, and that only in two districts of these provinces, viz., Burdwan and Shahabad, Local Boards have any concern with secondary education. It may be argued that to the exercise of purely mechanical functions in this regard

there can be no reason to object, but Sir Charles Elliott would be glad to hear that even this connection had been severed, and that the control of secondary education throughout the province remained everywhere with District and not with Local Boards.

Changes other than that just noticed were but few. The powers of the Local Boards were increased in Patna and Darbhanga by the delegation of certain duties relating to primary schools; in Shahabad by making over to them the charge of pounds; and in Tippera by the grant of certain powers relating to pounds, ferries and public works. The Local Boards of Nadia were relieved of the charge of unmetalled district roads.

13. The remarks of Chairmen as to the manner in which these powers have been exercised are generally somewhat colourless. Mr. Allen, the Chairman of the Midnapore District Board, thinks that the grants for village roads are not properly managed: he writes that money is generally wasted on village roads unless the operations are controlled by the District Engineer, and that the Boards maintain a greater length of road than they can afford to keep in repair, or than the District Engineer can effectively supervise. The remedy is obvious, and the Lieutenant-Governor trusts that, if further enquiry confirms the view held by the Chairman, steps will be taken during the current year to reduce the number of village roads. In Howrah the Local Boards are reported to have worked intelligently and to have taken considerable interest in their work. The Presidency Commissioner complains that the Local Boards generally show apathy in regard to pounds and are especially negligent in making collections. The Jessore Local Boards are said to have discharged their duties with a fair amount of diligence and success, and similar terms of faint praise are used in reference to the work of Local Boards in Birbhum, Rajshahi, Rangpur, Dacca, Mymensingh, Backergunge, Cuttack, Balasore, and Puri. The Chairman of Mymensingh (Mr. Earle), on the other hand, makes special mention of the success of the Tangail Local Board under the chairmanship of a local talukdar, who is also an Assistant Surgeon. The Chairman of the Pabna District Board comments on the disadvantages of giving to the Local Boards such wide powers as they enjoy in this district which include the charge of all District Roads. The objections to the system are patent to all, and the matter has since been laid before Government with suggestions for having these powers curtailed.

14. *Union Committees.*—No village unions were established during the year, and there are none as yet existing in the Province. In accordance with the directions of the Government of India, steps were taken after the close of the year for their establishment experimentally in selected areas of the Burdwan, Presidency and Dacca Divisions, and it is expected that they will be inaugurated in a tentative manner before the close of the current year. The lines on which action is being taken were fully set forth in the Resolution of this Government, No. 3600L.S.-G., dated the 1st September 1894, which was published at the time in the *Calcutta Gazette*, and the subject needs no further notice here.

15. The following statement shows the income and expenditure of District Boards under the various heads in 1892-93 and 1893-94:—

INCOME.

	1892-93.	1893-94.
	Rs.	Rs.
I.—Land Revenue	66,249	1,18,273
VI.—Provincial rates	36,27,676	35,97,417
XII.—Interest	666	674
XVII.—Police (including pounds)	4,57,159	4,50,009
XIX.—Education	62,761	45,561
XX.—Medical	17,095	14,015
XXI.—Scientific and other Minor Departments ...	3,631	4,689
XXII.—Receipts in aid of superannuation and compassionate allowances	Nil	638
XXV.—Miscellaneous	1,61,812	1,31,080
XXX.—Irrigation—Minor Works and Navigation	286	225
XXXII.—Civil Works (including ferries) ...	4,44,518	4,29,987
Contributions	11,63,815	11,94,990
Debt	11,88,137	6,97,994
Total ...	71,93,805	66,85,552

EXPENDITURE.

	1892-93.	1893-94.
	Rs.	Rs.
1.—Refunds	403	31
18.—Administration	2,98,983	2,98,493
20.—Police (pounds)	35,235	27,475
22.—Education	10,54,477	10,83,144
24.—Medical	96,420	1,29,911
26.—Scientific and other Minor Departments	8,579	7,082
29.—Superannuation allowances and pensions	3,530	5,217
30.—Stationery and printing	50,022	45,446
32.—Miscellaneous	55,390	63,644
33.—Famine relief	2,86,713	2,649
41.—Railways	Nil	358
43.—Minor works and navigation ...	12,302	10,257
45.—Civil works	42,88,747	43,22,384
Contributions	12,370	4,196
Debt	8,12,821	6,99,726
Interest on debt	7,758	10,282
Total ...	70,23,750	67,10,295

16. *Credit balance.*—The year 1892-93 closed with a credit balance of Rs. 17,63,217, which was reduced to Rs. 17,38,474 by the close of 1893-94. The closing balances amounted to more than one-third of the year's income in Hooghly, Bogra, Saran, Monghyr and all three districts of the Chittagong Division. Steps should be taken for their reduction, unless there are particular reasons for retaining a large balance. The Commissioner should look into the matter in each case.

INCOME.

17. *Land Revenue.*—The receipts under this head show an increase from Rs. 66,249 to Rs. 1,18,273, which is partly due to an increase of Rs. 18,232 under the head of Fees, Fines, and Forfeitures, but mainly to the fact that recoveries from defaulters on account of the cost of collecting road cess arrears have in several districts been shown under this head for the first time instead of under "Miscellaneous." There are no receipts in Bengal which should properly be credited under the head of Land Revenue in Local accounts; recoveries of the cost of collecting road cess arrears should be shown under heading XXV—"Miscellaneous"—as directed in the Accountant-General's Circular No. 10 of the 15th January 1891, receipts from canals under "Irrigation," and so on. If any doubt arises in future as to how any items hitherto shown under Land Revenue ought to be credited, a reference should be made to the Accountant-General.

18. *Provincial rates* (*Rs.* 35,97,417).—This item of revenue represents the proceeds of the road cess less the cost of collection and revaluation. District Boards have nothing to do with the collection of the cess, which is in the hands of the Collector, and the subject is treated in a separate Resolution. The total receipts showed a decrease of Rs. 30,259, which is generally ascribed by local officers to there having been smaller arrears to deal with, and also to the collections having been indifferent. The District Boards of Gaya and Muzaffarpur suffered most loss, their incomes from this source being respectively Rs. 41,500 and Rs. 29,851 less than in the previous year. In Saran, Shahabad, and Tippera the receipts were at least Rs. 10,000 less than in 1892-93, while on the other hand in Champaran, Backergunge, Midnapore, and Nadia there was considerable improvement in each case, that in Backergunge (Rs. 20,312) being due to the District Board having enhanced the rate at which the Road cess was levied.

19. *Pounds* (*Rs.* 4,50,009).—The number of pounds increased from 3,389 to 3,456, but not only did the receipts not increase, but they actually decreased to the extent of Rs. 7,150. This falling off is variously ascribed to bad seasons, to floods, to indifferent collections and similar causes, and it has been urged that the use of the new pound forms and the more numerous inspections now made have deterred the old class of farmers from taking leases. These suggestions no doubt partly explain the decrease; but it is also certain that, though the revenue under this head is elastic, there is a point beyond which any increase in the number of pounds, except by very gradual stages, ceases to be profitable, and care should be taken in each district that this point is not exceeded. Not only does a new pound often realize but little during the first few years of its existence, but

it lowers the prices obtained at auction of the old pounds in the neighbourhood, because it is uncertain to what extent their fees will be affected. The sudden increase of 27 pounds in the Muzaffarpur district, where 157 already existed, no doubt explains in a great measure the low collections realized there, which are the subject of comment by the Commissioner of Patna.

20. The number of pounds in any given area varies very much from district to district: in Puri there is one pound to every 107 square miles, and in Patna one to every 66, while in Muzaffarpur there is one to every 16 square miles, and in Burdwan one to every 14. Such variations depend greatly on the practice of former years, and on local conditions, especially whether a resort to the pounds is customary with the people, and where the farming system is in force the fact that the number of pounds is large does not necessarily cause the average profit of each to be small, provided that there are no sudden increases or sudden reductions in the number of pounds. All the pounds in the Saran district were for the first time let out in farm in 1893-94, and the consequence has been an increase in the net profit from Rs. 306 in 1892-93 to Rs. 3,645 in 1893-94: this result justifies the change of system from direct management to farming. The Commissioner of Orissa reports that the District Board of Cuttack have resolved to adopt the farming system from the commencement of the current year. The system of direct management now survives only in Champaran, where its success would seem to warrant its continuance, and in a few pounds in Shahabad.

21. The Commissioner of the Presidency Division writes strongly on the subject of the large arrears, amounting to Rs. 72,017, due from the farmers of pounds in that Division. He writes:—

"The very heavy arrear demands outstanding show that, as a whole, the administration of pounds is very indifferently looked after by the Local Boards * * * * If it were not necessary to give them some work to justify their existence, I would gladly see pounds taken away from them."

He suggests that a column be added to Appendix A to show the balance outstanding at the close of the year, and the Lieutenant-Governor is pleased to approve of the suggestion. That these large arrears should have been allowed to accumulate shows very serious mismanagement. It may be partly due to the fact stated by Mr. Garrett, Chairman of the Nadia District Board, that the farmers in that district come from the lowest class of society; but it is not understood why this should be the case. The Lieutenant-Governor has recommended that the leases should be granted 'to persons of known position and solvency residing in the neighbourhood of the pound,' and this should be done, even though it be necessary in some cases to accept lower rents. Moreover, if the deposit of one quarter's rent in advance had been insisted on, such a state of affairs could hardly have arisen. The Commissioner will be requested to submit a special report showing what measures have been taken to wipe off the arrears.

22. The new pound forms prescribed in Government circular No. 3T.M., dated the 22nd May 1893, had been introduced in only a few districts before the close of the year under report: it is hoped that no further delay will be allowed to occur in the adoption of them. It is as yet too early to judge how far they have proved successful, but there is a tendency among local officers to regard them as too elaborate. Possibly their effect will be in some cases to preclude illiterate persons from accepting leases of pounds, but an illiterate pound-keeper is an anachronism, and his exclusion is a matter of congratulation, even at the possible loss of some revenue. The reports generally afford little information as to how far the orders of Government have been observed, which direct that the lessees should be persons of known position and solvency, that they should deposit one quarter's rent in advance, and that, if possible, the leases should be of three years' duration. The allusions to the subject, so far as they go, appear to show that hardly sufficient attention has been paid to these matters. Commissioners of Divisions are requested to state in the report for the current year how far the wishes of the Lieutenant-Governor on the point have been carried out. Inspections of the pounds are generally reported to have been effected as directed in Government circular No. 42L.S.-G., dated 1st December 1892, by District and Subdivisional Officers, by Chairmen and Vice-Chairmen of Local and District Boards, by Sub-Inspectors of Schools, and in some cases by special Pound Inspectors. In

Bhagalpur, however, it appears that inspections were made by the subordinate executive officers of the District and Local Boards. It is not clearly stated what officers are meant, but the Lieutenant-Governor views with disapproval the inspection of pounds by subordinate officials, for any such inspection will at once preclude 'persons of known position' from becoming pound-keepers: the practice should therefore be stopped. No abuses or acts of oppression by pound-keepers are reported. In Champaran embezzlements by some pound-keepers, paid servants of the District Board, were discovered, and the delinquents were prosecuted and punished.

23. *Education.*—The receipts under this head fell from Rs. 62,761 in 1892-93 to Rs. 45,561 in 1893-94. The receipts from school-fees proper were almost the same as in the previous year, save for small increases amounting to Rs. 508 and Rs. 440 respectively in the Burdwan and Patna Divisions. But there was a considerable falling off under the heads of Contributions and Miscellaneous; the former naturally varies from year to year with the impulses of the benevolent, no such gift, for instance, having been made in 1893-94 as the Rs. 11,000 contributed by Babu Jogendra Kishore Rai Chowdhury of Mymensingh, in the previous year. The Miscellaneous head was swelled in 1892-93 by refunds received from Government on account of the pension contribution of education officers.

24. *Medical.*—The income under this head consists of contributions by private persons to dispensaries and hospitals, and a few trifling miscellaneous receipts. The total income for 1892-93 was Rs. 17,095, and for 1893-94 it amounted to Rs. 14,015. The receipts in 1892-93 were unusually large owing to a special gift of Rs. 5,178 to the Bogra District Board for building dispensaries.

25. *Scientific and other Minor Departments.*—Rupees 4,689, the receipts come from fees for latrines at Sonepur fair, and contributions by zamindars for the sanitation of fairs in the districts of the 24-Parganas, Saran, and Dacca. They are slightly larger than in the previous year.

26. *Miscellaneous.*—The receipts credited under this head fell from Rs. 1,61,812 in 1892-93 to Rs. 1,31,080 in the year under report. An examination of the sub-heads shows that there was an increase of Rs. 2,088 in the receipts from staging bungalows, which was shared by all Divisions except Burdwan. Sarai fees also increased, receipts under this head being shown to the amount of Rs. 1,638 in Midnapore, and Rs. 637 in Balasore, against nothing in the previous year.

27. There is a considerable decrease under the sub-head "Miscellaneous, including fees, fines and forfeitures," but it is impossible to say to what extent this is actual, and to what extent due to the fact that recoveries on account of the cost of arrears of road cess have been shown under Land Revenue instead of under this head. As stated above in paragraph 17, the Accountant-General has now given clear directions that these recoveries should be credited under the head of miscellaneous, and the Lieutenant-Governor trusts that there will be no further confusion in regard to them.

28. *Civil works including ferries.*—Looking only to the figures in column 66 of Form No. II attached to this Resolution, there would appear to have been an enormous increase during the year 1893-94 in the income under this head, viz. from Rs. 4,44,518 to Rs. 11,45,828. The increase, however, is due to the inclusion for the first time in column 63 of all sums contributed for special and definite purposes, whether by Government or by individuals. It has hitherto been the practice to show as contributions in column 67 of Statement No. II the total of all sums received from Government by District Boards, whether as grants for special purposes or as the contributions payable from Provincial Funds year by year in order to maintain equilibrium between the receipts from and the expenditure on those branches of the administration which were made over to District Boards in 1888. The result is frequently misleading, and the figures afford little information. The Lieutenant-Governor is pleased therefore to decide that in future all sums granted for the execution of particular works to be carried out by local officers shall be entered in column 63, column 67 being thus left to those contributions which are yearly allotted to produce equilibrium. Details of the sums originally entered for 1893-94 in column 67 having been obtained from all local officers, except those of the Dacca Division, the figures in columns 63 and 67 of Statement No. II have been corrected in accordance with the principles stated above. The sums

ranted in each district for these special purposes during 1893-94 are shown elow:—

		Rs.			Rs.
Burdwan	...	59,710	Brought forward	...	4,30,412
Birbhum	...	4,826	Mymensingh	...	32,980
Bankura	...	20,006	Faridpur ...	...	20,505
Hooghly	...	48,125	Backerganj	...	45,197
24-Parganas	...	74,559	Tippera ...	...	24,890
Jessore	...	53,285	Noakhali ...	...	15,701
Khulna	...	153	Chittagong	...	31,658
Rajshahi	...	17,793	Patna ..	...	5,000
Dinajpur	...	8,846	Gaya ...	..	20,000
Jalpaiguri	...	46,315	Monghyr ...	...	13,002
Rangpur	...	17,693	Bhagalpur ...	...	53,218
Bogra	...	1,671	Purnea ..	...	5,455
Pabna	...	27,940	Malda ...	...	16,697
Dacca	...	49,490	Cuttack ...	...	1,126
Carried over		4,30,412	Total		7,15,841

Of this sum, Rs. 1,35,968 represent grants made year after year to District Boards for the maintenance and repairs of the Imperial and Provincial Public Works buildings entrusted to the charge of those bodies, and Rs. 13,600, the allowance to District Engineers for the supervision of these works. A large sum is absorbed by special grants for the repair, construction and maintenance of particular roads, of which the most important are the following: Rs. 41,522 granted to the District Board of Jessore for the maintenance of the Calcutta-Jessore Road, Rs. 20,000 to that of Gaya for the maintenance of the Grand Trunk Road from Ballua-Chatti to Barun-on-Sone. These are annual grants, but there was also a grant of Rs. 10,000 to the District Board of Jalpaiguri for the repair of the Nagarcotta Road, and a grant of Rs. 21,881 to the District Board of Bhagalpur for the recoupment of expenditure incurred on relief works in excess of budget provision. The total also includes grants made for other specific purposes, such as the repair and construction of Court-houses, Sub-divisional offices, Munsifees, jail buildings, police-stations, circuit-houses, &c., &c.

29. The receipts from ferries (Rs. 3,83,158) show a satisfactory increase of Rs. 14,741. In the Presidency Division there was an improvement in every district except the 24-Parganas, which is ascribed to better settlements and more punctual collections. In the 24-Parganas there was a falling off of Rs. 1,895 due, it is said, partly to the receipts of 1892-93 having included large arrears, and partly to resettlements of ferries having been made during the year under report at reduced rates. It is satisfactory to note that there were arrears of only Rs. 50 at the close of the year, and these have since been realized. In the Midnapore district there was an increase of nearly Rs. 4,000 in the collections owing to the realization of arrears, but the current demand was somewhat less than in the previous year. The increase in Howrah is nominal, arising from a considerable portion of the rents of 1892-93 having been credited in the year under report. The ferry over the Gaighatta khal in the Howrah district was resumed by Government, as it was silting up and the District Board could not afford to keep it open. There was a falling off in receipts in all the districts of the Rajshahi Division except Rangpur. In Jalpaiguri it amounted to Rs. 3,234, and was due to the reduction in the rent of the Paharpur ferry, necessitated by the opening of the Duars Railway. The receipts in the Dacca Division were much the same as in previous years, save for an increase of Rs. 3,480 in Mymensingh, due to the establishment of new ferries. In the Patna Division, on the other hand, there were considerable variations, resulting in a net increase of Rs. 3,961. In the Patna district itself the reduction of rents caused a loss of revenue amounting to Rs. 3,419, while in Muzaffarpur and Champaran the establishment of new ferries added more than Rs. 3,500 to the revenue of each District Board; and in Shahabad, owing to successful settlements, the receipts increased by Rs. 1,303. In the Monghyr district the ferries yielded Rs. 21,729 in the current year, as compared with Rs. 23,933 in 1892-93, the decrease being xplained by the fact that the East Indian Railway in April 1893 commenced running a steam ferry at Khagaria, and in consequence the lessee of the District Board ferry there relinquished his lease, which was resettled at a lower rent. In

Balasore and Puri the prospect of a large influx of pilgrims for the Naya Kalabar ceremony encouraged the farmers to bid higher for their ferries. In Cuttack an increase in receipts occurred, partly due to an adjustment of account, and partly caused by the payment by the Municipality of a share in the receipts of a ferry during the last two years.

30. In this connection the following remarks made by the Commissioner of Rajshahi in the General Administration Report of his Division, which have already been endorsed by the Lieutenant-Governor, are quoted below as deserving the special attention of District Boards:—

"I am not satisfied that sufficient attention is paid to the subject. Ferries are not as a rule served by platform boats or provided with suitable approaches, even where the revenues admit of such conveniences. The tendency is to look upon them too much as a means of raising revenue by taxing traffic, and too little as public works of primary importance."

The Lieutenant-Governor is inclined to think that in many districts the condition of the ferry boats, landing stages and approaches, and the conduct of the ferry farmers and their employés, receive too little attention. Overcharges are common, and many kinds of oppression are practised, although the Ferries Act supplies ample powers for the punishment of offenders, the reason doubtless being that the victims prefer to suffer rather than incur the loss of time and money which a complaint would involve. Definite arrangements should be made by every Magistrate and Chairman for the proper and unexpected inspection of the ferries from time to time for the strict execution of engagements and for the punishment of offenders.

31. *Contributions.*—Contributions amounted to Rs. 4,79,149 as explained in paragraph 28 above. Column 67 now shows only those contributions which are made by the Local Government to District Boards to produce equilibrium or for general purposes, and the figures will usually display few variations from year to year.

32. *Deposits and advances.*—Under this head are shown all sums deposited as security by ferry farmers, contractors and others, and also all recoveries and adjustments on account of advances made from the District Fund. The total reached Rs. 6,47,994, against Rs. 8,78,137 in 1892-93. The decrease was mainly in the districts of Bhagalpur, Muzaffarpur, and Darbhanga, and was due to the fact that the adjustments under this head in those districts in the year 1892-93 had been unusually large on account of advances made for famine relief works in 1891-92.

EXPENDITURE.

33. *Administration.*—Expenditure under this head fell from Rs. 2,98,983 in 1892-93 to Rs. 2,98,493. There was a small increase, amounting to Rs. 3,210, in the cost of office establishment, but except for the entertainment of an additional clerk and peon in Cuttack, there was no increase in numbers, and the increase in cost was due to the payment of annual increments of salary. Contingent expenditure was almost the same as in the previous year. The amount paid over to Government to cover the cost of the offices of Account, Control, and Audit was Rs. 3,738 less than in 1892-93, owing to Government having decided that receipts from deposits and advances should be excluded in calculating the income on which the percentage rate is charged.

34. *Pension and Provident Fund Rules.*—Sir Charles Elliott is glad to notice that a Provident Fund for the benefit of those employés whose whole service has been under District Boards has now been established in every district, and that Pension rules for the benefit of those who have been transferred from Government service, or from service under the Road Cess Committees, have been adopted in all districts except in Bankura, Jalpaiguri, Faridpur, Tippera, Chittagong, and Malda.

35. *Pounds.*—Expenditure on cattle-pounds amounted to Rs. 27,475, which was Rs. 7,760 less than in the previous year. The cost both of contingencies and establishment fell considerably, the decrease under the latter head being due to the introduction of the farming system into the Saran district, and to the abolition of Pound Inspectors in Midnapore, Pabna, Tippera, and Noakhali.

36. *Education.*—According to the figures in columns 17 to 28 of Statement III, which have been prescribed by the Government of India, the expenditure of District Boards on education amounted in the year under

report to Rs. 10,83,144, against Rs. 10,54,477 in the previous year. The district figures will be found in many cases to differ from those given in the special Appendix B, the preparation of which was prescribed by the Lieutenant-Governor in 1893. There are two reasons for the difference; first, the figures in statement III include the amounts of cheques drawn in 1893-94, but not cashed until after the close of the year, and exclude those which were drawn in 1892-93, but cashed in 1893-94: in Appendix B the contrary practice is followed; when cheques are drawn in one year and cashed in another, they are debited to the expenditure of the year in which payment was actually made. Secondly, Statement III excludes the amount of fees received on account of a school and again expended on the school without having been paid into the treasury: Appendix B shows these fees on both sides of the account.

District.	1892-93. Rs.	1893-94. Rs.
Bankura	30,115	29,992
Hooghly	37,708	37,004
24-Parganas	43,237	41,355
Nadia	29,667	28,407
Jessore	34,946	33,801
Rajshahi	22,410	20,839
Rangpur	45,336	44,550
Dacca	41,308	40,948
Faridpur	30,078	28,742
Chittagong	23,116	22,903
Pabna	26,394	25,062
Malda	14,870	14,275
Balasore	27,901	27,356

37. Taking first the figures shown in Statement III, there was an increase in the educational expenditure of all districts except those named in the margin. The difference was inconsiderable save in the 24-Parganas, Nadia, Jessore, Rajshahi, and Faridpur districts. The decrease in Rajshahi is not accounted for. That in the 24-Parganas is said to be due to the fact that the rewards earned by gurus had to be reduced by one-fourth owing to insufficiency of funds: that in Nadia is attributed partly to a reward bill that was due not having been paid during the year, and partly also to lack of funds. But as the District Board of the 24-Parganas closed the year with a balance of Rs. 52,238, and that of Nadia with Rs. 12,726, the explanation is not altogether satisfactory. In Jessore the explanation offered is that the number of pupils fell off owing to the scanty harvest, the high price of food, and the unhealthiness of the season. The falling off in Faridpur was in contingent charges only, and requires no special explanation.

38. Turning next to the figures of Appendix B, to which the Lieutenant-Governor attaches greater importance, as they in his opinion more fairly represent the actual facts, the abstract in the margin shows for the past two years the expenditure under the various sub-heads given in that statement. There is a noticeable increase of about Rs. 4,000 in the charges for the maintenance of special (*i.e.* industrial) schools due to the establishment of new schools of this class in Burdwan, Pabna, and Noakhali. In the expenditure on middle schools there has been an advance in the sums devoted to scholarships and a decrease in that for grants-in-aid. The decrease of about Rs. 30,000 in charges for maintenance, and the increase of nearly twice that amount in grants-in-aid to primary schools, appear. to be due to the District Boards of Bankura, Rajshahi, and Bogra having substituted the system of giving grants-in-aid for one of direct maintenance.

39. The following statement compares for the past two years the expenditure of each District Board on primary education and on education as a whole, and the percentage that the expenditure bears to the ordinary annual income. The figures will not agree entirely with those given in last year's Resolution, as some alteration has been made in the method of calculating the ordinary income of the Boards from which category have now been excluded all sums granted for

special
diture,

The alteration in the method of calcula ing ordinary income mentioned above, although it shows more clearly the real facts, makes it impossible to compare the figures of 1893-94 with those of the revious year. Speaking generally, the Lieutenant-Governor is glad to see that the figures of educational ex enditure now appear in a more favourable light, id although much of the increase is due to the revision o the method of calculation, there has in several districts en a real

advance in this direction. Of the seven districts which were unfavourably mentioned in last year's Resolution as having failed to spend 10 per cent. of their income on education, viz., Jalpaiguri, Gaya, Shahabad, Darbhanga, Muzaffarpur, Saran, and Bhagalpur, all show some improvement. In Jalpaiguri, Saran, and Bhagalpur the suggested minimum has already been attained, and the increase, it is hoped, may be taken as an earnest of a further advance in the current year. In Monghyr there is a satisfactory increase of nearly Rs. 5,000 in educational expenditure, and in Purnea there is also a considerable increase, but it is entirely on secondary education, the expenditure on primary education having actually decreased by Rs. 3,144.

40. The whole question of educational expenditure by District Boards, especially in regard to primary education, was reviewed by the Lieutenant-Governor during the current year, and the policy of Government was fully set forth in the Resolution No. 306T.M. of the 28th June 1894, which was published in the *Calcutta Gazette*. On the general question, therefore, it is only necessary to say in this place that the Lieutenant-Governor trusts that District Boards will cordially endeavour to carry out that policy, which he is convinced is likely to promote the best interests of the masses in this province. At the close of that Resolution the Lieutenant-Governor prescribed a form to show the details of expenditure on primary education, and the figures supplied accordingly in Appendix C demand a few words of comment. It appears unnecessary to examine district details: it will be enough if they are perused by the various District Boards with the object of ascertaining wherein their expenditure differs from that of neighbouring Boards under similar conditions, and wherein alterations and improvements are feasible. Taking the province as a whole, it will be seen that out of the total of Rs. 7,46,553 spent by District Boards on primary education in 1893-94, Rs. 4,65,500 or 62·35 of the whole were paid direct to the schools; Rs. 1,16,222 or 15·56 were expended on the salaries of Sub-Inspectors; and Rs. 82,896 or 11·10 per cent. on the remuneration of the subordinate inspecting agency, while Rs. 30,529 or 4·08 per cent. were devoted to examinations, prizes and rewards.

41. In regard to educational expenditure in Orissa, the Commissioner quotes with approval the following remarks of the Chairman of the Puri District Board:—

"The expansion of expenditure on education is regrettable. It has now encroached on the money that ought to be devoted to roads. When the next annual budget is framed, a very considerable reduction will have to be made."

The Commissioner adds—

"The remarks of the Chairman of the District Board have my entire concurrence * * *. There appears to be a tendency in all districts of Orissa similar to that observed at Puri, and the attention of the Boards has been directed to the subject. It cannot be said that in Orissa State aid to education is deficient, and indeed it appears necessary to redress the balance in favour of other objects."

These remarks appear to the Lieutenant-Governor to be of doubtful validity. The expenditure in Orissa appears to be almost entirely devoted to inspection and to primary education, and it is notorious that Orissa is more behind the rest of Bengal in education than in any other respect. It is extremely difficult to draw the line with complete wisdom between the different objects which demand the attention of District Boards, and His Honour would be unwilling that any official pressure should be placed on the Boards to induce them to diminish their educational expenditure if they deliberately consider that they are not starving more important wants of the country by an inadequate allotment of their funds.

42. *Special schools.*—A technical school was opened in Burdwan in April 1894; it is maintained by the District Board assisted by the Municipality; carpentry and blacksmith's work were taught, and a survey class was also opened; there were 38 students in the workshops, and 46 attended the classes. The District Board of the 24-Parganas have started a model school of carpentry on an unambitious scale at Sonarpur, the monthly cost amounting only to Rs. 33; the school had 33 pupils, and is reported to be prospering. The pupils at the Rangpur technical school numbered 77, against 72 in 1892-93. Surveying, drawing, mensuration, carpentry, and blacksmith's work are taught at the technical school of Pabna; the Commissioner says he found

25 pupils of the *bhadralog* class being educated there, and is inclined to the opinion that the school should be supported partly by fees or subscription; In the Elliott Artizan School at Comilla there were 29 pupils; the school cost the Tippera District Board Rs. 2,559, and besides this, Rs. 3,163, spent on buildings, was met from donations; the receipts from sale of the articles made in the school amounted to Rs. 880. The Lieutenant-Governor lately inspected this school and passed upon it a similar criticism to that passed by Mr. Nolan on the Pabna school. The technical school established in Noakhali in March 1893 proved a failure and was abolished during the past year. A technical school founded by Babu Jogendro Kissore Roy Chaudhuri in memory of his father, Babu Kasi Kishor Rai Choudhuri of Ramgopalpur, was opened at Nasirabad in Mymensingh in July 1893; there were 21 pupils at the close of the year; the Chairman expresses regret that few boys of the artizan castes had yet attended. At the school at Barisal, the number of pupils rose from 35 to 43, the cost of the school was Rs. 2,765, and the receipts from fees and the sale of manufactured articles Rs. 266 and Rs. 614 respectively. The technical school at Purnea was reorganized in May 1893 and at first promised well, but in the rainy season many of the boys fell ill, and after the puja holidays did not return to the school. Rupees 3,152 were spent on the school during the year, of which Rs. 672 were recovered by the sale of the manufactured articles. The Balasore District Board contributed Rs. 120 to a technical school in the district. The District Boards of Howrah, Noakhali, and Puri granted scholarships for students at the Sibpur College. The Cuttack District Board paid for three boys who were learning at the Jobra workshops, and all the District Boards in Bihar, except that of Champaran, as well as those of Malda and Monghyr in the Bhagalpur Division, offered scholarships tenable at the Bihar industrial school. Viewing the year's work as a whole, the efforts made to push technical education appear to have been fairly successful. Failures there have been, and these must inevitably occur until the artizan classes have learned to appreciate the efforts being made in their behalf. It is abundantly clear therefore that, in order to avoid loss and disappointment, beginnings should be made on a small scale, without any elaborate plant or buildings, and every endeavour should be made to attract boys from the artizan castes, and not to receive pupils from the ordinary educated classes who are not likely to follow the trades thus learnt when they grow up.

43. Of indigenous schools there are under the Rangpur District Board two *madrassas* with 94 and 41 pupils respectively, and two Sanskrit *tols*. In Puri there are 17 Sanskrit *tols* and one *maktab*, but they receive no help from the District Board. In Hooghly the Sanskrit *tols* increased from 70 to 80, with a total number of 361 pupils, while the Arabic schools decreased from 36 with 507 pupils to 29 with 339. There are 7 *tols* in Howrah and 14 Koran schools.

44. *Female Medical Education.*—Scholarships to female medical students were granted by the District Boards of Burdwan, Birbhum, 24-Parganas, Faridpur, Backergunge, Chittagong, Patna, Shahabad, Saran, Monghyr, and Cuttack. In Champaran, Mymensingh, and Puri scholarships were offered, but no candidates applied for them.

45. *Medical.*—The total outlay on medical relief amounted to Rs. 1,29,911 during the year 1893-94, being an increase of Rs. 33,491 on the expenditure of the previous year. On general medical establishment and on hospitals and dispensaries together Rs. 1,15,529 were spent, compared with Rs. 87,777 in 1892-93. The increase is shared by all districts except Birbhum, Howrah, 24-Parganas, Pabna, Chittagong, Shahabad, Saran, Champaran, and Bhagalpur, and in no case is the decrease of any importance. In last year's Resolution the Lieutenant-Governor found it necessary to draw attention to the inadequate expenditure under this head in many districts, and he is gratified therefore to find that out of the eleven District Boards then mentioned, all, except those of Howrah, Jalpaiguri, and Dacca, have been able to comply with his suggestions for increased expenditure. The increase in expenditure in Tippera was due to the necessity of rebuilding the dispensary buildings that had been damaged by the cyclone of October 1893, and of dealing with the cholera epidemic that broke out soon afterwards; elsewhere it arose almost entirely from the establishment of new dispensaries under the District Boards, or from increased

contributions to institutions under Municipalities or other local bodies. The Hooghly District Board opened three temporary dispensaries during the year, and also took charge of that at Mandlai, which is maintained from the interest of securities left for the purpose by the late Dr. Bholanath Bose. In Mymensingh four new dispensaries were opened and a like number in Backergunge. Three new dispensaries were sanctioned during the year by the Noakhali District Board, while two were opened in Monghyr and one in Malda. In Patna, Babu Har Hardhari Singh promised a subscription of Rs. 600 a year for a dispensary; this sum the District Board have agreed to supplement with a grant of Rs. 30 a month, and a dispensary is to be opened in the Bikram thana. The Cuttack Board have established a new dispensary on the Grand Trunk Road, and have relieved Government of the charge of the Dharmsala dispensary. Altogether there were during the year 69 dispensaries maintained chiefly from District Funds at a cost of Rs. 54,674, without counting those institutions which are chiefly maintained from other sources, but which receive help from the District Funds.

46. The District Boards of Mymensingh, Rangpur, Birbhum, and Noakhali retained the services of midwives in their districts. In Rajshahi, Malda, Chittagong, and Birbhum contributions were made from the District Funds towards the salaries of lady doctors. Saran and Shahabad appear to have stopped their expenditure on account of female medical aid, and on the other hand in Dinajpur some expenditure has been incurred for the first time, but in neither instance is any mention of the fact made in the Divisional Reports. The Gaya District Board paid the cost of acquiring land for a Dufferin Hospital, and in Tippera and Khulna contributions were made from District Funds for the construction of similar institutions. The Balasore District Board added four rooms for the accommodation of females in the Bhadrak dispensary.

47. *Sanitation.*—The total expenditure on sanitation fell from Rs. 1,31,914 in 1892-93 to Rs. 84,166 in the year under report. The figures on the margin show how these amounts were apportioned among the various sub-heads of expenditure in both years.

	1892-93.	1893-94.
	Rs.	Rs.
Improvement of water-supply ...	97,402	43,177
Ditto village sites ...	635	870
Conservancy of towns and villages	Nil	751
Sanitation at fairs	8,065	7,192
Other sanitary expenditure ...	25,812	32,175

48. The large falling off in the expenditure on the improvement of water-supply is due to the inclusion in the total for 1892-93 of Rs. 45,037 spent in digging and re-excavating tanks in the Bhagalpur district—operations whose primary object was to find work for the poor in a season of scarcity, rather than the improvement of the water-supply. In Monghyr and Muzaffarpur there is a considerable falling off, which may be accounted for in the same way. The Lieutenant-Governor trusts that these tanks, which are now, it is presumed, the property of the District Board, will not be entirely neglected, but that proper measures will be taken to maintain them and preserve them from contamination and decay. An unsatisfactory feature in the sanitary operations of District Boards is the fitful and desultory way in which they are undertaken, as illustrated by the great variations in expenditure from year to year in the districts marginally noted. The Lieutenant-Governor recognizes that it is impossible to spend any large sums from the District Fund on the improvement of the water-supply of a whole district, but it is probable that most District Boards can afford some Rs. 2,000 or Rs 3,000 a year for this purpose, and the sum available should be heedfully expended year by year in pursuance of a regular system carefully thought out beforehand. The Lieutenant-Governor is gratified to see that in Mymensingh and Backergunge the District Boards are already going to work on these lines, and in the Patna Division the Commissioner has succeeded to some extent in inducing the District Boards to take up the cleaning of roadside wells on a systematic plan. Sir Charles Elliott again draws attention to the pregnant remark made by Mr. Romesh Chandra Dutt in his Divisional Report, that the aim of the District Boards and Municipal Commissioners should be to establish a reserved tank of pure water in every village, and a system of house supply of pure water in every

	1891-92.	1892-93.	1893-94.
	Rs.	Rs.	Rs.
Rangpur ...	1,229	35	4,611
Faridpur ...	3,092	6,264	716
Champaran ...	Nil	1,400	Nil
Khulna ...	599	254	1,252

considerable town. He trusts that during the current year all District Boards will seriously consider how they can best give effect to his recommendations on this subject, for it is almost superfluous to remind them that much more real progress is made by the sustained expenditure of moderate sums than by spasmodic liberality alternating with periods of neglect. The largest sums were spent during the current year in improving the water-supply in Backergunge (Rs. 6,146), Rangpur (Rs. 4,61[illegible]), and Monghyr (Rs. 4,180); while in Bankura, Howrah, Gaya, Champaran, Darbhanga, Purnea, Malda, Balasore, and Puri, nothing at all was spent. In the improvement of village sites and in village conservancy altogether Rs. 1,621 were spent in Murshidabad, Jessore, Khulna, Patna, and Shahabad. Expenditure on the sanitation of fairs was much the same as in previous years, and requires no special comment.

49. Expenditure on other sanitary objects amounted to Rs 32,403, of which Rs. 20,000 represent the contribution of the Mymensingh District Board to the Rajeswari water-works at Nasirabad, Rs. 8,196 expenditure in the Presidency Division on the improvement of drains, and Rs. 800 expenditure by the Puri District Board in affording vaccination to the people free of charge.

50. *Stationery and Printing.*—The charges fell from Rs. 50,022 to Rs. 45,446. There was a satisfactory decrease in the Patna Division, where expenditure had been high in the previous year, and had attracted the attention of Government. The fluctuations are generally due to more than one year's supply having been obtained and paid for within the same twelve months, and are not necessarily due to increased consumption.

51. *Miscellaneous.*—The expenditure rose from Rs. 55,390 to Rs. 63,644 in the year under report; the outlay on sarais and dák bungalows increased by Rs. 5,017, and Provident Fund contributions by Rs. 1,811. In Dacca the general elections led to increased expenditure. There is a large falling off in Hooghly, explained by the fact that the total of the year 1892-93 was swelled by an old advance of some Rs. 8,000 which was written off and shown under this head. In Bankura there was a heavy item of Rs. 5,960, which had to be paid in the year under report, by the orders of the Board of Revenue, on account of processes issued in revaluation cases, and in Chittagong Rs. 9,000 had to be paid to a contractor in satisfaction of a decree of the Civil Court.

52. *Famine relief.*—The expenditure on famine relief in 1893-94 amounted only to Rs. 2,649, nearly all of which was incurred in Backergunge in affording gratuitous relief. Advances to the extent of Rs. 1,500 were made from the Faridpur District Fund in order to purchase paddy to be husked by necessitous women, and some expenditure was incurred on roads, amounting to Rs. 6,691 in the Faridpur district, and to Rs. 17,533 in the Backergunge district, but this is shown under the head of 'Civil Works,' although it partook of the nature of expenditure on relief works. In Darbhanga test relief works were opened in February 1894, but were soon closed. On the whole, considering the high prices of food-grains and the injury done by floods in many quarters, the year was extraordinarily free from any real scarcity.

53. *Civil works.*—The following statement compares the expenditure under the head of Civil works during the past two years:—

Year.	Ferry establishment, contingencies and refunds.	Original works.	Repairs.	Establishment and contingencies.	Tools and plant.	Water-supply and water-works.	Drainage works.	Total.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

The total expenditure shows an increase of Rs. 33,637. The increase under the sub-head of Ferries occurred chiefly in Dacca, where Rs. 10,049 were spent in the year under report, as compared with Rs. 8,455 in the previous year, but no explanation has been given of the increase. The large increase under the head of water-supply is due to the contribution of Rs. 1,00,000 made by the District Board of Shahabad for the Municipal water-works at Arrah. As

regards original works, the gross expenditure on which has fallen off by nearly a lakh of rupees, the largest expenditure was incurred, in the districts named in the margin. Few large schemes were undertaken during the year, but much important work was done in the way of small improvements. In the 24-Parganas the metalling of the road between Barasat and Barrackpore, which is estimated to cost Rs. 33,000, was begun. It is reported that the Victoria bridge in Burdwan over the Khori river, which was said last year to be nearly complete, was not finished and could not be opened during the year for want of funds. It is not understood why this should have been so, seeing that the District Fund had a credit balance of Rs. 38,219 at the close of the year; and the Lieutenant-Governor hopes that the work will be completed at any rate in the current year. In Howrah further progress was made in the construction of the Begri-Hakhola road sanctioned in 1890, Rs. 56,314 having now been spent, out of a total estimate of Rs. 59,712. In Jessore four causeways on the Jhenida-Magura road were completed during the year, and another on the Calcutta-Jessore road was nearly finished. In Khulna the construction of four iron bridges was begun. The Rajshahi Division stands second only to Patna in the expenditure on original works; it amounted to Rs. 2,63,671, but the Commissioner's report on the subject does not show what works were undertaken. A considerable portion of the sum, however, namely Rs. 71,457, was spent on Imperial and Provincial works for which grants were made by Government. From information obtained from the Public Works Department of this Government it appears that in Dinajpur a sum of Rs. 42,080 was spent in making bridges and culverts to improve the waterway, and in Jalpaiguri Rs. 17,433 represent the outlay on improving roads in the Duars, for which Government made a grant of Rs. 40,000 in 1892. In the Rangpur district the road from Kankeria to the borders of the Kuch-Bihar State was completed, and 26 bridges and culverts were constructed to improve existing roads. In Pabna no important original works were undertaken, but a contribution of Rs. 9,000 was made from the District Fund towards the construction of the bridge over the Dhanbandi river at Sirajganj. In the Mymensingh district important works were undertaken on behalf of Government in the shape of a Subdivisional Officer's residence at Netrakona and Subdivisional Court buildings in Netrakona, Jamalpur, and Kishorganj, while a considerable sum was spent in constructing and bridging the district roads. The expenditure on original civil works in the Patna Division is far more important than in any other; it amounted to Rs. 4,81,186, or 36·7 of the whole expenditure of the province on original works during the year under report. Further expenditure, amounting to Rs. 37,822, was incurred in the Patna district on the bridge over the Punpun river on the Fatwa-Hilsa road, and Rs. 9,643 on the metalling of the road itself; the bridge is now ready to be opened for traffic. In Gaya three iron girder bridges over the Jahanabad-Arwal road were nearly completed, and Rs. 11,277 were spent on the materials of a fourth bridge on the same road. The raising of the Aurangabad-Maharajganj road to Daltonganj was nearly completed at a cost of Rs. 12,181. In Champaran and Muzaffarpur much was spent in making new culverts and bridges. In Saran only a little more than one-third of a budget allotment of Rs. 68,587 was spent during the year: the explanation given, namely, that the works were sanctioned too late in the year, and that contractors did not fulfil their contracts, is, as the Commissioner observes, wholly inadequate. In Bhagalpur, some important provincial works were carried out by the District Board in improving the Central Jail and in constructing a double munsifi at Madhipura. The Malda District Board spent Rs. 7,156 on metalling the Englishbazar-Nawabganj road, the work having been estimated to cost Rs. 13,865.

54. The figures in the margin show side by side for the past two years the outlay on communications divided into original works and repairs. The increase in the expenditure on repairs occurred chiefly in the Howrah district, where Rs. 17,111 were spent in remetalling the

Howrah-Jagatballabpur road, and in Muzaffarpur and Darbhanga, where severe damage was done to roads and bridges by the floods that occurred in August and September 1893. In Darbhanga, particularly, the damage fell heavily on the District Board, which has not yet recovered from the drain on its resources caused by the scarcity in 1891-92. The districts of the 24-Parganas (Rs. 1,33,938), Burdwan (Rs. 1,64,713), and Darbhanga (Rs. 1,33,177) spent most in repairs to communications during the year. The length of district and provincial roads repaired by District Boards is shown in Appendix D attached to the report to be 24,058 miles.

55. In the course of the year the Lieutenant-Governor had occasion to examine the relation borne to their total expenditure by the cost of establishment entertained by each District Board, and also the manner in which establishment charges of certain kinds were entered in the accounts of the Boards. On each of these subjects a resolution issued in the month of June, and in that numbered 3T.—M. of the 28th of that month, the Lieutenant-Governor prescribed the preparation of a statement, which now appears as Appendix D to the present Resolution. An examination of this statement reveals extraordinary variations between the different districts. Thus the mean Provincial percentage of cost of civil works on total expenditure (column 9) is 64·5, but it runs as high as 71·8 for the Patna Division, and as low as 51·8 for that of Chittagong. In Jalpaiguri, where communications are still very defective, and where the District Fund has been largely assisted by grants from Government, the percentage reaches 76·8, while Shahabad shows 82·8 and Muzaffarpur 80·6. Turning next to the percentage of cost of establishment on total expenditure (column 10) it is for the whole province 8·9, but it exceeds 10 per cent. in thirteen districts headed by Bhagalpur with 14·4. Column 11 of the statement shows what ratio the salary of the District Engineer bears to the total cost of establishment. It appears that the Provincial average is 41·1, but in eight districts, where it is hard not to suspect excessive liberality, the District Engineer receives as salary more than half the total sum shown as cost of establishment for the year: in Champaran he receives as much as 70·3 per cent. of the whole, and in Cuttack and Balasore nearly 60 per cent. Column 12 of the statement shows what proportion is borne to the expenditure on original works and repairs by the cost of establishment: the provincial mean being 17·1, it is exceeded in 21 districts, the highest place being taken by the Saran District Board (31 per cent.), owing no doubt to the fact that only a small portion of the funds allotted for works were spent during the year. Lastly, column 13 shews what ratio was borne by the District Engineer's salary to the expenditure on original works and repairs. The provincial mean is 7 per cent., but 10 per cent. is exceeded in nine districts, the first place being taken again by Champaran, and all the Orissa districts displaying apparently unusual liberality in this respect. This is not the place for a complete examination of the figures reported, but the Lieutenant-Governor desires that the Commissioners and the Chairmen of District Boards will scrutinise the statement, and will consider, by the light of the information it affords, whether the Public Works expenditure in each district is fairly distributed, or whether it is not capable of revision and improvement.

56. *Village roads.*—In the statement in the margin is shown the expenditure in each Division on village roads during the last two years. A considerable increase occurred in the Burdwan Division, but expenditure is said still to be less than the requirements of the districts. The total number of miles maintained in the province, with the exception of the Orissa Division, the Chittagong district, and the Nator subdivision, for which figures have not been furnished, amounted to 15,662 miles. The cost of maintenance of each mile varied from Rs. 3-12 in Champaran to Rs. 142 in Birbhum. In the Backergunge and Faridpur districts, also, the cost of maintenance per mile is very high. The Commissioner of Patna proposes to limit the expenditure

	Expenditure.

Total	3,40,339	3,55,297

for the maintenance of this class of road to Rs. 10 a mile except in special cases, and the Lieutenant-Governor agrees with him that in his Division this amount should ordinarily be sufficient. Elsewhere a higher limit may be found necessary, but some limit should be fixed for expenditure on roads of this class. If a road is so important as to make it worth while to spend on it as much as Rs. 100 a mile, it seems proper that it should no longer be classed as a village road, but should be placed on the list of district roads. In Howrah, Chittagong, Saran, Darbhanga, and other districts in Bihar, the repairs were largely undertaken by planters and other resident gentlemen. The largest expenditure on village roads in any one district was Rs. 20,384 in Saran, which is covered with a network of roads essential to its teeming population, and the lowest Rs. 1,976 in Puri.

57. *Water communications.*—The outlay under this head during 1893-94 was but small. In Mymensingh the Narsanda khal was cleared of reeds with the double object of improving communications and supplying drinking water. In the Backergunge and Noakhali districts, by the ingenious plan of making the side cuttings along the roads continuous, the drainage has been improved, and boat communications facilitated. In the 24-Parganas, Pabna, Noakhali, and Malda small sums were spent in deepening and improving channels. The Commissioner of Dacca takes much interest in keeping the tow-paths along the banks of navigable channels free from obstructions, but hitherto the District Boards of the Division have done but little in this direction. The Lieutenant-Governor trusts that the matter will not be lost sight of, as it is one of great importance in the amphibious districts of the Gangetic delta.

58. *Steam communications.*—There is little new to report for the year 1893-94. The Dacca District Board maintained the steamer service from Narayanganj to Munshiganj as in former years. The receipts, it is said, cover the annual cost of maintenance with some margin, but are not enough to pay for the wear and tear of the steamer; the service, however, is said to be useful. Steamer services from Barisal to Khulna, to Patuakhali and to Chandpur received subsidies to the extent of Rs. 8,700 a year from the Backergunge District Fund, and in Faridpur a subsidy of Rs. 200 a month was granted to the India General Steam Navigation Company for a service from Goalundo to Madaripur, but it was stopped owing to the irregular running of the steamers. For the same reason the Tippera District Board withdrew the grant that they used to pay for the launch between Daudkandi and Shatnal. The Malda District Board paid, as in former years, a subsidy for the steamer service between Englishbazar and Rampur Boalia, but reduced it from Rs 300 to Rs. 200 a month: they also granted a subsidy to the farmer of the Rajmahal steam ferry for plying between that place and Englishbazar. The Pabna District Board paid Rs. 3,492 as a subsidy for the maintenance of a steamer plying between Pabna and Kushtia.

59. *Miscellaneous Public Improvements.*—The Bhagalpur District Board spent Rs. 358 in registering traffic on the Bhagalpur-Naya-Dumka road, the Board having agreed to allow Sir W. B. Hudson, K.C.I.E., the use of the road for the construction of a railway and to grant a subsidy for the work. In most districts there was some expenditure on account of tree planting, but it was chiefly incurred in maintaining existing trees or replacing those that had died. In Champaran, however, 218,000 palm trees were planted to demarcate the roadside lands. In Gaya the expenditure on arboriculture amounted to Rs. 2,971, and in Burdwan to Rs. 2,092. In Tippera and Noakhali the floods and a cyclone did the trees on the roads much damage, so that they cost the District Boards Rs. 1,704 and Rs. 2,114, respectively, during the year.

60. *Railway feeder roads.*—In Burdwan the feeder road, one mile long, connecting Gulsi station with the Grand Trunk Road was completed, and proceedings are being taken for the acquisition of land for another such road to Devipur station at the expense of the local zamindar, Babu Kalidas Singh. The feeder roads in Birbhum are said to need improvement, and the Lieutenant-Governor trusts the matter will receive due attention in the current year. In Nadia a fair-weather road from Bharamara to Taragonia, which is under construction, will form an important feeder to the Eastern Bengal State Railway. The Bengal Central Railway is said to be much in want of this class of road, and the Presidency Commissioner, at the request of the Public Works Department

of this Government, submitted an estimate for their construction in various localities, but the District Boards concerned are at present unable to give assistance for the work owing to want of funds. A bridge was completed on a feeder road in Dinajpur, and in Jalpaiguri one such road was constructed and another much improved. In Tippera estimates are being prepared for feeder roads for the Assam-Bengal Railway. In the Dacca Division, this useful class of road appears to be receiving considerable attention. Five miles of road leading to the Sripur railway station in Mymensingh were completed; the road will ultimately connect Tangail with the railway. In the same district five miles of road from Gaffargaon were completed, and some progress was made towards the construction of two feeder roads from Kalibazar railway station. In Purnea Rs. 8,848 were spent in constructing a feeder road from Sonaili to Pranpur, and Rs. 3,713 in metalling the feeder road to Kasba railway station.

61. *Tramways.*—No tramways were under construction during the year. The proposal for a light steam-tramway from Suri to Sainthia in the Birbhum district was dropped, and no progress was made in the Howrah-Sheakhala and Howrah-Amta project. Provisional sanction was accorded in March last to the construction of a steam-tramway in Nadia from Ranaghat *viâ* Santipur to Krishnagar, on condition that it should give way to a railway, should one be constructed hereafter, and the District Board have been asked to submit a formal proposal for sanction.

62. *Drainage.*—On this subject the Commissioner of the Presidency Division writes:—

"In the 24-Parganas a sum of Rs. 1,039 was, for the first time, spent during the year under report on the improvement of drainage. Having regard to the desirability of bettering the sanitary condition of Barasat and the adjoining villages, the unhealthiness of which is said to be due to a large extent to the silting up of the Sunti Nadi, the District Board took up the work and cleared the channel from the mouth of the river to the Jagatighata bridge, a distance of 9 miles. The health of the locality is said to have much improved, and the water of the river, which was filthy before, is now used for drinking purposes. The expenditure includes a sum of Rs. 400, which was contributed by the Barasat Municipality towards the cost of this work. Operations to clear the bed of the river for a further distance of 10 miles, from Jagatighata to Digra, for which Rs. 1,000 have been already sanctioned, are now in progress."

That great sanitary benefits accrue from works of this kind is beyond question, but unfortunately the fact that the silting up of the river has been hastened and assisted by the construction of dams and fishing weirs in its bed frequently renders their execution a matter of some difficulty. The District Board of the 24-Parganas and their Chairman, Mr. Collier, are to be congratulated on having carried this project through so far with such success, and it is to be hoped that their future efforts will be no less fortunate. It is with the object of providing efficient machinery for dealing with large and difficult tasks of this nature that the Sanitary Drainage Bill has been brought before the Provincial Legislative Council, but the Lieutenant-Governor trusts that without waiting for the result of proceedings in Council other District Boards will profit by the example of that of the 24-Parganas, and will endeavour to carry out similar projects wherever they are required, so far as they are within their means. In the Dinajpur district the drainage canal from Dinajpur to Gouripur was maintained at a cost of Rs. 509, and Rs. 412 were also spent in removing obstructions to drainage. In Rangpur the drainage canals of the Sadar, the Kurigram, and the Nilphamari subdivisions were repaired at a cost of Rs. 1,692. The expenditure under this head in Noakhali, amounting to Rs. 3,026 for improving the roadside drains and for deepening the Daudpur khal, and that from Gangapur to the Meghna river, has been referred to under the head of water communications, to which it more properly belongs.

63. *General remarks.*—The following are the comments of Commissioners of Divisions on the working of the District and Local Boards in their Divisions during the year.

The Officiating Commissioner of Burdwan (Mr. Dutt) writes of the District Board of Burdwan, of which he has long been Chairman:—

"The members of the District Board generally took much interest in their work. I have derived much help from their advice and active co-operation, and not unoften I have changed my own views on a subject after a friendly discussion with the members of the Board in meeting. Much useful work is done quietly and unostentatiously by the Committees of the District Board, and non-official members belonging to these Committees give us their time and

services ungrudgingly for public good. It is a gain to the cause of administration that non-official gentlemen should thus share with us the work of administration, and that the leading residents of the district should have a hand in disposing of the District Fund for the good and improvement of their own district."

And in his capacity as Commissioner of the Division he adds :—

"It will appear from these remarks that all the District Officers of this Division have borne their testimony to the value and utility of the District Boards, to the interest which members take in their work, and to the intelligence with which they manage their duties. Local Boards have proved their usefulness in a less degree, as the scope of their work is very limited. But I believe they will have plenty of work to do when we undertake sanitary improvements on a larger scale in the near future."

Mr. Williams, Officiating Commissioner of the Presidency Division, writes as follows :—

"I have seen but little of the working of the District and Local Boards of this Division, but it appears that the results generally seem to be much the same as in other parts of the province, namely, that while the District Board works well, and a majority of the members take interest in their work, the Local Boards are, as a rule, distinguished for general apathy. The reason generally assigned, and with a fair amount of truth, is that, as a rule, the work is insufficient and of an uninteresting nature, but until it is seen that they carry out efficiently the work made over to them, the District Boards exercise a wise discretion in declining to increase their powers. One of the main difficulties of the Local Board question lies with regard to the Chairman. The Subdivisional Officer ought ordinarily to be the Chairman, as he alone probably knows the wants of the whole subdivision, and can weigh the respective claims of its different parts; but apart from the natural desire of Government to encourage, as far as possible, local self-government by appointing a non-official Chairman, and the fact that there is a certain amount of jealousy, especially in the neighbourhood of Calcutta, among non-official members, the frequent changes among the Subdivisional Officers render their appointment as Chairmen often impossible. So far as the people generally go, local self-government is, and is likely to be for some time, an absolute impossibility. The question of travelling allowance is also at times given as an excuse for persons not joining Local Boards, but I am opposed to any such grant, as the work done is not for years likely to be anything but of the lightest description."

The following are the comments of Mr. Nolan, Commissioner of the Rajshahi Division :—

"In my opinion the District Boards have worked well during the year. Their administration can hardly be distinguished from that which was in force before, viz., that of the District Magistrate acting with the Road Cess and Education Committees. The District Magistrate remains at the head of the Executive, and the consultative body is taken from the same class. The work goes on as it did before, attaining about the same degree of efficiency. There has been some addition to the cost by the erection of separate offices for those engaged in business formerly transacted at the Collectorate, and by the creation of new establishments; and on the other hand the cess-payers have the satisfaction of knowing that their interests are watched by their elected representatives. In other respects I can see no marked difference."

To Mr. Luttman-Johnson, Commissioner of the Dacca Division, local self-government presents the appearance of a paradox. He says :—

"As I have frequently pointed out, District Boards are of no account from the point of view of local self-government. They are in no sense local. But as district councils to advise the district officer, they no doubt serve a useful purpose. They are prone to subserve landlord interests. They are also, the members being for the most part residents of the district head-quarters, inclined to spend more money than it is entitled to on the Sadar subdivision. And perhaps they do not take more interest in the education and advancement of the masses than might have been expected. As was foreseen, they do not evince a great interest in sanitation. Generally, if the question of local self-government be excluded from consideration, they may be said to do good work honestly and straightforwardly. The Local Boards might be entitled to a place in a local self-government scheme had they any powers. As it is, they are merely agents of the District Board in the performance of a few not very interesting duties.

Mr. Forbes, the Commissioner of the Patna Division, looks at the question solely from an administrative point of view; he writes—

"The foregoing report will show that the general working of the District Boards during the year in this Division continued to be satisfactory. * * * * and better attention was paid to the water-supply by looking after the roadside wells, particularly those along the main roads frequented by pilgrims. The working of the Local Boards, however, has not been uniformly satisfactory in all districts."

From the Bhagalpur Division, Mr. Phillips, Chairman of the Monghyr District Board, writes :—

"Local self-government is not cared for in this district, and the pleader element is conspicuous by its absence. Debates are unknown, and an amount of solid business is got

through in 20 minutes which would take a Bengal Board several hours to get through. * * * Local members do not initiate any measures, nor do they seem even to press for the execution of works in their own localities. At the same time the Board is a great power behind the back of the Chairman."

Mr. Faulder, Chairman of the Purnea Board, writes in the same strain—

"The members of the District Board attend with praiseworthy regularity * * * * *. That they should take so much trouble to come and spend so much of their time in doing so, is the point which has always struck me as most surprising. They take very little interest in the work, which is generally very uninteresting: they often scarcely attend to the proceedings * * * . I do not think that in the year under report any amendment was proposed, or that one single resolution had to be put to the vote. I imagine that the members, though easily satisfied as to details, value the honour of being consulted, and the reserved power of voting, should any really vital question have to be decided."

The following are the remarks of Mr. Cooke, the Officiating Commissioner of the Orissa Division:—

"I am glad to be able to recognize a very marked improvement in the work of the Puri District Board, a greater conformity with the usual procedure in the case of the Balasore District Board, rather than any change in the quality of its work, which has never been otherwise than satisfactory, and some improvement in Cuttack; the last district named does not, in my opinion, take the place it should in matters connected with local self-government, but I have no doubt that this reproach could be removed. In the practical result the work appears satisfactory in all districts—a circumstance which is obviously quite consistent with any degree of apathy on the part of Board's members, so long as the executive officers are competent; this, however, does not constitute local self-government."

64. From the perusal of the Divisional reports and an examination of the statistics which they embody, the Lieutenant-Governor has received the impression of important duties harmoniously and unostentatiously discharged. The crudities which, as was inevitable, marked the administration of the earlier years during which the Local Self-Government Act was in force have largely disappeared under the ripening influence of time: in parts of the province there is a tendency to favour one or more branches of the administration at the expense of others, but year by year mistakes are corrected and improvements introduced, year by year variations in administration as between district and district disappear, and year by year the working of the machine grows smoother as those who control it become more familiar with its capabilities and their own duties. In all this Sir Charles Elliott detects not an approach to a dull level of mediocrity, but an emulous struggle towards the highest standards available, and he cordially congratulates all members of District Boards in these provinces that the year 1893-94 has been marked by such steady progress and such general good work.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

Form No. I(*a*).

Statement showing the constitution of the District Boards in Bengal during the year ending 31*st March* 1894.

The Canal Revenue Reports for 1893-94.

No. 1413*I.A.*

Government of Bengal.

IRRIGATION DEPARTMENT.

Accounts.

Dated Calcutta, the 19th November 1894.

RESOLUTION.

READ—

The Canal Revenue Reports for 1893-94 and the Chief Engineer's note on the same.

The canals in Bengal, of which Capital and Revenue Accounts are kept, have cost Rs. 7,47,43,771 to construct. Of this sum Rs. 1,05,86,519 have been provided from Provincial funds, Rs. 6,12,80,150* from loan funds, and the remainder has been charged to the Famine Relief and Insurance Fund.

2. The length of canals in operation is 916 miles, of which 495¼ miles are for irrigation and navigation, 242¾ miles are for irrigation only, and the remaining 178 miles for navigation only. There are also 2,579¾ miles of distributary channels. The area at present irrigable is 1,557,090 acres.

3. The receipts for the year for both Major and Minor Works have amounted to Rs. 21,97,974, and the working expenses to Rs. 19,42,188, the net revenue being Rs. 2,55,786 against Rs. 6.17,928 in 1892-93 and Rs. 3,82.280 in 1891 92. The receipts have been less than in the preceding year, the rainfall being favourable and seasonable, whilst the working expenses have been heavier than usual, owing to the cost of repairing the damages caused by the high floods of July 1892 in Orissa, and the cyclone of May 1893 in Orissa and Midnapore.

4. Taking the canals classed as Major Works only, the following table shows the main features of the year's working, and also the expenditure charged to capital account to date:—

NAME OF CANAL.	Capital expenditure (direct and indirect) during year.	Capital expenditure (direct and indirect) to date.	Receipts of year, *less* refunds.	Expenditure of year including indirect expenditure.	Net income of year.	Net income. Average of nine years ending 1892-93.

Sone Canals ...	1,68,465	2,68,69,942	9,25,675	7,40,976	(+)1,84,699	(+)1,74,584
Total ...	5,27,305	6,35,32,230	16,65,005	15,41,144	(+)1,23,861	(+)44,280

* Exclusive of indirect charges amounting to Rs. 20,11,102.

5. The receipts and working expenses of the year are compared with those of 1892-93, and the average of the nine years preceding, in the statemen following:—

Name of Canal.	Receipts for 1893-94.	Receipts for 1892-93.	Receipts. Average of nine years ending 1892-93.	Working expenses, 1893-94.	Working expenses, 1892-93.	Working exrenses. Average of nine years ending 1892-93.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	3,/5,365	4,97,375	2,79,300	5,35,477	5,05,507	4,40,786
Midnapore Canal ..	3,04,769	2,80,001	2,67,650	2,08,190	1,95,550	2,24,968
Hijili Tidal Canal ...	59,196	53,890	45,190	56,501	33,089	46,690
Sone Canals ...	9,25,675	10,52,581	8,66,488	7,40,976	7,51,247	6,91,904
Total ...	16.65,005	18,83,347	14,48,628	15,41,144	14,85,393	14,04,348

The interest charges from Provincial revenues amounted to Rs. 24,61,87

6. The areas irrigated during the past ten years are shown in the tabl below. *Rabi* irrigation is shown separately in the case of the Sone Canals only in the case of the other canals the area watered at that season is insignificant The area under the head perennial is in all cases small, and is included unde the head *kharif*. The rainfall of the year is given:—

Year.	Orissa Canals.	Midnapore Canal.	Sone Canals.			All canals.	Rainfall.
			Kharif.	Rabi.	Total.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Inches.
1884-85	57,372	69,294	293,103	77,558	370,661	497,327	44·93
1885-86	72,339	70,604	281,960	50,610	332,570	475,513	59·46
1886-87	77,709	69,762	251,542	16,662	268,204	415,675	57·32
1887-88	109,506	65,861	287,879	27,501	315,380	490,750	36·70
1888-89	159,292	69,777	286,092	69,817	355,909	584,978	52·21
1889-90	186,627	58,810	284,946	20,336	305,282	560,719	54·02
1890-91	180,299	82,002	260,382	20,632	281,014	543,315	57·03
1891-92	177,685	83,973	297,415	177,308	474,723	736,381	46·55
1892-93	160,952	91,217	284,566	126,195	410,761	662,930	45·13
1893-94	103,526	85,763	300,318	66,458	366,776	556,065	64·03
Average of nine years preceding 1893-94 ...	131,309	74,589	280,887	65,180	346,056	551,954	50·37

The area irrigated was 556,065 acres against an average of 551,954 acres Compared with the two years immediately preceding, the defect is mainly in the area irrigated by the Orissa Canals, and by the Sone Canals in the *rabi* season. The rainfall of the year was 64·03 inches against 45·13 inches in 1892-93, 46·55 inches in 1891-92, and an average of 50·37 inches in the nine years preceding 1893-94.

In both the preceding years the rainfall was scanty, and the demand for water acute. In the year under review, more especially in May and late in the season, the rainfall was abundant, and there was little demand for canal water.

7. The collections of water rates as well as the assessments are now carried on under the orders of Superintending Engineers, the duties of Collectors o

districts being, so far as the canals are concerned, confined to disposing of objections against the orders of canal officers, and seeing that the management of the canals is conducted with a proper regard to the interests and feelings of the cultivators. The collections of arrears under the Public Demands Recovery Act are, however, entirely under the orders and control of the District Officers, the Superintending Engineer having no connection therewith. The following table shows the main features of the collection work of the year:—

Year.	Balance at beginning of year.	Balance at the end of the year.	Remissions, including cancelled demand statements.	Irrecoverable items.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1884-85	6,20,687	8,84,289	80,771	37,121
1885-86	8,84,289	5,33,177	1,41,162	41,229
1886-87	5,33,177	3,69,789	57,375	22,612
1887-88	3,69,789	5,59,883	32,356	19,796
1888-89	5,59,883	5,79,983	42,666	14,074
1889-90	5,79,983	5,09,188	80,282	20,592
1890-91	5,09,188	4,72,113	48,674	16,476
1891-92	4,72,113	4,04,120	38,421	12,126
1892-93	4,04,120	2,26,174	61,576	11,168
1893-94	2,26,174	1,72,235	29,054	4,818
Average of nine years preceding 1893-94 ...	5,48,136	5,04,302	64,809	21,688

The improvement in administration continues. The balance of water-rates due at the close of the year was Rs. 1,72,235 against Rs. 2,26,164 at its commencement. The remissions have been Rs. 29,054 only against Rs. 61,576 in the year preceding, and an average of Rs. 64,809. The items written off as irrecoverable were Rs. 4,818 against Rs. 11,168 in 1892-93, and an average of Rs. 21,688.

8. Particulars regarding the navigation collections (exclusive of the transport service and miscellaneous navigation receipts) for 10 years are given in the table following:—

Year.	Orissa Canals.	Midnapore Canal.	Hijili Tidal Canal.	Sone Canals.	Total.	Miles open.	Tollage per mile.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Miles.	Rs.
1884-85	52,784	1,28,747	41,382	37,335	2,60,248	484	537·7
1885-86	64,093	1,37,578	52,143	41,712	2,95,526	490	603·1

1892-93	1,00,503	1,14,141	52,180	49,996	3,16.827	524¼	604·3
1893-94	1,19.115	1,14,994	58,209	50,548	3,42,866	524¼	654·0
Average of nine years preceding 1893-94...	79,795	1,28,028	43,973	49,664	3,01,472	.....	.....

The increase in the revenue under the head Navigation was chiefly owing to the pilgrim traffic to Orissa, a festival of special importance occurring at Puri in July 1893.

9. The miscellaneous revenue was Rs. 78,006 in the current year, and Rs. 74,007 in 1892-93, the average for the nine years preceding 1893-94 being Rs. 63,460.

10. So far as Major Works are concerned, the receipts were Rs. 2,16,377 more than the average of the preceding nine years, but the working expenses were also Rs. 1,36,796 in excess, the net income being Rs. 1,23,861 against Rs. 3,97,954 in the preceding year; but the average for the nine years ending with 1892-93 was Rs. 44,280.

The navigation revenue, Rs. 3,42,866, compares favourably both with that received during the preceding year, Rs. 3,16,827, and the average, Rs. 3,01,472. The earnings of the year were Rs. 14,75,361 only against Rs. 16,72,626 actually collected, so that the results of the year, judged from that standpoint, were more unfavourable than the figures giving the net income would show. On the other hand the expenses of the year were swollen by expenditure due to a flood which occurred in the previous year, July 1892, and to an altogether exceptional item, the renewal of the shutters of the Byturni weir.

The results of the year's working have, compared with the two preceding years, not been favourable from causes which have been stated, and which will be more particularly referred to later on in commenting on the year's working of the different canals.

11. The canal systems will now be separately considered, commencing with the Orissa Canals. The receipts on revenue account were Rs. 3,75,365, against an average of Rs. 2,79,300 during the preceding nine years, and the working expenses Rs. 5,35,477 against an average of Rs. 4,40,786. The heavy expenditure under Working expenses was due (I) to making good, at a cost of Rs. 31,107, the damages caused by the flood of the river Mahanadi in July 1892, which was the highest on record, and (II) the renewal, at a cost of Rs. 23,830, of the shutters of the Byturni weir, an improved pattern being substituted. Deducting the expenditure incurred on these two items, the cost of maintenance proper was Rs. 2,00,780, which was lower than that of any of the last ten years, except 1891-92. There was under the head Tools and Plant an extraordinary expenditure of Rs. 9,295 in renewing the boilers of the S.S. *Aurora*. The cost of Revenue establishment was Rs. 6,459 less than in 1892-93, and there will be a reduction during the year now current owing to the abolition of head-men's fees. A further diminution is anticipated when a larger portion of the area commanded has been leased. The increased expenditure on the transport service was more than compensated for by extra receipts. The actual collections of water-rates were entirely satisfactory. They are nearly one lakh of rupees above the average, and the balance at the close of the year was Rs. 63,350 against Rs. 89,816 at its commencement. The navigation revenue is the highest on record, and has nearly doubled in the course of the last ten years.

12. The area irrigated in Orissa was 103,526 acres against 160,952 acres in the preceding year, and an average of 131,309 acres. The comparison is somewhat misleading, as in all leases executed since the 1st April 1892, unirrigable lands have been excluded, whilst in those of a prior date, the unirrigable lands are included and dealt with by yearly remission statements. It is not possible to give the exact areas so dealt with, but the areas previous to 1893-94 include at least 10,000 acres of non-irrigable lands. The remissions and irrecoverable items amounted to Rs. 7,748 in 1893-94 against Rs. 52,541 in 1892-93. The area for which leases lapsed on the 1st of April 1894 was 114,361 acres, and new leases were entered into for 42,263 acres. This is more than one-fifth of the entire area which has ever been under irrigation, and with a system of five-year leases is a normal area. But the year was unfavourable for irrigation. The rainfall was 74·83 inches against 56·43 inches in the previous year, and an average of 58·55 inches. There was a cyclone in May 1893, in which month 28·12 inches of rain fell, and a consequent indisposition on the part of the cultivators to renew leases early in the season. Late in September and early in October, when water was beginning to be indispensable for the rice crops, applications

began to come in, but there was heavy rain on the 17th of October, and all further demand ceased. In 1888, out of 89,296 acres leased, which lapsed on the 1st of April 1893, 43,595 acres were leased in October and November. Altogether, considering the character of the season, which is described by the Chief Engineer as being seasonable for the crops, so that canal irrigation was not necessary, the area renewed was quite as great as could fairly be expected, and it is the more satisfactory, as the leases contain no unirrigable areas for which remissions would be yearly required.

13. The transport service was worked at a profit of Rs. 2,879 against Rs. 1,594 in the preceding year. The working charges include Rs. 7,834 charged as tollage. The service was of considerable importance owing to the number of pilgrims, and boats were hired and run daily so that there might not be any delay.

14. The number of certificate cases instituted during the year was 6,667 against 7,991 filed in the year 1892-93. Including a balance of 979 from the previous year, there were 7,646 cases for disposal. Of these 6,861 were disposed of by being fully satisfied, 4 only were cancelled on objection, and 305 struck off. The number pending at the close of the year was 476 against 979 at its commencement. The certificate office was inspected by the Collector of Cuttack, who remarked that the office in every respect seemed to be in exceptionally good condition. The Lieutenant-Governor recognizes the improvement shown by the diminution in the number of certificate cases, and trusts that a further decrease will occur. It may be noted as creditable to the Deputy Collector that in no single case was a defaulter sent to jail or had his property sold in satisfaction of Government claims. In regard to ordinary complaints, the Deputy Collector remarks:—

"The reduction in the number of complaints from 3,372 in the previous year to 1,514 in the year under report is due to the new system of assessment, exclusion of unirrigable areas from *jamabandis* and the systematic regulation and very careful distribution of water."

He adds:—

"There were very few frivolous complaints, the number found to be groundless on investigation being 379 only."

The area assessed under the head unauthorized irrigation was 174 acres only.

15. The net revenue of the Midnapore Canal was Rs. 96,579 in the year under review, against Rs. 84,451 in that previous. The earnings were, however, Rs. 14,334 less than in 1892-93, the favourable results shown by the revenue account (actuals) being due to the balance at the close of the year being Rs. 7,027 only as opposed to Rs. 48,567 at its commencement. The area irrigated was 85,763 acres against 91,217 acres in 1892-93, but the rainfall in 1893-94 was 70·63 inches against 41·28 inches in 1892-93. The character of the season is explained in the following extract from the Deputy Collector's report:—

"The demand for rice irrigation in this district has not yet become independent of the character of the season, and in consequence of heavy and untimely rainfall the outlook of the year's administration was indeed very gloomy in the early part of the season. The provision in the new water-rate rules about an additional rate of 12 annas per acre to be levied in cases where the lease is not renewed in the first year following its expiry, and similar other provisions intended to prevent delay in applying for the renewal of the lapsed leases, were thoroughly explained to the ex-lessees; but they were of little avail to overcome the general disinclination, although the most intelligent among them, who are gifted with foresight, were in favour of prompt renewal. But when later in the season (*i.e.*, in the latter part of August and beginning of September) the rains held off, and in consequence of the exemplary punishment awarded in certain cases of illicit irrigation, the ex-lessees could no longer cherish the hope of having recourse to surreptitious irrigation which the system of compromise (*i.e.*, taking kabuliyats at the ordinary rates from the persons found guilty of using canal water in an unauthorized manner), which had hitherto prevailed, used to stimulate, there was a great rush for the execution of kabuliyats, and the result was that out of an area of 35,400 acres which fell in on the 31st March 1893, leases covering an area of 27,072 acres were renewed in a short time. But the worst character of the season was that the rain fell again just when the demand for canal irrigation was becoming general, and had the last break continued for a week more, all the lapsed leases would have been renewed."

16. The very heavy rain in May—more than 10 inches fell in the last week of that month—was very prejudicial both to canal irrigation and the growth

of the crops, and the rice that was sown in June was to a large extent also destroyed. Under the circumstances the Lieutenant-Governor agrees with the Superintending Engineer that the result may be considered satisfactory. Mr. Romesh Chunder Dutt, C.I.E., Commissioner of Burdwan, makes the following remarks regarding the work of Babu Raj Mohun Chuckerbutty, Deputy Collector, in charge of the Revenue Division:—

"It is satisfactory to observe that much improvement has been introduced by the Deputy Collector in charge in the working of the department. Though the year was not favourable for irrigation purposes, there was an increase in the total revenue to the extent of Rs. 21,565 with a decrease in collection charges, &c., from Rs. 21,656 to Rs. 19,497. The percentage of total collections rose from 75·56 to 96·06.

"The number of certificates filed during the year was 1,799 against 1,223 in the preceding year. The increase was mainly due to the realization of old arrears. It is satisfactory to notice that out of the total number of certificates (2,155 including 356 pending from previous year) 2,085 were disposed of, leaving a balance of 70 only at the close of the year. Out of the cases disposed of, the demand was wholy satisfied in 2,037 cases."

The Lieutenant-Governor notices this commendation with satisfaction, and also the fact that instead of waiting until certificates are filed to raise objections, appeals are beginning to be preferred to the Collector under section 91 of the Irrigation Act. Eight such appeals were preferred during the year: in four cases the orders of the Deputy Collector were upheld, and in the remaining four the rates of assessments modified. This is the first year in which such appeals have been preferred.

17. The high floods not only caused extra expenditure on maintenance, but breached the embankment on the left bank of the river Cossye at Jagatpur flooding 30 square miles of country. One consequence of the flood was that remissions to the extent of Rs. 6,021 against Rs. 1,338 in the year previous were granted.

18. The working expenses of the canal, Rs. 2,08,190, were Rs. 12,640 in excess of those incurred during 1892-93, but below the average of the nine years preceding viz. Rs. 2,24,968. On the whole, the year's working of this canal may be considered as successful, though there were many adverse circumstances to contend with.

19. The receipts of the Hijili Tidal Canal were in excess of the year previous, but the expenditure on maintenance and repairs to works was Rs. 50,517 against Rs. 27,372 in 1892-93, so that the net revenue fell from Rs. 20,301 to Rs. 2,695. The increased cost of repairs was due to the cyclone of May 1893 and to the silt clearing of Range I. The Superintending Engineer on this subject observes:—

"With its short ranges and proportionately increased share of locks and buildings for its length and heavy influx of silt, the mileage rate must always be heavier on the Hijili than on the Orissa Coast Canal. The rate per mile for the year was Rs. 1,948. The average expenditure on maintenance of the canal for the past ten years has been Rs. 47,777, or Rs. 1,647 per mile."

He adds in regard to the works recently sanctioned:—

"Although the proposals for remodelling will not affect materially the cost of maintenance, they will increase the receipts by avoiding the losses of traffic caused by closures, as the work of clearance can go on with an open canal."

20. The net revenue of the Sone Canals was Rs. 1,84,699 in 1893-94 against Rs. 3,01,334 in the year preceding and an average of Rs. 1,74,584. The receipts, Rs. 9,25,675, though in excess of the average, were Rs. 1,26,906 less than last year, due to the *rabi* irrigation of 1893, collections on which are made in the year 1893-94, being much less than in 1892. The working expenses, Rs. 7,40,976, were Rs. 10,271 less than in the year preceding, but Rs. 49,072 in excess of the average. The excess does not occur in the item Repairs and Maintenance, the expenditure under that head being less than any of the last ten years, except 1891-92. It is chiefly due to expenditure debitable to capital having ceased, and to the whole of the establishment employed being in consequence charged to the revenue accounts of the canal. The charges for revenue establishment have also increased, though less than last year, but some reduction under this head may be expected when the reduced fees for headmen take effect.

21. The area under irrigation was 366,776 acres against 410,761 acres in 1892-93, and an average of 346,056 acres. The area irrigated in the *kharif*

season, 280,528 acres, was in excess of any year to date. The *rabi* irrigation, 66,458 acres, though up to the average, was only about one-half of the area irrigated in that season in 1892-93, and less than one-third of the area irrigated in 1891-92. The rainfall in those three years was as follows:—1891-92, 26·82 inches; 1892-93, 37·69 inches; 1893-94, 46·62 inches. There was a copious fall of rain in October, which was beneficial both to the *kharif* and *rabi* crops, and this was supplemented by a good fall in November, so that there was generally a sufficient supply of moisture in the soil to mature the *rabi* crops with little or no canal irrigation. The area under long-term leases continues to increase, as will be seen from the statement following:—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Acres.
Long leases	224,268	223,556	234,791	271,966	291,746
Short „	81,014	57,458	239,932	138,795	75,030
	305,282	281,014	474,723	410,761	366,776

The area charged under the head unauthorized irrigation was 681 acres only, against 3,707 acres in the year preceding, whilst the assessments for waste of water amounted to Rs. 615 against Rs. 105 in the previous year.

22. The Superintending Engineer has called attention to the fact that in some villages 80 per cent. and even more of the total area of the village is irrigated in the *kharif* season. He remarks that "*as matters now are, only about half the villages which are commanded obtain water, and the other half get none, partly on account of the comparative difficulty in irrigating them, partly because they are on lower ground and need it less, but mainly because their neighbours absorb it all. It does not seem to be right that villages in favourable situations should be allowed to absorb the benefits of the canals to the exclusion of others.*" The sanitary objections to so copious a delivery of water are also obvious. Instructions have therefore been issued which will tend to restrict the area irrigated in the *kharif* season in villages where the area irrigated is excessive, but they will require to be worked with caution, partly because leases with good and definite boundaries are necessary, and partly because it is better to permit the water to be used where it is appreciated, rather than to permit it to run to waste. The continuance of the endeavour to limit the supply of water to about 50 per cent. of the cultivated area of any village and to reserve the balance for villages which do not now receive it, will depend somewhat on the extent to which that balance is utilised. During the year now current, chiefly owing to the good rainfall there has been a sufficient supply of water for irrigation in the *kharif* season to an area in excess of that for which applications have been accepted.

23. In last year's Resolution the late date at which the demand statements reached the Deputy Collector was unfavourably commented on. There has this year been a marked improvement. Out of 118,837 acres assessed during the year, the demand statements for 21,116 acres only reached the Deputy Collector after the water-rates were due, and out of these 17,259 acres refer to hot—weather irrigation, the demand statements of which it is stated were ready, but not forwarded owing to some misunderstanding as to the rules. The season was, it is true, an easy one, the area of long leases lapsing being small, but it is clear that, with proper arrangements, all but a fraction of the demand statements can be submitted at the proper date, and the Lieutenant-Governor expects that this will in future be done.

24. The number of certificate cases filed decreased from 2,903 in 1892-93 to 2,219 in the year under review, and the balance pending at the close of the year from 153 to 100. Out of those pending, all except 53 had been disposed

of on the 12th July, when the Deputy Collector's report was submitted. The Collector of Shahabad, to whom the Deputy Collector is immediately subordinate in regard to certificate cases, remarks:—"*The working of the Certificate Act shows a marked improvement.*"

25. The most unsatisfactory feature of the year's working is the increase in the balance at the close of the year from Rs. 87,790 to Rs. 1,01,858. The explanation of the Deputy Collector is as follows:—

"The comparatively heavier balance at close of the last year is chiefly due to several of the collecting officers having been drawn away from their work for some time for giving evidence in the case of Empress *versus* Ram Dour Lal during the busiest working time, that is, March, and this case having mostly engrossed my attention, keeping me confined at head-quarters, and thus depriving me of the opportunity of personally visiting all such villages where the rate-payers are refractory. No sooner the case was over I began this work, and have already succeeded in reducing the arrears."

The defendant, Ram Dour Lal, who was charged with embezzling Rs. 690, was convicted and sentenced to four years' imprisonment. There are three other cases in regard to embezzlements which occurred in 1891-92 and 1892-93, in which warrants have been issued against former officials employed in the Collection Department. The frauds occurred chiefly in regard to items wrongly written off as irrecoverable, but which were actually recovered. Alterations in the system of collection and accounts have been made which will render it more difficult to defraud Government in this way in future.

26. The increase in the number of permanent outlets from 2,748 in 1892-93 to 3,036 in the year under review, and in the length of registered village channels from 1,125¼ miles to 1,341 miles is satisfactory.

27. The Lieutenant-Governor attaches much importance to the crop experiments which are annually made to ascertain the outturn of canal irrigated land cultivated with rice. The experiments have been carried out in the Sone Circle with considerable exactitude for a series of years, and they have recently been also carefully made in the Orissa and South-Western Circles. The table below gives the average of the experiments made during the last year:—

Name of Canal.	Number of experiments made.	Quality of crop.	Average outturn per acre in maunds.	
			Paddy.	Straw.
1	2	3	4	5
Sone Canals	95	Good ...	33·58	77·68
Ditto	139	Average ...	22·92	53·55
Orissa Canals	98	Good ...	21·32	28·93
Ditto	116	Average ...	13·92	22·32
Midnapore Canal	65	Ditto ...	21·74	44·55

The results in the Sone Circle are not quite so good as in 1892-93.

The discrepancies noticed last year between the outturn in Orissa and in the Sone still continue. It is believed that they are due to the paddy in Orissa being mostly sown broadcast. The matter is receiving special attention, and an Executive Engineer, who was previously in the Sone and is now in the Orissa Circle, will this year make very careful experiments both on broadcast and transplanted paddy.

28. The table following gives the financial results of the canals classed as Minor Works and Navigation for the years 1892-93 and 1893-94, and the average of the nine years ending 1892-93. The Saran Canals, for which capital and revenue accounts are kept, are excluded, as they are practically closed,

and the Eden Canal, from which revenue is derived, though capital and revenue accounts are not kept, has been included.

† Average of five years.

29. The Calcutta and Eastern Canals are purely navigation works. The receipts have fallen off from Rs. 4,80,114 in 1892-93 to Rs. 4,20,541 in the year under review, the average receipts for the nine years preceding being Rs. 5,23,765. The falling off in revenue is considerable and progressive, as there is a further decline in the year now current. Excluding miscellaneous receipts, the decrease in the tollage of boats, compared with the previous year amounts to Rs. 55,290. The Superintending Engineer ascribes the smaller revenue to a number of reasons, but chiefly to the very large increase in the number of steamers and flats plying *viâ* the Nadia Rivers and the Sunderbunds. Vessels taking the latter route pay a nominal toll only. There were, however, other causes for the diminished traffic: there was a short rice crop in the Eastern districts, and the jute traffic is being more largely diverted yearly to the railway and steamers. The Bengal Central Railway, which is now worked in connection with steamers plying to Khulna, which pay no toll, is getting a larger share of the traffic. Further, independently of the actual decline in traffic, flats are being largely used instead of native boats, resulting in a considerable loss in tolls, the canal measurement of native boats being, compared with the cargo carried, much in excess of that of flats. One potent reason of the decrease in traffic is the deterioration of parts of the canal route, more especially the Bhangore khal, which has yearly to be closed for a greater length of time. Measures

for remedying this defect are now under consideration. At present tolls are only charged on boats coming to Calcutta, the return journey being free. Excluding a refund of Rs. 28,498, credited to the canals in 1892-93, the working expenses of the canals were Rs. 2,58,631 against Rs. 2,52,177 in the preceding year, and an average of Rs. 2,66,312. There is no hope of diminishing the working expenses, except by measures involving an increase to the capital cost of the canals, which would render extensive silt clearing unnecessary. It is, however, rather the diminished income than the increased expenditure which has resulted in the net income of the canals having fallen to Rs. 1,33,412 from an average of Rs. 2,57,453. Something may be done to improve the revenue by re-adjusting the tolls, so that cargo which at present pays nothing shall contribute, but the only effectual measure will be to improve the canals so that they may offer equal facilities with other modes of transit. In the present state of the canals it is believed that Insurance Companies decline to accept risks on goods forwarded by this route. The charge for tollage is Rs. 0·69 per cent. on the value of the goods carried.

The increase in the number of missing toll tickets from 169 to 252 is not satisfactory.

During the ten years ending with 1893-94, the expenditure on the steamer route through the Sunderbunds has aggregated Rs. 67,266, whilst the tolls received have been Rs. 48,360 only. The charge is very low, viz., Rs. 5 on a steamer leaving and arriving at Calcutta.

30. The Orissa Coast Canal was worked at a loss of Rs. 1,566 against a loss of Rs. 14,718 in 1892-93, and an average loss of Rs. 16,940 since it has been opened for traffic. Both the expenditure and the receipts were largely in excess of any former years. The expenditure was wholly due to repairing damages caused by the cyclone of the 26th May 1893. The Superintending Engineer says that the canal banks were for miles the only land above flood, and that in places they were topped and greatly injured. One of the flood gates of the Bhaitghur lock was unshipped and damaged, and the escapes at Bhograi, Sartha and Jamba, which had not been repaired at the close of the year, were greatly injured. The increased receipts were due to the heavy pilgrim traffic to Puri in July and August 1893. The receipts from the steamer companies were Rs. 25,410, or Rs. 7,038 more than in the preceding year.

31. The receipts derived from the Nadia Rivers were Rs. 5,731 in excess of the previous year, but there was also an increased expenditure of Rs. 16,382.

The net revenue was Rs. 24,594 only, compared with an average of Rs. 87,275. The unsatisfactory returns are ascribed to the increased cost of the training works at the head of the rivers. On this subject the Superintending Engineer makes the following remarks:—

"The entrance of the Bhagirathi was in a better condition than in the year before, and further efforts will be made to improve it. Owing to a large sandbank having formed in the Ganges in front of the entrance of the Bhairab, the channel draws its supply from 4 miles below the head, and the greater part of this had to be trained. The Jalangi continued in much the same state as in the year previous. The head of the Mathabhanga closed again after the rains, the same conditions prevailing as in 1892. The training works were very successful on the Bhagirathi and Bhairab-Jalangi. The channel at Kasiadanga shoal in the Lower-Bhagirathi was diverted, shortening the river route by about two miles."

32. The constant increase in the expenditure on these rivers, which in 1893-94 reached Rs. 1,46,657 against an average of Rs. 1,03,571, is not satisfactory, and the Superintending Engineer will be directed to take steps to impose a check on the expenditure to be incurred in future years. A considerable portion of the money spent during the last two years appears to have been expended on a hopeless attempt to keep open the head of the river Mathabangha.

33. The area at present irrigable by the Eden Canal is about 72,000 acres. In 1892-93, when the rainfall was very deficient, the area irrigated was 71,333 acres, whilst in the year under review when the rainfall was abundant and seasonable, 11,739 acres only were irrigated. The collections were Rs. 35,909 against Rs. 31,043 in 1892-93, whilst the expenditure was Rs. 50,340

against Rs. 37,160 in that year. Of the sum realized Rs. 28,891 was collected by canal officers and Rs. 7,018 realized under the certificate process by the Collectors of Burdwan and Hooghly.

34. The actual cost of repairs was Rs. 35,619 against Rs. 26,478 in the previous year, Rs. 16,926 having been expended on silt clearing against Rs. 4,002 in 1892-93. The heavy deposit of silt was a consequence of the extensive area under irrigation in the year 1892-93. There are still difficulties in regard to the title of Government to the old river channels through which the water supplied by the Eden Canal is distributed. Rules under the Irrigation Act for the future working of these canals have lately been sanctioned, and it is trusted that in regard to the matters still under discussion, the good sense of the landholders and occupiers interested will induce them to agree to terms under which it will be possible to maintain steady irrigation from this canal, which was devised and is prinicipally used as a means of supplying wholesome water for domestic purposes in the districts of Burdwan and Hooghly.

35. The Saran Canals have, during the last three years, been worked under an agreement with the proprietors of the Moniara and Sadowa Indigo Concerns, which terminated on the 1st of April 1894, and has not been renewed. The loss to Government on the three years working amounted to Rs. 9,660. There are 18½ miles of canals, but no distributaries or village channels, and it is impossible to carry out irrigation on any systematic plan. It has now been decided to keep these canals closed until terms, which will enable Government to realize some return for the money expended, have been acceded to. The area irrigated during the year was 1,568 acres only against 3,560 in the previous year.

36. The Madhuban Canal is a small work in Champaran, from which 3,071 acres were irrigated in the year under review and 6,400 acres in 1892-93. The weir across the Teur river continues to give trouble, and the cost of maintenance, on which Rs. 8,383 were expended during the year, is very heavy. No water-rates are levied in respect to irrigation from this canal.

37. In spite of the character of the season, which in many respects was unfavourable, progress has been made in many directions, and the Lieutenant-Governor notices with satisfaction the progress made in the Sone Circle in preparing the demand statements more expeditiously, and the reduction in the arrear balances on the Midnapore Canal. The thanks of this Government are due to Mr. Odling for the vigilance and sagacity which have distinguished his supervision of the Bengal Canals, both on the administrative and the professional side. The names of the officers commended by the Chief Engineer have been noted.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note, and its accompaniments, be submitted to the Government of India in the Public Works Department, and published in the *Calcutta Gazette*. Also that it be circulated to other Governments and to all Departments and Officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

K. H. STEPHEN,

Under-Secretary to the Govt. of Bengal.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by C. W. ODLING, ESQ., M.E., M. INST. C.E., *Chief Engineer, on the Canal Revenue Reports of Bengal for the year* 1893-94.

DURING the year 1893-94, the Capital expenditure on Irrigation Works, for which Capital Accounts are kept, amounted to Rs. 5,60,446 for direct and Rs. 10,709 for indirect charges:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	5,17,947	9,358	5,27,305
Minor Works and Navigation ...	42,499	1,351	43,850
Total ...	5,60,446	10,709	5,71,155

2. The total Capital outlay at the end of the year 1893-94, including interest charges, was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works—			
Productive Public Works ...	6,18,05,909	17,26,321	6,35,32,230
Minor Works and Navigation—			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial. }	1,00,60,760	2,84,781	1,03,45,541
Total ...	7,27,32,669	20,11,102	7,47,43,771

3. Divided under the different projects the above outlay is shown in the following statement:—

Works.	During 1893-94.			To end of 1893-94.

REVENUE

4. The total receipts, working expenses, and charges for interest for the year 1893-94 and four previous years in respect of the works which are classed as Major Irrigation Works are shown in the statement below :—

Particulars.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts from all sources (less refunds of revenue)	15,04,474	13,39,141	15,98,608	18,83,347	16,65,005
Working expenses (direct and indirect charges)	14,22,368	14,32,136	14,37,935	14,85,393	15,41,144
Net revenue ...	82,106	(—) 92,995	1,60,673	3,97,954	1,23,861
Charges for interest	23,65,030	23,87,119	24,16,363	24,42,363	24,61,878
Deficit	22,82,924	24,80,114	22,55,690	20,44,409	23,38,017
Rate per cent. on Capital outlay ...	3·74	4·02	3·61	3·24	3·68

INTEREST.

5. The total amount of interest payable to the Imperial Treasury on account of Major Irrigation Works for the year 1893-94 is Rs. 24,41,474.

FINANCIAL RESULTS.

6. The financial results to the end of the year 1893-94 of both Major Irrigation Works and Minor Works and Navigation, of which Capital and Revenue Accounts are kept, are shown in the statement below:—

		Major Irrigation Works.		Minor Works and Navigation.
		Rs.		Rs.
Direct revenue	...	2,31,76,018		2,34,58,198
Working expenses (direct charges)	...	2,26,97,632		99,11,679
Results on direct charges only ...	Profit	4,78,386	Profit	1,35,46,519
Indirect charges debitable to revenue	...	12,75,786		2,92,351
Results on both direct and indirect charges	Loss	(—)7,97,400	Profit	1,32,54,168
Charges for interest on Capital ...	...	4,61,36,680		Not calculated.
Net results, including interest to end of 1892-93	Loss	(—)4,69,34,080		.....

7. The financial results to the close of the year 1893-94 of Minor Works and Navigation, of which only Revenue Accounts are kept, are as follows:—

		Rs.
Direct revenue		87,38,021
Working expenses (direct charges)		48,03,683
Results on direct charges only	Profit	39,34,338
Indirect charges debitable to revenue		2,55,425
Results on both direct and indirect charges ...	Profit	36,78,913

8. The receipts from, and expenditure on, Irrigation, Navigation, and Agricultural Works during the year 1893-94, as compared with those of the year 1892-93, are shown below:—

	1892-93. Rs.	1893-94. Rs.
RECEIPTS.

* Exclusive of lands surreptitiously irrigated for which leases were granted in subsequent years.

The year's working and its financial results will now be dealt with separately for each of the canal systems of the province, as in previous years.

GENERAL.

In all statements showing totals of receipts or expenditure, the figures are those of the Examiner of Accounts. In dealing with details the figures of the Commissioner or of the Superintending Engineer have been taken.

ORISSA CANALS.

CAPITAL ACCOUNT.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1893-94.	Outlay to end of 1893-94.
1	2	3
DIRECT CHARGES.	Rs.	Rs.
I.—Works	2,83,658	1,83,75,855
II.—Establishment	57,147	45,82,701
III.—Tools and plant	16,057	20,39,972
IV.—Suspense accounts	(—)15	1,46,299
Loss by exchange	...	2,68,070
Total ...	3,56,847	2,54,12,897
V.—*Less*—Receipts on Capital account	32	86,201
Net total Direct Charges ...	3,56,815	2,53,26,696
INDIRECT CHARGES.		
Capitalization of abatement of land revenue	53	33,183
Leave and pension allowances	8,000	5,37,704
Total Indirect Charges ...	8,053	5,70,887

The principal works charged to Capital account which were in progress during the year were:—The extension of the Taldanda Canal from the 28th to the 52nd mile; this work is practically complete; the remodelling of the existing danda Canal from Biribatty to Tarpore; about five lakhs of earthwork and six lakhs of turfing remain to be done to complete the work; drainage cuts in the areas commanded by the distributaries of the Taldanda and Machgong extension canals; the Byturni right embankment from 11 to 20 miles; the Burra Khursua left embankment. The self-acting sluice and cut in connection with the Bhimai Had drainage scheme were completed, and good progress was made with the distributaries, several of which, aggregating 144¾ miles in length, were finished during the year.

INTEREST ACCOUNT.

2.—INTEREST ACCOUNT.

	Rs.
Interest charges to end of 1892-93	1,76,61,689
Ditto for 1893-94	10,05,932
Total ...	1,86,67,621

REVENUE ACCOUNT.

3.—REVENUE ACCOUNT—(Actuals).

Particulars.	Expenditure—		Particulars.	Receipts—	
	During 1892-93.	During 1893-94.		During 1892-93.	During 1893-94.
1	2	3	4	5	6
Direct charges.	Rs.	Rs.		Rs.	Rs.
I.—Works, maintenance, and repairs ...	3,79,311	4,14,566	Water-rates ...	3,52,369	2,09,542
			Navigation ...	1,18,757	1,43,911
II.—Revenue management ...	95,913	90,828	Miscellaneous ...	26,532	23,122
			Total ...	4,97,658	3,76,575
Total Direct Charges ...	4,75,224	5,05,394	*Less*—Refunds of revenue.	283	1,210
			Net total receipts	4,97,375	3,75,365
Indirect charges ...	30,283	30,083	Deficit ...	8,132	1,60,112
Total Working Expenses	5,05,507	5,35,477	Total ...	5,05,507	5,35,477

Note.—The details by heads of expenditure for the year 1893-94 and nine preceding years will be found in the table given in paragraph 12 following:—

The total receipts were Rs. 1,22,010 less, and the total expenditure Rs. 29,970 more than last year, the result being a deficit of Rs. 1,60,112. Omitting indirect charges the deficit is Rs. 1,30,029. The receipts under water-rates in 1892-93 were abnormal, and due to the outstandings of many years being called up, while a much larger area than usual was also under irrigation in that year. The reduced receipts of 1893-94 are due to the arrears to be recovered being small and to the smaller area under irrigation. The increased expenditure was mainly due to the fitting of the Byturni weir with shutters on the Sone pattern, and to a special expenditure of Rs. 31,107 required

to make good the damage caused by the cyclone and floods of the previous year.

EARNINGS. 11. The following statement shows the earnings, by which is meant the revenue due on the irrigation of the year, whether or no the demand statements were prepared before the 1st of April or not as opposed to collections and actual outlay, for the years 1892-93 and 1893-94:—

Earnings.	1892-93. Rs.	1893-94. Rs.
Irrigation ...	2,40,200	1,50,146
Navigation ...	1,18,757	1,43,911
Miscellaneous ...	26,532	23,122
Total	3,85,489	3,17,179
Deduct refunds	283	1,210
Net earnings ...	3,85,206	3,15,969
Outlay ...	5,05,507	5,35,477
Net deficit ...	1,20,301	2,19,508

As regards irrigation the assessed revenue shows a decrease of Rs. 90,054 compared with that of the previous year, which is entirely due to the falling off of 59,129 acres in the leased area, consequent on the favourable rainfall. The actual collections during the year amounted to Rs. 2,09,542, and was Rs. 59,396 in excess of the assessed revenue of the year. This is due to the collection of arrear balance.

FINANCIAL RESULTS. 12. The revenue receipts and working expenses for the last ten years are tabulated below:—

PARTICULARS.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

The completion of 144½ miles of distributaries during the year resulted in an increase of 64,606 acres to the area irrigable. The total area protected from floods was increased by 50,000 acres owing to the completion of the Burra Khursua left and Byturni right embankment.

14. In the following statement is shown the average rainfall at thirteen stations situated within the canal irrigated area for the kharif and rabi seasons of the last five years :— RAINFALL.

		AVERAGE OF THIRTEEN STATIONS.

The total rai
panied by heavy
The average rainf
inches. The rain

above the average from August to October, after which it altogether ceased until March, when only a small quantity of rain fell. The rainfall was seasonable for the crops, and canal irrigation was not necessary.

FLOODS. The average rainfall of the year at ten stations in the Central Provinces, which are drained by the Mahanadi, was 59·74 inches, against 62·43 inches in 1892-93.

15. The highest floods occurred in the month of September. The highest recorded readings of the principal rivers for the year and up to date are given in the following statement:—.

NAME OF RIVER.	Locality.	1892-93.		1893-94.		HIGHEST RECORDED.

* A still higher flood than that of 1881 occurred on 26th July 1894, when the gauges above and below the weir read 69·60.

IRRIGATION. 16. The areas of each crop irrigated during the last ten years with the yearly rainfall are shown in the following statement:—

YEAR.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1884-85 ...	54,181	2,994	197	57,372	50·40
1885-86 ...	70,563	1,605	171	72,339	52·59
1886-87 ...	75,115	2,440	154	77,709	60·07
1887-88 ...	108,867	502	137	109,506	47·84
1888-89 ...	156,319	2,779	194	159,292	49·07
1889-90 ...	180,568	5,897	162	186,627	67·95
1890-91 ...	175,829	4,250	220	180,299	63·17
1891-92 ...	173,453	3,943	289	177,685	61·03
1892-93 ...	158,025	2,594	333	160,952	56·43
1893-94 ...	100,406	2,904	216	103,526	74·83

The whole of these areas was assessed.

17. The nature of the assessment of the crops irrigated during the year, as compared with the figures of the two preceding years, is shown in the statement below:— ASSESSMENT OF CROPS.

CROP.	Rate per acre.	1891-92.		1892-93.		1893-94.	
		Area.	Amount.	Area.	Amount.	Area.	Amount.
1	2	3	4	5	6	7	8
	Rs. A. P.	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.
Kharif ... ... Flow ...	1 8 0	(a) 168,655	2,56,314	(b) 155,727	2,33,448	(c) 94,679	1,41,916
Lift ...	1 0 0	(a) 4,787	4,790	(b) 2,197	2,197	(c) 5,553	2,876
Perennial crops ... ... Flow ...	6 0 0	141	843	125	748	135	812
Lift ...	4 0 0	148	594	208	834	81	325
Rabi ... ... Flow	0 8 0 to 2 0 0	3,259	3,435	2,291	2,408	2,713	3,239
Lift ...	0 5 0 to 1 8 0	632	513	303	263	191	199
Unauthorised irrigation Kharif	...	11	20	101	302	174	779
Rabi	...	52	78	...	...	...	...
Total ...	...	177,685	2,66,587	160,952	2,40,200	103,526	1,50,146

(a) 170,816 acres 5-year lease, and 2,626 acres annual lease.
(b) 156,566 acres 5-year lease, and 1,358 acres annual lease.
(c) 100,232 acres 5-year lease only.

The area of unauthorised irrigation assessed was 174 acres, against 101 acres in 1892-93. There was a decrease of kharif irrigation on all the canals, except the Gobri and Jajpur, the total amounting to 57,619 acres. Under rabi there was also a decrease on all the canals with the exception of the Kendrapara Canal, the High Level Canal, Range II, and the Jajpur Canal.

Of the commanded area 25·18 per cent., and of the area provided with distributaries 26·84 per cent., were under lease at the end of the year. These percentages are less than those of last year, owing partly to the area provided with distributaries having been inceased by 64,606 acres, and partly to the decrease of the leased area.

18. The duty obtained on each of the principal canals, and calculated from the gross discharge at the canal heads is given in the following table for the year under review and two preceding years:— DUTY OF WATER.

	PARTICULARS.	Kendrapara Canal system.	Taldunda Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.
1		2	3	4	5	6
1893-94	Kharif ... Acres	59,393	11,941	10,468	2,000	15,801
	Duty on gross supply	**67·56**	**73·82**	**35·95**	**142·25**	**113·50**
	Rabi ... Acres	1,866	113	23	52	1
	Duty on gross supply	**3·78**	**1·21**	**0·16**	**6·21**	**0·44**
1892-93	Kharif ... Acres.	65,724	36,327	20,950	2,285	32,194
	Duty on gross supply	**64·93**	**114·97**	**60·51**	**119·76**	**98·95**
	Rabi ... Acres	2,004	264	275	44	7
	Duty on gross supply	**5·80**	**13·03**	**1·82**	**74·58**	**0·74**
1891-92	Kharif ... Acres	70,686	41,570	22,394	2,451	36,189
	Duty on gross supply	**80·05**	**103·99**	**84·75**	**24·95**	**117·69**
	Rabi ... Acres	3,494	336	29	62	22
	Duty on gross supply	**7·60**	**3·50**	**0·14**	**2·88**	**1·02**

The rabi irrigation is so small that it is not worthwhile considering the duty in that season.

The results regarding the duty of water for the kharif season are shown in the following statement:—

		Kendrapara Canal system.	Taldunda Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.	Jajpur Canal.
1		2	3	4	5	6	7
Area of kharif irrigation ...	Acres.	59,393	11,941	10,468	2,000	15,801	1,019
Average gross discharge at head of canal ...	C. ft.	879·13	161·75	261·20	14·06	139·21	9·74
Average discharge utilized ...	„	767·96	145·75	108·56	14·06	130·66	9·74
Duty of quantity entering canal	Acres.	67·56	73·82	35·95	142·25	113·50	104·62
Ditto utilized	„	77·34	81·93	96·42	142·25	116·34	104·62

The duty obtained on the Kendrapara Canal was slightly in excess of that obtained last year but less than the duty obtained in 1891-92. On the Taldunda Canal the duty obtained was 41·15 acres less than in the previous year, and 30·17 acres less than in 1891-92, a result which, for a year of seasonable rainfall as that of 1893-94, is remarkable and has not been explained. The duty on gross supply, as also on the discharge utilized, was less on the High Level Canal, Range I, and more in Ranges II and III than in the previous year.

The duty on the utilized discharge on the Kendrapara Canal in the first two weeks of October, when the rain held off and the demand for canal water was fairly keen, was 44·30 acres.

CROP EXPERIMENT.

19. To test the outturn of crops, 319 experiments were made during the year—214 of them were on lands irrigated by canal water, and 105 on unirrigated lands. The results obtained are tabulated below:—

Division.	Number of experiments.	Outturn per acre from irrigated land.		Number of experiments.	Outturn per acre from unirrigated land.		Value of outturn from irrigated land.		Value of outturn from unirrigated land.	
		Paddy.	Straw.		Paddy.	Straw.	Rice at 17 seers 14 chs. per rupee.	Straw at 9 maunds per rupee.	Rice at 17 seers 14 chs. per rupee.	Straw at 9 maunds per rupee.

BALANCES.

20. The balances outstanding at the commencement of the ye review were as follows:—

		Rs.
Water-rates		89,816
Miscellaneous revenue		·17
Total ...		89,816 61·03

as against the balances outstanding on 1st April 1894, which w 56·43

		Rs
Water-rates		63,· 74·83
Miscellaneous revenue		•
Total		

21. The table below shows the balances, assessments, and recoveries of water-rates for the last five years:— AND COLLECTIONS.

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realisations.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90 ...	1,14,597	2,87,277	4,01,874	1,99,844	25,268	1,76,762
1890-91 ...	1,76,762	2,69,650	4,46,412	2,09,806	38,242	1,98,364
1891-92 ...	1,98,364	2,82,880	4,81,244	2,17,256	30,284	2,33,704
1892-93 ...	2,33,704	2,61,023	4,94,727	3,52,368	52,543	89,816
1893-94 ...	89,816	1,90,824	2,80,640	2,09,542	7,748	63,350

The results disclosed by these figures are very satisfactory. The outstanding balance, which was small, has been still further reduced.

The amount realised by the Deputy Collector on water-rates and miscellaneous revenue was Rs. 2,26,851 against Rs. 3,73,244 so collected in 1892-93.

22. In the following table is shown (approximately) the amount of certificate work done in each district:— CERTIFICATES.

	CUTTACK.				BALASORE.				TOTAL.

REMISSIONS.

24. The amounts remitted and written off as irrecoverable during the year on account of water-rates aggregated Rs. 7,748 only as compared with Rs. 52,541 written off under the same heads in 1892-93. The details are given below :—

Revision of Assessment.

		1892-93.	1893-94.
		Rs.	Rs.
(a)	Unirrigated crops	17,641	2,640
(b)	Damaged ,, ...	7,421	153
(c)	Chaukidar's jagir	5,048	1,942
	Total ...	30,110	4,735

Remissions.

(a)	Waste land	1,444	63
(b)	Land occupied by canals	175	4
(c)	Twice assessed	244	48
(d)	Barred by limitation	2,664	...
(e)	Excess recovery refunded	990	...
(f)	Change of rates	5,642	1,216
(g)	Erroneous assessments	491	91
(h)	On account of death of defaulters ...	631	...
(i)	Absconding of defaulters	266	...
(j)	Lease cancelled	825	...
(k)	Cyclone damages	3,296	...
	Total ...	16,668	1,422

Written off.

	Irrecoverable demands	7,532	1,591
	Total ...	54,310	7,748
	Deduct remissions under miscellaneous revenue ...	1,769	...
	Net remission ...	52,541	7,748

The large reduction in the amount remitted under the heads "Unirrigated and damaged crops" is due to the change of system in granting leases which was introduced in 1893 and noticed in last year's Revenue Report. Irrespective of the change of system there was a satisfactory reduction in the amount remitted under all heads during the year.

25. The cost of the revenue establishment for the last five years is given in the following statement:— REVENUE ESTABLISHMENT.

	1889-90.	1890-91.	1891-92.	1892-93.	1823-94.
1	2	3	4	5	6
Establishment under Deputy Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowance	22,116	21,848	22,014	31,086	43,981
Temporary establishment	19,112	17,451	17,504	16,020	11,580
Contingencies	4,482	2,928	3,458	4,098	3,811
Headmen's fees	2,244	2,803	6,591	20,040	3,464
Establishment under Executive Engineer.					
Permanent and temporary establishment ...	3,398	3,417	3,447	5,930	7,874
Water-regulation establishment	4,150	4,144	4,127	3,274	3,278
Total ...	55,502	52,591	57,141	80,448	73,988
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	2,09,823	2,19,692	2,28,451	3,73,244	2,32,664
Percentage ...	26·4	23·9	25·0	21·0	31·8

The total cost of the revenue establishments is Rs. 6,460 less than in 1892-93, but omitting the item "Headmen's fees," which represents the arrear charges paid and under which no further charges will be made, the cost of the establishment has increased by Rs. 10,116. The excess is wholly under revenue establishment, and is due to the augmentation of the revenue establishment of the circle in 1892-93. The increase was, however, partly owing to headmen ceasing to be employed. The pay of this extra establishment for the whole year has been charged in the year under review, whereas in 1892-93 they were entertained for only a portion of the year. It is hoped, however, that when the enquiries into the irrigable areas are completed, a considerable reduction in the cost of the revenue staff will be feasible.

26. The tollage receipts of each of the canal systems for the last five years are shown below:— NAVIGATION.

Year.	Taldundah Canal System.		Kendrapara Canal System.		High Level Canal, Range I.		High Level Canal, Range II.		High Level Canal, Range III.		Jajpur Canal.		Total.	
	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
1889-90	31	4,426	75	69,245	33	8,380	12½	3,433	19	1,386	6½	163	177	78,039
1890-91	31	2,148	75	86,807	33	12,220	12½	3,185	19	2,174	6½	318	177	1,06,961
1891-92	55½	4,357	78		33	12,854	12½	3,027	19	1,775	6½	286	204½	1,20,761
1892-93	55½	6,554	78		33	15,278	12½	3,165	19	1,761	6½	275	204½	1,00,503
1893-94	55½	14,369	78		33	14,616	12½	3,091	19	2,026	6½	508	204½	1,19,115

The increase in the total tollage receipts is due mainly to the up traffic on the Kendrapara Canal. This traffic consists chiefly of kerosine oil, and is said to be increasing yearly.

TRAFFIC.

The following table details the traffic (excluding the transport service) of all the canals in Orissa for the last ten years :—

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

TRANSPORT SERVICE.

27. During the year the cost of working the transport service amounted to Rs. 21,917, and the actual receipts were Rs. 24,796. The service therefore worked at a profit of Rs. 2,879. The working charges under miscellaneous include Rs. 7,834 as tollage debited to the account by book adjustment. If this amount be excluded, the profit would amount to Rs. 10,713 against Rs. 7,011 in 1892-93. The increased receipts are entirely due to the large influx of pilgrims during the Car festival at Puri in July 1893 and to the presence in the district of the officers of the Settlement Department, who use the service for the transport of their large establishments and luggage.

MISCELLANEOUS RECEIPTS.

28. The miscellaneous receipts for the last five years are shown in the following statement:—

DETAILS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water	243	222	56	158	46
Plantations	728	1,035	917	1,960	1,244
Other canal produce	568	845	936	1,123	528
Rent of buildings	4,781	3,067	6,332	4,749	4,892
Miscellaneous — Rent of lands ...	7,659	6,793	8,232	9,291	9,247
Miscellaneous — ,, fisheries ...	920	1,039	1,104	972	1,191
Miscellaneous — Cost of process ...	63	6	...	7,420	4,951
Miscellaneous — Sales of old materials	65	100	96	3	...
Miscellaneous — Other items ...	116	601	170	856	1,023
Total ...	15,143	13,708	17,843	26,532	23,122

MAINTENANCE AND REPAIRS.

29. The charges for works and maintenance and repairs during the year were Rs. 2,55,717 against Rs. 2,39,483 in the previous year and Rs. 1,75,467 in 1891-92, distributed as in the following statement:—

	1891-92.	1892-93.	1893-94.
1	2	3	4
	Rs.	Rs.	Rs.
Extensions and improvements	8,679	9,123	29,355
Head-works	48,154	53,456	45,757
Main canals	82,741	1,23,060	1,27,400
Distributaries	15,324	30,033	29,261
Drainage and protective works	10,389	11,997	8,237
Cost of working transport service	10,180	11,814	15,707
Total ...	1,75,467	2,39,483	2,55,717

The amount under Extensions and improvements includes a sum of Rs. 23,830 expended during the year in remodelling the Byturni weir shutters on the Sone pattern against Rs. 8,172 expended last year. It also includes a sum of Rs. 3,840 expended on rubble packing the slopes of the Kendrapara, Gobri, and Gobri Extension Canals. The cost of maintenance and repair in both 1892-93 and 1893-94 was abnormal on account of the floods of July 1892 and the cyclone of May 1893. The expenditure in these years is useless for purposes of comparison with each other, and will be compared with the expenditure of 1891-92, which is the lowest on record. The average expenditure for the nine preceding years on maintenance and repairs only was Rs. 2,42,329.

HEAD-WORKS

30. The cost of maintenance of the weirs was Rs. 39,022 out of the total Rs. 47,871 spent on head-works. Details are given below :—

NAME OF WEIR.	Length.	EXPENDITURE.			RATE PER RUNNING FOOT.		
		1891-92.	1892-93.	1893-94.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6	7	8
	Feet.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Naraj ...	3,833	3,194	4,031	5,621	0·83	1·05	1·48
Mahanadi ...	6,349	19,484	15,136	14,718	3·07	2·38	2·32
Beropa ...	1,980	8,433	9,546	4,043	4·27	4·77	2·04

Total of all weirs ...	18,497	38,681	42,666	39,022	2·09	2·30	2·11

MAIN AND BRANCH CANALS.

31. The expenditure on each canal for the last three years is shown below :—

CANALS.	1891-92.			1892-93.			1893-94.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara	39	24,459	627	39	40,132	1,029	39	38,112	977
Ditto extension ...	15	2,442	163	15	7,639	509	15	17,901	1,193
Gobri	15	10,286	685	15	7,747	517	15	8,045	536
Do. extension	9	7,516	835	9	5,008	556	9	4,737	526
Pattamundi	47	4,367	93	47	8,526	181	47	7,698	164
Taldundah	51¼	7,587	146	51¼	14,051	271	51¼	11,053	213
Machgong	32	6,671	208	32	11,163	349	32	11,097	346
High Level, Range I ...	33	9,160	277	33	8,914	270	33	12,266	371
Ditto, do. II ...	12½	4,071	326	12½	6,836	547	12½	4,539	363
Ditto, do. III ...	19	4,907	258	19	6,870	362	19	7,009	369
Jajpur Canal	6¼	1,275	196	6¼	1,932	297	6¼	1,547	237
Total ...	279¼	82,741	295	279¼	1,18,818	425	278¼	84,004	395

The expenditure was more than that of 1891-92 on all the canals except the Gobri canal and the Gobri extension canal. The abnormal expenditure on the Kendrapara Extension Canal includes Rs. 16,384 for filling breaches caused by the floods of 1892. The excess on the High Level Canal, Range I, is due to the renewal of the upper gates of the Imamnugger lock and to very heavy expenditure on weed clearance. The excess on the High Level Canal, Range III, is due to extra earthwork required at the tail end of the canal and to the cost of thorough repairs to the inspection bungalows. The expenditure on the Kendrapara canal includes the cost of raising the banks of the canal 4 feet above the high flood of 1892. The excess expenditure in all the canals is due to the cost of the repairs to the damage caused by the cyclone.

DISTRIBUTARIES.

32. The average mileage rate for the maintenance of distributaries was Rs. 38·06 as compared with Rs. 39·06 in the previous year, and Rs. 20·94 in 1891-92:—

	1891-92.			1892-93.			1893-94.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Perile.
1	2	3	4	5	6	7	8	9	10
DISTRIBUTARIES.	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara Canal System	357	6,574	18·41	357	14,426	40·49	357	11,182	31·32
Taldundah Canal	71½	1,106	16·30	71½	3,784	52·93	71½	2,602	36·97
Machgong Canal	122½	2,753	22·52	122½	6,034	41·17	122½	4,693	38·46
High Level Canal, Range I	131½	2,063	20·29	131½	2,945	22·43	131½	4,648	35·48
Ditto, do. II	.....	.....	.....	.....	.....	.....	.....	.....	.....
Ditto, do. III	49½	2,168	43·80	49½	2,164	43·71	49½	3,600	73·46
Pattamundi Canal	.....	.....	.....	37½	680	18·25	37½	2,477	66·95
Total ...	731½	15,324	20·94	768½	30,033	39·06	768½	29,202	38·06

The lengths of distributaries in the above are those which have been brought on the revenue account, and consequently differ from the lengths given in paragraph 13 which include all so far advanced as to be fit for use, whether the capital account is still open or not.

The cost per mile of repairs to distributaries was abnormally high in consequence of the heavy repairs required to make good the damage caused by the cyclone and floods, and of clearing and practically remodelling some of the distributaries.

DRAINAGE AND PROTECTIVE WORKS.

33. The most important works under this head were the raising of the flood bank of the Kendrapara Extension Canal and flood embankments, and the repairs to the embankments on the High Level Canal. The total expenditure on drainage and protective works was Rs. 9,286 against Rs. 14,525 in 1892-93.

DREDGING AND SILT-CLEARING.

34. The cost of silt clearing and dredging during the year 1893-94 is given in the following table:—

	Silt-clearing.			Dredging.		
	Quantity.	Cost.	Rate per 1,000 c. ft.	Quantity.	Cost.	Rate per 1,000 c. feet.
1	2	3	4	5	6	7
	C. feet.	Rs.	Rs.	C. feet.	Rs.	Rs.
Kendrapara Canal	2,527,051	7,949	3·15	383,587	2,395	6·24
„ Extension ...	26,250	35	...	52,685	134	2·54
Pattamundi Canal	39,660	202	...	...	...	...
Gobri Canal	121,611	415	3·41	233,425	527	2·26
„ Extension	5,530	45	...	18,000	146	...
High Level Canal, Range I ...	251,387	745	2·95	...	...	...
Taldundah Canal	422,769	1,544	3·65	417,573	2,288	5·48
Machgong Canal	...	...	...	...	...	...
High Level Canal, Range II ...	123,715	314	2·54	...	...	...
Jajpur Canal	...	...	...	...	...	...
High Level Canal, Range III ...	208,167	526	2·52	...	...	...
Total ...	3,726,140	11,775	3·16	1,105,270	5,490	4·97

Compared with the previous year the average rate for silt clearing on all the canals was less, being 3·16 against 3·31.

TELEGRAPH OFFICES.

35. The telegraph offices at Jagatpur, Kendupatna and Acquapada continued at work during the year under a guarantee from this Department of Rs. 400 per year for each office. The receipts amounted to Rs. 1,016 as against Rs. 771 in the preceding year. The difference, viz. Rs. 184, between the receipts and the amount guaranteed is a charge against the canal revenue.

It is expected that the telegraph offices will be more generally used as they become more widely known to the public, and that they will soon be self-supporting.

36. The following table shows the state of the plantations for the last two years :— PLANTATIONS.

Year.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.

NOTE.—The details by heads of expenditure for the year 1892-93 and nine preceding years will be found in the table given in paragraph 39 following.

EARNINGS.

38. The net result, calculated on the earnings as opposed to collections, and actual outlay for the year 1892-93 and the preceding year, is shown below:—

EARNINGS.	1892-93.	1893-94.
	Rs.	Rs.
Irrigation	1,40,000	1,30,111
Navigation	1,14,141	1,14,994
Miscellaneous	16,979	24,319
Total ...	2,71,120	2,69,424
Deduct refunds of revenue	176	174
Net earnings ...	2,70,944	2,69,250
Outlay	1,95,550	2,08,190
Net profit	75,394	61,060

FINANCIAL RESULTS.

39. The receipts on Revenue Accounts and Working Expenses of the Midnapore Canal during the last ten years are shown below:—

PARTICULARS.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

LENGTHS OF CANALS AND DISTRIBUTARIES.

40. No alteration was made in the length of the canal open for navigation during the year, which was 72 miles, nor were any additions made to the areas protected or commanded. The following table gives particulars of the canals and distributaries and the areas protected, commanded and irrigated:—

NAME OF CANAL.	1892-93.								1893-94.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command. Average ...	44·48	55·68	51·81	41·28	70·63	.....	56·25

The total rainfall was considerably above the average, and was well distributed, so that there was really but little demand for canal water for irrigation purposes during the year. The following table shows the amounts which fell during the kharif season :—

	Midnapore.	Panchkurah.	Luchmapore.	Mowah.	Average, 1893-94.	Average, 1892-93.
1	2	3	4	5	6	7

Total, kharif season, 1893-94.	32·90	35·73	40·42	39·33	37·09	22·66
Do. 1892-93 ...	20·77	23·76	27·52	18·57	22·66	.....

43. The floods in all the rivers were much higher than in the preceding year. The flood in the Cossye on the 23rd and 24th June 1893 was abnormally high and did considerable damage. The left bank of the Cossye was breached at Jagatpur, and the crops of 30 square miles of country flooded and destroyed. The highest gauge readings of the river Cossye at Midnapore and Panchkurah above and below the weirs and those of the river (Rupnarain) FLOODS.

at Dainan and Kantapukhur, are shown in the statement below, the readings being the height in feet above mean sea level :—

River.	Locality.	1892-93.		1893-94.		Highest recorded.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8
Cossye	Midnapore above weir	17th June 1892 ...	86·10	24th June 1893 ...	91·70	1868 ...	92·30
	Ditto below weir	Ditto ...	79·00	Ditto ...	79·00	Do. ...	91·55
	Panchkurah above weir	10th July 1892 ...	32·10	23rd June 1893 ...	32·50	10th October 1876 ...	35·00
	Ditto below weir	Ditto ...	31·00	Ditto ...	32·20	Ditto ...	34·30
Rupnarain	Dainan	9th September 1892 ...	15·40	11th September 1893	15·80	26th August 1885 ...	17·36
	Kantapukhur	Ditto ...	15·20	26th May 1893 ...	16·50	Ditto ...	16·80

The greatest discharge of the Cossye during the year was 60,486 cubic feet per second on the 24th June 1893. After September the discharge diminished rapidly. The minimum discharge occurred on the 11th February 1894, when only 45 cubic feet per second was registered.

IRRIGATION. 44. The area of each crop irrigated during 1893-94, and the nine previous years, exclusive of unleased areas, compared with the yearly rainfall is shown below :—

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.		Acres.	Inches
1884-85 ..	69,294	1,835	...	69,294	53·01 }
1885-86 ...	68,769		...	70,604	81·28 } *
1886-87 ...	69,762	...	...	69,762	53·05 }
1887-88 ...	64,702	1,162	...	65,864	22·08
1888-89 ...	66,408	3,369	...	69,777	62·13]
1889-90 ..	68,370	440	....	68,810	44·47]
1890-91 ...	82,002	...	...	82,002	55·68]
1891-92 ...	83,905	68	...	83,973	51·81 } †
1892-93 ...	91,217	...	...	91,217	41·28]
1893-94 ...	79,550	6,213	...	85,763	70·63]

* Mean of observations of two stations—Midnapore and Panchkurah.

† Average of four stations throughout the irrigated areas under the Midnapore and Panchkurah weirs.

The area irrigated during the year was 85,763 acres, as compared with 91,217 acres of the previous year, thus showing a decrease of 5,454 acres. The result may be considered satisfactory considering the heavy rainfall, which was favourable to the cultivators and entirely adverse to canal irrigation. The area leased during the year was 88,879 acres, or 3,168 acres more than the area irrigated. The area actually irrigated was less than the area leased for the following reasons:—(1) 664 acres were not supplied with water on account of non-payment of water-rates and (2) the balance did not require water on account of the heavy and seasonable rainfall.

LEASES. 45. The areas under lease at the beginning of the year, the progress of leasing during the year, and the leases which remained in force after its close, are given in the following table.—

Particulars.	Kharif.			Sugarcane and other perennial irrigation.	Rabi.	Total.
	Long leases.	Annual leases.	Surreptitious irrigation.			
1	2	3	4	5	6	7
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Leases in force at the end of 1892-93	91,114	83	20	...	...	91,217
,, which expired at the end of 1892-93 ...	35,297	83	20	...	...	35,400

,, which expired at the end of 1893-94 ...	13,710	...	...	...	62·13	19,023
,, current on the 1st April 1894	68,956	...	...	...	...	68,956

46. The duty obtained from the gross discharge during the past three years is detailed in the following statement:— DUTY OF WATER.

PARTICULARS.				Under Midnapore weir.	Under Panchkurah weir.
1				2	3
1891-92	Kharif ...	Acres		77,631	5,898
		Duty on gross supply		**172**	**64**
1892-93	Kharif ...	Acres ...	...	82,642	7,690
		Duty on gross supply	...	**138**	**54**
1893-94	Kharif ...	Acres ...	...	73,738	4,970
		Duty on gross supply	...	**134**	**9 1**

The duty is high on account of the plentiful rainfall.

47. The table below gives the results of the crop experiments made during the year by the Deputy Collector. CROP EXPERIMENTS.

Statement showing the average outturn of each crop experimented by each officer during the year 1893-94.

NAME OF OFFICER.	Name of crop.	Number of experiments.	AVERAGE WEIGHT PER ACRE IF WEIGHED WET.		AVERAGE WEIGHT PER ACRE IF WEIGHED DRY, OR REDUCED IF WEIGHED WET.		REMARKS.
			Paddy.	Straw.	Paddy.	Straw.

48. The balances, assessments, and recoveries of water-rates on the Midnapore Canal during the last five years are shown in the following statement:— ASSESSMENTS, COLLECTIONS, AND BALANCES.

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1888-89 ...	56,493	1,23,337	1,79,830	91,016	4,041	84,773
1889-90 ...	84,773	1,17,202	2,01,975	1,16,424	34,907	50,644
1890-91 ...	50,644	1,30,595	1,81,239	1,15,438	834	64,967
1891-92 ...	64,967	1,29,822	1,94,789	1,32,981	2,836	58,972
1892-93 ...	58,972	1,39,990	1,98,962	1,49,057	1,338	48,567
1893-94 ...	48,567	1,30,111	1,78,678	1,65,630	6,021	7,027

The figures in the above statement have been furnished by the Special Deputy Collector in charge of the Revenue Division, and agree with those given in the Examiner's memorandum. The increase of Rs. 16,573 in the collections and the large decrease in the balance outstanding at the end of the year are both very satisfactory, and especial credit is due to the Deputy

Collector in charge of the Revenue Division for the favourable results. The increase in the amount remitted is due to the total destruction of the autumnal rice on a large area of canal-irrigated lands between Panchkurah and Danain on both sides of the main canal by the high flood in the river Cossye.

ARREARS. 49. In the following table arrear and current dues are distinguished, the sums composing the demand being distributed by the years in which they were earned, and the proportions of each year's earnings recovered or remitted, are separately shown :—

YEAR.	Amount previously due and unrealised.	Amount falling due within the year.	Total amount due to end of the year.	ADJUSTMENTS OF THE YEAR.				Balance unrealised at end of the month of May 1894.
				Cash recoveries.	Remission authorised.	Written off as being irrecoverable.	Total.	
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1888-89 ...	270 12 0 −182 14 0	...	87 14 0	36 6 3	51 7 9	...	87 14 0	...
1889-90 ...	0 3 9 +77 1 3	...	77 5 0	65 10 6	11 10 6	...	77 5 0	...

1892-93 ...	43,677 4 0	5,211 13 9	48,889 1 9	47,664 10 9	168 11 0	...	47,833 5 9	1,055 12 0
1893-94 ...	...	1,24,435 9 6	1,24,435 9 6	1,13,263 3 3	5,363 14 9	...	1,18,627 2 0	5,808 7 6
Total ...	48,567 0 6	1,30,110 13 9	1,78,677 14 3	1,65,630 3 6	6,020 14 3	...	1,71,651 1 9	7,026 12 6

These figures show that the total amount collected or otherwise adjusted during the year was 96·0 per cent. of the amount due for water-rates, against a percentage of 75·5 last year.

REMISSIONS. 50. The remissions granted during the year were as follows :—

	Rs.	A.	P.
Remissions granted by the Collector under rule 28 of the Midnapore canal (new) rules	81	14	6
Remissions granted under section 91 of the Canals Act .	201	10	9
Ditto by Government under rule 27 of Canals Act	45	5	6
Remissions granted by the Special Deputy Collector under clauses I and II, rule 24 of the new rules	1,014	4	3
Remissions granted by the Special Deputy Collector under rule 25 of the new rules	4,634	3	6
Remissions granted after judicial enquiry	43	7	9
Total remissions .	6,020	14	3

CERTIFICATES. 51. The following statement gives particulars of the number of certificates issued and disposed of during the year :—

PARTICULARS.	MIDNAPORE.			
	1892-93.		1893-94.	
	No.	Amount.	No.	Amount.
1	2	3	4	5
Cases for disposal.		Rs.		Rs.
1. Cases pending at the close of the preceding year ...	449	3,572	356	1,962
2. Cases instituted during the year	1,223	9,080	1,799	12,102
Total ...	1,672	12,652	2,155	14,064
Cases disposed of.				
1. By being struck off, owing to the demand having been remitted.	153	1,384	48	248
2. By being wholly satisfied	1,163	9,306	2,037	13,323
Total ...	1,316	10,690	2,085	13,571
Balance outstanding at the close of the year ...	356	1,962	70	493

The increase of 576 in the number of cases filed as compared with the previous year was due to a large number of cases being necessary for the adjustment of old arrears and the prompt realization of the current demand in one instalment. The increase is justified by the result of the collections. Out of 2,155 certificates for disposal 2,106 were for satisfaction of demands under kabulyats and only 49 for surreptitious irrigation, against 142 in the preceding year. Forty eight cases were struck off owing to the death, insolvency or absconding of the debtors. The percentage of disposals is 96·75 against 78·70 in the preceding year.

52. The following table shows the number of complaints filed during the last two years, and how they have been disposed of:— COMPLAINTS.

Year.	Class of complaints.	Received.			Disposed of.			Balance pending at end of the year.		
		Balance pending from previous year.	Received during the year.	Total.	Allowed.	Refused.	Total.	Received during previous years.	Received during the year.	Total.

1893-94	Ordinary remission	28	221	249	131	110	241	...	...	8
	Other complaints	41	166	207	78	108	186	...	...	21
	Total ...	69	387	456	209	218	427	...	...	29

53. The following statement compares the cost of the revenue establishment during the last five years:— REVENUE ESTABLISHMENTS.

Establisiiment under the Collector.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
manent establishment, inuding travelling allownces ...	18,984	19,757	17,947	20,263	16,620
porary establishment ...	604	649	682	441	346
tingencies	1,253	1,260	1,154	1,014	1,814
dman's fees	49	60	335	375	325
Total ...	20,890	21,726	20,118	22,093	19,105

In addition to the amounts specified in the foregoing table, the following sums were paid by the Executive Engineer for water regulation:—

	Water-regulation.	
	Permanent.	Temporary.
	Rs.	Rs.
1889-90	480	533
1890-91	488	595
1891-92	473	682
1892-93	419	500
1893-94	822	288

The cost is greater than in the previous year on account of the transfer of patrols to the Establishment under the orders of the Executive Engineers.

The cost of collection was 9·08 per cent. on the amount realised, against 14·07 per cent. in 1892-93.

NAVIGATION.

54. The total tollage receipts of the year were Rs. 1,14,994 against Rs. 1,14,141 in 1892-93. The Superintending Engineer makes the following comments on the navigation receipts:—

"The navigation receipts of the year amounted to Rs. 1,14,994 as compared with Rs. 1,14,141 of the previous year. The revenue from tolls on private boats was slightly below that of the year before, being Rs. 84,347 against Rs. 85,075 of 1892-93, and the number of passengers fell of from 205,804 to 203,653. The tolls realised from the Calcutta Steam Navigation Company, however, show an increase of Rs. 1,581.

The increase in the total collections of the year was due to better crops as compared with the preceding year. Larger quantities of grain were steadily exported from Midnapore district, and Messrs. Hoare Miller & Co.'s steamers were largely employed in this trade.

Had the traffic depended on the native boats, a great increase to the revenue would have resulted, but on account of the extended operations of the steamer service and the increase in the grain forwarded by these vessels, little increase is apparent, and a reduction in the receipts must ensue yearly, while the existing very liberal concessions are made to the company."

There was an increase of 5,183 tons of rice and 4,457 tons of paddy carried on the Midnapore Canal as compared with that carried in the previous year.

TRAFFIC.

The usual particulars regarding the traffic carried in vessels, including those of the Calcutta Steam Navigation Company for the last ten years are given below:—

DESCRIPTION.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91	1891-92.	1892-93.	1893-94.

MAINTENANCE AND REPAIRS.

56. The following figures show the actual cost of maintenance and repairs during the last three years distributed by subheads:—

	1891-92. Rs.	1892-93. Rs.	1893-94. Rs.
Head works, including buildings	8,373	9,965	9,430
Main canal and branches	1,18,241	59,802	67,404
Distributaries ...	10,365	12,612	20,932
Drainage and protective works	1,239	2,090	2,058
Working steamers ...	3,044	2,961	3,354
Total	1,41,262	87,430	1,03,178

57. The expenditure on the Midnapore and Panchkurah head works during the year was Rs. 5,538 and Rs. 3,892, respectively, against Rs. 7,619 and Rs. 2,346 in the preceding year. On weirs the expenditure was at the rate of Re. 0·74 per foot run at Midnapore, and Rs. 1·53 at Panchkurah, against Rs. 2·08 and Re. 0·46, respectively, last year. HEAD WORKS AND WEIRS.

58. The outlay on repairs to the main canal, including that on head works, on working steamers, and on drainage works, was Rs. 82,246 against Rs. 74,818 in the previous year. The increase in the expenditure is due to the extra cost of silt clearance in the tidal reaches and of the repairs to buildings. The expenditure on tools and plant was Rs. 38,788 as compared with Rs. 29,885 of the previous yar. The increased expenditure was necessary to bring the dredging plant into good working order. MAIN CANAL.

59. On distributaries the expenditure on repairs was Rs. 20,932 or Rs. 74 per mile, against Rs. 12,612, or Rs. 44 per mile, in the previous year. The very heavy expenditure was due to the damage caused by the floods and cyclone, and also to the maintenance of certain distributaries which were practically abandoned for years and have been brought into use again since 1892-93. DISTRIBUTARIES.

60. The mileage rates for the last ten years, both for main canals and distributaries, are shown in the following table:—

	MAIN CANAL AND HEAD WORKS, &c.			DISTRIBUTARIES.		
R.	Length of canal open.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
	2	3	4	5	6	7
	Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1884-85 ...	48	1,15,171	2,399	277	18,865	68
1885-86 ...	48	1,10,350	2,299	277	14,424	52
1886-87 ...	48	1,20,135	2,503	283	17,617	63
1887-88 ...	48	1,10,494	2,301	283	20,687	74
1888-89 ...	48	83,675	1,743	283	22,464	79
1889-90 ...	48	93,738	1,953	283	19,769	69

1891-92 ...	48	1,30,897	2,727	283	10,365	36
1892-93 ...	48	74,818	1,558	283	12,612	44
1893-94 ...	48	82,246	1,713	283	20,932	74

61. The quantity of silt dredged during the year was 4,455,444 cubic feet, at an average rate of Rs. 5·4 per 1,000 cubic feet, whereas the quantity during the previous year was 3,825,213 cubic feet, and the rate Rs. 5·9. DREDGING AND SILT CLEARING.

The work done by the steam dredgers during the year under review and the cost of working them is shown below:—

NAME OF DREDGER.	Quantity of earth dredged.	Actual cost of lifting.	COST OF REMOVING—		Total.	Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet.

PLANTATIONS.

62. The state of the plantations for the last two years is shown in the following statement:—

YEAR.	Trees upwards of 12 feet high.	Saplings between 4 and 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1892-93 ...	10,296	10,216	2,346	22,858
1893-94 ...	10,151	5,794	3,109	19,054

GENERAL RESULTS.

63. The results of the year may be considered very satisfactory on the whole. There was an increase in the receipts of Rs. 24,766 and a net profit of Rs. 96,579 against Rs. 84,451 in the previous year, notwithstanding an increase in the cost of maintenance of Rs. 12,638. The increased receipts are entirely due to the collection of previous years' arrears. The year was one of untimely and excessive rainfall, and the consequence was that there was little demand for canal water.

HIJILI TIDAL CANAL.

CAPITAL ACCOUNT.

64. The capital, interest and revenue accounts of this canal are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1893-94.	Outlay to end of 1893-94.
1	2	3
DIRECT CHARGES.	Rs.	Rs.

The cost of maintenance was Rs. 56,501 against Rs. 33,089 of the previous year. The considerable excess over last year's figures is mainly due to the damage done by the cyclone of May 1893 and to the silt clearing of Rango I.

66. The rainfall at Contai station was 78·26 inches against 52·71 inches in 1892-93. RAINFALL.

FLOODS.

67. There were no very high floods in any of the rivers crossed by the Hijili Tidal Canal during the year. The highest gauge readings of the rivers Hooghly, Haldi, and Russulpore are shown in the following statement:—

NAME OF RIVER.	Locality.	1892-93.		1893-94.		HIGHEST RECORD.		REMARKS.
		Date.	Reading.	Date.	Reading.	Date.	Reading.	
1	2	3	4	5	6	7	8	9

Haldi ...	Terapakia ...	Ditto ...	117·20	Ditto ...	119·00	* Not known ...	120·23	* Recorded on plan without date (Mr. Vertannes's).
Russulpore ...	Kalinagar ...	Ditto ...	115·30	11th Sept. 1893	115·50	26th August 1888	118·50	

NAVIGATION.

68. The usual particulars regarding the traffic on the Hijili Tidal Canal carried in vessels during the last ten years are given in the following statement. The figures include those relating to the steamers belonging to the Calcutta Steam Navigation Company:—

PARTICULARS.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

Rate of toll per mile ,,	1,427	1,798	1,734	1,338	1,700	1,200	821	1,128	1,607	2,007
Number of boats, including empty boats No.	17,660	19,316	17,542	13,503	16,481	13,785	10,215	15,332	16,084	14,716
Tonnage of boats ... Tons.	145,424	163,535	149,747	124,903	165,635	124,605	91,114	133,575	168,239	1,78,649
Passengers carried ... No.	...	...	8,569	11,951	34,032	(b)30,222	(b)22,420	(b)27,320	(b)42,488	60,081
Estimated value of cargo, including rafts ... ... Rs.	30,06,852	32,74,961	31,48,826	26,13,351	33,01,123	27,29,720	20,78,972	34,97,725	52,56,550	42,37,488

(a) Inclusive of tolls, Rs. 1,603, Rs. 1,592, Rs. 4,590, Rs. 5,523, Rs. 3,346, Rs. 3,634, Rs. 5,568, and Rs. 7,586 paid by the Calcutta Steam Navigation Company.
(b) Inclusive of passengers, 23,243, 17,554, 21,209, 31,702, and 41,286 carried by the Company's steamers.

The increased toll collections of the year are due to heavy passenger traffic by steamers as well as to increase of private traffic. When the remodelling operations on Range II have been completed, and there is no interruption to traffic, the returns will, it is hoped, improve still further.

MISCELLANEOUS RECEIPTS.

69. The miscellaneous receipts for the last five years are shown below:—

1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Rs.	Rs.	Rs.	Rs.	Rs.
1,614	899	567	1,282	987

The decrease in the miscellaneous receipts during the year, amounting to Rs. 295, was due to a falling off in the amounts realized from fisheries and rent of land.

DREDGING.

70. The amount of silt dredged from the Terapakia and Etamugra lock entrances and the cost of removal is shown in the statement below:—

NAME OF DREDGER, HOPPER BARGES AND MUD PUNTS.	Cubic feet dredged.	Actual cost of lifting.	COST OF REMOVING.				Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet.	REMARKS.

Capitalization of abatement of land revenue	.....	37,911
Leave and pension allowances	1,660	8,76,880
Total indirect charges	1,660	9,14,791

As the Capital Estimate of the Sone Canals was closed on the 31st March 1891, the works chargeable to Capital Account executed during the past year were carried out under the rules laid down in Chapter V of the Public Works Code.

The works which were executed during the year were—a watch-house at the head of the Main Western Canal; permanent outlets on many of the distributaries; one or two small escapes; some culverts and syphons to pass drainage or village channels; and a drainage cut at the head of the Jaitpur distributary.

II.— INTEREST ACCOUNT. INTEREST ACCOUNT.

	Rs.

NOTE.—The details by heads of expenditure for the year 1893-94 and nine preceding years will be found in the table given in paragraph 74 following.

EARNINGS.

73. The earnings as opposed to collections and the actual outlay were as follows :—

	1892-93.	1893-94.
Earnings—	Rs.	Rs.
Irrigation	8,15,158	7,39,959
Navigation	59,089	60,025
Miscellaneous	29,214	29,578
Total	9,03,461	8,29,562
Deduct refunds of revenue	3,792	6,237
Net earnings	8,99,669	8,23,325
Outlay	7,51,247	7,40,976
Profit	1,48,422	82,349

The net earnings include the actual realisations of navigation and miscellaneous revenue, together with the revenue assessed on the irrigation of the year, after deducting refunds. The demand statements for the rabi crop are supposed to be submitted to the Deputy Collector on the 15th March. It is impossible, however, to do this in the case of crops irrigated very late in the season, the demand statements for which are mostly submitted after 1st April, but the sums due under them are nevertheless included under earnings, which show the amount due on account of the irrigation of the year. The outstanding balance on 1st April 1894 was Rs. 1,01,858. This amount does not include Rs. 45,865, the rabi assessments received before the 31st March 1894 by the Deputy Collector, because the money on these assessments is not due till 1st April.

74. The receipts on revenue account and working expenses of the canals for the year 1893-94 and the nine preceding years are shown in the statement below :— FINANCIAL RESULTS.

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

INDIRECT CHARGES.										
Capitalization of abatement of land revenue...	...	...	...	...	...	...	...	...	...	...
Leave and pension allowances	31,569	31,632	32,097	50,369	51,613	48,071	48,813	49,780	53,556	54,087
Total—indirect charges...	31,569	31,632	32,097	50,369	51,613	48,071	48,813	49,780	53,556	54,087
Total—working expenses	6,28,075	5,73,345	5,97,821	7,52,348	7,94,432	7,29,030	7,02,099	6,97,840	7,51,247	7,40,976
Net revenue ...	2,26,944	4,78,644	3,04,871	(—)1,63,730	36,846	1,51,045	27,071	2,08,234	3,01,334	1,84,699

Compared with 1892-93, the receipts (less refunds) have decreased from Rs. 10,52,581 to Rs. 9,25,675, that is by Rs. 1,26,906, and the working expenses (direct charges) from Rs. 6,97,691 to Rs, 6,86,889, or by Rs. 10,802. Including indirect charges, the net revenue has decreased from Rs. 3,01,334 to Rs. 1,84,699. The decrease in the working expenses was due mainly to reduced expenditure on distributaries. The decrease in receipts was due to the smaller rabi irrigation of the year. The works carried out under the head Extensions and improvements were converting wooden topped bridges on the Gurra Chowbey canal ; an inlet on the Buxar Canal ; a regulator on the Gurra Chowbey canal ; roofing lock khalasis' sheds with Allahabad tiles and other small works. The Eastern Main Canal was closed from the 21st April to the 10th June 1893, and the Western Main Canal from the 14th to the 26th May for silt clearance.

LENGTHS OF CANALS AND DISTRIBUTARIES.

75. The following table shows the lengths of canals and distributaries in operation, and the areas commanded, provided with distributaries, and irrigated, at the close of the last two years :—

Name of Canal.	1892-93.								1893-94.							
	Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

The increase in the length of distributaries is due to the addition to the length of the Pandaria distributary and some parallel channels in the Buxar Canal.

VILLAGE CHANNELS AND OUTLETS.

76. The length of village channels made by villagers up to the end of 1893-94 and the number of outlets in use during the year are shown below :—

Division.	Total length of village channels completed up to end of 1893-94.	Total number of temporary and permanent outlets in use during 1893-94.	Number of permanent outlets.
1	2	3	4
	Miles.	No.	No.
Eastern Sone	385½	1,455	915
Arrah	837	2,304	1,518
Buxar	664½	1,147	603
Total, 1893-94 ...	1,887	4,906	3,036
Total, 1892-93 ...	1,874	5,224	2,748

The increase in the length of channels was very small. The total number of outlets shows a further reduction in consequence of the reduced rabi irrigation of the year : the increase in the number of permanent outlets is on the other hand very satisfactory.

77. The rainfall during the last five years registered at 22 stations on, or in the neighbourhood of, the Sone Canals is shown below :— RAINFALL.

		Average of 22 Stations.				
		1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

1893-94 ...	280,528	66,458	19,790*	366,776	46·62

* Hot-weather crop.

The total area irrigated was 43,985 acres less than in the previous year. The falling off was entirely in rabi. The Superintending Engineer remarks :—

"The total rainfall of the year was about 5½ inches in excess of the average. This will be seen by a comparison of this table with subsidiary form IV-E-*f*, and, although the rainfall in the kharif season was only slightly above the average, it was distributed in a manner which was suitable to the crops. There was copious rain in October, when water is much in request for the rice crop, and this October rain was further supplemented in November by a good fall which was of great service to the rabi ; so that there was, generally, sufficient moisture in the soil to mature the rabi with little or no irrigation."

80. The following statement gives the areas of each crop irrigated under annual and five-year leases up to 1891-92, and under season and long-term (seven and three-year) leases in 1892-93 and 1893-94 under the new rules:—

Crop.	1889-90.	1890-91.	1891-92.	1892-93.		1893-94.

* Under the new rules for the Sone Canals there are no separate leases for sugarcane. They are included in each season lease as explained above.

The total irrigation of the year 1893-94 compared with the previous year may be stated in this way:—

	1892-93.	1893-94.
	Acres.	Acres.
Area irrigated under long-term leases	271,966	291,746
„ „ „ season leases	129,356	74,292
„ „ by sale by volume	5,732	57
„ „ without permit ...	3,707	681
Total	410,761	366,776

The increase in the area under long-term leases is satisfactory as showing that in spite of the favourable rainfall the area permanently under irrigation is increasing, and it is probable that the whole area which can be irrigated from the Sone Canals in the kharif season will soon be under long leases. The Superintending Engineer remarks:—

The five-year leases which are now current will entirely disappear at the end of 1895-96 as the year 1891-92 was the last in which any were granted. In the year 1893-94 an unusually small area of long-term leases expired, which accounts for the fact that the area for which long-term leases entered into during the year (43,807 acres) is less than in 1892-93. But the total area under long-term leases is increasing steadily thus:—

	Area under long-term leases.		Area under long-term leases.
	Acres.		Acres.
1888-89	200,275	1891-92	234,791
1889-90	224,268	1892-93	255,964
1890-91	223,440	1893-94	275,567

Out of the 275,567 acres now under long-term lease 254,515 are irrigated in the kharif season; it is doubtful whether the Sone Canals could irrigate more than 300,000 acres in the kharif season at a time of maximum demand; so that the area under long leases can only be increased slightly. Leases in several parts are now being refused, because the supply is insufficient. The question of restricting the area irrigated in villages near the canals, so as to give it to others which are less favourably situated, is under consideration. As matters now are, only about half the villages which are commanded obtain water, and the other half get none, partly on account of the comparative difficulty in irrigating them, partly because they are on lower ground and need it less, but mainly because their neighbours absorb it all. In a considerable number of villages, 70, 80, and even 90 per cent. of the land is under long lease. It does not seem to be right that villages in favourable situations should be allowed to absorb the benefits of the canals to the exclusion of others.

Orders have been issued which will tend to reduce the area irrigated in any village in the *kharif* season to 50 per cent. of the area under cultivation.

DISTRIBUTION BY DIVISIONS.

The following statement shows the areas irrigated in 1893-94 in divisions and in subdivisions:—

		Acres.	Acres.
Eastern Sone Division—			
Daudnagar	subdivision	42,454	
Bikram	ditto	41,974	
			84,428
Arrah Division—			
Nasriganj	subdivision	34,519	
Koath	ditto	53,749	
Ramnagar	diito	53,077	
Ageaon	ditto	32,819	
			174,164
Buxar Division—			
Sikroul	subdivision	59,133	
Jamrore	ditto	35,075	
Basawan	ditto	13,976	
			108,184
	Total		366,776

The long-term leases are the most important ones in the Sone Canals. The following statement shows by divisions the main facts with reference to these leases:—

Division.	Leases which lapsed on 31st March 1893.	Leases in force on 1st April 1893.			Leases entered into during 1893-94.		Total area under long-term leases in 1893-94.
		Seven-year leases.	Five-year leases.	Three-year leases.	Seven-year leases.	Three-year leases.	
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
stern Sone ...	4,258	18,794	38,141	638	7,767	162	65,502
rah	6,884	21,920	82,215	3,021	16,356	1,469	124,981
xar	10,385	13,880	48,339	4,812	14,362	3,691	85,084
Total ...	21,527	54,594	168,695	8,471	38,485	5,322	275,567

Three-year leases are said to be very unpopular, the cultivators preferring to take a season lease, if they need it, rather than to bind themselves to pay a somewhat smaller rate for three years.

81. The amounts assessed during the last five years for the unauthorised use of water and for wastage of water are shown below :— UNAUTHORISED

	1889-90.	1890-91.	1891-22.	1892-93.	1893-94.
	Rs.	Rs.	Rs.	Rs.	Rs.
For unauthorised use of water	913	2,734	13,861	14,549	4,760
For wastage of water	224	256	314	105	615

The Superintending Engineer gives the following explanation of the large decrease in the amount assessed for unauthorised use of water :—

"The reason of this large decrease is not probably that there was any actual decrease of unauthorised irrigation, but that the rule which prohibits the assessment under certain circumstances was not properly expressed in 1892-93."

Under the rules now in force irrigation effected without permit in the kharif season cannot be assessed if the water used is drawn from lands which are under lease.

82. The areas actually irrigated in each division since the year 1888-89 are shown by crops in the following statement :—

Eastern Sone Division.						Arrah Division.						Buxar Division.						Total for all Divisions.

64,801	7,873	6,987	...	79,361	124,814	14,835	35,996	4,664	180,309	82,351	16,494	46,883	5,063	150,791	271,966	39,202	89,866	9,727	410,761
67,894	9,123	4,880	2,531	84,428	133,894	7,987	18,064	14,219	174,164	89,958	8,903	6,283	3,040	108,184	291,746	26,013	29,227	19,790	366,776

The area measured during 1893-94 was 104·59 per cent. of the area for which permits were issued. The proportion of flow to lift irrigation was as 43·5 to 1.

83. The duty in the kharif season is calculated on the average gross discharge entering at the head of the canal or series of canals named, and the duty in the rabi season is calculated on the average discharge utilised, which is taken as the discharge at the head less the quantity gauged as escaping from recognised escapes. These duties show a decided improvement over those of the previous year in the kharif season, but the rabi duties, with the exception of the duty in the Eastern Main Canal series, are much lower than those of 1892-93. DUTY OF WATER.

The Superintending Engineer observes :—

"These figures call for no particular remark. The higher duties in the kharif season were due to the favourable rainfall of the year. The decrease in the rabi duty is mainly due to the large decrease in the area irrigated. A small area is always more wasteful than a large one."

Kharif.

	1893-94.		1892-93.		1891-92.

Sone Canals ...	66,458	67·33	126,195	79·87	212,579	92·83

The most important duty, however, in the case of the Sone Canals, as remarked in last year's report, is that obtained for kharif at the period of maximum demand in October. The Superintending Engineer's remarks on this point, which are reproduced below, tend to confirm the previously expressed opinion that a higher duty than 50 acres per cubit foot cannot be expected at the period of maximum demand:—

"The period of maximum demand for water in the kharif season is in October. The duty obtained during the ten days of maximum demand was—

52 acres to the cubic foot to a base of ten days in the Eastern Sone Division.
59 ditto ditto ditto Arrah Division.
69 ditto ditto ditto Buxar Division.

The Executive Engineer of the Buxar Division writes on this subject as follows:—

'There was no rain in the division from the 28th September to the 15th October, and the maximum demand for water was between the 6th and 15th October. The average discharge at 5¾ miles of Main Western Canal for these ten days was 1,213 cubic feet per second, and the area under irrigation was 84,432 acres, and the duty 69·6 acres per cubic foot per second If we take the average discharge for the six days, 10th to 15th October, when the demand was at its maximum, we get a duty of 62 acres per cubic foot per second. This, I think, shows that the duty now assumed of 50 acres per cubic foot per second on the gross discharge is too low, and that a duty of 60 acres per cubic foot per second may be safely assumed.'

It would seem probable, however, that the maximum demand in the early part of October was moderated to some extent by the fact that the rainfall in September was unusually large, being some 40 or 60 per cent. in excess of the average. Nevertheless, it is to be hoped that the Executive Engineer may be right and that some progress is being

made towards a higher kharif duty, but the following facts do not lead to my belief that a higher duty than 50 acres can be expected on the gross discharge during the month of October and during the period of maximum demand.

The following observations were recorded of the duty actually obtained *at the outlet*. The people carried on their irrigation as usual, and were satisfied with the supply they obtained. The observations of the discharge passing were carefully recorded with reference to the area irrigated each day. The following table is an abstract of the results :—

Division.	Position of outlet.	Number of days in which area was completely irrigated.	Average depth of water in inches on the area irrigated.	Area irrigated in acres.	Duty of one cubic foot of water to a base of ten days.
1	2	3	4	5	6

DEMANDS, COLLECTIONS, AND BALANCES.

85. The demands, collections, and balances of water-rates for the last five years are shown below:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due for recovery during the year.	Total for recovery.	Cash realisation.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90 ...	3,80,613	7,52,788	11,33,401	8,16,394	35,225	2,81,782
1890-91 ...	2,81,782	6,29,124	9,10,906	6,44,718	21,460	2,44,728
1891-92 ...	2,44,728	6,93,685	9,38,413	8,11,750	15,220	1,11,443
1892-93 ...	1,11,443	9,50,733	10,62,176	9,59,472	14,914	87,790
1893-94 ...	87,790	8,53,161	9,40,951	8,34,261	4,832	1,01,858

The Examiner gives the "assessments of the year" as Rs. 8,82,715, but the above statement shows the "amount falling due during the year" as Rs. 8,53,161, which is arrived at in this way:—

	Rs.	Rs.
Examiner's "assessments of the year" ...	...	8,82,715
Add—The assessments of the rabi of 1892-93 which were "received" in that year but legally due in 1893-94	24,359	
Deduct—The assessments of the rabi of 1893-94 which were "received" in that year but legally due in 1894-95	45,866	(—)21,507
		8,61,208
Deduct—Certain excess recoveries which are treated as "amounts falling due during the year" (see paragraph 27 of Deputy Collector's revenue report)		8,048
Amount falling due during the year		8,53,160

The Examiner gives the outstanding balance at the end of the year as Rs. 1,47,723 instead of Rs. 1,01,858 as shown above. The Superintending Engineer offers the following explanation of the difference:—

"It will be noticed that that figure does not agree with the balance outstanding at the end of the year as given in the above table. The demand statements for the rabi crop are supposed to be submitted to the Deputy Collector on the 15th March, but it is not possible to do this; some are submitted before and some after the last day of March. The Deputy Collector includes in his account of "assessments received during the year" all demand statements which reach him before the 31st March, and the Examiner's "balance oustanding" is based on those assessments. It is the fact, however, that the money due on the rabi assessments is not legally due until the 1st April, so the amount included in rabi "assessments received during the year" is not really "outstanding at the end of the year" at all. The Examiner's figure exaggerates the true outstandings. If all the money due on any rabi crops were collected on the very day it fell due, the Examiner's figure would still show a balance due at the end of the year, although such balance would not exist. At the end of March 1894, the rabi "assessments received during the year" by the Deputy Collector of the rabi crop of 1893-94 amounted to Rs. 45,866, so that the true "outstanding at the end of the year" was (1,47,723—45,866) Rs. 1,01,857.

86. In the following statement the Deputy Collector shows the extent to which the arrears as well as current demand have been worked off:— ARREARS.

	Demand of 1893-94 consisting of	Collected or remitted in 1893-94.	Percentage of demand adjusted.	Unadjusted balance at close of year.
1	2	3	4	5
	Rs.	Rs.		Rs.
Arrears previous to 1891-92	274	274	...	...
Arrears of 1891-92	7,079	7,079	...	...
Do. of 1892-93	80,437	76,477	95·0	3,960
Total arrears outstanding on 1st April 1893 ...	87,790	83,830	95·4	3,960
Current demand for 1893-94	8,53,161	7,55,263	88·5	97,898
Total ...	9,40,951	8,39,093	89·1	1,01,858

There is on the whole an outstanding balance of Rs. 1,01,858, but the rabi assessments which formerly became due on the 31st March, and are now due on the 1st April, no longer form a part of the balance.

87. In last year's report the delay in the submission of demand statements was unfavourably commented on. During the year under review particular attention was paid to the punctual submission of demand statements with very satisfactory results. Out of a total area of 118,837 acres on which water-rates were charged during the year, demand statements for only 21,116 acres were submitted after the water-rates were due, and the result would have

been still more favourable if the demand statements for hot-weather irrigation had not been deliberately delayed in the Arrah Division under some misunderstanding of the rules.

OLLECTIONS. 88. The following statement gives the collections in each district:—

DISTRICT.	DEMAND.			ADJUSTMENTS.				Balance on 31st March 1894.	Percentage, column 8 on column 4.
	Arrears on 31st March 1893.	Current demand for 1893-94.	Total.	Collection.	Remission made by canal officers.	Written off as irrecoverable.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Shahabad	54,883	6,80,215	7,35,098	6,55,249	1,340	2,975	6,59,544	75,554	89·7
Patna	18,596	77,604	96,200	76,321	144	198	76,663	19,597	79·6
Gaya	14,311	95,282	1,09,593	1,02,691	142	53	1,02,886	6,707	93·8
Total ...	87,790	8,53,101	9,40,951	8,34,261	1,626	3,226	8,39,093	1,01,858	89·1

Besides the collections of Rs. 8,34,261 shown above, a further sum of Rs. 10,916 was credited to water-rate accounts as below:—

	Rs.
Surplus or excess recoveries	8,048
Process fees in certificate cases	2,528
Miscellaneous	340
Total ...	10,916

EMISSIONS. 89. The sums remitted during the year under review and the preceding year according to the figures given by the Examiner of Accounts are:—

	1892-93.	1893-94.
	Rs.	Rs.
By Canal officers	2,171	1,606
By Civil do.	8,252	3,226
	10,423	4,832

According to the figures supplied by the Superintending Engineer the remissions are—

	1892-93.	1893-94.
	Rs.	Rs.
Written off by Civil officers as irrecoverable ...	12,743	3,226
Remissions granted by Executive Engineers ...	4,620	2,180
Extraordinary remissions by Superintending Engineer...	...	...
Remitted on revised and cancelled khatianies ...	1,921	15,251
	19,284	20,657

The remissions by Executive Engineers were less than those granted during the previous year, but on the other hand demand statements for about Rs 6,000 were cancelled on account of incorrect assessment. A large number of assessments had been made in the kharif season of 1892-93 for lands irrigated with water taken from land already under lease, and the Superintending Engineer, after enquiry, ordered that these assessments should be cancelled. Another reason for the large increase of cancelled *khatians* is that in the Arrah Division a large number of three-year leases were converted into seven-year leases: the amount was more than Rs. 6,500. The amount remitted by the Deputy Collector is slightly less than the amount, viz. Rs. 3,635, remitted by him last year on account of the death or absconding of the rate-payers, or of their being too poor to pay; the items, however, require closer supervision than they have received in the past. More than one case has come to light during the year in which sums have been written off on account of the death, absence, or insolvency of the debtor which have really been paid and the money embezzled.

The ordinary remissions by the Executive Engineers are classified in the following table:—

Class.	Causes.	Eastern Sone Division.	Arrah Division.	Buxar Division.	Total, 1893-94.	Total 1892-93.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
a	Charged by mistake for land cultivated by others	...	...	7	7	...
b	Excess measurement or errors in calculation	69	229	151	449	940
c	Lift charged as flow	9	16	18	43	219
d	Irrigation not denied, but remitted as not chargeable under the Act ...	...	111	270	...	233
e	Land not having been irrigated at all	16	343	251	610	1,005
f	Injury to crop due to insufficient supply	...	78	130	208	262
g	Land thrown temporarily out of cultivation (applicable to long leases only)	5	1	94	100	70
h	Failure of crop originally sown, Rule 82	119	51	4	174	1,571
i	Land appropriated for other purposes than cultivation	...	5	1	6	16
j	Double assessment, as when land assessed on a season lease is subsequently included in a long lease in the same year	128	24	50	202	304
	Total ...	346	858	976	2,118	4,620

The decrease in the amount remitted is satisfactory.

The remissions implying errors in assessments were for the last five years as follows:—

1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Rs.	Rs.	Rs.	Rs.	Rs.
11,284	6,555	3,304	4,620	2,180

The percentage on the gross demand of remissions by canal officers is as follows:—

	Percentage of remissions to gross demand.	
	1892-93.	1893-94.
Eastern Sone Division	0·73	0·13
Arrah ditto	0·24	0·16
Buxar ditto	0·41	0·19

REVENUE ESTABLISHMENT.

90. The expenditure on the revenue establishments employed during the year under review and the four previous years is shown below :—

PARTICULARS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
Establishment under Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
1. Permanent establishment, including travelling allowances.	30,589	31,253	40,997	58,538	55,308
2. Temporary establishment ...	710	687	4,752	3,070	2,993
3. Contingencies	2,522	2,398	2,784	2,663	4,274
4. Fees to tahsildars or establishment employed in lieu thereof.	28,603	24,499	16,868	2,580*	5,166
Fees to patwaris	3,763	3,988	2,205	1,152	368
Establishment under Superintending and Executive Engineers.					
Permanent and temporary establishment, including travelling allowances.	51,635	48,105	50,228	52,187	49,930
Contingencies	3,695	3,500	5,443	4,768	3,426
Water-regulation establishment ...	2,299	2,235	2,286	2,310	2,277
Headmen's fees	29,007	28,861	26,550	32,032	26,080
Total ...	1,52,823	1,45,528	1,52,113	1,59,300	1,49,732
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department.	8,19,762	6,47,839	8,15,858	9,71,202	8,45,177
Percentage	18·6	22·3	18·66	16·4	17·7

* Lumbardar's fees and contractor's percentage.

The decreased expenditure is due to the smaller irrigation of the year as compared with that of the previous year and to the reduced collections.

COST PER ACRE.

91. The following statement shows the total cost of the revenue establishment under the Executive Engineer per acre irrigated :—

DIVISION.	1893-94.			1892-93.
	Revenue* establishment.	Area irrigated.	Cost per acre.	Cost per acre.
1	2	3	4	5
	Rs.	Acres.	A. P.	A. P.
Eastern Sone	18,206	84,428	3 5	4 2
Arrah	35,701	174,164	3 3	3 4
Buxar	27,842	108,184	4* 1	3 5
Total Sone Canals ...	81,749	366,776	3 6	3 6

* Includes proportion of water regulation establishment employed on the head works.

92. The number of complaints, such as objections to assessments actually made, or petitions alleging damage from the canals, and their disposal is shown in the following statement:— COMPLAINTS.

DIVISION.	(I)—ORDINARY REMISSION				(II TO V)—OTHER COMPLAINTS			Total complaints received during year, excluding those pending from previous year.	Pending.
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.	Pending.		
		Remission allowed.	Remission refused.

	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone ...	490	171	309	10	13	13	...	476	10
Arrah	2,323	600	1,654	69	41	39	2	2,139	71
Buxar	1,865	499	1,248	118	156	147	9	1,678	127
Total, 1893-94 ...	4,678	1,270	3,211	197	210	199	11	4,293	208
Total, 1892-93 ...	7,757	2,471	4,709	577	255	237	18	7,483	595
Total, 1891-92 ...	4,725	1,274	2,974	477	243	191	52	4,855	259

The Superintending Engineer writes:—

"The figures of 1893-94 are satisfactory. Out of 4,680 complaints dealt with during the year, rather less than one-third were held to be good and more than two-thirds were refused. The number of cases in which the petitioners were not satisfied with, or at any rate did not accept, the orders of the canal officers in the 4,680 cases dealt with, was 23 only; in these cases an appeal was made to the Collector of the district. Out of 21 such cases about 33 per cent. were allowed by the Collectors to be good, and 67 per cent. of the appeals were rejected. The following table shows the figures in the different divisions:—

DIVISION.	NUMBER OF APPEALS—		Appeals allowed.	Appeals discharged.	Pending.
	Pending from last year.	Instituted during the year.			
1	2	3	4	5	6
	No.	No.	No.	No.	No.
Eastern Sone ...	2	...	...	2	...
Arrah ...	...	16	4	10	2
Buxar ...	...	7	3	2	2
Total ...	2	23	7	14	4"

93. There were, including 2 pending from the previous year, 25 appeals to the Collectors of districts against Executive Engineers' decisions. Of these, 7 were allowed, 14 discharged, and 4 had not been decided at the close of the year.

Two cases were decided by Engineers vested with magisterial powers under the Bengal Irrigation Act. Two persons accused of offences under the CASES UNDER ACT III (B.C.) OF 1876.

Act were convicted, and one discharged. The amount of fines imposed was Rs. 10, and the number of days' imprisonment fourteen.

CERTIFICATES. 94. The Special Deputy Collector in charge of the collections continues to deal with the certificates required in realising water-rates.

The amount of certificate work done in each district during the year under review, as compared with that of the previous year, is shown in the following statement:—

	SHAHABAD.				PATNA.				GAYA.				TOTAL.		
	1892-93.		1893-94.		1892-93.		1893-94.		1892-93.		1893-94.		1892-93.		1893

The number for disposal was 2,372, inclusive of the outstanding balance from last year, covering a sum of Rs. 24,389 as compared with 3,137 and Rs. 34,272 in the previous year. The demand adjusted was Rs. 23,008 as against Rs. 30,745, the remissions being Rs. 1,608 compared with Rs. 5,992. The outstanding balance was reduced from Rs. 3,527 to Rs. 1,381, and the number of cases pending at the close of the year shows a satisfactory decrease of 53 cases.

NAVIGATION. 95. The following statements show the receipts from navigation for the last five years:—

NAVIGATION RECEIPTS.

YEAR.	EASTERN MAIN SERIES.			WESTERN MAIN SERIES.			Total.	Total tollage only.

Boats, including empties ... No.	8,058	8,644	8,645	6,710	6,666
Tonnage of boats ... Tons.	104,390	114,096	129,147	97,841	98,551
Estimated value of cargo, including rafts ... Rs.	49,36,564	65,25,714	70,06,595	57,32,365	61,19,288

96. The transport service continued to be worked by Messrs. Hodges and Radford under the contract which had been renewed for two years from 1st December 1892. The charges, Rs. 600 per month for steamer hire, and Rs. 500 for compounded tolls, are the same as in past years. The ordinary repairs of the steamers, which belong to Government, are executed by the lessees.

TRANSPORT SERVICE.

The extent of the traffic in connection with the steamers is shown below:—

PARTICULARS.		Patna Canal.	Arrah Canal.	Buxar Canal.	Total.
1		2	3	4	5
Passengers carried	Up ... No.	4,749	13,346	8,134	26,229
	Down „	4,516	13,331	8,079	25,926
Cargo carried	Up ... Tons.	935	389	191	1,515
	Down ... „	879	795	440	2,114

On the Arrah and Buxar Canals the steamers make two trips each way in every week. On the Patna Canal, which is the longer route, the steamer makes

only one trip each way in a week. For the hire of the steamers Rs. 7,250 wa realised during the year.

There are in addition to the steamers four cargo boats, the property o Government, for the hire of which Rs. 1,515 was received during the yea besides which Rs. 712 was recovered by way of fees for the use of the accon modation boats and mud punts.

MISCELLANEOUS RECEIPTS.

97. The following table shows the details of the miscellaneous receipts fo the last five years:—

PARTICULARS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water	514	393	1,056	805	730
Plantations	279	355	995	852	1,164
Other canal produce	1,542	1,815	742	967	1,651
Water-power	769	1,158	1,049	1,138	978
Rent of buildings	8,313	8,164	8,397	8,807	8,921
Fines	28	40	5	362	20
Miscellaneous — Rent of lands ...	6,939	8,114	9,920	9,241	9,014
Miscellaneous — Fisheries ...	597	431	489	523	697
Miscellaneous — Cost of process ...	3,244	2,937	3,769	2,955	2,528
Miscellaneous — Sale of old materials	17	121	82	35	139
Miscellaneous — Other items ...	1,100	2,610	5,323	3,529	3,736
Total ...	23,342	26,128	31,827	29,214	29,578

MAINTENANCE CHARGES.

98. The expenditure on works and maintenance will now be briefly reviewed.

EXTENSIONS AND IMPROVEMENTS.

The principal works executed under "Extensions and improvements," on which Rs. 7,419 were spent, have already been described in paragraph 74.

REPAIRS.

99. The expenditure on maintenance and repairs by main sub-heads fo the last three years is shown below:—

PARTICULARS.	1891-92.	1892-93.	1893-94.
1	2	3	4
	Rs.	Rs.	Rs.
Head works	20,922	22,374	27,297
Main canal, including branches	1,75,837	2,00,130*	1,89,160
Distributaries	58,248	55,918	46,457
Drainage and protective works ...	3,622	2,157	3,014
Cost of working transport service	1,155	...	...
Compensation	28	...	...
Total ...	2,59,832	2,80,579	2,65,928

* Includes Rs. 600 for the Arrah-Dehri Telegraph line, and Rs. 4,491 on account of theft money in the Revenue Division and of money embezzled in the Patna district.

100. The figures below give the cost of repairs to head works during the last three years:— REPAIRS TO HEAD WORKS.

		1891-92.	1892-93.	1893-94.
		Rs.	Rs.	Rs.
Weir on Sone River	...	11,617	14,058	18,262
Other works	...	8,773	7,577	8,301
Total	...	20,390	21,635	26,563

The increased cost of maintenance of the Sone weir during the year is due to filling rubble into holes which had formed below the weir.

101. Details of the expenditure on maintenance and repairs on the main canals and distributaries in each division during the last three years are given in the following statement:— MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

	Arrah Division.			Buxar Division.*			Eastern Sone Division.			Total.

* Includes cost of maintaining the Telegraph line from Arrah to Dehri.

A decrease of Rs. 18,764 has taken place in the total expenditure during the year as compared with 1892-93.

The possibility of effecting economies in the charges for the maintenance of main canals and distributaries is receiving the attention of the Superintending Engineer.

102. The following table shows the quantity of silt dredged from the Eastern and Western Main Canals, and the rate at which the work was done during the last three years:— SILT-CLEARING AND DREDGING.

Canals.	1891-92.			1892-93.			1893-94.		
	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river. In addition to the above, the following dredging work was done in the Arrah and Buxar Divisions during the year.

Arrah Division.—In this Division 561,402 cubic feet of silt were dredged above and below locks 1 to 5 at a cost of Rs. 2,625, giving a rate of Rs. 4-10-10 per 1,000 cubic feet.

Buxar Division.—In this Division 1,918,599 cubic feet of silt were dredged in the Main Western Canal below the Kao syphon in the 10th, 11th, and 12th miles at a cost of Rs. 7,469, giving a rate of Rs. 3-14-3 per thousand. In the Buxar Canal itself 60,039 cubic feet of silt were dredged at a cost of Rs. 240, giving a rate of Rs. 3-15-11 per thousand.

The rates given above include the cost of lifting the silt into barges and of carrying it either over the spoil banks or into the river.

The cost of lifting the silt on to the barges or dredging proper was as shown below:—

	1891-92.			1892-93.			1893-94.		
	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.

Taking the Eastern Main and Patna Canal together, the cost of "lifting" the silt was Re. 1-6-10 per 1,000 cubic feet as compared with Re. 1-6-7 in 1892-93 and Re. 1-13-10 in 1891-92—a very small increase. The cost for "labour" is nearly the same as last year. The cost for "discharging" was Rs. 4-7-11 per 1,000 cubic feet against Rs. 4-6-11. The total cost per 1,000 cubic feet of removing the silt was Rs. 5-14-9 as compared with Rs. 5-13-6 in 1892-93.

103. The statement below compares the expenditure on repairs to dredgers during the year under review with that of the two previous years:—

	1891-92.	1892-93.	1893-94.
1	2	3	4
	Rs.	Rs.	Rs.
12 Fouracres' dredgers	7,004	6,752	6,467
2 Bruce's ditto	750	546	627
2 English ditto	3,170	3,081	3,575
Mud punts ...	3,009	3,076	3,075
Total ...	13,933	13,455	13,744

104. The cost of lifting the silt on to barges for each class of dredger used, inciuding interest on capital cost and expenditure on repairs, is compared by Superintending Engineer as follows:—

	Working expenses per 1,000 cubic feet.	Interest and repairs of dredgers per 1,000 cubic feet.	Interest and repairs of mud punts per 1,000 cubic feet.	Total.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs A. P.

PLANTATIONS.

108. Below is a statement showing the number of trees, classified according to size, in the plantations in each division:—

DIVISION.	1892-93.				1893-94.				Increase.	Decrease.
	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.		
1	2	3	4	5	6	7	8	9	10	11
	No.	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone	94,864	34,676	51,642	181,082	99,564	34,125	46,721	180,410	...	672
Arrah	53,936	37,842	33,611	125,389	67,425	25,233	30,561	123,213	...	2,170
Dehri Workshop	8,343	46,340	12,544	66,227	17,290	37,577	24,378	79,245	13,018	...
Buxar	19,671	10,448	14,682	44,801	25,374	8,187	16,196	49,757	4,956	...
Total ...	176,814	128,206	112,479	417,499	209,653	105,122	117,856	432,631	17,974	2,842
							Net increase ...		15,132	

It is satisfactory to notice the increase in the number of trees in the Buxar Division, which is the most behind hand in this respect.

The receipts and expenditure of the year were as under:—

DIVISION.	Receipts.	Expenditure.
1	2	3
	Rs.	Rs.
Eastern Sone ...	379	443
Arrah ...	262	1,975
Dehri Workshop ...	456	1,050
Buxar ...	67	2,416
Total ...	1,164	5,884

The Superintending Engineer remarks:—

"The increase in the trees in the Buxar Division is satisfactory as this canal needs trees badly. The financial results as expressed in the above table are still far from satisfactory. Some beginning was made in cutting babul trees for firewood in the Eastern Sone and Arrah Divisions, but the results do not find a place in this year's figures."

CALCUTTA AND EASTERN CANALS.

CAPITAL ACCOUNT.

109. The Capital and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1893-94.	Outlay to end of 1893-94.
1	2	3
	Rs.	Rs.
Direct charges	(—)424	53 49,509
Less—Receipts on capital account	...	54,467
Total direct charges ...	(—)424	52,95,042
Indirect charges	21	62,404

The following original works chargeable to Capital Account were carried out during the year:—(*a*) Improving the second bad bend in the Jangulia river in the steamer route, (*b*) demarcating the land acquired for improving the first bad bend at Balasore, (*c*) the construction of three sections of towpath, with rustic and remodelled bridges, from Khulna to Cutchoca. The amount expended was Rs. 802, but the actual outlay is shown as Rs. (—)424 on account of a reduction of Rs. 1,226 in the suspense balances during the year.

REVENUE ACCOUNT.

2.—REVENUE ACCOUNT—(Actuals).

Expenditure—			Receipts—		
	During 1892-93	During 1893-94.		During 1892-93.	During 1893-94.

1893-94	(—)103	53,57,446	4,20,541	2,87,129	1,33,412	2·5

(*a*) Is Rs. 35,185 larger than it should be by reason of error of account.
(*b*) Is Rs. 35,185 smaller than ditto ditto ditto.

The results of the year's operations cannot be considered satisfactory. The actual realizations were Rs. 59,573 less, and the working expenses 34,952 more, mainly, however, due to a refund of Rs. 28,498 in 1892-93, than in the preceding year. The decrease in the receipts is due to the failure of the rice crop in the Backergunge district and to the diversion of the jute traffic to boats and railways. On this subject the Superintending Engineer remarks:—

"Should it be desired to increase the revenue on these canals, it will be a simple matter to do so. Steamers and flats are now taking the place to a large extent of the native craft, and their measurement does not come up to the weight of the cargo carried. What has

been considered objectionable with native boats, viz., assessment on chalans of the cargo, need not be so considered with these vessels.

These vessels also carry very large quantities of kerosine oil and miscellaneous cargo on their return trips, and these are fairly chargeable with toll. As the number of flats and steamers increase, it will be necessary to seriously consider this question."

LENGTHS OF CANALS.

111. The lengths of canals open for navigation during the year, including the steamer route, was the same as that of the preceding year, 1892-93, viz., 713 miles, as detailed below:—

			Miles.
Calcutta and new canals			10
Tolly's Nala with 20 miles of Kaorapookhar khal			37
Total Calcutta Canals ...			47
Eastern Canals	Inner boat route	189	
	Outer ditto	127	
			316
Steamer route			350
Total Calcutta and Eastern Canals ...			713

NAVIGATION.

112. The navigation receipts during the last two years by the Collector and Supervisor of the Canals and by the Executive Engineer are shown in the following statement:—

CANALS.	Number of boats and rafts.	COLLECTIONS BY COLLECTOR AND SUPERVISOR.						COLLECTIONS BY EXECUTIVE ENGINEER.	GRAND TOTAL, GROSS REVENUE.
		Tolls from boats and rafts.	Demurrage.	Ferry tolls.	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts.	Total.	Rents of buildings, lands, and other miscellaneous receipts.	
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern ...	71,126	3,06,237	5,106	3,776	5,495	6,566	3,27,180	7,858	4,20,824
Tolly's Nala ...	74,388	83,252	1,277	1,055	...	202	85,786		
Total 1893-94 ...	145,514	3,89,489	6,383	4,831	5,495	6,768	4,12,966	7,858	4,20,824
Total 1892-93 ...	142,588	4,44,779	7,212	6,015	4,955	5,988	4,68,949	11,295	4,80,244

The chief source of revenue from these canals is the tolls from boats and rafts. They amounted to Rs. 3,89,489 during the year against Rs. 4,44,779 of 1892-93, showing a decrease of Rs. 55,290. This is attributed to the following causes:—

1. Traffic tapped by Eastern Bengal State Railway at Khulna, Singia, and Nowpara.
2. Extension of several branch lines to canal banks—
3. Transfer of Kidderpore storage godowns to Howrah side of the river to escape payment of tolls.
4. Construction of Railway to kerosine depôts at Budge-Budge.
5. Reduction in demurrage rates.
6. Diversion of jute traffic to flats and railway.
7. Very large increase in number of steamers and flats plying *viâ* Sunderbunds route and Nadia rivers.

This last cause is the most serious, as during 1893-94 there was an increase of 108 vessels under this head.

BOATS.

113. The particulars regarding the boats which used the canals during the last two years are given below :—

CANAL.	YEAR.	NUMBER AND CLASS OF BOATS.					
		Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
1	2	3	4	5	6	7	8
Calcutta and Eastern Canals.	1893-94	40,003	23,480	6,778	775	26	71,062
Tolly's Nala	1893-94	23,068	12,657	855	2	...	36,582
Total ...	1893-94	63,071	36,137	7,633	777	26	1,07,044
Calcutta and Eastern Canals.	1892-93	36,389	20,658	17,389	5,211	716	80,363
Tolly's Nala	1892-93	15,716	16,425	4,310	42	...	36,493
Total ...	1892-93	52,105	37,083	21,699	5,253	716	1,16,856

There was a general decrease in all classes of boats except those below 100 maunds. The decrease is mainly due to the falling off in the rice and jute traffic.

The number of small boats and dinghies which, entering Tolly's Nala from Kourapukhar, pay toll at Russa, was 37,749 against 25,607 in 1892 93. They are not classified. Including these boats, the total number was 145,393 against 142,463 in 1892-93, showing an increase of 2,930.

TRAFFIC

The following table gives the tonnage of boats by canal measurement and the estimated weight and value of the cargoes for the Calcutta Canals and Tolly's Nala compared with the corresponding figures for 1892-93.

	Number of boats.	Tonnage of boats by canal measurement.	Weight of cargo carried.	Value of cargo carried.	Tollage, including demurrage.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7

SING ETS.

114. The number of missing tickets for the last ten years is shown below. The increase in the number is not satisfactory :—

YEAR.	No.	YEAR.	No.
1884-85	1,404	1889-90	238
1885-86	653	1890-91	212
1886-87	542	1891-92	210
1887-88	677	1892-93	169
1888-89	329	1893-94	252

115. The cost of the revenue establishment employed on toll collections for the last five years is shown below:— REVENUE ESTABLISHMENT.

PARTICULARS.	1889-90.	1890-91.	1891-92	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Supervisor ...	11,053	11,475	11,863	10,529	9,780
Salary of Canal Inspector	3,900	5,172	5,016	5,013	4,545
Supervisor's office establishment ...	5,142	5,155	5,424	6,076	6,879
Canal police	2,050	2,061	2,049	2,059	2,058
Supervisor's steam-launch establishment ...	735	98	...	...	...
Inspector's and chalan boat establishment ...	1,138	1,049	1,036	696	691
Dhappa water-boat establishment ...	173	168	168	166	168

Toll-collecting establishment	10,424*	11,478*	12,127*	12,391	12,486*
Total cost of establishment ...	36,281	38,210	41,359	39,935	39,344

* Includes salary of darogas, clerks, cashiers, kootnavises, koyals, toll peons, and dinghies with crew.

These figures show a decrease in the total cost of establishment of Rs. 591 compared with those of the previous year.

116. The miscellaneous receipts during the year were Rs. 13,129 against Rs. 15,528 in 1892-93, showing a decrease of Rs. 2,399. Under the head "Rent of Buildings" and land there was a decrease of Rs. 6,045 which has not been explained, while under the head "Sale-proceeds of canal silt and fishery rent" there was an increase of Rs. 3,191. MISCELLANEOUS RECEIPTS.

117. The expenditure under this head was only Rs. 53. EXTENSIONS AND IMPROVEMENTS.

118. The cost of maintenance of the canal by sub-heads as compared with that of the previous year is given below:— MAINTENANCE AND REPAIRS.

CANALS.	Locks.	Masonry bridge.	Roads.	Buildings.	Plantations.	Dredging.	Channel and banks.	Towpath.	Rustic bridges.	Steam-launches.	Miscellaneous.	Drainage.	TOTAL

The variations are not such as to call for any special notice.

DREDGING AND SILT CLEARANCE.

119. The quantity of silt dredged, the expenditure incurred, and the rate per 1,000 cubic feet during the year, including the cost of delivering the mud, are shown below:—

	Quantity dredged.	Cost.	Rate per 1,000 cubic feet.
1	2	3	4
	C. feet.	Rs.	Rs. A. P.
Steam dredger *Victoria* ...	255,000	4,785	18 12 2
Fouracres' dredger ...	499,500	4,894	9 12 9
Marchant's dredger ...	184,500	1,866	10 1 9
Hydraulic dredger *Clinker* ...	1,418,580	10,021	7 1 0

Omitting the cost of delivering the mud, the rates of dredging proper, exclusive of the cost of repairs and of interest on original cost, were per 1,000 cubic feet—

	Rs. A. P.
Steam dredger *Victoria*	14 7 7
Fouracres' dredger	4 1 8
Marchant's dredger	2 14 3
Hydraulic dredger *Clinker*	0 15 2

The high rate of the *Victoria* was due to the cost of the establishment maintained while the dredger was idle in the Sanderbunds being debited to the out turn of earth dredged.

PLANTATIONS.

120. The state of the plantation for the last two years is shown below:—

YEAR.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1892-93 ...	2,304	1,627	1,773	5,104
1893-94 ...	2,496	1,977	720	5,193

The cost incurred during the year was Rs. 1,195 against Rs. 1,434 in 1892-93.

121. In the following statement are shown the receipts from, and expenditure on the steamer route, for the last ten years:— STEAMER ROUTE.

YEARS.	Receipts.	EXPENDITURE—			Difference.	REMARKS.
		On capital account.	On revenue account.	Total.		
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
1884-85 ...	4,495	.....	1,637	1,637	2,858 more.	
1885-86 ...	5,230	15,096	1,629	16,725	1,495 less.

1889-90 ...	4,640	.....	2,094	2,094	2,546 more.	
1890-91 ...	5,425	.....	2,268	2,268	3,157 ,,	
1891-92 ...	4,640	.....	1,920	1,920	2,720 ,,	
1892-93 ...	4,955	28,964	2,094	31,058	26,103 less.	
1893-94 ...	5,495	627	2,094	2,721	2,774 more.	
Total ...	48,360	44,687	22,579	67,266		

The expenditure during the year of Rs. 627 was incurred on the improvement of the bad bend of the river Jagulia.

ORISSA COAST CANAL.

122. The Capital and Revenue Accounts of this canal are given below:—

1.—CAPITAL ACCOUNT. CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1893-94.	Outlay to end of 1893-94.
1	2	3
	Rs.	Rs.
Direct charges	44,123	42,88,875
Less—Receipts on capital account	...	3,293
Total direct charges ...	44,123	42,85,582
Indirect charges.	1,330	1,04,305

The canal was open throughout its entire length of 97½ miles. During the year the following works were carried out chargeable to the capital account of the canal:—

			Rs.
Constructing flood escapes in Range V, Orissa Coast Canal	...	...	10,520
Construction of a dock and two tanks at Panchpally	...	...	4,508
,, of an inspection bungalow at Churbatia	...	...	1,458
Land for Panchpara bungalow	...	...	72
,, for Erum bungalow	...	...	59
,, for Sub-overseer's quarters, Orisal	...	...	13
Constructing supply sluice at Bhograi	...	Rs. 14,248	24,730
Excavating supply channel at ditto	...	,, 10,482	
		Total ...	41,387

NOTE.—The details by heads of expenditure for the year 1892-93 and seven preceding years will be found in the table given in paragraph 123 following.

There was an improvement in the total receipts of Rs. 31,633 over the figures of the previous year. The net result was a loss on the year's working of only Rs. 1,566 as against Rs. 14,718 in the preceding year.

123. The receipts on Revenue account and working expenses of the canal for the last nine years are shown in the following statement:— FINANCIAL RESULTS.

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

king expenses	30,712	61,426	83,507	77,018	68,986	76,798	78,549	79,652	98,133
ne ...	(—) 16,994	(—) 31,938	(—) 29,670	(—) 10,844	(—) 3,653	(—) 11,212	(—)16,492	(—)14,718	(—)1,566

The total direct charges were Rs. 17,857 higher than those of last year. The excess was mostly under repairs and navigation establishment, while there was a considerable decrease in the charges under Engineer establishment.

On works alone the cost of maintenance was at the rate of Rs. 613 per mile against Rs. 466 of the preceding year. The constant work that is required at the Sabarnarekha crossing to keep the river channels navigable swells to no inconsiderable degree the yearly maintenance charges.

AVIGATION. 124. As compared with 1892-93 a considerable increase of traffic on all ranges took place, more especially in Ranges IVA, IVB and V. The increase is mostly due to the special pilgrim traffic to Puri in July and August 1893. Of the total receipts of Rs. 95,233 during the year, the steamers of the Calcutta Steam Navigation Company and of the India General Steam Navigation Company contributed Rs. 25,410, or Rs. 7,038 more than in the previous year.

TRAFFIC. 125. The traffic on the canal during the year 1893-94, compared with that of the previous year, is shown in the following statement:—

	Number of boats.		Tonnage of boats.		Value of cargo, including rafts.		Tolls.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9
Orissa Coast Canal	No. 12,185	No. 11,823	Tons. 100,807	Tons. 141,825	Rs. 23,78,405	Rs. 37,45,657	Rs. 55,832	Rs. 95,233

ISCELLA-NEOUS RECEIPTS. 126. The miscellaneous receipts during the last five years are shown below:—

1888-90.	1890-91.	1891-92.	1892-93.	1893-94.
Rs.	Rs.	Rs.	Rs.	Rs.
1,563	1,410	2,072	9,149	2,477

The receipts of 1892-93 were unduly swelled by the sale of certain materials and unclaimed deposits.

DREDGING AND SILT LEARANCE. 127. Two dredgers, the *Comus* and the *Marchant*, were at work during the year in excavating silt. The quantity dredged, and the cost and rate per 1,000 cubic feet, for the last two years are shown in the following table:—

Year.	Names of dredgers.	Quantity dredged.	Cost of—			Rate per 1,000 C. ft.		
			Lifting by dredger.	Removing by mud-punts.	Total.	Lifting.	Removing.	Total.
1	2	3	4	5	6	7	8	9
1893-94	*Marchant* with 8 mud-punts.	186,110	645	691	1,336	Rs. A. P. 3 7 4	Rs. A. P. 3 11 4	Rs. A. P. 7 2 8
	Comus with 10 mud-punts.	149,710	1,273	579	1,852	8 8 0	3 12 9	12 4 9
	Total ...	335,820	1,918	1,270	3,188	5 11 3	3 12 9	9 8 0

132. The lengths of canals and distributaries in operation at the close of the year 1893-94, compared with 1892-93, are given in the following table:— LENGTH OF CANALS OPEN AND AREAS COMMANDED AND IRRIGATED.

Name of Canal.	1892-93.								1893-94.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Saran Canals.		Miles.			Acres.		Acres.			Miles.			Acres.		Acres.	
Main canal or head cut		6·34								6·34						
Branch Canals.																
I.—Daha feeder ...		3·34	...	...	64,000		3,560	...	...	3·34	...	...	64,000	...	1,568	...
II.—Gandaki ...		1·57								1·57						
III.—Dhanai ...		1·00								1·00						
IV.—Gangri ...		6·57								6·57						
In addition to the above, the following are maintained:—																
I.—Thakraha Sota ...		1·50	...	...	...	...	...	...	...	1·50	...	...	...	...	...	...
II.—Roopan Chap Sota		27·00	...	...	...	...	...	...	...	27·00	...	...	...	...	...	...

There was no alteration in the lengths of the cuts and channels constructed and maintained by the Manager of the Moniara Estate, which aggregate about 33 miles. No distributaries or village channels are maintained by Government. There are nine permanent dams and regulators in the branch canals. No temporary dams were constructed during the year.

133. The average rainfall on the area under command is shown by seasons in the table below for the last five years:— RAINFALL.

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season* ...	19·47	24·60	11·52	27·70	24·96
Rabi	1·20	1·43	0·61	2·29	1·08
Year	45·09	58·63	35·05	49·19	49·95

* August, September and October.

The total rainfall was slightly in excess of last year and was more seasonable. There was an ample fall during the "Hatia," and consequently there was no demand for rice irrigation, and no water was also required for rabi irrigation.

134. There was no very high flood in the Gandak last year, and no damage was done to the canals. FLOODS.

135. The areas irrigated as obtained from the Canal Manager's reports during the past ten years, together with the rainfall, are given in the table below:— IRRIGATION

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1883-84 ..	Not known		...	21,122	26·32

1893-94 ...	994	574	...	1,568	49·95

DUTY OF WATER.

136. The duty of water cannot be calculated, as the canals are drainage as well as irrigation channels.

ASSESSMENTS, COLLECTIONS & BALANCE.

137. The agreement with the proprietors of Moniara and Sadowa, under which the canals were worked in 1891-92 and 1892-93, was renewed for one year only on the same terms. It came to an end on the 31st March 1894, when the canals were practically closed and a dam made across the mouth of each feeder. A new set of rules have been issued, by which no sluice will be opened unless a certain sum is deposited for each sluice. The final accounts of the recent guarantee with the proprietors of the Moniara and Sadowa concerns, have been closed, but a claim has been made for a refund in regard to the guarantee which expired on the 1st of April 1891, and is still under consideration. The following statement shows the assessments and collections on account of irrigation of areas beyond the guarantors estates during the three years, ending 31st March 1894, in which the guarantee was in force, as compiled by the Executive Engineer in charge of the Siwan subdivision:—

Description of crops.	Assessments.	Collection.	Balance.	Remarks.
1	2	3	4	5
1891-92.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
Dhan	1,429 3 6	991 15 0	437 4 6	
Rabi	2,068 15 4	416 5 6	1,652 9 10	
Hot-weather ...	200 6 0	174 0 0	26 6 0	
Total ...	3,698 8 10	1,582 4 6	2,116 4 4	
1892-93.

Rabi	2,721 7 0	342 11 3	2,378 11 9	
Total ...	3,201 0 1	342 11 3	2,858 4 10	
1893-94.				
Hot-weather ...	357 0 3	64 10 6	292 5 9	
Total for three years ...	7,256 9 2	1,989 10 3	5,266 14 11	Balance of March 1894.

Of the amount shown to be due Rs. 1,648 has been remitted since the close of the year and active steps are being taken to collect the balance.

138. The following table shows the expenditure on maintenance during the past five years:— MAINTENANCE AND REPAIR

	Miles.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
Repairs to head cut and river protective works	6·34	10,026	7,445	4,304	1,341	1,766
Repairs to Daha feeder ...	3·34	909	1,290	357	544	499
„ to Gandaki feeder ...	1·57	1,118	1,735	221	1,550	550
„ to Dhanai feeder ...	1·00	722	592	65	411	242
„ to Gangri feeder ...	6·57	·768	2,777	129	565	424
„ to dams and channels for irrigation purposes	...	11,357	12,615	3,945	5,106	631
Total ...	...	24,900	26,454	9,021	9,517	4,112
Establishment	...	12,422	10,560	3,710	3,772	1,738
Tools and plant (actual) ...	...	991	389	(—)193	213	112
Irrigation establishment to be treated as refund of revenue ...	...	...	...	...	...	530
GRAND TOTAL ...	...	38,313	37,403	12,538	13,502	6,492

139. The cost of maintaining the head works was a little more than last year, owing to the fact that silt clearance at the mouth of the head cut had been commenced about the 20th September and had made good progress, when a high flood came down the Gandak early in October necessitating a further clearance of silt. In the other feeders the expenditure was less. The main decrease in expenditure was, however, under the items "dams and channels," and was due to the Managers of the Moniara and Sadowa concerns having requested that the dams usually constructed after the rains at Siswa and on the Roopunchap Sota should not be made, as no rabi irrigation would be done by the factories. No silt clearance was for the same reason done in the Thakraha Sota. SILT CLEARANCE AND DAMS.

140. The state of the plantations for the last two years is shown below:— PLANTATION

YEAR.	Trees over 12 feet.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	TOTAL.
1	2	3	4	5
	No.	No.	No.	No.
1892-93	4,939	6,973	6,983	18,895
1893-94	5,276	6,117	6,041	17,434

The decrease in the total is due to a number of seedlings and saplings having died. No trees were planted, but the existing plantations were well maintained. The expenditure was Rs. 73 against Rs. 81 in the preceding year.

NADIA RIVERS.

REVENUE ACCOUNT.

141. The approximate length of the channels comprising the Nadia rivers' system is 477 miles. No capital account of expenditure is kept. The revenue account for the last two years is given below:—

PARTICULARS.	EXPENDITURE. During 1892-93.	EXPENDITURE. During 1893-94.	PARTICULARS.	RECEIPTS. During 1892-93.	RECEIPTS. During 1893-94.

Indirect Charges.										
Leave and pension allowances	4,867	4,419	4,101	5,870	6,075	5,395	6,357	6,417	7,221	8,222
Total indirect charges ...	4,867	4,419	4,101	5,870	6,075	5,395	6,357	6,417	7,221	8,222
Total working expenses ...	1,00,643	82,087	64,314	97,892	1,40,769	92,989	1,09,894	1,13,274	1,30,275	1,46,657
Net revenue ...	94,814	1,01,694	1,38,936	1,00,783	51,119	92,834	90,588	79,463	35,245	24,594

The total receipts show an increase of Rs. 5,731 as compared with 1892-93, but they are much below the average of the last ten years. The expenditure increased by Rs. 15,381 as compared with the previous year. The result of the year's working is a net revenue of Rs. 24,594 only, the smallest on record. The bad state of the head of the Mathabhanga, which was noticed in last year's report, still continues and accounts for the short revenue.

RAINFALL AND FLOODS.

143. No rainfall register is kept up for these rivers. The floods of the year were of ordinary height and caused no damage.

The gauge readings at Gheria and Berhampore for the last five years are given below:—

	Gheria.	Berhampore.
1889 ...	34·00	... 30′4$\frac{1}{5}$″
1890 ...	34·70	... 30′11$\frac{3}{4}$″
1891 ...	29·30	... 26′7″
1892 ...	31·55	... 29′1$\frac{1}{4}$″
1893 ...	30·75	... 27′11$\frac{1}{2}$″

A statement showing the highest guage readings of the Nadia rivers is given below as compared with those of the previous year:—

River.	Locality.	1893-94.		1892-93.		Highest known.

TRAFFIC.

145. The following statement shows the number of boats, tonnage, weight and value of cargo and toll collections:—

NAME OF RIVER.	Number of boats, inclusive of steamers, flats and rafts.	Tonnage of boats.	Weight of cargo.	Value of cargo.	Toll* collection.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7
	No.	Tons.	Tons.	Rs.	Rs.	
Bhagirathi	14,025	165,653	88,324	69,16,459	36,895	...
Ditto and Bhyrub-Jalangi ...	32,067	511,029	195,655	2,92,70,519	1,11,536	...
Mathabhanga and Ichamati ...	11,076	113,170	38,513	34,47,781	22,735	...
Total, 1893-94 ...	57,118	789,852	322,492	3,96,34,759	1,71,166	0·43
Total, 1892-93 ...	54,790	783,489	306,294	3,55,92,594	1,65,380	0·46

* Tolls from boats, steamers, flats and rafts.

REVENUE ESTABLISHMENT.

146. The cost of the revenue establishment for the last five years is shown below:—

	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Collectors	11,943	13,224	13,210	12,391	12,644
Accounts and office establishment	8,986	9,223	8,942	8,879	8,901
Travelling allowance ...	390	711	530	601	525
Contingencies	441	472	452	411	947
Total ...	21,760	23,630	23,134	22,282	23,017

The increase results from the larger commission earned by toll-collectors and darogas owing to increased revenue.

MAINTENANCE AND REPAIRS.

147. The charges for maintenance and repairs for the last three years are detailed below:—

PARTICULARS.	1891-92.	1892-93.	1893-94.
1	2	3	4
	Rs.	Rs.	Rs.
Re-opening lower entrance channel, Bhagirathi river	1,290	...	546
Inspection shed, upper entrance... ...	496	...	...
Training works in river Bhagirathi ...	40,413	46,518	51,481
„ „ Bhyrub ...	2,593	3,174	4,318
„ „ Jalangi ...	1,960	3,287	6,430
„ „ Mathabhanga ...	1,415	3,062	2,060
Sounding Nadia rivers	6,015	6,161	6,500
Maintaining and working divisional boats ...	3,102	2,698	2,635
Petty and other charges	5,420	3,863	3,394
Total ...	62,704	68,763	77,436

The total expenditure for the year was very heavy, being Rs. 8,601 in excess of that of 1892-93, and Rs. 14,660 higher than the figures of 1891-92. This was caused by the large outlay on training works in the several rivers, more especially in the Bhagirathi, which was necessary in order to prevent the entire closure of the navigable channels.

MISCELLANEOUS RECEIPTS.

148. The miscellaneous receipts during the year amounted to Rs. 86, against Rs. 158 in the previous year.

DREDGING AND SILT CLEARANCE.

149. There was no expenditure under this head during the year.

PLANTATIONS.

150. The only plantations kept up are on the berms of the embankments. No trees were planted during the year. The number now existing is 14,664 against 17,864 of last year. The great decrease in the number of trees has not been explained.

EDEN CANAL.

LENGTH OF CANAL.

151. No capital or revenue account of this canal is maintained. Its total length inclusive of that of the excavated channels is 26½ miles, as detailed below:—

Jujuty sluice channels	...	...	...	2 miles.
Eden Canal proper	...	...	...	19½ „
Kana Damodar junction cut	...	...	...	2½ „
Saraswati junction cut	...	...	...	2½ „
		Total	...	26½ „

Besides the above length the natural channels of the Kana Nadi, Kana Damodar, and North and South Saraswati are included in the system.

The rainfall during the year was 67·48 inches against 50·89 in 1892-93. During the kharif season it was very heavy, 34 06 inches against 22·51 of 1892, and there was very little demand for canal water: from December 1892 to middle of February it was almost nil.

REVENUE ACCOUNT.

152. The receipts and expenditure for the last two years are given below:—

Receipts.	1892-93.	1893-94.	Expenditure.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.
Water-rates ...	30,310	35,943	Works	(—)18	515
Miscellaneous ...	803	620	Maintenance and repairs	26,478	35,619
			Establishment ...	10,078	13,474
Total ...	31,113	36,563	Tools and plant ...	652	732
Less—Refunds of revenue	70	654	Total expenditure ...	37,160	50,340
Net total receipts ...	31,043	35,909	Balance, deficit ...	6,117	14,431

The only original work carried out during the year was the remodelling of the existing irrigation channel from Halara above the Kana Damodar stop dam to Kalna. The estimated cost of the work is Rs. 697, against which Rs. 515 was expended during the year.

There was an increase of Rs. 5,633 in the receipts from water-rates over the figures of 1892-93. The increase was due to the large amount of arrear water-rates for 1892-93 realized during the year under review. The maintenance charges were abnormally high. The excess is due to a large quantity of silt having been excavated from the Banka at Jujuty above the weir at Kanchanagar and from the channel No. 1 at Jujuty, and also to extended repairs having been done to the upper and lower sections of the canal during the year. The large deposit of silt was due to the extensive irrigation carried out in 1892-93.

The sand dam across the Damodar at Jujuti to keep up the cold weather supply of the canal was constructed as usual.

IRRIGATION.

153. The irrigation operations during the year were not so satisfactory as in the previous year. The total area irrigated was 11,739 acres of which 10,670 acres were in the Burdwan and 1,069 acres in the Hooghly district. The corresponding figures for last year were 38,024 acres in Burdwan and 33,309 acres in Hooghly. The areas irrigated during the last five years were as below:—

Nature of leases.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Acres.
Annual ...	9,693	1,330	1,478	6,534	138
Long leases ...	...	...	12,707	47,848	11,601
Unauthorized ...	...	...	...	16,951	...
Total ...	9,693	1,330	14,185	71,333	11,739

DEMANDS, COLLECTIONS AND BALANCE.

154. The total demand for the year was Rs. 68,565, of which Rs. 35,943 were actually collected and Rs. 1,041 remitted, leaving an unrealised balance of Rs. 31,581, a large portion of which will probably not be collected, as irrigation was effected under private agreements and not under the Irrigation Act. With the help of Rajah Peary Mohun Mukerji, C.S.I., of Utterpara, a compromise has been recently effected with the zamindars who possess proprietary rights in the old river channels which are utilised as canals, and rules for the Eden Canals have been passed under the Irrigation Act. There are, however, still some difficulties to be settled. In future all agreements for the supply of water will be executed under the Irrigation Act.

REVENUE ESTABLISHMENT.

155. The cost of establishment employed on irrigation during the year was Rs. 2,378 against Rs. 1,536 in 1892-93.

MADHUBAN CANAL.

EXPENDITURE.

156. The expenditure on works and maintenance of this canal during the last five years are given below:—

PARTICULARS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Works ...	2,957	6,236	...	...	...
Maintenance ...	3,257	2,011	7,300	7,093	5,943
Establishment ...	3,100	3,293	3,003	2,813	2,438
Tools and plant ...	23	287	203	126	2
Total ...	9,337	11,827	10,506	10,032	8,383

The Teur weir was seriously damaged during the year by a series of heavy floods which came down the Teur river. The flood of the 13th August rose two feet higher than any previously recorded flood. It topped the left bank above the weir and did considerable damage to the wingwall and apron of the weir. The canal banks were damaged in several places by floods due to heavy local rainfall. The irrigation of the year was considerably less than that of the previous year. Up to the end of May 2,724 acres were irrigated, when owing to a pentiful and seasonable rainfall the demand for water ceased and none was supplied again till January 1894, when only 347 acres of rabi and poppy were irrigated.

No revenue is derived from the canal.

MISCELLANEOUS RECEIPTS.

The miscellaneous receipts were Rs. 163 against Rs. 92 in 1892-93.

The areas irrigated during the last three years are shown below:— IRRIGATIO

Nature of crop.	1891-92.	1892-93.	1893-94.
1	2	3	4
	Acres.	Acres.	Acres.
Kharif	2,539	4,895	2,710
Rabi	495	150	46
Poppy	552	734	301
Other crops ...	...	640	14
Total ...	3,586	6,400	3,071

GENERAL RESULTS.

157. The net results of the year 1893-94, compared with those of the previous year, are shown below:— NET REVENUE.

PARTICULARS.	Receipts from all sources.	Working expenses, including refunds of revenue. (Direct and indirect charges.)	Profit or loss.
1	2	3	4
MAJOR IRRIGATION WORKS.	Rs.	Rs.	Rs.
1892-93	18,87,670	14,89,716	+3,97,954
1893-94	16,72,626	15,48,765	+1,23,861
MINOR WORKS AND NAVIGATION.			
For which Capital and Revenue accounts are kept.			
1892-93	5,46,751	3,46,036	+2,00,715
1893-94	5,25,348	3,93,423	+1,31,925
For which only Revenue accounts are kept.			
1892-93	1,65,538	1,30,293	+35,245
1893-94	1,71,252	1,46,658	+24,594
For which neither Capital nor Revenue accounts are kept.			
1892-93	31,276	47,262	−15,986
1893-94	36,687	59,377	−22,690
Total { 1892-93 ...	26,31,235	20,13,307	+6,17,928
Total { 1893-94 ...	24,05,913	21,48,223	+2,57,690

The actual receipts exceeded the figures of the revised Budget estimates by Rs. 1,15,913, while the expenses were only Rs. 47,112 more than the provision therein made.

158. Compared with 1892-93 the net result of the Major Irrigation Works reckoned on earnings, that is, on assessed revenue instead of on actual receipts, was:— EARNINGS.

	Earnings.	Working expenses.	Profit or loss.
	Rs.	Rs.	Rs.
1892-93 ...	16,13,532	14,89,716	+1,23,816
1893-94 ...	14,75,361	15,48,765	— 73,404

The expenditure was considerably over the average owing to the extensive damage caused by the cyclone of 1892 and floods of 1892 and 1893.

The revenue from Minor Works and Navigation is derived mainly from tollage receipts.

ARREARS. 159. The following summary shows the progress in the recovery of water-rates during the year:—

CANALS.	Outstanding on 1st April 1893.	Demand of 1893-94.	Collected or adjusted.	Outstanding on 1st April 1894.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Orissa Canals	89,816	1,90,824	2,17,290	63,350
Midnapore Canal	48,567	1,30,111	1,71,651	7,027
Sone Canals	87,790	8,53,161	8,39,093	1,01,858
Total ...	2,26,173	11,74,096	12,28,034	1,72,235

VALUE OF CROPS. 160. The approximate value of crops irrigated by Major Irrigation Works during the last two years is shown below:—

CANALS.	1892-93.		1893-94.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres.	Rs.
Orissa Canals	160,952	42,12,253	1,03,526	32,05,156
Midnapore Canal	91,217	22,80,425	85,763	26,35,305
Sone Canals	410,761	1,58,91,273	3,66,776	1,22,10,325
Total ...	6,62,930	2,23,83,951	5,56,065	1,80,50,786

The average value per acre of the various crops irrigated has decreased from Rs. 33 7 to Rs. 32·4.

DATE FOR SUBMISSION OF REPORTS. 161. The date fixed for the submission of revenue reports to the office of the Chief Engineer is the 5th September. The dates when the different reports were received are shown below:—

		In 1893.	In 1894.
Orissa Circle ...	Deputy Collector's report through Commissioner	13th October.	8th September.
	Superintending Engineer's report	5th September.	5th ditto.
South-Western Circle	Deputy Collector's report through Commissioner	21st ditto.	5th October.
	Superintending Engineer's report	6th ditto.	6th September.
Sone Circle ...	Deputy Collector's report through Commissioner	7th ditto.	8th ditto.
	Superintending Engineer's report	7th ditto.	3rd ditto.

All the reports were punctual, excepting that of the Deputy Collector, Revenue Division, Midnapore Canal, which was not received from the Commissioner of Burdwan until the 5th October 1894. The delay was in the office of the Superintending Engineer, who received the report in the middle of August.

162. The year has been one of a disappointing character so far as irrigation is concerned, the heavy and seasonable rainfall rendering canal water in many places not necessary. The cyclone of May 1893 did much damage to the canals in the Orissa and South-Western Circles, and in the latter circle the floods of

June also caused injuries to the works, which resulted in increased expenditure on repairs. The revenue derived from the canals was, owing to the diminished irrigation and the increased expenditure on maintenance, less than in the preceding year, and in some cases less than usual. In the body of the note the various items of which the expenses are made up have been subjected to a careful scrutiny. The necessity of economy, more especially as the year now current has also been one of plentiful rainfall and consequently diminished return, is obvious. The matter has received attention, but it is clear that expenditure has been incurred in the Nadia Rivers Division which led to no useful result, and that in the Sone Circle, more especially in the Arrah Division, there is a tendency to keep up the smaller distributaries and works to an unnecessarily high standard. In the latter circle as the whole area for which water can be given comes under long lease, some reduction in the revenue establishment should be practicable. A beginning in this direction has been made by reducing the rates of commission paid to headmen. The discovery of extensive frauds, committed however mainly in past years, by subordinates of the Revenue Division, has been followed by the trial and conviction of one of the circle officers. Alterations in the system of accounts have been made which will enable inspecting officers to check the accounts on the spot, and it is chiefly from their vigilance that it is hoped such occurrences in future will be rendered impracticable. The reduction, to almost a nominal figure, of the arrear balances in the Midnapore Revenue Division reflects great credit on Babu Raj Mohun Chuckerbutty, the Deputy Collector in charge. Mr. R. B. Buckley, the Superintending Engineer of the Sone Circle, has by the institution of irrigation conferences and other measures done much to further improve the administration of the Sone Circle: his efforts have resulted in the disappearance of the shortcomings noticed in the Resolution of the Lieutenant-Governor on last year's reports. Credit is due to the Engineers of the Orissa Circle and to the Deputy Collector in charge of the Revenue subdivision for the careful and sympathetic manner in which the new system of irrigation has been worked there.

163. The tours of officers have in all cases come up to the standard laid down by Government, but though there is considerable improvement on last year all the offices were not inspected. This is especially the case in the Sone Circle, where only two out of six divisional offices were inspected by the Superintending Engineer during the year. He, however, inspected more than the usual number of subdivisional offices. In the Orissa Circle the Superintending Engineer inspected every divisional office, and in the South-Western Circle the Superintending Engineer inspected all the divisional offices except one, which he inspected shortly after the close of the year.

C. W. ODLING,

The 9th November 1894. *Chief Engineer.*

IA.

STATEMENT OF CANALS IN THE PROVINCE OF BENGAL DURING THE YEAR 1893-94.

* The area 5,000 acres) commanded by the Sasaram distributary has been added.

(*a*) Rupees 19,58,356 sanctioned for direct outlay on the Orissa Project from 1st April 1890 to date of closing of construction estimate on 31st March 1895—*vide* Government of India, Public Works Department, letter No 295*I.*, dated 8th December 1892. From 1890-91 to 18 3-94 Rs. 14,06,787 have been expended out of this amount.

(*b*) and (*c*) The estimates for the Midnapore and Hijili Tidal Canals, respectively, having been withdrawn and closed, the figures shown are the totals of the old and fresh sanctions.

(*d*) Sanction to the construction estimate for the Sone Project expired on 31st March 1891. The expenditure from 1st April 1891 is chargeable against the schedule of works amounting to Rs. 7,05,707 for direct outlay and Rs. 16,366 for indirect outlay sanctioned in Government of India, Public Works Department letter, No. 6*I.*, dated 6th January 1893.

(*e*) There is no general sanctioned estimate for this project.

(*f*) Includes Rs. 8,66,000 expended from Famine Relief Funds.

(*g*) This length is that of the Calcutta and new canals with 20 miles of Kaorapukur khal. The Eastern Canals are 316 miles in length.

IB.

* Cannot be filled in, as the payment is partly for water supplied for the manufacture of indigo.

Note A.—In this table the water-rates shown as assessed during the year are the amounts for which occupiers have rendered themselves liable in return for canal water supplied during the year, and include some demands which were not legally recoverable, and others of which the assessment papers were not completed till after the close of the year.

Note B.—Refunds of revenue have been deducted from "Gross assessed revenue from all sources."

		Flow irrigation.	Lift irrigation.
1	2	3	4

SONE CIRCLE.

The following schedule is in force with reference to long leases taken in, and previous to the year 1891-92:—

Five-years' Leases.

Class.	Nature of crop.	Irrigation per—		
		Cottah.	Bigha.	Acre.
1	2	3	4	5
		Rs. A. P.	Rs. A. P.	Rs. A. P.
	For all crops ...	0 1 0	1 4 0	2 0 0

The following schedules are in force with reference to all leases taken during 1893-94:—

Schedule No. I.

Leases for a term of years.

For water supplied between the 25th of June of one year and the 25th March of the next.	Flow or Lift.		
	Rate per acre.	Rate per bigah.	Rate per tenth of a bigah.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
For leases for seven years—all crops ...	2 0 0	1 4 0	0 2 0
„ for three years „ ...	2 8 0	1 9 0	0 2 6

Schedule No. II.

Season Leases (Kharif).

Name of crop.	Date of supply.	Flow or Lift.		
		Rate per acre.	Rate per bigah.	Rate per tenth of a bigah.
1	2	3	4	5
		Rs. A. P.	Rs. A. P.	Rs. A. P.
Rice and sugarcane for kharif season only	25th June to 25th October.	3 0 0	1 14 0	0 3 0
Bhadoi serha rice or any other crops ...	25th June to 15th October.	2 8 0	1 9 0	0 2 6

SCHEDULE No. III.

Season Leases (Rabi).

TIME OF SUPPLY.	Locality.	FLOW.			LIFT.		
		Per acre.	Per bigha.	Per tenth of a bigha.	Per acre.	Per bigha.	Per tenth of a bigha.
1	2	3	4	5	6	7	8
		Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
15th October to 25th March.	Water supplied for all crops including sugarcane from distributaries open for kharif irrigation.	2 0 0	1 4 0	0 2 0	1 8 0	0 15 0	0 1 6
25th October to 25th March.	Water supplied for all crops including sugarcane from distributaries or parts of distributaries from which rabi irrigation only is allowed.	1 8 0	0 15 0	0 1 6	1 0 0	0 10 0	0 1 0

SCHEDULE No. IV.

Season Leases (Hot weather).

	FLOW OR LIFT.		
	Per acre.	Per bigha.	Per tenth of a bigha.
1	2	3	4
	Rs. A. P.	Rs. A. P.	Rs. A. P.
For water supplied between the 25th March and the 25th June, or at the option of the applicant, between the 25th of February and the 26th of May, for all crops.	4 0 0	2 8 0	0 4 0
When water can only be supplied for a part of the season, for each watering.	1 8 0	0 15 0	0 1 6

In the case of charges under schedules I to IV, any smaller area than one-tenth of a bigha will be charged as one-tenth. The bigah contains 27,225 square feet.

SCHEDULE No. V.

For water supplied by volume in the kharif season.

For water supplied between the 1st of September and the 31st October, four rupees for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less than twelve hours, a proportionate charge shall be made, but a fraction of less than one-sixteenth shall be charged as one-sixteenth.

SCHEDULE No. VI.

For water supplied by volume to fill aharas.

For water supplied between the 1st of November and the 25th of March, one rupee for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less then twelve hours, a proportionate charge shall be made, but a fraction of less than one-sixteenth shall be charged as one-sixteenth.

The total fall from 1st January to 24th November 1894 ...		48·58
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·45

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observation made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; =, fog. ⊖ ⊖

N.B.—In the weekly abstract from 16th to 22nd September 1894 read 79·2 for 79·4 as the minimum temperature of the 22nd September 1894; in that from 30th September to 6th October 1894, read SSE for ESS as a prevailing direction of wind of the 5th October 1894; and in that from 21st to 27th October 1894, read 0·11 for 0·1 as rain of the 25th October 1894.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 26th November 1894.

* Mean of 4 days. | † Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the readings during the same period for [illegible]. The humidity of the atmosphere is expressed as percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. [illegible] means of the numerical means or average of the rainfall in that district determined from the returns sent in for the [illegible]

for the week ending Saturday, the 24th of November 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 24TH OF NOVEMBER 1894.

DURING the whole of the previous week, fine settled weather of ordinary north-east monsoon character prevailed in Bengal, and similar weather has obtained throughout the present week. Slight changes only have occurred from day to day, but they have been of the small oscillatory character such as usually occur during fine settled weather. On the 18th, pressure had fallen briskly, the fall being largest at the western stations, where it exceeded a tenth of an inch, but still pressure was in excess by small to moderate amounts; temperature, on the other hand, was usually in small defect. On the 19th a further slow fall of pressure occurred, while temperature was generally rising. On this and the previous day though weather continued quite fine and settled in the plains, yet in the hills weather was slightly disturbed, and on the 19th, Gnatong reported having had a light snowstorm. On the 20th the pressure changes were very small, though at most stations a slight increase had occurred, while, on the other hand, temperature was falling at many stations. Again, though weather continued fine in the plains, another snowstorm with about 2 inches of snow was reported at Gnatong. On the 21st, the increase of pressure had continued more briskly, and pressure was becoming decidedly in excess; temperature, on the other hand, had fallen at the majority of stations, and had become from 1° to 2° in defect. The slightly disturbed conditions in the hills were less pronounced on this day, and no storms or rain of any kind were reported. On the 22nd the increase of pressure continued, while the temperature changes were small and variable. The disturbed conditions in the hills had again become more pronounced, and Gnatong reported a snowstorm with about an inch of snow. On the 23rd the increase of pressure ceased, and a slight fall commenced, though pressure was still largely in excess, the usual excess equalling 0·12″. Temperature had also commenced to fall rather more briskly at many stations. Weather on this day appeared to have become more settled, and there were no storms in the hills. On the 24th the fall of pressure continued, though pressure was still in excess by from 0·06″ to 0·07″. Temperature had again fallen, and the mean temperature was usually in defect by about 1° to 3°.

Throughout the week a steady dry northerly wind current, usually varying between north-easterly and north-westerly, has been blowing over the whole province; skies have been almost cloudless except at the stations in the hills, and there has been a complete absence of rain, except at some of the stations in the hills, where slightly disturbed weather with light rain or snow has been reported.

Pressure has again been in excess practically throughout the week, and the usual average excess has equalled from 0·06″ to 0·09″.

Temperature has been below the normal for the week, and the defect in the mean temperature has equalled 1·1°. This defect has been largest in East Bengal, while in Orissa and Chota Nagpur the temperature has been more nearly normal.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperature, which have been very considerably in defect:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 24th of November 1894.

	Normal mean maximum temperature for the week ending 24th November.	Actual mean maximum temperature for the week ending 24th November 1894.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 24th November.	Actual mean minimum temperature for the week ending 24th November 1894.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 24th November.	Actual mean daily temperature for the week ending 24th November 1894.	Variation of actual mean from the normal.

Rainfall.—Except for a few local falls of rain or snow in the hills the whole province has been rainless for the week.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 24th of November 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

* Mean of 5 days. | † Mean of 6 days.

Explanation.—Summary—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the means of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question. The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The stations in the district sending in returns divided by the number of stations. A rainy day is one of which at least a tenth of an inch fell.

for the week ending Saturday, the 1st of December 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1894. Mean for district.	Normal mean.	Variation.	District.

last ten years. The variations are *negative* when the mean or the week is less than the corresponding normal mean, and *positive* when greater.
Numbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal during the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, i e., from total rainfall as the subdivision.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 1st of December 1894.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0.10 inch of rain has fallen.

CALCUTTA, *the 4th December* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 1ST OF DECEMBER 1894.

FINE settled weather of ordinary north-east monsoon character has prevailed throughout the province during the whole week, and the changes from day to day have again been only of the small oscillatory charater which accompany fine weather. On the 25th of November, or the first day of the week under review, pressure was falling slowly to moderately over the whole province, though it was still in excess usually by from 0·02″ to 0·05″; temperature was also falling slowly, and was in defect usually by from 1° to 3°. On the 26th pressure had increased slowly, but this was followed on the 27th by a rather brisk fall, which caused pressure to be below the normal at all except the extreme western stations, this defect being the first that had been registered for a considerable period. This fall continued very slowly practically daily until the end of the week, when pressure had become in defect by amounts which usually ranged between 0·04″ and 0·06″. On the other hand, the temperature changes were a little variable, but they were generally in an upward direction, and on the 1st of December the mean temperature of the province was in excess by from about 2° to 3°.

Throughout the week also a steady northerly wind current, usually varying between north-easterly and north-westerly, has prevailed over the whole province, giving lightly clouded or almost cloudless skies, low humidity and a complete absence of rainfall.

Pressure.—The mean pressure for the whole week has been in very slight defect from the normal at the great majority of stations, though slight excess amounts have been registered in parts of Bihar. The variations have, however, been exceedingly small, and at most stations they have only equalled a few thousandths of an inch, and they have rarely exceeded a hundredth of an inch.

Temperature.—The variations of temperature from day to day have been small, and while at the beginning of the week a defect was registered, at its close an excess of almost equal amount had been established. The mean temperature for the whole province for the week has therefore been not very far removed from the normal, and a general defect of only 0·4° has been registered.

The actural temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperatures, which have been moderately in defect, while on the other hand night or minimum temperatures have in some cases been largely in excess:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 1st of December 1894.

	Normal mean maximum temperature for the week ending 1st December.	Actual mean maximum temperature for the week ending 1st December 1894.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 1st December.	Actual mean minimum temperature for the week ending 1st December 1894.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 1st December.	Actual mean daily temperature for the week ending 1st December 1894.	Variation of actual mean from the normal.

The maximum temperature	79·2
	Miles.
The highest velocity of the wind in one hour	8
	%
The mean relative humidity	78
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	71
	Inches.
The total fall of rain from 25th November to 1st December 1894 ...	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st January to 1st December 1894	48·58
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·45

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; = fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA; *Calcutta, the 3rd December* 1894.

C. LITTLE, *For Meteorological Reporter to the Govt. of India.*

Vital Statistics of the Districts of Bengal for the month of October 1894.

FINANCIAL RESOLUTION.

FINANCIAL DEPARTMENT—FINANCE.

Calcutta, the 8th December 1894.

RESOLUTION No. 6133F.

AT the close of the first six months of the financial year 1894-95 the Lieutenant-Governor takes the opportunity of examining the financial position of the province. The Accountant-General's memorandum on the final accounts of 1892-93 has now been received, as well as the Appropriation Report for the year 1893-94 which, although the accounts are still open to adjustments, furnishes results sufficiently approximate for all practical purposes. Lastly, the figures of the revenue and expenditure of the first six months of the current year have also been received from the Accountant-General, and these three sets of figures afford sufficient data for the usual review of the closed accounts of 1892-93, an examination of the approximate actuals for 1893-94, and a revised estimate of the probable position of the province during the remainder of the year 1894-95.

PART I.

CLOSED ACCOUNTS OF 1892-93.

2. The revised estimates adopted in the Financial Resolution No. 5032F., dated the 21st November 1893, assumed that the year 1892-93 had opened with a credit balance of Rs. 23,53,000 and closed with a credit balance of Rs. 22,47,000; that the total amount available for expenditure was Rs. 4,48,15,000, and that Rs. 4,25,68,000 had been spent. The actual result was more favourable than this estimate by Rs. 7,741. The amount available for expenditure was Rs. 4,47,98,997, and the amount actually expended Rs. 4,25,43,825, so that the closing credit balance was Rs. 22,55,172. The following statement shows the figures of actual expenditure furnished by the Accountant-General, Bengal,

in his memorandum on the accounts of the year as compared with the revised estimates adopted in November 1893:—

Receipts.	Revised Estimate adopted in November 1893, for 1892-93.	Actuals, 1892-93.	Expenditure.	Revised Estimate adopted in November 1893, for 1892-93.	Actuals, 1892-93.

Grand Total ...	4,48,15,000	4,47,98,997	Provincial surplus (+) or deficit (—)	(—)1,96,000	(—)98,259

3. The actual receipts were less than the estimate by Rs. 16,434, of which Rs. 10,066 were under Land Revenue adjustments, due chiefly to a debit of Rs. 9,259 against Provincial Funds, that being the Government share of the contribution from the 1st July 1890 to 31st March 1892, to the Provident Fund established for the Bengal and North-Western and Tirhut Railways. On the representation of the Local Government, this amount has since been written back to Provincial Funds in the accounts of 1893-94. The remainder of the decrease was under "Jails" (Rs. 5,864) and under "Miscellaneous" (Rs. 1,825).

4. The actual expenditure in 1892-93 was less than the revised estimate by Rs. 24,175. The largest fluctuations appear under the heads of Refunds and Drawbacks (—12,351), Interest (—2,401), Jails (—5,468), Political (—5,499), Stationery and Printing (+2,309).

PART II.

APPROXIMATE ACTUALS, 1893-94.

5. The following table compares the approximate actuals for 1893-94 with the revised estimates as passed by the Government of India in March last, and they show that, according to the latest information, the receipts were less than the revised estimate by Rs. 1,31,757, while the expenditure exceeded the revised estimate by Rs. 2,36,846. Taking into consideration a small increase of Rs. 172 in the opening balance, the net result is a reduction of the closing balance by Rs. 3,68,431. The details of these fluctuations are discussed in the following paragraphs:—

Receipts.	Revised estimate passed by the Government of India, 1893-94.	Approximate actuals, 1893-94.	Expenditure.	Revised estimate passed by the Government of India, 1893-94.	Approximate actuals, 1893-94.

RECEIPTS.

6. *Land Revenue.*—The latest return from the Accountant-General shows that the total collections under this head during 1893-94 amounted to Rs. 3,87,06,849, against Rs. 3,87,50,000 passed by the Government of India as the revised estimate for the year. The actuals include Rs. 403 on account of recoveries for Survey and Settlement charges, which are wholly Imperial. The 12 per cent. on collections from Government estates aggregated Rs. 4,78,504, and the Provincial share of Land Revenue was therefore one-fourth of (Rs. 3,87,06,849—403—4,78,504), plus Rs. 4,78,504 or Rs. 1,00,35,489. The adjustments between Imperial and Provincial will probably result in a net deduction of Rs. 14,56,419 from the Provincial share of Land Revenue as shown below:—

	Revised estimate passed by the Government of India.	Approximate actuals.
	Rs.	Rs.
Fixed contribution to Imperial Revenues under the terms of the contract	(—)14,39,000	(—)14,39,000
Interest on the sums already advanced for remodelling the Hidgellee Tidal Canal	(—)20,000	(—)18,856
Write back of the excess credit (Rs. 44,629—32,456) taken in 1892-93 on account of Imperial buildings made over to local agencies for maintenance and execution	... ...	(—)12,173
Cost of maintenance and execution of ditto in 1893-94	(+)41,000	(+)53,327
Advance for remodelling the Hidgellee Tidal Canal	(+)32,000	(—)8,279
Compensation for loss sustained by the Provincial revenues on account of the reservation of the Western Duars for the Khedda Department ...	(+)14,000	(+)10,806
Write back to Provincial Funds of the contribution to the Provident Fund of the Tirhut State Railway charged in the accounts of 1892-93 ...	(+)9,000	(+)9,259
Salary of Mr. H. Davies, the gardener who has newly arrived at the Royal Botanic Gardens, Calcutta	... ..	(+)256
Outfit allowance of ditto granted by the Secretary of State	.....	(+)325
Compensation to the Government of North-Western Provinces and Oudh for the loss sustained by that Government through the importation of Shajehanpur rum under bond	... ..	(—)52,084
Total ...	(—)13,63,000	(—)14,56,419

7. The expenditure incurred by the local agencies in the execution of Military and Imperial Civil Works, including the percentage charges for establishment and tools and plant during the year 1892-93, amounted to Rs. 32,456, against the estimate of Rs. 44,629, for which credit had been taken in the accounts of that year. The difference of Rs. 12,173 has now been written back to Imperial Funds in the accounts of 1893-94. The actual expenditure on Military and Imperial Civil Works in 1893-94, including the percentage charges for establishment, &c., as reported by the Public Works Department, amounted to Rs. 53,327, for which a credit has been taken provisionally and subject to final authorisation by the Government of India against Rs. 41,000 passed in the revised estimate for the year. The claim of the Government of the North-Western Provinces and Oudh for the sum of Rs. 52,084 as compensation for the loss sustained by the Provincial revenues of that Government in consequence of the action of the Board of Revenue, Bengal, prohibiting the importation of Shahjehanpur rum into Bengal, except under bond, has been accepted, and a debit of this amount against the Bengal Provincial Funds has accordingly been afforded in the estimate of 1893-94 now adopted.

8. *Salt.*—The original estimate of receipts under this head was Rs. 90,000, which was reduced to Rs. 80,000 in the revised estimate with reference to the actuals of 1892-93 amounting to Rs. 84,536. The actual collections in 1893-94, however, proved to be lower still and reached Rs. 77,265 only. The decrease

was in "Rent of warehouses," and was due to the stocks of bonded salt in store throughout the year falling very low.

9. *Stamps.*—The total receipts under this head amounted to Rs. 1,59,76,710 against Rs. 1,60,50,000, the revised estimate passed by the Government of India. Three-fourths of this sum, or Rs. 1,19,82,533, have accordingly been taken as the Provincial share of the receipts, as against Rs. 1,20,38,000 in the revised estimate, a falling off of Rs. 55,467. The decrease was under "Commercial and other Stamps."

10. *Excise.*—The Provincial receipts under this head amounted to Rs. 30,37,041 against Rs. 30,25,000, the revised estimate of the Government of India. The increase was mainly under the head "Duty on ganja." The duty on all kinds of this drug was raised by one rupee per seer from the commencement of the year, and although an increase of Rs. 1,14,000 on the actuals of 1892-93 was provided on this account, in the revised estimate, the realizations in 1893-94 were still better than the revised estimate by Rs. 38,000. There was also an increase under "Distillery fees," owing to a change in the system of levying the fee in most of the districts towards the latter part of the year, liquor issued from central distilleries being charged $2\frac{1}{2}$ annas per gallon London-proof, instead of one anna per gross gallon as hitherto.

11. *Provincial Rates.*—The receipts under this head represent principally the proceeds of the Public Works Cess, but they include also two other items, viz., the recoveries from District Funds of part of the cost of collecting the Road Cess, and the proceeds of the rate for the general management of Private Estates under Act X of 1892. The total collections amounted to Rs. 46,13,061 against Rs. 46,05,000, the revised estimate, the details being as follows:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Public Works Cess	41,40,000	41,34,309
Proportionate cost of collecting road cess	3,40,000	3,47,201
General rate for the management of Private Estates	1,25,000	1,31,551
Total ...	46,05,000	46,13,061

12. *Assessed Taxes.*—The revenue under this head showed a progressive increase up to 1891-92, and the estimate for 1893-94, which was based on the revised estimate for 1892-93, was originally placed at Rs. 43,30,000. The actuals of 1892-93, however, amounted to Rs. 42,27,964, and in consideration of the falling off in the collections during the first five months of the year, the revised estimate was reduced to Rs. 42,30,000 in the Financial Resolution No. 5032F., dated the 21st November 1893. That estimate was, however, subsequently raised by the Accountant-General to Rs. 43,00,000 with reference to the actuals of 12 months ending February 1894, and his action has been justified by the fact that the actual collections of the whole year amounted to Rs. 43,50,415. Half of this sum or Rs. 21,75,208, has been taken as the Provincial share of the receipts. The increase was under "Ordinary Collections," and appears to have been due to a careful revision of assessments.

13. *Forests.*—The receipts under this head amounted to Rs. 8,01,612 against Rs. 7,82,000, the revised estimate passed by the Government of India, and Rs. 7,44,882 the actuals of 1892-93. The increase was under the head "Timber and other produce removed from the forests by consumers or purchasers." The Provincial share of the receipts (one-half) amounts to Rs. 4,00,806, and the increase to Rs. 9,806.

14. *Registration.*—The revenue under this head, which had steadily improved for some years past, showed a falling off for the first time in 1893-94. The Provincial share (one-half) of the receipts under this head amounted to Rs. 6,94,568 against Rs. 7,16,901 the actuals of 1892-93, and Rs. 7,15,000 the revised estimate passed by the Government of India, the decrease being Rs. 20,432. The falling off occurred in the last two months of the year, and was due to the reduction of the minimum *ad valorem* fee on documents not exceeding Rs. 50 in value from twelve annas to eight annas.

15. *Principal Heads of Revenue.*—To sum up the figures contained in paragraphs 6 to 14, the total Provincial receipts under these major heads have

proved to be Rs. 3,16,18,382 against a revised estimate of Rs. 3,17,44,000, showing a loss of Rs. 1,25,618.

16. *Interest.*—The actuals amounted to Rs. 1,38,187 against Rs. 1,36,000, provided in the revised estimate ; the details are shown below :—

	Revised estimate.	Actuals.
	Rs.	Rs.
Class I.—Interest on advances to cultivators ...	36,000	31,735
„ II.— ditto under special laws	4,000	1,300
„ III.—Interest on loans to landholders and other notabilities	10,000	21,182
„ IV.—Interest on loans to Municipalities, District Boards and other Public Bodies	22,000	24,644
Interest on Government securities	13,000	12,672
Miscellaneous	51,000	46,654
Total ...	1,36,000	1,38,187

17. *Jails.*—In view of the large increase in the receipts under this head in 1891-92 and 1892-93, amounting to Rs. 9,27,642 and Rs. 9,13,136 respectively, and with reference to the orders of the Secretary of State directing that the requirements of the public consuming departments should, as far as possible, be supplied by the Jail Department, the original estimate for 1893-94 was placed at Rs. 9,59,000. Smaller supplies to the Military and Opium Departments caused, however, a falling off of income, and the actual receipts amounted to Rs. 8,08,117 against Rs. 9,10,000, the revised estimate of the year.

18. *Marine.*—The receipts under this head amounted to Rs. 9,33,731 against Rs. 9,12,000, the revised estimate passed by the Government of India.. The increase was solely under pilotage receipts.

19. *Medical.*—The fluctuations in the receipts of the Medical Department are shown below : —

	Actuals, 1892-93.	Revised estimate, 1893-94.	Actuals 1893-94.
	Rs.	Rs.	Rs.
(1) Medical schools and colleges ...	32,891	38,000	41,847
(2) Hospital receipts	80,614	85,000	86,098
(3) Receipts from Lunatic Asylums...	23,459	24,000	28,702
(4) Medicines sold by Civil Surgeons	11	.....	213
(5) Contributions from municipalities and private persons ...	31,350	31,000	31,950
(6) Miscellaneous	1,958	2,000	1,762
Total ...	1,70,263	1,80,000	1,90,572

The receipts under head (1) show a progressive annual increase since 1888-89. The increase under head (2) was partly due to the enhancement of the rate of payments from the Hospital Port Dues Fund on account of sick seamen sent to hospitals, and partly to larger receipts from paying patients.

20. *Scientific and other Minor Departments.*—The receipts under this head amounted to Rs. 1,82,883 against Rs. 1,75,000, the revised estimate passed by the Government of India. The increase was chiefly under "Emigration fees," which amounted to Rs. 33,798 against Rs. 27,000, the revised estimate of the year.

21. *Miscellaneous.*—The actuals amounted to Rs. 8,62,995 against Rs. 8,97,000 the revised estimate, as shown below :—

	Revised estimate.	Actuals.
	Rs.	Rs.
(1) Unclaimed deposits	3,80,000	2,92,137
(2) Treasure Trove	.....	119
(3) Sale proceeds of Durbar presents ...	8,000	5,130
(4) „ of old stores and materials ...	35,000	33,244
(5) „ of land and houses ...	26,000	27,134
(6) Fees for Government audit	80,000	70,097
(7) Rents	26,000	27,972
(8) Miscellaneous fees, &c.	1,69,000	2,13,016
(9) Miscellaneous	1,73,000	1,94,146
Total ...	8,97,000	8,62,995

The estimate under (1) was based on the average actuals of past years, but there was an extraordinary falling off in the deposits lapsing to Government. The increase under (8) was chiefly due to exceptionally high receipts from fees in partition cases, which were realized during the closing months of the year.

22. *State Railways.*—The following statement compares the revised estimate passed by the Government of India with the actuals of the year, and shows a falling off of Rs. 90,158 in the Provincial shareof the receipts:—

	Revised estimate passed by the Government of India.	Actuals.
	Rs.	Rs.
Gross receipts	1,26,00,000	1,24,94,814
Working expenses	53,50,000	54,25,131
Net receipts ...	72,50,000	70,69,683
Provincial share ...	36,25,000	35,34,842

23. *Irrigation Major Works.*—The total collections amounted to Rs. 16,72,626 against Rs. 15,00,000, the revised estimate for the year. The increase was distributed among all the great Canal systems in the province as shown below:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Orissa Project	3,40,000	3,76,575
Midnapore Canal	2,30,000	3,04,943
Tidal ,, ...	55,000	59,196
Sone Project	8,75,000	9,31,912
Total ...	15,00,000	16,72,626

The increase was principally due to larger traffic on the Orissa Canals, to the recovery of old outstandings on the Midnapore Canal, and to the more punctual recovery of current demands on the Midnapore and Sone Canals.

24. *Irrigation—Minor Works and Navigation by Public Works Department.*—The revenue from the various canals, rivers and embankments which are classed under this head was estimated at Rs. 8,00,000, while the actuals amounted to Rs. 7,44,667. The short realizations upon the Calcutta and Eastern Canals were due to much of the jute crop having been carried by rail and steamers, and in the case of the Nadia rivers to the continued unsatisfactory state of the entrance to the Mathabhanga river from the Ganges.

25. *Buildings and Roads—Civil Works by Public Works Department.*—The original estimate of receipts under this head was Rs. 1,70,000, which was raised to Rs. 2,55,000 in the Financial Resolution dated the 21st November 1893, as the Government share of the profits of the Darjeeling-Himalayan Railway for three years ending the 30th June 1892 was paid during the year, and it was expected that payment for the year ending the 30th June 1893 would also be made before the 31st March 1894. The actual receipts, however, aggregated Rs. 3,07,209, or Rs. 52,209 better than the revised estimate, owing to a gross profit of Rs. 30,439 on the working of the Calcutta work shops, not anticipated in the revised estimate, and to the realization of Rs. 25,395 in excess of the sum estimated (Rs. 40,000) as the probable rental of buildings during the year.

26. *Summary of Receipts.*—Thus the total Provincial revenue of the year amounted to Rs. 4,32,78,243, against a revised estimate of Rs. 4,34,10,000, a falling off of Rs. 1,31,757.

EXPENDITURE.

27. *Land Revenue.*—The total Provincial charges under this head amounted to Rs. 35,30,079 against Rs. 34,88,000, the revised estimate passed by the Government of India, there having been an advance under each main head as shown below:—

	Revised estimate.	Actuals
	Rs.	Rs.
(1) Charges of District Administration	30,22,000	30,46,248
(2) Management of Government estates ...	3,89,000	4,02,872
(3) Land Records and Agriculture	77,000	80,959
Total ...	34,88,000	35,30,079

The increase under (1) was partly under the item of partition establishment, which was more than covered by the fees realised, and partly under salaries of general establishment due to the payment of exchange compensation allowance. The increase under (2) was caused by a larger outlay on improvements.

28. *Salt.*—The original estimate under this head, amounting to Rs. 41,000, was reduced to Rs. 35,000 in the revised estimate of the year. The actual charges, however, were smaller still, amounting to Rs. 26,731, an effect due chiefly to the provision for improvements of the golahs and warehouses at Sulkea, Chittagong, and Narainganj not having been fully utilized.

29. *Stamps.*—The cost of "Stamp paper supplied from Central Stores" amounted to Rs. 3,14,803 against Rs. 3,43,000, the revised estimate of the year, and largely owing to this reduced expenditure, the Provincial share of the total charges of the Stamp Department aggregated Rs. 4,73,780 against a revised estimate of Rs. 4,97,000.

30. *Customs.*—The actual charges amounted to Rs. 5,42,498 against Rs. 5,56,000 passed by the Government of India as the revised estimate of the year. The saving was in Calcutta, and was due to the municipal tax on the Customs House buildings not being paid during the year on account of a disputed charge.

31. *Law and Justice—Courts of Law.*—The total charges amounted to Rs. 88,19,530 against Rs. 87,60,000, the revised estimate passed by the Government of India. The increase was due to the payment of exchange compensation allowance at a higher rate than was allowed for in the revised estimate, and also to larger payment of fees to pleaders in criminal cases.

32. *Jails.*—The revised estimate under this head was Rs. 20,30,000, but the total charges amounted to Rs. 20,75,478. The excess expenditure was under rations and clothing and bedding in both Central and District Jails, and was attributed partly to the rise in jail population and partly to the high prices of food-grains.

33. *Police.*—The total charges under this head amounted to Rs. 55,97,974 against Rs. 55,50,000, the revised estimate passed by the Government of India. The details are these:—

	Revised estimate.	Actuals.
	Rs.	Rs.
(1) Presidency Police	7,20,000	7,37,216
(2) Superintendence	1,46,000	1,51,894
(3) District Executive Force	40,25,000	40,79,531
(4) Municipal Police	37,000	36,257
(5) Village ,, ...	20,000	22,507
(6) Special ,, ...	4,93,000	4,61,791
(7) Railway ,, ...	1,03,000	1,01,033
(8) Cattle-pounds	4,000	4,533
(9) Refunds	2,000	3,212
Total ...	55,50,000	55,97,974

The saving under item (6) was chiefly in rations of the Lushai Hill Police; there was larger outlay under item (1) on account of hospital charges and arrear payments of contribution to the Port Commissioners of Calcutta for River Police, and under item (3) for larger payments of exchange compensation allowance.

34. *Marine.*—There was an increase of expenditure under "Purchase and hire of ships and vessels." The total charges amounted to Rs. 9,39,253 against Rs. 9,15,000, the revised estimate passed by the Government of India.

35. *Education.*—The total expenditure was Rs. 25,72,090 against Rs. 25,45,000, the revised estimate for the year, the increase being chiefly under "Government Colleges."

36. *Medical.*—There was larger expenditure under "Hospitals and Dispensaries" than had been provided for in the revised estimate, and the total outgoings of the department were Rs. 17,13,997 against Rs. 17,00,000, the revised estimate for the year.

37. *Scientific and other Minor Departments.*—The total expenditure under this head amounted to Rs. 4,51,978 against Rs. 4,23,000, the revised estimate. The increase was under "Cinchona Plantation," "Botanical Gardens" and "Veterinary charges."

38. *Stationery and Printing.*—The value of "Stationery supplied from Central Stores" amounted to Rs 6,11,505 against Rs. 7,75,000 provided for in the revised estimate of the year and largely on account of this saving, the total charges amounted to Rs. 12,60,355 only against the revised estimate of Rs. 14,06,000, passed by the Government of India.

39. *Miscellaneous.*—There were increases under "Petty Establishments" owing to the adjustment under this head of the charges on account of Khedda establishment and contingencies; under "Rents, Rates and Taxes" for the payment of arrear allowance to Omrao Begum Shahazada Mohamed from December 1881 to March 1893, for the maintenance of the tomb of Khaja Anwar Sahib; and under "Miscellaneous Refunds." The total expenditure aggregated Rs. 2,87,604 against Rs. 2,36,000, the revised estimate for the year.

40. *Irrigation—Major Works.*—The actual charges amounted to Rs. 14,55,178 against Rs. 14,25,000 provided for in the revised estimate. The increase was in the cost of maintenance of the Orissa canals.

41. *Buildings and Roads—Civil Works in charge of the Public Works Department.*—The outgoings were originally estimated at Rs. 27,43,000, but owing to the transfer of various sums to the Civil Department for expenditure by District Boards, the amount accepted by the Government of India as the revised estimate was Rs. 25,38,000. The actuals, however, aggregated Rs. 25,59,450. The increase was chiefly caused by certain expenditure having been debited in the accounts by transfer from the suspense heads.

42. *Buildings and Roads—Civil Works in charge of the Civil Department* —The grant of Rs. 41,451 for improvements in Hastings was not expended, and the grant for Contributions to Excluded Local Funds and Municipalities was not fully drawn during the year. The total charges amounted to Rs. 1,21,558 against Rs. 1,90,000, the revised estimate for the year.

43. *Contributions.*—The revised estimate of contributions in aid of Incorporated Local Funds for the year was Rs. 12,55,000, but the total amount drawn was Rs. 13,97,715. The increase was due to several additional grants made at the latter part of the year to Local Funds for the construction of Provincial Civil Works, which were not included in the estimate, and also to the adjustment of Rs. 24,856, being the starting balance of the Village Chaukidari Fund opened in the Chota Nagpur Division, which was passed on to the local fund by a debit to Provincial Funds.

44. *Closing balance.*—To sum up, the total expenditure of the year was anticipated to be Rs. 4,26,78,000, and turned out to be Rs. 4,29,14,846, an excess of Rs. 2,36,846. Adding this to the falling off in revenue of Rs. 1,31,757, the province was worse off at the end of the year than was anticipated by Rs. 3,68,603. The result is that the closing balance of the past year will stand at Rs. 26,18,569 against Rs. 29,87,000 anticipated by the Government of India when passing the estimate for the current year. Out of these 26 lakhs have to be taken during 1894-95 the three lakhs contributed to the Supreme Government's Resources to meet the anticipated deficit of the current year.

PART III.

REVISED ESTIMATE, 1894-95.

45. Turning now to the estimates of the current year based upon the latest information available, the following table compares the figures which were passed by the Government of India and those which the Lieutenant-Governor has now resolved to adopt. They show that there is an anticipated increase of Rs. 5,29,000 in receipts, but against that has to be set an actual reduction of Rs. 3,68,000 in the opening balance, and an expected increase of expenditure of Rs. 3,64,000, so that the closing balance will fall from Rs. 22,17,000 to Rs. 20,14,000. The cause of the variation in each case is examined in the following paragraphs:—

Receipts.	Estimate passed by the Government of India.	Estimate now adopted.	Expenditure.	Estimate passed by the Government of India.	Estimate now adopted.
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.
Opening balance ...	29,57,000	26,19,000	Direct demand on the Revenues—		
Principal Heads of Revenue—			1. Refunds and drawbacks	1,55,000	1,55,000
I.—Land Revenue { Proper ...	99,81,000	99,81,000	2. Assignments and compensations	1,79,000	1,79,000
{ Adjustments	—16,08,000	—16,01,000	3. Land Revenue	35,36,000	35,45,000

Receipts.

46. *Land Revenue.*—The Government of India accepted the estimate of total collections under this head as passed by the Local Government amounting for 1894-95 to Rs. 3,85,00,000 against Rs. 3,87,06,849, the actuals of 1893-94. The collections in the first seven months of the current year amounted to Rs. 1,32,86,000, against Rs. 1,34,02,000 in the corresponding period of last year, showing a falling off of Rs. 1,16,000. The average receipts for each of the past five years amounted to Rs. 3,87,17,000, and the Lieutenant-Governor does not

think that there are any grounds for apprehending that the receipts during the year will not come up to the original estimate of Rs. 3,85,00,000, which will accordingly be retained. The adjustments between Provincial and Imperial will probably result in a net reduction of Rs. 16,01,000 in the Provincial share of revenue under this head, as shown below:—

	Estimate passed by the Government of India.	Estimate now adopted.
	Rs.	Rs.
Lump contribution under the Provincial contract	(—)14,39,000	(—)14,39,000
Interest payable on advances received for the remodelling of the Hidjili Tidal Canal	(—)23,000	(—)21,000
Special contribution to Imperial Funds ...	(—)3,00,000	(—)3,00,000
Further advance to be drawn for remodelling the Hidjili Tidal Canal ...	+1,26,000	+1,26,000
Grant for expenditure on Imperial Civil and Military Works transferred to local bodies	+10,000	+14,000
Grant for loss sustained consequent on the reservation of the Western Duars for the Khedda Department	+18,000	+18,000
Salary of Mr. Davies, the probationary gardener at Sbpur	.....	+1,000
Total ...	(—)16,08,000	(—)16,01,000

47. When the estimates for 1893-94 were passed, it was anticipated that the capital expenditure of the year on the remodelling of the Hidjili Tidal Canal would amount to Rs. 1,00,000. This was reduced to Rs. 32,067 in the revised estimate in March last, in consequence of half the cost of the Bhograi Supply and Sluice Channel being written back and charged to the accounts of the Orissa Coast Canal instead of to the Hidjili Tidal Canal as had been anticipated. The ultimate result of this transfer was that instead of Provincial revenues receiving the estimated amount of Rs. 32,067, the sum of Rs. 8,279 was actually paid back from Provincial to Imperial revenues. This adjustment also accounts for the reduction of the charge for interest payable from the Provincial revenues on the capital advanced for the work from Rs. 23,000 to Rs. 21,000. The Government of India, while passing orders on the budgets for 1894-95, allowed a credit of Rs. 10,000 on account of the transfer of certain Imperial Civil and Military works to the management of local agencies. Since then the care of several other Imperial buildings has been made over to local bodies, with additional grants aggregating Rs. 4,000; so that the grant on this account amounts to Rs. 14,000.

48. *Salt.*—The miscellaneous receipts under this head during the first half of the current year amounted to Rs. 53,786, against Rs. 37,586 in the corresponding period of 1893-94, showing an increase of Rs. 16,200. The actual receipts of 1893-94 were Rs. 77,265, and as some further increase is expected in the second half of the current year owing to the increasing importation of salt, for which sheds have been provided in the Kidderpore Docks, the total estimate under this head has been raised from Rs. 80,000 to Rs. 1,10,000.

49. *Stamps.*—The estimate of total revenue under this head, as passed by the Government of India, amounts to Rs. 1,60,50,000. The Comptroller-General's latest statement shows that the receipts during the first six months of the current year exceeded those of the corresponding period of last year by Rs. 1,92,000, the increase being entirely under "Court-fees." The actual receipts in 1893-94 amounted to Rs. 1,59,76,710, and the Lieutenant-Governor thinks that the estimate for 1894-95 may be safely raised to Rs. 1,61,60,000. The Provincial share will be Rs. 1,21,20,000, against Rs. 1,20,38,000 passed by the Government of India.

50. *Excise.*—The estimate for 1894-95 amounted to Rs. 1,21,00,000 against Rs. 1,21,48,165, the actuals of 1893-94. The result of the settlement of excise shops for 1894-95 shows an increase of Rs. 5,29,179 in "License fees" as compared with the figures of the previous year, and the Comptroller-General's return shows that the receipts in the first seven months of the current year were Rs. 2,93,000 in excess of the receipts of the corresponding period of 1893-94. In view of these figures the estimate of total revenue under this head will be

raised from Rs. 1,21,00,000 to Rs. 1,25,00,000. The Provincial share of one-fourth will stand at Rs. 31,25,000, against Rs. 30,25,000 originally estimated.

51. *Provincial Rates.*—The following statement compares the estimates under this head with the actuals of the last two years:—

	Actuals, 1892-93.	Approximate actuals, 1893-94.	Estimate, 1894-95.	Revised estimate, 1894-95.
	Rs.	Rs.	Rs.	Rs.
(1) Public Works Cess ...	41,94,726	41,34,309	42,00,000	41,40,000
(2) General rate for the management of private estates ...	77,209	1,31,551	1,40,000	1,50,000
(3) Proportionate cost of collecting Road Cess	3,44,332	3,47,201	3,20,000	3,40,000
Total ...	46,16,267	46,13,061	46,60,000	46,30,000

The latest return from the Accountant-General shows a falling off of Rs. 17,000 in the collections under Public Works Cess in the first six months of the current year, as compared with those of the corresponding period of last year. The actuals in 1893-94 amounted to Rs. 41,34,309, and the Lieutenant-Governor thinks that it will not be safe to place the estimate for the current year at a higher figure than Rs. 41,40,000. The Board of Revenue have recently raised the estimate of receipts under item (2) from Rs. 1,40,000 to Rs. 1,50,000, which has been accepted. Under head (3) the recoveries in the first six months show a falling off of Rs. 6,000 only, and as the actuals of 1892-93 and 1893-94 amounted to Rs. 3,44,332 and Rs. 3,47,201 respectively, the estimate for 1894-95 will be raised from Rs. 3,20,000 to Rs. 3,40,000. The total estimates under Provincial Rates will therefore stand at Rs. 46,30,000.

52. *Assessed Taxes.*—The Government of India placed both the revised estimate for 1893-94 and the estimate for 1894-95 at Rs. 43,00,000. The receipts in 1893-94 amounted to Rs. 43,50,415, and the collections in the first six months of the current year show an increase of Rs. 2,07,211 as compared with those of the corresponding period of last year. The increase is attributable partly to better assessments, and partly to prompter payments, which will necessarily decrease to some extent the receipts in the second half-year: it will therefore not be safe to place the estimate at a higher figure than 44,00,000 instead of Rs. 43,00,000. The Provincial share will stand at Rs. 22,00,000.

53. *Registration.*—The Provincial share of the receipts under this head during the first six months of the current year amounted to Rs. 3,62,637, against Rs. 3,94,064 obtained in the corresponding period of last year, showing a decrease of Rs. 31,427. The falling off has been attributed chiefly to the orders reducing the minimum *ad valorem* fees from annas 12 to annas 8, which took effect from the 1st July 1893. The actuals in 1893-94 were Rs. 6,94,568. The estimate for the current year has been reduced from Rs. 7,25,000 to Rs. 6,70,000.

54. *Law and Justice—Courts of Law.*—The Government of India placed the revised estimate for 1893-94 at Rs. 9,00,000, and the estimate for 1894-95 at Rs. 9,04,000. The actuals in 1893-94 amounted to Rs. 8,96,595, and the receipts in the first six months of the current year show a decrease of Rs. 31,000 as compared with those of the corresponding period of last year. In view of these figures the estimate has been reduced to Rs. 8,70,000.

55. *Jails.*—The original estimate under this head amounted to Rs. 9,55,000 against Rs. 8,08,117, the approximate actuals of 1893-94, and Rs. 8,55,000, the average actuals of the past five years. The receipts in the first six months of the current year show a falling off of Rs. 5,000, but there was an increase of Rs. 28,000 in September 1894. Looking to these results, the estimate will be placed at Rs. 9,00,000.

56. *Police*—The approximate actuals in 1893-94 amounted to Rs. 2,43,600, and the receipts during the first six months of the current year show an increase of Rs. 14,000 as compared with those of the corresponding period of last year. The estimate will be raised from Rs. 2,40,000 to Rs. 2,56,000.

57. *Marine.*—The original estimate under this head amounted to Rs. 9,19,000 against Rs. 9,33,731, the approximate actuals of 1893-94. The receipts in the first six months of the current year show an increase of Rs. 9,000 as compared

with those of the corresponding period of last year. The estimate for 1894-95 will be placed at Rs. 9,40,000.

58. *Medical.*—The receipts under this head in 1893-94 amounted to Rs. 1,90,572, and the realizations in the first six months of the current year show an increase of Rs. 19,000 over those of the corresponding period of last year. The estimate will be raised from Rs. 1,77,000 to Rs. 2,00,000.

59. *State Railways.*—Under the terms of the Provincial contract with the Government of India, the net receipts of the entire Eastern Bengal State Railway system are divided equally between the Imperial and Provincial Governments. The following statement compares the estimate passed by the Government of India for 1894-95 with the actuals of 1893-94:—

	Actuals for 1893-94.	Estimate passed by the Government of India for 1894-95.
	Rs.	Rs.
Gross receipts ...	1,24,94,814	1,22,00,000
Working expenses ...	54,25,131	55,00,000
Net receipts ...	70,69,683	67,00,000
Provincial share ...	35,34,842	33,50,000

The approximate gross earnings of the Eastern Bengal State Railway system from the 1st April to the 27th October 1894 amounted to Rs. 75,52,000, against Rs. 69,12,000 obtained from the 1st April to the 28th October 1893, showing an improvement of Rs. 6,40,000. If the average receipts of one day are added to this, the total increase in six months and 28 days will be nearly Rs. 6,90,000. The earnings for a later week, however, show a small falling off of Rs. 9,000; and, in view of all these figures, the Lieutenant-Governor thinks that the estimate of gross receipts may be raised from Rs. 1,22,00,000 to Rs. 1,31,00,000, and the working expenses from Rs. 55,00,000 to Rs. 57,00,000, so that the net receipts may be taken at Rs. 74,00,000. The Provincial share of these receipts will therefore be Rs. 37,00,000.

60. *Irrigation—Major Works.*—The latest returns received from the Examiner of Public Works Accounts show that there has been a falling off of Rs. 1,26,000 in the actual collections of the first five months of the current year as compared with the receipts of the corresponding period of last year. The high actuals of 1893-94 (Rs. 16,73,626) are accounted for by the fact that large arrears were collected in that year. The estimate for 1894-95, amounting to Rs. 15,00,000, which contemplated a considerable falling off, will be retained.

61. *Irrigation—Minor Works.*—The returns of the Examiner of Public Works Accounts show that the receipts during the first five months of the current year from Minor Works in charge of the Public Works Department amounted to Rs. 2,25,127, against Rs. 2,78,500 realized in the corresponding period of last year. The total receipts in 1893-94 amounted to Rs. 7,44,667, and the estimate for 1894-95 has, upon the advice of the Public Works Department, been reduced, from Rs. 8,15,000 to Rs. 7,15,000. On the other hand, the estimate of receipts by Civil Officers will be raised from Rs. 1,16,000, to Rs. 1,26,000, the actual collections in the first six months of 1894-95 being Rs. 1,21,216.

62. *Buildings and Roads—Civil Works.*—The original estimate of receipts for Civil Works under the Public Works Department amounts to Rs. 1,50,000, which will be raised by Rs. 61,000 on account of the sale proceeds of certain buildings and lands. The estimate of receipts for Civil Works in charge of officers of the Civil Department amounts to Rs. 2,28,000. The actuals in 1893-94 were Rs. 2,38,000, and the receipts during the first six months of the current year very nearly correspond with those obtained in the same period of last year. The estimate will be raised to Rs. 2,37,000.

63. *Contributions.*—A contribution of Rs. 10,000 has been made from the Darjeeling Improvement Fund towards the cost of a bridge over the Balasun river. The amount will be adjusted under this head and made over to the Public Works Department in addition to another Rs. 5,000 by reduction of the grant for the management of Government estates, to enable that department to undertake the work.

64. *Summary of Receipts.*—The total estimated revenue of 1894-95, is now fixed at Rs. 4,33,57,000, an increase of Rs. 5,29,000 over the original estimate. Of this increase the prosperous traffic of the Eastern Bengal State Railway accounts for three-and-a-half lakhs.

EXPENDITURE.

65. Out of the net estimated additional expenditure of Rs. 3,64,000, as much as Rs. 1,68,000 is caused by the payment of additional exchange compensation allowance, and it will be convenient, before examining the major heads in detail, to show in one view the total expenditure likely to be entailed on the Provincial Revenues by the payment of exchange compensation allowance in 1894-95 as compared with the actuals of 1893-94. The estimates for 1894-95, as passed by the Government of India, included a provision of Rs. 6,36,000 for exchange compensation allowance, based upon a rate of exchange of 1*s.* 2*d.* for the rupee; but owing to the fall in the exchange value of the rupee, the Accountant-General has reported that the total charge will probably amount to Rs. 8,04,000, as shown below in details of the major heads—

	Actuals, 1893-94.	Estimate passed by the Government of India, 1894-95.	Estimate now adopted, 1894-95.
	Rs.	Rs.	Rs.
Land Revenue	58,937	99,000	1,06,000
Stamps and Excise	1,898	5,000	3,000
Customs	9,795	17,000	11,000
Assessed Taxes	383	...	...
Forest	4,065	7,000	6,000
Registration	625	1,000	1,000
General Administration ...	49,228	74,000	76,000
Courts of Law	1,60,449	2,30,000	2,85,000
Jails	11,493	17,000	19,000
Police	51,313	68,000	1,08,000
Marine	6,195	6,000	30,000
Education	31,195	44,000	62,000
Medical ...	41,970	58,000	83,000
Minor Departments	6,681	9,000	10,000
Stationery and Printing ...	1,326	1,000	4,000
Total ...	4,35,553	6,36,000	8,04,000

Increased provision on this account will now accordingly be made in the proper place in the estimates under the several major heads.

66. *Land Revenue.*—The estimate under this head, amounting to Rs. 35,36,000, will be raised by Rs. 7,000 for exchange compensation allowance as noted in the previous paragraph; by Rs. 5,000 for the additional establishment sanctioned to enquire into irregularities in the *tauzi* accounts of the Burdwan District; and by Rs. 2,260, being the amount granted for the management of private estates in the Chittagong Hill Tracts and Angul. Against this addition a reduction of Rs. 5,000 will be made in the grant for the management of Government estates, that being the sum transferred to the Public Works Department for the construction of a bridge over the Balasun river in the district of Darjeeling as stated in paragraph 63 above. The estimate will now stand at Rs. 35,45,000 instead of Rs. 35,36,000.

67. *Salt.*—Owing to the unusually large importations of salt this year, two sheds at the Kidderpore Docks have been rented at Rs. 600 per mensem each. Some temporary increase in the establishment has also been sanctioned, as well as temporary partitions in the Sulkea Salt Golah sheds at a cost of Rs. 2,000. The total estimate will therefore be raised from Rs. 33,000 to Rs. 43,000.

68. *Excise.*—A grant of Rs. 14,000 has been sanctioned to the District Board of Rajshahi for constructing two godowns for the storage of ganja at Nowgong, the charge being met by transfer from the grant for the construction of excise buildings. A reduction of Rs. 4,000 will be made this on account in the Provincial share of the excise charges, and the Provincial share of the estimate will now stand at Rs. 1,63,000.

69. *Provincial Rates.*—The estimate under this head, amounting to Rs. 3,96,000, will be raised by Rs. 17,000 to meet the cost of cess revaluation

in the district of Patna. The estimate will now stand at Rs. 4,13,000: the approximate actuals of 1893-94 were Rs. 4,27,711.

70. *Customs.*—Since the budget was passed, placing the estimate under this head at Rs. 5,79,000, considerable additional establishment has been entertained in the Calcutta Custom House on the introduction of the new Tariff Act; but as the additional charge will be met by an assignment from the Imperial Revenues, for which no credit has been taken under Land Revenue adjustments, no provision for the additional expenditure will now be made in the Provincial Budget. The dispute with the Calcutta Municipality regarding the payment of taxes for the Custom House buildings having now been concluded, a provision of Rs. 10,837 will be added to the revised estimate to meet this charge which, as explained in paragraph 30 above, was saved in 1893-94.

71. *Assessed Taxes.*—On the recommendation of the Board of Revenue, the total grant for establishment in the Income-Tax Department in 1894-95 has been reduced from Rs. 1,77,144 to Rs. 1,72,992, and the grand total from Rs. 1,88,144 to Rs. 1,83,992. The Provincial share will stand at Rs. 92,000, against Rs. 94,000 originally estimated.

72. *Forests.*—Owing to the number of officers on leave, the Conservator of Forests has reduced the original estimate by Rs. 10,000 under the head of Salaries and Travelling Allowances of superior officers. The Accountant-General has recently reported that a provision of Rs. 11,000, against a budget grant of Rs. 14,000, may be sufficient on account of exchange compensation; so that the total reduction amounts to Rs. 13,000. The Provincial share will stand at Rs. 2,23,000, against Rs. 2,30,000 in the original estimate.

73. *Registration.*—The Provincial share of the charges during the first six months was Rs. 2,14,000, against Rs. 2,05,000 in the same period of last year, showing an increase of Rs. 9,000. The actuals of 1893-94 were Rs. 3,92,748, and it will not be safe to place the estimated Provincial share at a lower figure than Rs. 4,00,000.

74. *Jails.*—The estimate passed by the Government of India amounts to Rs. 22,44,000 against Rs. 20,75,478, the approximate actuals of 1893-94. The estimates of receipts and charges under this head are compared below with the actuals of the two preceding years:—

		Actuals, 1892-93.	Approximate actuals, 1893-94.	Budget estimate, 1894-95.	Estimate now proposed, 1894-95.
1		2	3	4	5
		Rs.	Rs.	Rs	Rs.
Jails ..	Receipts ...	4,055	5,433	5,000	5,000
	Charges ...	14,08,045	14,55,589	14,86,600	15,00,000
Net Expenditure ...		14,03,990	14,50,156	14,81,600	14,95,000
Manufactures ...	Receipts ...	9,09,081	8,02,684	9,50,000	8,95,000
	Charges ...	7,05,487	6,19,889	7,57,400	7,00,000
Net Receipts ...		2,03,594	1,82,795	1,92,600	1,95,000

The estimate for 1894-95 provides for a net expenditure of Rs. 14,81,600 under Jails and for a net profit of Rs. 1,92,600 from Jail manufactures. The actual charges for Jails in the first six months of the current year show an increase of Rs. 38,000. Looking to all these figures, it will not be safe to place the estimate of expenditure under Jails lower than Rs. 15,00,000. In view of the actual charges in past years, a provision of Rs. 7,00,000 will probably be sufficient under Jail manufactures, and the total expenditure of the Jail Department for 1894-95 may be estimated at Rs. 22,00,000.

75. *Police.*—The estimate under this head, amounting to Rs. 58,92,000, will be raised by Rs. 20,000 for an increased grant under contract contingencies and by Rs. 40,000 for the payment of additional exchange compensation allowance. The total grant will now stand at Rs. 59,52,000.

76. *Marine.*—The grant under this head will be raised by Rs. 3,000 for an annual provincial contribution towards the cost of a pilot chart of the Indian Ocean; by Rs. 2,207 the contribution of the Bengal Government towards the claim of Messrs. Macneill & Co. for the carriage of non-service parcels by the mail steamers running on the Brahmaputra river during the years 1885 to 1893, and by Rs. 24,000 to meet the cost of additional exchange compensation allowance. The total estimate will therefore be raised by Rs. 29,000, and will stand at Rs. 9,28,000.

77. *Education.*—The estimate under this head, amounting to Rs 26,46,000, will be raised by Rs. 50,000 for additions and alterations to the workshop attached to the Sibpur Engineering College; by Rs. 4,300 for the printing of the Lepcha Dictionary; by Rs. 1,000 for the purchase of tools and raw materials for the Ranchi Industrial School; and by Rs. 18,000 for the payment of additional exchange compensation allowance. Against these further grants, amounting to Rs. 73,300, the following reductions aggregating Rs. 33,634 will be made by transfer from this to other heads:—

	Rs.
(*a*) A grant to the District Board of Noakhali for repairing the houses and furniture of the four Government middle vernacular schools in that district damaged by the cyclone of October 1893	411
(*b*) A grant to the District Board of Pabna for the construction of two wings of the Pabna Zilla School building	6,926
(*c*) A grant to the District Board of Backergunj for the purchase of books, maps, &c., for the Government middle vernacular schools in that district	150
(*d*) Grants to the several District Boards for grants-in-aid to primary schools	25,500
(*e*) A grant to the District Board of Bankura for opening out the lower parts of two windows in the Bankura Zilla School ...	66
(*f*) A grant to the Public Works Department for the erection of iron fencing with iron gates in the Nawab's Madrassa at Murshidabad	581
Total ...	33,634

The total estimated expenditure will now stand at Rs. 26,46,000+73,300—33,634=Rs. 26,85,666, or Rs. 26,86,000 in round numbers.

78. *Scientific and other Minor Departments.*—The estimate under this head will be raised by Rs. 4,300, or from Rs. 4,42,000 to Rs. 4,46,000 to meet certain minor charges.

79. *Superannuation.*—The following table shows the Provincial charges under this head during the past six years:—

	Rs.	Increase.
1888-89	13,70,000	...
1889-90	14,36,000	66,000
1890-91	15,13,000	77,000
1891-92	16,00,000	87,000
1892-93	17,03,000	1,03,000
1893-94	17,40,000	37,000
Estimate 1894-95 ...	18,50,000	1,10,000

The increase during the last five years has averaged Rs. 74,000 a year. The actuals in the first six months of the current year show an increase of Rs. 22,000 compared with the payments during the same period of last year; but out of this sum the increase in September 1894 alone amounted to Rs. 11,000. In view of these figures, the Lieutenant-Governor thinks that the estimate may be safely reduced from Rs. 18,50,000 to Rs. 18,00,000.

80. *Miscellaneous.*—A grant of Rs. 6,061 has already been sanctioned to the District Charitable Society to meet the cost of the repairs to the Alms House buildings, and applications for grants-in-aid from some of the Charitable Societies are under consideration. The estimate under this head will be raised from Rs. 2,27,000 to Rs. 2,36,000.

81. *Irrigation—Minor Works and Navigation.*—The estimate of the Government of India, amounting to Rs. 15,72,000, will be raised by Rs. 35,000 on account of the estimated cost of clearing the Gaighatta khal and the Balighai drain. The total grant will thus stand at Rs. 16,07,000.

82. *Civil Works in charge of the Public Works Department.*—The grant for Provincial Civil Works for the current year was originally fixed at Rs. 26,36,000. It has been reduced to Rs. 24,82,314 as the net result of certain additions and deductions sanctioned during the past eight months. An additional grant of

Rs. 10,483 will now be made for percentage charges for establishment, tools and plant on Imperial works transferred to the management of local funds in 1892-93 and 1893-94, as shown below :—

	Rs.
Grant for percentage charges in 1892-93	6,386
Ditto ditto in 1893-94	10,474
	16,860
Deduct amount already granted in 1893-94	6,377
	10,483

The Lieutenant-Governor has also determined to make a further additional grant of Rs. 40,000 to enable the Public Works Department to undertake several urgent works which can no longer be postponed. The total grant will therefore stand at Rs. 25,33,000.

83. *Civil Works in charge of Civil Officers.*—The sum of Rs. 41,451 sanctioned by Government for the improvements at Hastings was not drawn by the Calcutta Municipality in 1893-94. The amount should therefore be provided in the current year. A provision of Rs. 50,000 will also be made to meet the Government contribution towards the cost of acquiring land in the northern part of the town of Calcutta for a recreation ground for young men. The total grant under this head will therefore be raised from Rs. 1,38,000 to Rs. 2,29,000.

84. *Contributions.*—The grants made to several District Boards to establish equilibrium between the receipts and charges of departments transferred to their management amount to Rs. 4,45,035, and the special grants made to the several Boards for the maintenance of roads transferred to their charge now amount to Rs. 2,29,720. Against these sums must be set Rs. 20,000 restored to the Public Works Department by the retransfer of the roads in the district of Gaya. The annual grants to the District Boards for the maintenance of Imperial and Provincial civil works, including establishment and allowances to Engineers, &c., amount to Rs. 1,48,267, and the annual grants to the District Road Accounts and Road Funds aggregate Rs. 82,942. The grand total of these various grants is Rs. 8,85,964. The following further expenditure has been sanctioned for the current year :—

	Rs.
To Local Funds for the construction and maintenance of Imperial works	3,855
To Local Funds for the construction and maintenance of Provincial works by reduction of the Public Works Department grant	1,83,450
To Local Funds for the construction and maintenance of Provincial works for which no corresponding reduction of the Public Works Department grant has been made	3,859
To Local Funds for the construction and maintenance of Provincial works by reduction of Irrigation Minor Works	107
To the District Board of Rajshahi for ganja golahs ...	14,000
Grants to the District Boards for the extension of primary education and other charges by reduction of the Education grant as in paragraph 77 above ...	33,053
Additional grant for the District Road Accounts, Sonthal Parganas, for Public works	10,000
Grant to the District Board of Howrah in compensation for the loss of tolls arising from the retransfer of the Gaighata Khal Ferry to Government ...	2,500
Grant to the District Board of Muzaffarpur for primary education	1,000
Grant to the District Board of Noakhali for retransfer of cattle-pounds	350
Grant to the District Board of Mymensingh for revaluation charges	7,314
	2,59,488

The estimated expenditure of grants to Incorporated Local Funds now, therefore, amounts to Rs. 8,85,964+2,59,488=11,45,452, and as some provision is necessary to meet unforeseen demands, the estimate under this head will be placed at Rs. 11,70,000.

85. *Closing balance.*—According to the estimates passed by the Government of India, it was expected that the year would close with a balance of Rs. 22,17,000. According to the estimates now adopted, the closing balance will be Rs. 20,14,000. The manner in which this total has been arrived at has been explained in paragraph 45 above.

86. *Conclusion*—The budget estimates passed early in the year by the Government of India contemplated an excess of Rs. 7,70,000 in expenditure above receipts, but owing chiefly to the large increase in Railway receipts and Stamps and Excise, the estimated excess expenditure will be only Rs. 6,05,000. This saving of Rs. 1,65,000, however, is more than absorbed by the unexpected reduction of Rs. 3,68,000 in the opening balance, due chiefly to the larger payments of exchange compensation allowance in 1893-94, and the difference about 2 lakhs, represents the extent to which the closing balance of 1894-95 is expected to be reduced. It is anticipated that the estimate of expenditure sanctioned by the Government of India for 1894-95 will be exceeded by $3\frac{1}{2}$ lakhs, which includes nearly $1\frac{3}{4}$ lakhs for additional exchange compensation allowance and more than a lakh and-a-half on account of grants to District Boards, provided in great part by corresponding reductions of the Public Works grant.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India, Department of Finance and Commerce, for information.

Ordered also that a copy of the above Resolution be forwarded to the Board of Revenue; to all Commissioners of Divisions; to the Accountant-General; to the Inspectors-General of Civil Hospitals, Police, Jails, and Registration; to the Directors of Public Instruction and Land Records and Agriculture; to the Conservator of Forests; to the Port Officer, Calcutta; to the Superintendent of the Royal Botanic Gardens, Calcutta, to the Manager of the Eastern Bengal State Railway and to all Departments of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Govt. of Bengal.

FINAL REPORT ON THE WINTER RICE CROP OF BENGAL 1894.

The following is published for general information.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

REVENUE DEPT.,
The 11th December 1894.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final report on the winter rice crop of Bengal, 1894.

1. *Explanatory.*—The final forecast of the winter rice crop has not been received from the Sonthal Parganas, Angul and Khondmals and Puri. For these districts the preliminary forecasts have been retained in the consolidated district returns appended to this note.

2. *Character of the Season.*—The character of the season up to the middle of September last was described in the Preliminary Forecast issued on the 4th October 1894. The rainfall had been on the whole favourable to the cultivation and growth of the winter rice crop in most districts of Bengal. The crop suffered, however, slightly from insufficiency of rain in July in North Bengal and North Bihar, from floods in parts of Burdwan, Nadia, Murshidabad, Patna, Muzaffarpur, Cuttack and Balasore, and from excessive accumulation of water in the Contai sub-division of Midnapur. Since the middle of September abundant rain has been received in every part of these provinces. The rainfall during October and the first week of November was, indeed, unusually heavy, especially in Bihar, Chota Nagpur and North Bengal, but as fortunately there was no wind, the crop was not damaged to any appreciable extent. On the contrary the continuance of the monsoon to a later period than usual proved to be of great benefit to the crop in general, and in particular to the crop in North Bengal, where, owing to the scanty rainfall during June and July, transplanting was very late. It will be seen, on comparison of the present returns with the preliminary estimates, that in 22 districts the prospects of the crop have improved since the submission of the preliminary forecast; in 18 the preliminary estimates have been maintained, while in one only, namely Murshidabad, the preliminary estimate of outturn has been slightly reduced.

3. *Area cultivated.*—The district estimates of area cultivated with winter rice in the current and last year, as reported in the first forecast, remain unaltered with a few exceptions. The total area in Bengal, estimated to have been cultivated with winter rice this year, amounts to 31,388,600 acres against 30,798,100 acres in 1893. Owing to some misconceptions still existing with regard to the term "normal area," no strict comparison between the current year's area and the normal is yet possible; probably the area cropped this year has been in excess of the normal.

4. *Character of the crop.*—Out of the 45 districts in these Provinces, as many as twenty-five* have reported the crop to be a full average or better than a full average crop; 15† have reported the crop as varying from 14 to 16 annas, and five‡ from 12 to less than 14 annas. No district, as a whole, returns less than a 12-anna crop, and no sub-division less than an 11-anna crop. Twenty-nine out of the 45 districts report this year's crop to be better than last year's; six report the crop to be equal to that of the last year, and ten districts report worse crops. The current year's crop is no doubt better than the crop of 1893. The outturn of the crop of 1893 was estimated at the full average or 16 annas; that of the present crop may safely be estimated at 17 annas or 1 anna more than the full average. Probably no better crop has been reaped in these provinces in recent years.

* viz., Birbhum, Bankura, Jessore, Khulna, Rajshahi, Bogra, Backergunge, Faridpur, all the three districts of the Chittagong Division, Patna, Gaya, Saran, all the five districts of the Bhagalpur Division, all the Chota Nagpur districts except Singhbhum, Puri, Angul, and Khondmals.

† Burdwan, Midnapore, Hooghly, 24-Parganas, Murshidabad, Rangpur, Pabna, Darjeeling, Dacca, Mymensingh, Shahabad, Champaran, Darbhanga, Balasore, Singhbhum.

‡ Nadia, Dinajpur, Jalpaiguri, Muzaffarpur, and Cuttack.

5. *Gross outturn.*—The statement of gross outturn, given in Appendix II, has been prepared for these provinces as a whole. The attempt to prepare estimates of gross outturn for every district has been abandoned owing to the absence of reliable estimates of average outturn to the acre of winter rice. The gross outturn for Bengal, as a whole, has been obtained, as in previous years, by multiplying the total acreage cultivated by 15 maunds or 1,230lbs., which has been assumed to be the average yield of clean rice to the acre in the case of the winter rice crop. The gross outturn of clean rice thus obtained amounts to 366,258,700cwt. against 338,229,100cwt. estimated to have been produced in the previous year.

B. C. BASU,

Assistant Director of Land Records and Agriculture, Bengal.

CALCUTTA,
The 5th December 1894.

Countersigned.

W. C. MACPHERSON,

Director of Land Records and Agriculture, Bengal.

The 5th December 1894.

APPENDIX I.

District Returns appended to the Final Report on the Winter Rice Crop of Bengal, 1894.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
							Annas.	Annas.		
Burdwan	Sadar	794,880	635,500	434,300	424,300	434,200	14	15	In the Sadar subdivision, owing to good and seasonable rains, the outturn of winter rice is good this year. Sufficient rainfall in the beginning was very favourable to the outturn in the Kalna subdivision, but owing to floods the outturn is expected to be the same as was last year.	
	Kalna	276,480	224,000	128,000	128,000	128,000	12	12		
	Katwa	225,280	169,600	140,800	140,800	140,800	16	16		
	Raniganj ...	429,440	254,700	225,500	225,500	225,500	16	16		
	District Total ...	1,725,080	1,283,800	928,400	918,400	928,500	15¼	15½	The prospects were very good. The recent rainfall did no harm to the aman crop.	
Birbhum	Sadar	1,124,023	900,000	413,000	413,000	413,000	18	18		
	Rampurhat ...			241,000	241,000	241,000	18	18		
	District Total ...	1,124,023	900,000	654,000	654,000	654,000	18	18		
Bankura ...	Sadar	1,229,440	428,800	364,800	364,800	364,800	16	18	I consider the figure 16 annas in the Vishnupur subdivision is too low. I would make it 17 annas, but as the Subdivisional Officer has seen far more of the subdivision than I have, I retain his figures.	
	Vishnupur ...	448,000	214,000	185,000	185,000	185,000	16	16		
	District Total ...	1,677,440	642,800	550,400	549,800	549,800	16	17½		

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
Midnapore	Sadar	2,120,960	1,223,100	760,000	612,100	756,900	16	17	The normal area at the Sadar sub-division as now shown has been ascertained by latest enquiry, and the outturn is better than was expected at the first instance. The area brought under cultivation at Contai has considerably increased owing to a large tract having been brought under cultivation since the submission of the first forecast. The late rain is expected to damage the crops of Tamluk and Ghatal sub-divisions to a certain extent, but the forecast of Contai is far better than was anticipated in the first instance.	
	Tamluk	390,400	279,600	264,300	203,100	231,500	14	14		
	Contai	543,360	456,300	416,000	325,300	315,000	14	14		
	Ghatal	298,080	144,500	131,800	120,000	122,000	14	13		
	District Total ...	3,252,800	2,111,500	1,572,100	1,260,500	1,433,400	15	15		
Hooghly ...	Sadar	282,880	176,800	141,400	141,400	141,400	20	16	The Serampore report alleged much damage by the rains at the end of October and beginning of November, but from personal observation I could see no damage whatever—rather the reverse, as there was no wind. I have therefore maintained the original estimate. In the Howrah sub-division the outturn is better than that of the previous year owing to the sufficient and timely rainfall. The estimated outturn of the district as a whole will be 15 annas.	
	Serampore ...	219,520	160,000	100,500	80,400	95,000	12	14		
	Jahanabad ...	280,320	167,700	83,800	79,500	80,000	14	16		
	Howrah	149,440	69,800	69,800	35,400	39,100	12	15		
	Ulubaria	193,920	128,000	108,800	61,200	90,000	8	16		
	District Total ...	1,086,080	702,300	495,300	397,900	445,500	14	15		
24-Parganas	Sadar	800,576	462,700	303,800	231,100	293,900	14	16	The normal area has been revised. The prospects of outturn this year are more favourable on account of seasonable rainfall. The difference between the normal acreages and this year's acreages under winter rice is due to submersion of low lands under water.	
	Barasat	333,600	189,400	117,100	103,400	103,000	14	14		
	Basirhat	339,200	281,640	213,800	203,800	213,800	16	16		
	Diamond Harbour	328,320	289,900	285,400	246,100	247,000	12	14		
	District Total ...	1,671,626	1,223,600	920,100	784,400	857,700	14	15¼		

Nadia	Sadar	497,920	362,800	65,200	34,000	65,200	10	12	The increase in the area sown this year is due to the timely and normal rainfall during the ploughing and sowing season. The increase in the expected outturn is also due to the normal rainfall and to the late rise of the rivers. I should have estimated a still larger outturn had not a certain amount of damage been done by the floods and the abnormal rainfall during the month of November.
	Kushtia	382,080	278,400	28,000	21,000	28,000	5	12	
	Meherpur	634,880	462,600	24,400	18,000	24,400	8	12	
	Ranaghat	273,280	199,200	12,800	10,000	12,800	16	16	
	District Total ...	1,788,160	1,303,000	130,400	83,000	130,400	9	12½	
Murshidabad.	Sadar	586,240	395,100	82,000	82,200	82,200	16	12	Heavy rainfall in the middle of October affected the outturn to some exteut.
	Kandi	405,760	279,800	189,900	18[illegible]	188,800	18	16	
	Jangipur	380,160	310,000	40,300	42,300	42,300	16	12	
	District Total ...	1,372,160	985,500	312,200	314,400	313,300	17½	14½	
Jessore ...	Sadar	568,960	304,000	166,400	160,000	160,000	8	16	The rainfall was favourable to the winter rice crop of this season. No difference between this and the preliminary forecast,
	Jhenida	304,000	224,800	64,000	64,000	64,000	6	14	
	Magura	272,000	171,500	89,600	65,000	78,000	10	16	
	Narail	311,080	187,500	128,000	128,000	128,000	12	18	
	Bangaon	415,320	240,000	130,000	58,000	100,000	10	14	
	District Total ...	1,872,000	1,116,800	578,000	475,000	530,000	9	16	
Khulna ...	Sadar	1,006,336	293,100	228,000	210,000	215,000	18	17	Good outturn is due to well-distributed rainfall this year. Even after the bad weather at the beginning of November the crop is above the average.
	Satkhira	814,613	249,500	232,400	200,000	232,400	14	17

DISTRICT.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year.	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn.	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
Midnapore	Sadar	2,120,960	1,229,100	760,000	612,100	756,900	16	17	The normal area at the Sadar sub-division as now shown has been ascertained by latest enquiry, and the outturn is better than was expected at the first instance. The area brought under cultivation at Contai has considerably increased owing to a large tract having been brought under cultivation since the submission of the first forecast. The late rain is expected to damage the crops of Tamluk and Ghatal sub-divisions to a certain extent, but the forecast of Contai is far better than was anticipated in the first instance.	
	Tamluk	330,400	279,600	264,300	263,100	233,500	14	14		
	Contai	543,360	456,300	416,000	325,300	315,000	14	14		
	Ghatal	268,080	146,500	131,800	120,000	122,000	14	13		
	District Total ...	3,262,800	2,111,500	1,572,100	1,260,500	1,433,400	15	15		
Hooghly ...	Sadar	282,880	176,800	141,400	141,400	141,400	20	16	The Serampore report alleged much damage by the rains at the end of October and beginning of November, but from personal observation I could see no damage whatever—rather the reverse, as there was no wind. I have therefore maintained the original estimate. In the Howrah sub-division the outturn is better than that of the previous year owing to the sufficient and timely rainfall. The estimated outturn of the district as a whole will be 15 annas.	
	Serampore ...	219,520	160,000	100,500	80,400	95,000	12	14		
	Jahanabad ...	280,320	167,700	83,800	79,500	80,000	14	16		
	Howrah	109,440	69,800	64,800	35,400	39,100	12	15		
	Ulubaria	193,920	128,000	105,800	61,200	90,000	8	16		
	District Total ...	1,086,080	702,300	495,300	397,900	445,500	14	15		
24-Parganas	Sadar	690,560	462,700	303,800	231,100	293,900	14	16	The normal area has been revised. The prospects of outturn this year are more favourable on account of seasonable rainfall. The difference between the normal acreages and this year's acreages under winter rice is due to submersion of low lands under water.	
	Barasat	313,600	189,400	117,100	103,400	103,000	14	14		
	Basirhat	339,200	281,600	213,800	203,800	213,800	16	16

	District Total ...	1,671,626	1,223,600	920,100	784,400	857,700	14	15¼		

Nadia ...	Sadar	497,920	362,300	65,200	34,000	65,200	10	12	The increase in the area sown this year is due to the timely and normal rainfall during the ploughing and sowing season. The increase in the expected outturn is also due to the normal rainfall and to the late rise of the rivers. I should have estimated a still larger outturn had not a certain amount of damage been done by the floods and the abnormal rainfall during the month of November.
	Kushtia	392,080	278,400	28,000	21,000	28,000	5	12

Darjeeling	Sadar, including Kalimpong.	464,640	61,400	10,200	11,500	11,500	14	14	The difference in area in the Sadar subdivision is due to ordinary fluctuation in cultivation. In the Siliguri subdivision, owing to late rains at sowing time, land could not be fully cultivated. The untimely rainfall of the year will cause a decrease in the outturn.	
	Kurseong	118,400	12,800	.....	...	.....	.....	.....		
	Siliguri	161,920	115,200	57,600	57,600	57,600	16	14		
	District Total ...	744,960	189,400	67,800	69,100	69,100	15½	14		

Rangpur ...	Sadar	730,240	486,800	365,100	365,100	260,000	18	14	The distribution of rain this year has been favourable for aman paddy. There was deficient rain during July, the transplanting season, and excessive rain in October and the beginning of November, when fine weather was required. I think the outturn in the preliminary forecast was underestimated.	
	Kurigram	599,680	468,900	234,500	236,000	117,000	18			
	Gaibanda ...	486,400	371,200	281,600	281,600	234,700	18			
		414,720	275,800	92,800	105,000	80,000	18			
	District Total ...	2,231,040	1,602,700	974,000	987,700	691,700	18	14		
Bogra ...	Whole district ...	929,000	421,000	230,000	290,000	300,000	18	18	The heavy rain since the submission of the preliminary forecast has been beneficial to the winter rice crop. A large quantity of aus land having been transplanted with aman this year, owing to the lateness of the monsoon, the area under aman is in excess of normal.	
Pabna ...	Sadar	564,480	423,000	350,000	408,000	409,000	16	14	Owing to copious rainfall in the latter part of October and first week of November, a more than average outturn of crop is expected from the Sirajganj subdivision. The crop in the low lands of Dulai thana suffered from flood at an early stage in the growth of the plants, the estimate of outturn of the Sadar subdivision is thus somewhat low. The figures in column 7 appear to be approximately correct on a comparson with the total area of the district and the total area under cultivation, and the figures in column 5 have been revised. It appears that for some years the same lands have continuously been cultivated with the winter paddy crop. The normal area is thus increased and is more correctly represented by the figures now shown in column 5.	
	Sirajganj	612,480	459,500	300,000	216,200	216,200	18	17		
	District Total ...	1,176,960	882,500	650,000	624,200	625,200	17	15		
Dacca ...	Sadar	810,240	405,100	270,100	243,100	243,100	12	16	The normal area has been corrected from 593,900 acres to 603,700 acres. The high price of paddy last year, the demand for rice, and the favourable weather at the time of ploughing and sowing were the reasons for increase in the area sown this year as compared with last year's. The outturn was better than last year's, owing to sufficient and timely rainfall, and also to the gradual rise of the rivers till August. With such favourable conditions a full crop was expected, but the outturn was slightly affected by the high floods of September and the heavy rains in the beginning of November.	With such favourable conditions it is probable that at least the full normal area was cropped with winter rice this year. The figures in column 6 therefore appear to be excessive.
	Manikganj ...	312,960	234,200	202,200	176,900	189,000	12	14

	Sasaram	955,520	382,500	242,500	293,800	241,500	15	16		
	Bhabhua	832,640	624,600	312,300	227,700	227,700	15	14		
	District Total ...	2,793,600	1,712,400	1,054,600	850,700	798,700	14	15		

Saran ...	Sadar	638,720	561,500	144,000	138,000	144,000	18	20	The better outturn of this year is due to the timely rainfall.
	Siwan	545,925	450,000	175,000	180,000	195,200	18	16	
	Gopalganj ...	493,440	371,000	117,000	115,000	117,600	16	16	
	District Total ...	1,678,085	1,382,500	431,600	433,000	456,800	17½	17½	
Champaran	Sadar	971,520	654,000	229,000	223,000	229,000	15	15	Owing to the late rains all the transplantations could not be finished in time, hence the outturn will be below the average.
	Bettiah	1,288,320	768,000	448,000	448,000	448,000	16	14	
	District Total ...	2,259,840	1,422,000	677,000	677,000	677,000	15½	14½	
Muzaffarpur.	Sadar	779,520	614,000	272,000	272,000	272,000	8	12	Owing to absence of rain in the early part of the season, the sowing and transplanting of the crops were retarded for some time, and hence the reduced outturn as compared with the normal, but the weather was more favourable this year, and hence the estimated outturn was better than that in the last year.
	Hajipur	493,440	338,000	130,000	130,000	130,000	14	11	
	Sitamarhi ...	648,960	493,000	320,000	320,000	320,000	10	14	
	District Total ...	1,921,920	1,445,000	722,000	722,000	722,000	10	13	
Darbhanga	Sadar	782,080	594,600	377,600	250,000	281,300	8	16	The *Aghani* rice would have yielded nearly a bumper crop had it not been for the unusual heavy fall of rain towards the close of October, which somewhat damaged the crop in blossom.
	Samastipur ...	488,960	391,000	165,800	124,000	125,000	8	14	
	Madhubani ...	863,360	834,500	651,700	608,400	605,000	12	16	
	District Total ...	2,134,400	1,820,100	1,192,500	982,400	1,011,300	10	15½	
Monghyr ...	Sadar	997,760	698,200	279,000	279,000	279,000	16	16	More than the average outturn was expected owing to favourable season, but the rains of 22nd, 23rd, and 24th October somewhat damaged the crop. The areas in Jamui subdivision in columns 6 and 7 has now been corrected.
	Jamui	1,070,520	515,300	364,300	364,000	364,000	16	16	
	Begusarai ...	492,160	369,300	14,700	14,700	14,600	10	14	
	District Total ...	2,560,440	1,582,800	658,000	657,700	657,600	16	16

	Banki	75,030	37,200	23,000	23,000	23,000	12	14	
	District Total ...	2,325,910	1,161,200	1,028,100	912,500	967,700	11	13	
Balasore ...	Sadar	741,120	448,000	409,600	357,200	353,100	15	15	The estimate of acreage under this year's crop has been approximately made as far as possible. The large discrepancy between the figures for normal acreage and this year's acreage is due to the arable lands lying waste for want of seed plants, which had been prepared for transplantation but were destroyed by excessive rain fall followed by heavy floods. The increase of acreage under current year's crop now given as compared with that shown in the preliminary forecast is due to some lands having been brought under cultivation by transplantation afterwards.

NOTE ON THE EARLY COTTON CROP IN BENGAL, 1894.

THE following is published for general information.

C. E. BUCKLAND,
Secy. to the Govt of Bengal.

REVENUE DEPT.,
The 7th December 1894.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the early Cotton Crop in Bengal, 1894.

Explanatory.—The *early* cotton crop in these Provinces is sown during the monsoon rains and harvested during the cold weather by the end of December. The *late* crop is sown towards the close of the rainy season and harvested during the hot weather in the months of May and June. In the A districts noted in the margin, only an early crop is reported to be grown. In the B districts noted in the margin, both the early and late varieties are cultivated. This report deals with the area and prospects of the early crop only.

A. Jalpaiguri, Chittagong Hill Tracts, Sonthal Parganas, Hazaribagh, Lohardaga and Palamau.
B. Midnapur, Monghyr, Bhagalpur, Cuttack, Balasore, Puri, Angul and the Khondmals, Manbhum and Singbhum.

The cultivation of cotton in these Provinces is insignificant as compared with that of other Provinces. The produce is for the most part believed to be consumed locally, the Chittagong Hill Tracts being the only district where cotton is grown for export.

Character of the season.—The rainfall of the monsoon of 1894 has been generally above the normal. In July and August heavy rain fell throughout most of the early cotton-growing tracts. The only districts which received less than the normal rain in these two months were Midnapore, Jalpaiguri, Puri and Singbhum. In September, the rainfall was light. In October and the first half of November, the rainfall was again heavy.

Area sown.—The District Returns appended to this note show that the total area sown with early cotton this year has been estimated at 96,400 acres against 101,700 acres estimated to have been under early cotton last year. The decrease of 5 per cent. in the area sown is chiefly due to the excessive rain which characterised the last monsoon season, and which must have interfered with sowing operations. In Cuttack only is the decrease ascribed to want of rain at the sowing season.

Character of the crop.—The general prospects of the early cotton crop closely correspond with the rainfall. It will be seen from the appended statement that in only one district, viz., Angul and the Khondmals, is the crop said to come up to a full average one of 16 annas. *Six out of the fourteen districts, from which estimates of outturn have been received, report crops varying in character from 12 up to 16 annas, and the remaining seven† districts report crops varying from 8 to 12 annas. In three districts, the crop is estimated

* Jalpaiguri (12), Chittagong Hill Tracts (12), Monghyr (12), Bhagalpur (14), Cuttack (12), and Singbhum (14).

† Midnapur (8), Sonthal Parganas (9), Balasore (10), Hazaribagh (11), Lohardaga (10), Palamau (9), and Manbhum (8).

to be the same as that of last year, in four it is said to be better and in seven worse. The outturn of early cotton last year was estimated by this Department in the note published on the 19th April 1894 as 10½ annas or about ⅔rds of an average crop. This year the outturn appears likely to be slightly lower. The arithmetical mean of the District Returns show a crop of 10·2 annas. This low ou
attributed to the heavy rainfall of the season.

N. N. BANERJEI,

Asst. Director, Dept. of Land Records and Agriculture, Bengal.

Countersigned.

W. C. MACPHERSON,

Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA.

The 30th November 1894.

Forecast of the early cotton crop of Bengal, 1894.

Division.	District.	Approximate normal area under *early* cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
					Annas.	Annas.		
Burdwan ...	Midnapur	2,000	2,000	2,000	9	8	This year's outturn is estimated at half of the average. This low outturn is attributed to the excessive rainfall which stunted the growth of the plants.	
Rajshahi ...	Jalpaiguri	500	300	500	12	12	The tahsildars of the Government estates in this district have raised the area this year, and they assign the reason to be general increase of cultivation.	
Chittagong ...	Chittagong Hill Tracts	17,000	17,000	17,000	4	12	The outturn is less owing to late heavy rains.	
Bhagalpur ...	Monghyr	400	400	400	8	12	The increase in the outturn is due to seasonable weather this year. The timely rains were beneficial to this crop.	
	Bhagalpur	11,300	11,300	11,300	16	14		
	Sonthal Parganas ...	12,900	12,900	12,500	11	9	The decrease in the area sown is due to heavy rainfall in July and August 1894. The outturn will not be good for the same reason.	The Deputy Commissioner does not assign any reasons for changing figures in columns 3, 4 and 6 from 12,800 acres, 12,800 acres and 13 annas as shown in the revised forecast of the early cotton crop, published on the 19th April 1894, to 12,900 acres, 12,900 acres and 11 annas respectively.

Orissa	Cuttack	3,100	1,900	1,800	10	12	The decrease in area is due to the want of rain at the sowing season. As the weather for the past two months has been very seasonable, a better outturn is expected this year.	
	Puri	1,500	10,000	10,000	12	.....	.....	Not received; last year's gures have been repeated.
	Balasore	1,000	900	900	12	10	The decrease in the outturn for the district is due to excessive rainfall at the sowing season followed by floods in Bhadrak sub-division.	
	Angul and Khondmals	1,500	1,500	1,200	16	16	The figures given for this year are approximate. The decrease is due to heavy rainfall in July, which not only prevented cotton sowing, but led to the cultivators devoting all their attention to their *sarad* crops. In the Khondmals sub-division no cotton is grown.	
Chota Nagpur	Hazaribagh	7,500	7,500	7,500	12	11	The decrease in the outturn is due to incessant and heavy rains.	
	Lohardaga	8,800	11,000	8,800	12	10	The decrease in area sown this year as well as in the outturn is owing to the excessive rainfall during the months of July to September 1894.	The Deputy Commissioner has changed the normal average from 11,000 acres as shown in the revised forecast of the early cotton crop published on the 19th April 1894 to 8,800 acres, but has ascribed no reason for the alteration.
	Palamau	10,000	5,800	3,200	11	9	The decrease in area and outturn is due to the heavy rains at the sowing and reaping time.	The figures in columns 4 and 5 appear improbable. The Deputy Commissioner states that he will call for an explanation.
	Manbhum	12,000	12,000	12,000	7	8	Excessive rain is the cause of poor outturn.	
	Singhbhum	7,200	7,200	7,300	14	14		
	Total ...	109,700	101,700	96,400	10¼	10¼		

N. B.—Twenty annas represent a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 8th December, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

STATISTICAL DEPARTMENT,
The 10th December, 1894.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of November 1894.

	Inches.	Date.	Hour.
The mean pressure of the month	29·998		
The average pressure of November from 24 years' registers ...	29·970		
The highest pressure in the month	30·170	22nd	10
The lowest pressure in the month	29·799	1st	16
The range of pressure	0·371		
	Hours.		
The total number of hours of bright sunshine during the month	236·8		
The maximum possible number of hours of sunshine ...	330 8		
	⊖		
The mean temperature of the month	71·6		
The average temperature of November from 24 years' registers	74·8		
The highest temperature in the month	85·6	1st	
The lowest temperature in the month	59·2	25th	
The range of temperature during the month	26·4		
The mean daily range of temperature	15·2		
The greatest range of temperature in one day	19·2	22nd	
	Per cent.		
The mean humidity of the month	80		
The average humidity of November from 24 years' registers ...	72		
	Inches.		
The mean vapour tension of the month	0·619		
The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	2·13		
The average cloud proportion of November from 17 years' registers	2·51		
	Inches.		
The total rainfall of the month	3·04		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	1·73?		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	1·67	3rd	
	Days.		
The number of rainy days in the month	4		
The average number of rainy days in November from 24 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	133·5		
The mean difference of sun and air temperatures	53·8		
The greatest sun temperature	146·8	5th	
The greatest excess of sun over air temperature	61·7	11th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	58·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	5·9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8·1	23rd	
	Miles.		
The mean movement of the wind per day	45·6		
The greatest movement of the wind in one day	97·0	1st	
The greatest movement of the wind in one hour	12·0	1st 9 to 10 a.m.	

The number of hours with winds from each of the 8 points—
N. 317, N.E. 13, E. 46, S.E. 17, S. 16, S.W. 11, W. 34, N.W. 45,
Calm 221.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 10th December 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1894.

THE principal features which have characterised the meteorology of November have been—

1. Pressure was in small to moderate excess, the mean excess varying from 0·05 inch at the south-eastern stations to about 0·03 inch in the extreme west of the province.

2. The average day or maximum temperatures have been about 2° below the normal, while the night or minimum temperatures have been in excess by slightly smaller amounts, except at the southern and south-eastern stations, where small defects have been recorded. Hence the mean average temperature of the province has been nearly normal, though slight defects of usually less than a degree have been registered at the great majority of stations; indeed the mean temperature of both Bengal and Assam has been 0·5° in defect of the normal.

3. Humidity and cloud proportion have been in decided excess of the normal at almost all stations, the excess in the humidity being particularly marked.

4. Very heavy rain was received during the first week or ten days of November, due to the effect of a large cyclonic storm which crossed the Madras coast on the morning of the 2nd. For the remainder of the month no rain fell at the stations in the plains, but showers and snow-storms were received in the hills from the 14th to 20th.

5. The weather in the first eight or ten days of November was very disturbed over the province owing to a cyclonic storm which formed in the Bay and advanced across the Madras coast between Coconada and Masulipatam on the morning of 2nd November, and broke up shortly afterwards. The cyclonic circulation of winds extended over the whole of Bengal, and gave very disturbed weather for the first five days, after which the disturbed conditions were slowly driven back by a north-westerly wind current, which gradually established fine settled weather of ordinary cold season character from about the 10th of the month, and these conditions continued up till the close of November.

The following is a very brief summary of the conditions during November :—

A very large and extensive cyclonic storm had formed in the Bay of Bengal at the end of October, and after advancing in a north-westerly direction had crossed the Madras coast between Coconada and Masulipatam about 6 A.M. on November 2nd. The history of this storm has been already given in the summary for October, where it was shown that although it was a large storm giving rather stormy weather over a very large area, no less than from East and North Bengal to Ceylon, yet it was not accompanied by any inner zone of hurricane winds, as is usually the case in storms in October and November. The influence of the storm was felt considerably in Bengal from November 1st, when cloud proportion and humidity rapidly increased and winds had become part of a large cyclonic circulation, so that they were easterly and north-easterly at practically all stations, while winds were strong at the head of the Bay. Pressure was also falling rapidly in Orissa, and local rain was reported in that district, and in South and North Bengal, while in East Bengal rainfall was becoming general. On the 2nd the whole of the southern half of Bengal had become largely influenced by the storm, and strong winds forming part of the large cyclonic circulation were blowing at the head of the Bay, and also at some of the inland stations, and indeed the winds over the whole province were affected by the storm. Skies had become almost overcast, and rain had also recommenced and was general in all divisions except Bihar and parts of Assam. On the 3rd, though the storm had again moved away in a north-westerly direction and was rapidly filling up, yet in Bengal winds continued to form part of the cyclonic circulation, and fairly general rain was still being received over a large part of the province except in Bihar and Assam. This disturbed weather continued on the 4th. Moderately strong and very moist easterly winds were blowing over the whole province, temperature was rising and was unusually high, the sky was almost overcast, and humidity was also excessive, while the changes of pressure were unimportant. On the 5th, however, conditions began to change, and westerly winds appeared in the south-western districts, and hence began to slowly drive back the moist easterly winds which had been previously blowing. Pressure also began to rise slowly to moderately, and temperature had again risen and had become in excess by from 3° to 4°. With the commencement of westerly winds the sky began to clear in Orissa and Chota Nagpur, where rainfall was also light, though it was still fairly general over the remainder of the province, except in North Bengal. On the 6th, again, the westerly winds had extended and prevailed over the western half of the province, while irregular winds were blowing elsewhere. Pressure had also risen moderately over the west of the province, though it was falling over the eastern half, while temperature, humidity, and cloud proportion commenced to decrease in Bihar and at the western stations generally. The rainfall on this day also was confined practically to Assam, East Bengal, and Bihar. On the 7th, the dry north-westerly and westerly winds had swept over the whole province, and hence fine settled weather was setting in. Pressure was, however, still below the normal, while temperature, humidity, and cloud proportion were rapidly decreasing, the decrease being largest at the western stations. Rainfall had again been received in East Bengal and

Assam, but the remainder of the province was practically rainless. On the 8th a brisk increase of pressure occurred, and pressure became in excess in all districts. A further brisk fall of temperature occurred, humidity and cloud proportion also decreased, and no rainfall was reported, except a few showers in Assam and Orissa. On the 9th the same changes again occurred, and the fall of temperature was very pronounced, and at such stations as Chaibassa the fall in the mean temperature equalled 10° from the 8th to the 9th instant, and exceeded 5° at many other stations, and hence the mean temperature of the province on the 9th was in considerable defect, the variation ranging up to from 4° to 6° in the south-west of the province. The sky also became practically cloudless, and humidity again decreased, and the air became unusually dry over the western half of the province. Pressure had also become in excess by amounts ranging up to a tenth of an inch at False Point, and the whole province was rainless. Similar conditions again obtained on the 10th. Thus during the period from the 5th to the 10th the disturbed conditions were rapidly driven back, and fine settled weather rapidly commenced over the province, and the cold weather conditions became established.

From the 10th to the end of the month the meteorological changes were small and unimportant, and were of the small oscillatory character which usually accompany fine settled weather. For the period the 10th to the 17th pressure continued above the normal, while temperature was in defect, and the same was the case for the week from the 17th to the 24th, but in the last week of the month slightly defective pressures were recorded, and temperature at the close of the month had become in small, but distinct excess. Throughout the period from the 10th to the end of the month, however, a steady northerly wind current was blowing over the whole province, humidity was comparatively low, skies were cloudless or only lightly clouded, and rainfall was entirely absent except in the hills, where slightly disturbed weather existed from about the 14th to the 20th, when snow-storms and rain were reported on several days. This disturbed weather, however, practically did not extend to the plains.

Pressure.—The mean pressure for the month has varied from 30·03″ in the north-west of the Province to 29·99″ at the south-eastern stations, so there has been a distinct gradient favouring northerly winds. The gradient, however, has not been quite as steep as usual, for an excess pressure of 0·05″ has been registered at all the south-eastern stations, while in the extreme north-west of the province the excess has only equalled 0·03.″

Temperature was unusually high for the first week or eight days, and was then in defect up till nearly the close of the month, when again an excess was registered. For the whole month a defect in the mean temperature of 0·5° has been recorded. The day or maximum temperatures have been about 2° to 3° in defect at the great majority of stations except in the south of the province, where the defects have been from 1° to 1·5°. In the case of the minimum or night temperatures slight defects have been recorded at the southern and south-eastern stations, and excess amounts of about 2° over the remainder of the province.

Rainfall.—The falls of rain due to the effect of the storm in the Bay have varied from between four and four-and-a-half inches in South-West and East Bengal, and three-and-a-third inches in Orissa, to falls of an inch to an inch-and-a-half in Chota Nagpur, Bihar and North Bengal. The falls have hence been in large excess of the normal in all divisions, and have varied from about twice the usual amount in Orissa to ten and twelve times the ordinary fall in Bihar and South-West Bengal. The number of rainy days was also very much larger than usual in November, and where the falls of rain were usually about three or four times as frequent as in normal years.

The following table gives in a condensed form the rainfall information for each of the six large meteorological divisions of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average rainfalls in each division expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the close of November expressed in the same way. The rainfall for the year, it will be seen, has been either normal or rather largely in excess of the normal in all divisions.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1894 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	0	55	42	97	58	104	121	89	82	105	1,221	100
North Bengal ...	0	64	16	177	83	77	80	111	136	177	882	104

		Miles.
The highest velocity of the wind in one hour		9
		%
The mean relative humidity		79
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		71
		Inches.
The total fall of rain from 2nd to 8th December 1894		0·08
The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·04
The total fall from 1st January to 8th December 1894		48·66
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·49

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; ≡ fog; o, overcast; d, drizzling rain.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The means of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

or the week ending Saturday, the 8th of December 1894.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 9 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1894.			District.

ast ten years. The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater.
umbers denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal during the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, i.e., from total rainfall as the subdivision.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 8th of December 1894.

Meteorological division.	Division.	District.	Station.	Rainfall. Sunday, 2nd.	Monday, 3rd.	Tuesday, 4th.	Wednesday 5th.	Thursday, 6th.	Friday, 7th.	Saturday, 8th.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th October 1894.	Average rainfall from 16th October to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 8TH OF DECEMBER 1894.

ORDINARY cold season conditions continued to exist over Bengal up till the close of the previous week, though the second-half of that period had been marked by steadily falling pressure, which had become in defect on the 1st of December by amounts ranging between 0·04 inch and 0 06 inch. Temperature had also steadily risen, and on the same date had also become in excess by about 2° to 3°. On the 2nd of December a barometric depression formed in East Baluchistan, and commenced to advance eastwards into Upper Sind and the South-West Punjab. The depression was too far distant on this day in any way to affect the conditions in Bengal, where pressure was increasing slowly, while the changes of temperature were variable. On the 3rd the depression had advanced moderately rapidly in an easterly direction, and the centre was near Bikanir, where the defect of pressure equalled about a quarter of an inch. Pressure on the 3rd commenced to fall slowly to moderately in Bengal, while as is usual in front of such depressions, temperature began to increase rather briskly, while the changes of humidity were small and variable. On the 4th the centre of the depression had advanced to near Sutna, but it had partially filled up, and on this day it was a rather shallow diffused low pressure area covering a large tract of country. Pressure had again fallen slowly in Bengal, while temperature had also increased briskly, while humidity was generally increasing on that day. On the morning of the 5th the depression had moved eastwards into Bihar and the adjacent districts, and pressure was again falling slowly over the province, while a further brisk increase of temperature and a moderate increase of humidity had occurred, and at many stations in Bengal the night temperatures were from 5° to 7° and in some cases 10° and 11° higher than the normal. Skies had also clouded over to a moderate extent, and a few and in some cases rather heavy local showers were reported, while Gnatong experienced a snow-storm. On the 6th pressure had risen briskly in Bengal, and the depression was passing away, having either filled up over Bengal, or perhaps it had passed in a very feeble form over the Bay; pressure was, however, still generally in small to moderate defect over Bengal. Temperature had also again risen, and at many stations the night temperatures were 8° and 9° above the normal, but humidity on the other hand had commenced to fall. A few showers had also been reported in the southern districts on this day. The barometric depression having thus passed away from the province on the 6th, the changes on the 7th and 8th were those which again re-established the cold season conditions in Bengal, for pressure rose moderately on both days, and became again above the normal; temperature on the other hand fell quickly, the fall in the mean temperature at several stations equalling about 5° in the two days; humidity also decreased rapidly, and the sky cleared, while rain ceased, and weather on the 8th had again become fine and settled.

Pressure.—Owing to the passage of the depression over the province, the mean pressure for the week has been below the normal. The defect has been largest at the western stations, where the depression had the most marked effect, and where it has equalled about 0·05″ to 0·06″. On the other hand, in the east and south of the province the defect only has equalled about 0·02″ to 0 03″.

Temperature has been on the other hand in rather large excess over the normal, the excess equalling about 3° and 4° in Orissa and Chota Nagpur, while the excess has been small in East Bengal. For the whole of Bengal the excess in the mean temperature has averaged 2·1°.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperatures, which have been generally in excess, while on the other hand the night or minimum temperatures have in most cases been largely in excess, the average excess at such stations as Cuttack, Patna, Gaya and Purnea equalling about 4° and 5° :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 8th of December 1894.

	Normal mean maximum temperature for the week ending 8th December.	Actual mean maximum temperature for the week ending 8th December 1894.	Variation of actual mean from the normal. Rainfall.—Local showers have occurred in connection with the depression in East, North and South-West Bengal and in Chota Nagpur. The heaviest falls have occurred in East Bengal, but even here the falls have only averaged 0·15 inch, and in North Bengal 0·10 inch. In South-West Bengal and Orissa the falls have been much smaller, and they have only averaged 0·03 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 8th of December 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL DURING 1893-94.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Calcutta, the 13th December 1894.

RESOLUTION No. 5825 M.

READ—

The reports from the several Commissioners of Divisions on the working of Municipalities in the Lower Provinces of Bengal (except Calcutta) during the year 1893-94.

Read again—

The Resolution reviewing the Divisional Commissioners' reports on the working of Municipalities during the year 1892-93

The following Resolution treats of the working of municipalities in this Province during the year ending with the 31st March 1894. It is necessary year by year, in order to secure punctuality in the submission of the reports, to draw attention to the dates on which they have been despatched by the Commissioners of Divisions. They are due to Government on July 31st, and it is with satisfaction that the Lieutenant-Governor notes that five out of the nine reports were submitted on or about the proper date, and of the remaining four the latest was only a little more than a fortnight behind time. It is true that they were not all received in a complete state in the first instance, but still there has been an improvement. Several District Officers complain of the late receipt of reports from the Municipal Chairmen, and it is certain that punctuality in their case can only be attained by strenuous efforts on the part of District Magistrates.

2. *Amendment of the Bengal Municipal Act III of* 1884.—The Bill to amend the Municipal Act of 1884, which was first introduced into the Bengal Legislative Council in July 1892, was passed on the 28th April 1894, and received on the 15th August 1894 the sanction of His Excellency the Viceroy and Governor-General. The main provisions of the Act have been so fully discussed during the proceedings in Council, as well as in the explanatory circular No. 34 of the 27th August last, that no detailed notice is required in this place. Time will show what the practical effect of the changes introduced by the new law will be, but they are numerous and important enough to make the year under review a notable one in the municipal history of Bengal.

3. *The number of Municipalities, population and rate-payers.*—The number of municipalities—146—was the same as in the previous year. No new municipalities were established nor were any abolished. It has been decided since the close of the year, on the representation of certain of the rate-payers at Titaghar, to separate that ward from the South Barrackpore Municipality to which it now belongs, and to constitute it a separate municipality. The population of municipal towns amounted to 2,727,620 as against 2,731,182 in the previous year, the decrease being due mainly to the exclusion from the recorded population of Cuttack of the persons who live within cantonment limits.

4. The number of rate-payers was 463,960, or 840 less than in 1892-93, and the percentage they bore to the total municipal population was 17. The Presidency Commissioner reports that a uniform system of calculating the number of rate-payers in the municipalities of that Division is not observed, a rate-payer who pays for more than one holding, being counted in some towns as one and sometimes as more than one rate-payer. To avoid mistakes of this kind, instructions were issued during the year to the Commissioners of Rajshahi and Patna, but it seems necessary to repeat them for general information and guidance. An individual, although paying taxes for different holdings, should be shown as one rate-payer, and should not be counted as a separate rate-payer for each of his holdings. Conversely if in one house there are more persons than one who pay municipal rates, each of them should be reckoned as a separate rate-payer.

5. The percentage of rate-payers to the municipal population varied from 4·9 in Kurseong to 34·7 in Meherpur, a small town in the Nadia district. In the margin are given the names of the towns which were specially mentioned in last year's resolution on account of the relatively small number of rate-payers they contained; the percentage of rate-payers in 1892-93 and 1893-94 is given in each case. The improvement in Muzaffarpur, Motihari, and Bhagalpur is satisfactory. That in Cuttack is due merely to a rectification of the number of the municipal population; the rate-payers would still appear to be very few; the Chairman's explanation is that there is a larger number of beggars in Cuttack than in the other towns of Orissa. The falling off in Raniganj, too, requires further explanation: the Magistrate of the district does not think that the presence of a large number of day-labourers sufficiently accounts for the low proportion, and has called for a report from the Chairman. In Darjeeling the already low percentage has fallen to 7·4, and in Kurseong there has been a similar decline which has reduced the percentage of rate-payers to the absurd figure of 4·9. The percentage in Narayanganj (11·8) is also small. In Bankura, Motihari, Darbhanga, Cuttack and Hazaribagh the tax on persons is in force, and in these towns at any rate it is hardly conceivable that the number of adult males is comparatively so low or the poverty of the general public so great as to justify the figures given. In all the towns the Lieutenant-Governor trusts that the assessment and rating lists will be looked into during the current year and revised, if necessary, and the result set forth in next year's report.

	1892-93.	1893 94.
Bankura	12·8	13·
Raniganj	9·8	7·8
Darjeeling	11·3	7·4
Dacca	11·7	11 6
Motihari	11·3	13·1
Muzaffarpur	12·7	14·4
Darbhanga	9·7	10·3
Monghyr	12·1	12·3
Bhagalpur	10 7	14·2
Cuttack	8·3	10·8
Hazaribagh	12·4	12·4

6. *The elective system and the results of elections held during the year.*—In 117 municipalities the rate-payers have the privilege of electing two-thirds of

the Commissioners, and in 103 the Commissioners elect their Chairmen; elsewhere the Commissioners or Chairman, as the case may be, or both, are appointed by Government. During the year under report the fourth general election of Commissioners took place. In 113 towns, that is to say in all except four, to which the right to elect their Commissioners has been given, elections were held. In some municipalities one election was held for the whole town, others have been divided into wards for election purposes, and one Commissioner or more has been chosen separately for each ward. In all 550 elections were held (besides bye-elections). Only in six instances did the constituents fail to elect the full number of Commissioners. In 282 instances the elections were uncontested, and in 262 cases contests took place. The percentage of ratepayers who attended and voted at the contested elections amounted to 43·2, a very considerable improvement on that attained at previous general elections, which amounted in 1887-88 to 33·8 and in 1890-91 to 39·4. There can be no room for doubt that these elections excite an increasing though slowly growing interest.

7. A considerable number of disputes arose out of the elections, and in the seven cases mentioned in the margin references were made to Government. But as the Lieutenant-Governor has no authority under the existing election rules to interfere in the result of an election once it has been declared, the disputes had to be left to the decision of the Civil Court or allowed to drop. In the amending Act passed during the current year Government has been invested with power to declare the authority who shall decide election disputes, and the experience of the general elections having shown that the election rules required amendment in several particulars, their revision is now under the consideration of Government.

8. *Constitution of Committees.*—The following table shows how in each Division the Municipal Committees were constituted, and compares the percentages of the total figures for each class with those of the previous year:—

Name of Division.	Number of Members.			Race.		Occupation or Profession.								
	Nominated.	Elected.	Total.	Europeans.	Natives.	Government servants.	Zamindars and landholders.	Pleaders and mukhtears.	Planters.	Merchants, traders and money-lenders.	School-masters (other than Government employés).	Medical practitioners.	Government pensioners.	Unspecified.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Burdwan	140	225	365	27	338	54	76	79	1	63	43	12	8	29
Presidency	328	336	664	21	643	77	184	75	1	56	19	46	34	72
Rajshahi	87	98	185	39	146	39	33	49	7	16	13	2	4	23
Dacca	115	111	226	12	214	34	47	71	...	16	14	10	3	31
Chittagong	33	40	73	8	65	14	12	25	...	11	3	...	1	7
Patna	175	195	370	42	328	59	107	100	2	46	9	7	5	35
Bhagalpur	73	94	167	22	145	25	40	31	2	15	2	5	6	41
Orissa	63	32	75	5	70	26	9	25	...	3	5	...	3	4
Chota Nagpur ...	75	40	115	18	97	32	14	34	...	17	2	2	3	11
Total ...	969	1,171	2,140	194	1,946	360	522	489	13	243	110	84	67	253
Percentage on total...	45·2	54·7	...	9·0	90·9	16·8	24·3	22·8	·6	11·3	5·1	3·9	3·1	11·7
Ditto in 1892-93 ...	45·8	54·1	...	9·0	90·9	17·2	23·4	23·7	·6	13·6	3·8	5·3	2·8	11·1

It will be seen that although the general elections afforded an opportunity for a change in the class of Municipal Commissioners the proportion of members drawn from each of the various classes has altered very little for the whole Province. Taking single Divisions some changes are found; for instance, the proportion of Commissioners belonging to the legal profession increased 6 per cent. in the Presidency Division, nearly 4 per cent. in the Rajshahi Division, while in Patna, Chittagong, Bhagalpur and Chota Nagpur it fell off considerably. In the three Divisions last named and in Burdwan, the representation

of the landed classes increased. Lawyers were most largely represented in Chittagong (34·3), Orissa (33·3), Presidency (32·6), and Dacca (31·4); the landed interests in Patna (28·1) and Bhagalpur 23·9); trade in Burdwan (17·2) and Chittagong (15·1).

9. *Attendance at Meetings.*—There were in all 2,359 meetings held during the year against 2,534 in 1892-93. Of these meetings 206, or 8·7 per cent., were unsuccessful or adjourned, as against 228, or 9 per cent., in the previous year. The falling off in the number of meetings possibly implies that the Commissioners felt less interest in their work, as their period of office was drawing to a close. The Satkhira Municipality in the Khulna district held the largest number of meetings, namely 38, of which five had to be adjourned, Cossipore-Chitpur comes next with 36, which were all successful. In 1892-93 forty-one Municipal Boards were summoned more than twenty times, and only fifteen failed to hold at least twelve meetings. During the year under report only twenty-five municipalities held more than twenty meetings, while twenty-four held less than twelve.

10. Section 38 of the Municipal Act provides that there shall be at least one meeting a month unless there is no work to lay before the Commissioners in each municipality. It is incredible that in important townships, such as the South Suburban Municipality (population 69,642, meetings 11), Tangail (17,973, meetings 11), Narainganj (17,715, meetings 10), Muzaffarpur (49,192, meetings 11), Jamalpur (18,089, meetings 7), and Kendrapara (17,647, meetings 9), any month could pass without some work arising which required the attention of the Commissioners, and in the absence of further information it would seem that the Chairmen of these municipalities have neglected their statutory duties in failing to summon more meetings. Attention was drawn in last year's Resolution to the small number of meetings held at Jagdispur, Tangail, Kotrang, Nadia and Jamalpur, and everyone of these towns has again failed to attain the statutory limit. There may be adequate reasons for the default, but they have not been stated. The Lieutenant-Governor desires that the Commissioner of the Division will call for an explanation in each case.

11. In ninety-three towns, as against eighty-six in 1892-93, more than half the number of Commissioners attended at each meeting. The highest percentage of attendance was 88·3 in Jamui (Monghyr). In only two towns were less than one-third of the Commissioners habitually present, namely, in Vishnupur (Bankura) and Baduria (24-Parganas), but in Patna and Chapra this proportion was only just exceeded.

12. *Ward Committees.*—Opinion generally is still unfavourable to the formation of Ward Committees, and the system was not further extended during the year except to the towns of Maniktola in the 24-Parganas and to Kotchandpur in Jessore. It is in force in twenty-four municipalities only in the whole Province, and of these, twelve are in the districts of the 24-Parganas and Jessore. In six of these towns—Maniktola, Barnagor, Jainagar, South Barrackpore, Birnagar and Kushtia—the Ward Committees are said to have done good work, and in the other six to have worked badly. The reports are silent as regards their work in other towns. An alternative system, viz., that of putting Commissioners in executive charge of the wards for which they are elected was commended in the Resolution of 1891-92. This system, a feature of which is the issue of counterfoil books to Commissioners for the purpose of reporting to the Chairman any irregularities that come to their notice, was in operation in nineteen towns in the Burdwan, Presidency, Dacca and Patna Divisions, and to a modified extent in the Balasore Municipality. In Motihari and Rosera Municipalities the introduction of the system is reported to have been followed by good results. The Lieutenant-Governor is satisfied that one or the other of these systems could be beneficially extended to a great many towns in Bengal. The complaint most commonly levelled against Commissioners is that they take no interest in the executive work of the municipality ; any plan that will give them definite duties and a regular system of carrying them out, must increase their interest in outdoor work, bring them into closer contact with the people, enable them better to control the executive staff, and induce them to bring irregularities to notice. But the Lieutenant-Governor would take this opportunity to point out one error

which appears to have been committed in almost every municipality in which Ward Committees have been established, and which must seriously interfere with their smooth working, and that is to entrust Ward Committees with the duty of assessing the inhabitants of their wards. It is extremely difficult for any one, even with the best intentions, to deal in a perfectly impartial spirit with questions relating to the taxation or assessment of his neighbours. All such matters, if not decided by the main body of Commissioners, should be entrusted to a Sub-Committee of persons selected for their position or acknowledged impartiality, and should not be left to the members of a Ward Committee whose only qualification very often for this difficult and delicate task is the accidental proximity of their dwelling to that of the assessee.

13. *Assessments and taxation.*—The rate on holdings was in force in twenty-five municipalities, a tax on persons being levied in the remainder. The maximum rate at which the former tax can be levied is 7½ per cent., except in Dacca and Darjeeling, where 10 per cent. is the limit. In last year's resolution the names of the twelve towns were mentioned in which the tax is not assessed at the maximum rate. The Lieutenant-Governor regrets to observe that none of these have increased the rate during the year under report. In the Bill to amend the Municipal Act which was passed in the Provincial Legislative Council during the current year, the limit of taxation in the important towns of Howrah and Patna has been raised to 10 per cent., thus placing them in the same category as Dacca and Darjeeling.

14. The average incidence of taxation throughout the municipalities of Bengal (except Calcutta) was 12 annas 9 pie per head, or one pie more than in the previous year. This figure, low as it is, does not represent the real incidence of direct municipal taxation, for the sum total, on which the calculation is based, includes tolls on ferries, a tax on carts (a large proportion of which is paid by persons who live outside municipal limits), as well as sums raised as fines and penalties, and a very large amount paid by Government for the taxes on public buildings. The statement in the margin compares the incidence of municipal taxation in Bengal with the results in some of the other provinces of the Empire during 1892-93, the latest year for which figures are available, and the comparison shows the municipalities in this province to be very lightly taxed.

	Rs.	A.	P.
North-Western Provinces	0	12	10
Panjab	1	3	5
Bombay	1	6	6
Assam	1	2	6
Bengal	0	12	9

15. In twenty-eight towns the incidence of taxation exceeded one rupee per head of the population; the list of these towns is identical with that given in paragraph 14 of last year's Resolution, save that Raniganj and Nator have dropped out, and Pabna is now included in it. With the exception of Chittagong all the towns in the list are in the Burdwan, Presidency, Rajshahi, or Dacca Division. In sixty-eight towns as against sixty-three in the previous year, the incidence of taxation was less than 8 annas per head. It was highest in Darjeeling (Rs. 4-1-5) and lowest in Debhatta (3 annas). The following important towns which form the headquarters of districts continue to be lightly taxed:—

Name of Municipality.	Incidence of taxation. 1892-93.		1893-94.		Name of Municipality.	Incidence of taxation. 1892-93.		1893-94.

Purnea ...	13	9	13	7					

16. A revision of assessment, general or partial, came into force in 35 towns during the year, which resulted in an increase of the demand in all but four cases, viz., North Dum-Dum, Sherpur (Mymensingh), Bhabhua, and Old Malda.

The results were most satisfactory from a financial point of view in the towns mentioned in the margin. In Naihati the increase will probably be reduced before all the objections, of which a large number are pending, have been disposed of. In Berhampore and Motihari general revisions were made which improved the revenue by Rs. 3,186 and Rs. 1,133 respectively, but the new assessments did not come into force until 1st April 1894. The improvement in Patna is, no doubt, largely due to the judicious action of the Commissioners in appointing an official assessor; now that under section 46 of the Act provision has been made for the appointment of such an officer, a similar course would appear to be advisable in Darbhanga, Muzaffarpur, and other towns mentioned in paragraph 15, and the Lieutenant-Governor hopes that the Commissioners of these places will consider the propriety of taking action under that section. Municipal Commissioners should also everywhere consider whether it would not be to the advantage of the town to alter their system of taxation, or to put in force the provisions of section 85 of the Act as lately amended, and to introduce the tax on persons and the rate on holdings side by side in the same municipality. When the requirements of almost all municipalities in the province for improved sanitation are so urgent, it is a policy of mistaken philanthropy to abstain voluntarily from raising for the execution of these reforms any funds which could be obtained without undue hardship from the persons to be benefitted.

	Increase.
Patna ...	... 10,152
Bhagalpur ...	... 3,987
Naihati ...	... 3,532

Cattack ...	... 2,141

17. *Demands, collections, remissions and outstandings on account of taxes.*—Under these heads the following statement compares the totals for the years 1892-93 and 1893-94:—

	Demand.			Collections.				Remissions.				
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Percentage column 7 on 4.	Arrear.	Current.	Total.	Percentage column 10 on 3.	Outstanding balance.
1	2	3	4	5	6	7	8	9	10	11	12	13
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.		Rs.
1893-94 ...	4,27,689	22,81,279	27,08,968	2,43,143	18,60,629	21,03,772	77·6	59,612	50,372	1,18,984	4·3	4,86,212
1892-93 ...	4,21,006	22,52,676	26,73,682	2,65,052	18,60,231	21,25,283	79·4	65,010	56,840	1,22,756	4·5	4,25,643

With an increase in the demand there has been a general decrease in the collections. The percentage of current collections on current demand has fallen from 82·57 to 81·91, and that of arrear collections on arrear demand from 62·05 to 56·85; so that the percentage of total collections on the total demand has fallen by nearly 2. The outstanding balance has risen by Rs. 60,569. The record is altogether unsatisfactory except that there has been a small decrease in the percentage of remissions. The table below shows for each Division the percentages of collection attained by the municipalities as compared with the previous year:—

Percentage of total collections on total demand.	Number of Municipalities.																			
	Burdwan.		Presidency.		Rajshahi.		Dacca.		Chittagong.		Patna.		Bhagalpur.		Orissa.		Chota Nagpur.		Total.

Total number of Municipalities.	26	26	37	37	11	11	17	17	5	5	25	25	11	11	5	5	9	9	146	146

In the Rajshahi and Dacca Divisions the comparatively good record of the previous year was maintained. There was a very satisfactory improvement in the Patna Division, and in Orissa too the collections have improved. In the Burdwan and Presidency Divisions the record is worse than ever, the

percentage of collections on the total demand being 72·9 and 68·4, and the remissions 4 and 6·1 respectively per cent. In Serampore less than half the total demand was realized, and Maniktola, where in 1892-93 the collections were worse than in any town in Bengal, still retains this undesirable prominence, 40· per cent. only of the demand having been realized; it is reported that in the latter half of the year collections were made over to a contractor and some improvement is expected in the future. The inspection of the accounts of this municipality disclosed many irregularities which the Commissioners should lose no time in correcting.

18. In the thirteen towns noted in the margin the results reflect great credit on the Municipal authorities; the collections in each case exceeded 98 per cent., and this result was obtained without recourse being had to large remissions. It is a matter for regret that excepting Gaya, where for the second year in succession collections have been quite excellent and Narainganj, this list includes no large towns, and even if the scrutiny is extended to those places which collected 90 per cent. or more, it will be found that the only other large towns which attained that standard were Sirajganj (95·4), Chittagong (94·9), Bihar (96·21), Bettiah (97·5), Muzaffarpur (90·03), and Monghyr (94·9). Of the twenty-one towns in the Province with over 30,000 inhabitants, thirteen failed to realize 80 per cent. of the demand. The good results attained in the five municipalities in the Backergunge district deserve special notice; the percentage-figure of their collections is shown in the margin. In all the towns of the Muzaffarpur district, too, a high standard was reached. These facts show, if further proof is needed, that where method is employed and energy and attention are devoted to the work of collection, the municipal dues can be collected practically in full under the existing rules for the purpose, and that it is not the system but the manner of its application which is in fault.

Tamluk	98·6	Gaya	99·8

Barisal	94·7	Jhalokati	99·7
Nalchiti	98·8	Pirojpur	97·9
	Patuakhali 96·8		

19. In the matter of remissions which have occasionally been employed in the past as a convenient method of securing apparently good results in collections, the Lieutenant-Governor is glad to find that an improvement is visible everywhere except in the Presidency Division. Only in the six towns named in the margin as against twelve in 1892-93 did the remissions exceed 10 per cent. Five out of the six towns are in the Presidency Division. The two first-named towns on the list have, for the past three years, made large remissions, and it seems probable that the assessments are inequitable, and that a paid assessor should be appointed to revise them as provided in section 46 of the amended Act: the Presidency Commissioner will be asked to report separately on the subject. In Balasore also the remissions amounted to 22·6 per cent. in 1892-93 and again to 9·52 in the year under report—figures which imply unreasonable assessment or a sudden impoverishment of the rate-payers, or both.

South Suburban	13·2	Baduria	20·6
Gobardanga	16·7	Santipur	18
North Dum-Dum	12·3	Raghunathpur	12·2

20. An explanation of the indifferent collections during the year, suggested in the following remarks of the Presidency Commissioner, deserves quotation :—

"The low percentage of collection is generally ascribed to the high price of food-grains, to the disturbance caused by the general elections held during the year, and also to the insufficiency of the collecting staff. These explanations are, I think, utterly inadequate, the real reasons being a dislike to adopt coercive measures to enforce payments for fear of being unpopular, especially at the time of the general elections which took place during the year, and a want of supervision over and fear of punishing the collecting staff, which is generally inefficient."

The Lieutenant-Governor has little doubt that Mr. Williams' views are correct. The faults indicated are characteristic of municipal government all the world over; but they seem to be particularly rife in Bengal at a time when

elections are imminent. Nothing but the further elevation of the standard of public duty among Municipal Commissioners will serve to eradicate these faults, which meanwhile tend to paralyze municipal administration, since without a punctual collection of municipal dues, and the exaction of the best possible work from the staff, the business of a municipality cannot be carried on with complete success. Since the close of the year the reports of the Examiner of Local Account have disclosed serious irregularities in many cases, and the Lieutenant-Governor must again draw the attention of all concerned to the supreme importance of a scrupulous adherence to the prescribed rules of account.

21. *Fresh imposts levied during the year.*—The following rates and taxes were levied for the first time during the year. The latrine tax in Katwa, license fees for dangerous trades under section 261 of the Act in Midnapore, South Dum-Dum, Khulna and Siwan. In North Barrackpore sanction was given to the levy of burial fees, and in Krishnagar and Lalbagh a tax was imposed on carts and horses and other animals during the year. Fees for the registration of outside carts plying within the municipality are said to have been levied in Siwan for the first time. In paragraph 30 of the resolution on municipalities for 1892-93, attention was drawn to the danger of this means of taxation becoming a source of oppression; its operation should be carefully watched. In towns where the main roads are repaired by the District Board there would appear to be little justification for its imposition.

22. *Income and expenditure.*—The following table shows separately for each Division the opening and closing balances, the income and the expenditure of its municipalities during, 1892-93 and 1893-94:—

Name of Division.	Opening balance.		Income during the year.		Total fund available for expenditure.		Total expenditure.		Closing balance.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.

Chota Nagpur ...	17,457	21,602	72,206	66,447	89,663	88,049	68,061	70,740	21,602	17,309
Total ...	3,97,606	4,16,919	31,43,323	33,15,155	35,40,929	37,32,074	31,21,532	32,20,364	4,19,397	5,11,710

There was a satisfactory increase both in income and expenditure. The difference between the closing balance of 1892-93 and the opening balance of 1893-94 is due partly to an error of Rs. 1,448 in the accounts of Jamalpur Municipality in the Mymensingh district, which had passed unnoticed since 1890-91 until brought to light by Mr. Earle, the Magistrate; there were other small discrepancies elsewhere which call for no special notice.

23. The closing balances in many instances are unduly high; explanations have been given in some cases, but in the following municipalities there

appears to be no reason for keeping in hand a balance so large when compared with the income of the town:—

Name of Municipality.	Opening balance.	Income excluding opening balance.	Closing balance.	Name of Municipality.	Opening balance.	Income excluding opening balance.	Closing balance.

INCOME.

24. The apparent increase of Rs. 1,71,832 in the income of the municipalities shown in paragraph 23 is more than accounted for by the large increase amounting to Rs. 2,39,589 under debt and suspense heads. The income available for expenditure actually decreased.

25. The following table shows the revenue derived from taxation proper in each Division in 1893-94 and in each of the four preceding years:—

Year.	Names of Divisions.									
	Burdwan.	Presidency.	Rajshahi.	Dacca.	Chittagong.	Patna.	Bhagalpur.	Orissa.	Chota Nagpur.	Total.
1	2	3	4	5	6	7	8	9	10	11

26. The total income from taxation showed an altogether insignificant increase of Rs. 4,542 or ·2 per cent. over that of 1892-93. The considerable decrease of nearly 3 per cent. in the Burdwan Division is distributed among all the districts except Birbhum; it is due to indifferent collections and to a reduction in the demand. Similarly that in the Bhagalpur Division is shared by all districts except Malda, and is solely owing to laxity in collection, as the demand increased. The decrease in the income of the municipalities in the Chittagong Division after 1891-92, and the very small increase during the last five years, are unsatisfactory features, for it is impossible to believe that during that interval assessable income has not risen considerably, there having been no famine or calamity, except a cyclone in Noakhali in October 1893, to account for any general falling off in the material prosperity of the townsfolk.

27. The statement in Appendix E shows the details of income under each head separately for each Division during the years 1892-93 and 1893-94, and the following figures give the difference between the receipts of the two years for the whole province:—

Heads of Revenue.	Total receipts (1893-94).	Comparison with 1892-93.		
		Increase.	Decrease.	Percentage of variation.
1	2	3	4	5
1. Taxation—	Rs.	Rs.	Rs.	
Rate on houses and lands ...	7,86,763	...	11,041	1·38
Tax on animals and vehicles ...	1,85,910	5,742	...	3·18
Tax on professions and trades ...	25,163	...	2,559	9·23
Tolls on ferries	1,21,347	...	332	·27
Water rate	35,060	...	642	1·79
Lighting rate	35,770	...	678	1·86
Conservancy	4,18,021	18,861	...	4·72
Tax on persons	5,58,223	...	5,423	·96
Miscellaneous penalties ...	13,644	614	...	4·71
2. Realizations under special Acts ...	1,08,415	...	11,010	9·21
3. Revenue derived from municipal property and powers apart from taxation	2,78,058	...	18,763	6·32
4. Grants and contributions ...	1,77,673	...	11,391	6·02
5. Miscellaneous	56,785	...	31,135	35·41
6. Extraordinary and debt—				
(*a*) Sale proceeds of Government securities	1,069	1,069	...	(There were no receipts last year.)
(*b*) Loans	2,98,000	2,42,000	...	
(*c*) Realisations of sinking fund for repayment of loans ...	7,124	1,070	...	17·67

(*e*) Deposits	90,362	40,424	...	80·94
Total ...	33,15,155	3,09,780	1,37,948	
Net increase—Rs. ...		1,71,832		

28. *Rate on the value of holdings*—Either this tax or the tax on persons is levied in every municipality, and they form the most important sources of municipal income. The rate on holdings was levied in thirty-five towns during the year, and yielded a revenue of Rs. 7,86,763, which is Rs. 11,041, or 1·38 per cent. less than in the previous year. There was an increase in the Presidency, Rajshahi and Orissa Divisions, and a decrease in the other Divisions (excluding Chota Nagpur, where the tax is not levied). There was a decrease in all the municipalities of the Burdwan Division except in Hooghly, Uttarpara and Howrah. In Burdwan town the audit of accounts and preparations for the elections are said to have hindered collections, but the excuse cannot be accepted. The heavy falling off in Raniganj is due to the large realization of arrears in the previous year, that in Bally to bad collections. In the Presidency Division the increase was largest in the following towns:—Rupees 4,956 in Maniktola, due to the introduction of the system of collecting through a contractor instead of by a paid establishment, Rs. 3,398 in Cossipore-Chitpur, Rs. 2,212 in Santipur, and Rs. 510 in the South Suburban Municipality (due in all three cases to increased collection of arrears), Rs. 629 in Jessore, due to better collections and to an increase in the demand. There was a falling off of Rs. 1,970 in Krishnagar, due to mismanagement of the collections. In Darjeeling and Kurseong an increase occurred, chiefly due to the assessment of new and improved holdings. In Dacca the falling off is said to be due to the high prices of food-grain which have caused a falling off in the collections, but

in the neighbouring town of Narainganj there was not a falling off but an increase. In the Patna Division there was a decrease in the Patna Municipality, due to a dispute between the Railway Company and the Municipality as to the amount of taxes to be paid, and also to the late payment of amounts due on Government buildings. In Siwan, where the tax on persons is in force, the collections show a decrease from Rs. 5,528 to Rs. 704, owing to the receipts in previous years having been wrongly shown under this head. In Hajipur there was an increase of more than 16 per cent. in the collections. There was a decrease in all the towns in the Bhagalpur Division where the tax is levied, due to indifferent collections, for which the explanations offered are inadequate. In Puri an increase of Rs. 1,042 is ascribed to greater energy in collecting.

29. *Tax on animals and vehicles.*—In the Dacca, Chittagong, and Bhagalpur Divisions the amounts realized from this source of revenue varied but little. There was an advance of Rs. 2,256 in Burdwan, due mainly to an increase in the number of vehicles and draft cattle in Burdwan, Baidyabatty, and Howrah. In the Presidency Division the increase is owing to the imposition of a tax on carriages, horses, and other animals in Lalbagh; the collections in that town amounting to Rs. 3,933. Reference was made in last year's Resolution to the large amount (more than half the municipal income) realized in Chanduria Municipality from the registration of carts which belonged to persons outside the town, but plied occasionally within municipal limits, and in consequence of the opinion then clearly expressed that these carts, if they come but once or twice a week into the municipality on market days, ought not to be taxed, the collections have decreased by Rs. 976. In Baranagore the decrease in receipts under this head is again ascribed to the lack of supervision exercised during the period of the elections. In the Rajshahi Division the increase is ascribed to a falling off in the number of carts, carriages and animals registered.

30. *Tax on professions and trades.*—Some doubt exists as to what sums should be credited under this head and what under column 29, (fees for licenses under section 261). The total of these two columns was Rs. 29,663 in 1893-94 against Rs. 31,692 in 1892-93. The falling off under this head is due to the fact that in Howrah and Maniktola the fees levied on warehouses for jute, straw and other inflammable materials have been credited this year under the head of collections under the Licensed Warehouse and Fire-Brigade Act of 1893. In Dacca there was an increase of Rs. 1,317 in the receipts owing to the tax which was first imposed in 1892-93 having come into full operation only during the year under report. In Orissa the considerable increase was due to the taxing of trades not previously rendered liable.

31. *Tolls on Ferries.*—Nowhere in the Province are tolls levied on roads, and in the Chota Nagpur Division there are none on ferries situated within municipal limits. In the Presidency Division the receipts fell off, partly owing to the grant of Rs. 500 out of the receipts of the Government ferry at Ranaghat having been shown under Grants and contributions instead of under "Tolls and ferries," and partly to the reduction of income from the Jiaganj ferry in the Lalbagh Municipality, due to the East Indian Railway Company having opened an out-agency at that place. The decrease of Rs. 2,751 in the Patna Municipality due to a default has since been adjusted out of the security deposit made by the ferry farmers. In other Divisions except Patna and Burdwan, the receipts from tolls increased. In Cuttack town an increase of Rs. 1,007 is ascribed to realizations of arrears and to the large number of pilgrims who used the ferry. In Muzaffarpur the Korlahia Ghat ferry was re-opened owing to the Victoria bridge having become unfit for traffic, and the receipts in consequence partly recovered the falling off that occurred in 1892-93. No explanation has been given of the fact that there was no revenue from this source during the year under report in the English Bazar Municipality in Malda, whereas in 1892-93 it amounted to Rs. 1,387.

32. *Water rate.*—This was levied as in the previous year in Burdwan, Darjeeling, and Bhagalpur. In Nasirabad sanction was given to the imposition of the tax, but the Commissioners proposed, instead of levying a water-rate, to pay the cost of the water-supply from the general fund. This proposal has been vetoed, and the tax will be levied from the commencement of the current year.

33. *Lighting rate.*—This rate is levied only in Howrah. The decrease is due to remissions on account of vacant holdings.

34. *Conservancy including scavenging and latrine rates.*—The large increase (Rs. 18,861) of income under this head was shared by the seven Divisions named in the margin, whilst the remaining two Divisions, viz., Burdwan and Chittagong, show a falling off of Rs. 2,719 and Rs. 257 respectively. As regards the Burdwan Division, it may be said that in 1892-93 there was a large increase of Rs. 20,526 over the revenue of the previous year, and the present decline may be due to there having been smaller arrears to collect. Chittagong has shown a reduced income during both the years, although the decrease is small. The Lieutenant-Governor is gratified to observe that a large percentage of increase has occurred in the Patna Division during two successive years. The following municipalities show the largest fluctuations in the receipts as compared with the previous year :—

Division.	Amount of increase. Rs.	Percentage of increase.
Presidency ...	5,656	7·6
Rajshahi ...	1,720	3·1
Dacca	3,675	5·5
Patna	7,919	52·2
Bhagalpur ...	496	2·3
Orissa ...	1,767	11·4
Chota Nagpur ...	604	18·2

Name of Municipality.	Amount of increase. Rs.
Utterpara	1,057
Cossipore-Chitpur	2,162
Maniktola	1,153
Krishnagar	2,213
Patna	7,494
English Bazar	2,390
Cuttack	1,277
Puri	1,160

Name of Municipality.	Amount of decrease. Rs.
Raniganj	1,112
Baranagar	1,114
Dacca	1,021

The fluctuations of income under this head are obviously due to the same causes which affected the receipts under other forms of taxation in force in these municipalities.

35. *Tax on persons according to their circumstances and property.*—There was on the whole a falling off of income under this head, which was shared by six divisions. The Patna Division shows a satisfactory increase, whilst in Dacca and Orissa there was some slight improvement. The actual difference in income in each division as compared with the previous year, under this important head of taxation, which is in force in most of the municipalities in Bengal (111) is shown in the margin. All the municipalities in the Burdwan Division in which this tax was in force show a falling off except Bankura, Sonamukhi, Ramjibanpur, and Kharar, the last three being very small towns with small incomes. The Commissioner observes that the explanations submitted are generally not satisfactory. In the Presidency Division, more than one-half of the municipalities where this tax is levied show a falling off in income, the most notable among them being Baranagar (Rs. 3,322), Lalbagh (Rs. 2,267), North Barrackpore (Rs. 1,394), and Baduria (Rs. 1,034). Only three municipalities, viz., Naihati, Nadia, and Moheshpur, return an increase of over Rs. 300. Out of the nine municipalities in the Rajshahi Division which rely for their revenue on this form of taxation, six show a decline which in Rampur Boalia amounted to Rs. 1,860: Pabna alone shows a satisfactory increase of Rs. 1,611. In the Dacca Division nine out of fifteen municipalities show an increase, the largest being at Nasirabad where it was of Rs. 1,416. In the Chittagong Division there was a falling off in the Municipalities of Comilla and Brahmanberia. Of the considerable increase in the Patna Division, a portion is apparent only, the income of the Siwan Municipality (Rs. 4,425) having now, as stated above, been correctly shown under this head instead of under "tax on houses and lands:" among the remaining towns of the division, the improvement is most marked in Arrah (Rs. 2,534), Bihar (Rs. 1,351), Bettiah (Rs. 1,147), and Buxar (Rs. 1,026),

Name of Division.	Amount of increase (+) or decrease(—). Rs.
Burdwan ...	—4,800
Presidency ...	—9,966
Rajshahi ...	—1,570
Dacca	+1,192
Chittagong ...	—1,202
Patna	+10,844
Bhagalpur ...	—39
Orissa	+138
Chota Nagpur ...	—20

whilst Siwan and Sasaram show a decrease of Rs. 1,103 and Rs. 945, respectively. In the remaining three divisions the variations are small and call for no comment. The falling off of income is ascribed variously to the general elections, to the decreased prosperity of the people in some towns, to desertion and death of rate-payers, to the changes in, or reduction of, the collecting staff, to smaller arrears left from previous years, and to high prices of food-grains: but the Lieutenant-Governor is disposed to doubt whether there was much reason for the decrease beyond laxity in supervising collections, which was no doubt enhanced by the near approach of the elections.

36. *Other sources of revenue.*—Of other sources of revenue the rate levied in Howrah, Maniktola, Cossipur-Chitpur and Madaripur for the maintenance of the Fire Brigade under Bengal Act I of 1893 yielded an income of Rs. 35,368 against Rs. 42,546 in the previous year. Revenue from pounds shows a falling off from Rs. 65,361 to Rs. 61,281; the fluctuations are most noticeable in the towns of Midnapur and Dinajpur, where receipts decreased by Rs. 1,324 and Rs. 502 respectively, and in Rangpur, where there was a large increase of Rs. 642. The amount of fines shows a falling off from Rs. 40,717 to Rs. 33,423, which is due probably to lack of energy in prosecutions, for the Lieutenant-Governor can hardly suppose that there has been a sudden decrease in the number of offences.

37. *Grants from Provincial and Local Funds.*—The table in Appendix L shows the grants received by municipalities from Provincial and Local Funds, and also contributions from other sources in 1893-94 and in the previous year. The total amount of the grants and contributions from each of the different sources, and the purposes for which they were made, are shown in the table below:—

Purposes for which made.	Provincial.	District Fund.	Other Funds and public charity.	Total.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Medical	2,594	21,120	22,897	46,611
Education	5,890	...	550	6,440
Public Works	37,559	20,133	25,539	83,231
Other purposes	700	...	11,586	12,286
Total ...	46,743	41,253	60,572	1,48,568

The most important of the items shown in Appendix L are the following:—A grant of Rs. 25,000 from the Provincial Funds, being an instalment of a total contribution of Rs. 50,000 made for the improvement of the town of Khulna; a contribution of Rs. 20,000 by the Mymensingh District Board, towards the construction of the Raj Rajeswari water-works in Nasirabad; and two sums of Rs. 9,000 and Rs. 10,200, the former of which was given by Babu Udit Narain Singh for the water-works in the town of Bhagalpur, and the latter by Raja Surya Kanta Acharjee Chaudhury, Bahadur, for those at Nasirabad, being instalments of their contributions for the works.

38. *Gifts by Private Individuals.*—Besides those mentioned in Appendix L, other gifts have been made by private persons, and the Lieutenant-Governor is glad to take this opportunity of acknowledging the liberality which prompted the execution of the following works. In Raniganj the excavation of a tank to be reserved for drinking purposes was begun, the cost, estimated at Rs. 6,000, being borne by a private gentleman; Babu Bhuban Mohan Mukherji paid Rs. 3,849 for the improvement of a lane in the Howrah Municipality. In the

South Barrackpore Municipality Babus Trannath Banerji and Kalinath Pramanik have constructed public bathing ghats. Two large tanks in Jessore were re-excavated at the cost of the Dighapattia Estate and of the Narail zamindars, respectively. In Khulna, Babu Barada Kanta Rai, a Municipal Commissioner, maintained a school and the "Sripur Hitashadini Sabha," supported a dispensary and library in Debhata. Babu Radha Gobinda Das, of Enactganj, constructed a pucca ghat for the cremation of the dead at Daeca. In Comilla two tanks were excavated by private persons for the benefit of the public. In the Bihar Municipality liberal contributions were made by private persons for the repair of the Bayley sarai. Babu Ram Bhagwan Chaube, of Sikraul, built a pucca ghat in the Buxar Municipality, and another was constructed from public subscriptions. The late Maharaja of Dumraon gave Rs. 3,600 for the construction of an operation ward in the Bankipore dispensary. The following liberal contributions were received towards the cost of the Muzaffarpur drainage scheme :—

		Rs.
1.	Maharaja of Darbhanga	10,000
2.	Babu Rameshwar Narain Mahta	5,000
3.	„ Nandan Lal	5,000
4.	„ Bishwa Nath Prashad Mahta	2,500
5.	„ Gajraj Sahai	2,000
6.	„ Baldev Sahu	2,500
7.	„ Dewa Dass Mahanta, of Motihari ...	2,000
8.	Raja Peruddin Khan, of Parsanee	2,000
9.	Babu Chowdhry Mahadev Parshad	1,000

EXPENDITURE.

39. The total expenditure in the municipalities of the province (excluding Calcutta) amounted during the year to Rs. 32,20,364 against Rs. 31,21,532 in 1892-93, and the closing balances of the two years were respectively Rs. 5,11,710 and Rs. 4,19,397. The statement in Appendix F shows the percentage that the expenditure under each of the principal heads bears to the total outlay (excluding debt and suspense heads). For the whole province the percentages for the two years are as follows :—

	Conservancy.	Public Works.	Establishment.	Medical.	Lighting.	Education.	Drainage.	Vaccination.
	1	2	3	4	5	6	7	8
1892-93	29·07	19·21	11·4	9·47	5·28	4·8	3·56	0·6
1893-94	27·9	18·2	10·9	9·4	5·5	4·5	9·5	0·6

40. Looking first to the figures for each Division it appears that the highest proportionate expenditure on conservancy is in the Burdwan and Orissa Divisions and the lowest in the Patna, Chittagong, and Dacca Divisions. Compared with other Divisions, establishment absorbs the largest share of the expenditure in Orissa, Rajshahi, and Bhagalpur, while in Dacca and Patna it is smallest. The largest proportionate sum is devoted to the medical needs of the people in Chota Nagpur, Bhagalpur, Dacca, and Chittagong, while the Burdwan and Presidency Divisions are at the bottom of the list in this respect. As in the previous year, Chittagong shows the highest and the Presidency Division the next highest percentage of expenditure on education. The Municipalities in the Dacca Division would appear to be least heedful in this respect. These comparisons are useful only as a rough guide and cannot be relied on for exact conclusions; for instance, in the year under report the heavy expenditure in the Patna and Muzaffarpur Municipalities on drainage schemes raised the percentage of expenditure of the Division under Drainage from 2·4 to 29·5 and proportionately reduced that under all other items; but as the cost was met from extraordinary sources of income, there was no corresponding reduction in the actual expenditure under the other various heads.

41. The following table shows the expenditure of 1893 94 under its main heads, and also shows how these totals have varied from those of the previous year:—

Heads of expenditure.	Total expenditure in 1893-94.	Comparison with 1892-93.		
		Increase.	Decrease.	Percentage of variation.
1	2	3	4	5
	Rs.	Rs.	Rs.	
1. General Administration—				
Office Establishment	1,85,422	...	4,409	2·3
Collection of taxes	1,42,535	2,450	...	1·7
Survey of lands	2,540	...	2,556	50·1
Other items	6,834	1,049	...	18·1
2. Public Safety—				
Fire (establishment, &c.) ...	27,496	...	9,710	26·1
Lighting	1,66,167	13,342	...	8·7
Other items	15,404	...	278	1·7
3. Public Health and Convenience—				
Water-supply	1,55,684	...	60,783	28·0
Drainage	2,86,684	1,83,497	...	177·8
Conservancy (including road cleaning and watering) and latrines.	8,40,849	...	724	·08
Hospitals and dispensaries ...	2,82,189	8,064	...	2·9
Vaccination	18,828	...	212	1·1
Markets and slaughter-houses ...	20,981	2,362	...	12·6
Public Works—				
(*i*) Establishment	64,490	3,462	...	5·6
(*ii*) Buildings	45,940	...	418	·9
(*iii*) Roads	4,31,451	...	8,846	2·0
(*iv*) Stores	5,942	...	2,502	29·6
Other items	19,554	...	4,235	17·8
4. Public Instruction ...	1,36,867	3,592	...	2·6
5. Contributions for general purposes ...	5,595	...	2,687	32·4
6. Miscellaneous ...	1,39,652	...	13,577	8·8
7. Extraordinary and Debt—				
Investments	6,107	5,261	...	621·8
Other items	2,13,243	...	13,310	5·8
Total	32,20,364	2,23,079	1,24,247	3·1
Net increase	...	98,832		

42. *Office and Collection Establishment.*—The total expenditure on office establishment shows a small increase of Rs. 2,450, and that on collecting establishment a decrease of Rs. 4,409. The result is satisfactory and indicates that the insidious growth of establishment charges, which is the main danger of all local bodies, has been checked for the present. There is, however, an unexplained increase of Rs. 443 in the expenditure of the North Barrackpore Municipality on establishment, which merits the attention of the Divisional Commissioner. In fourteen municipalities as compared with fifteen in 1892-93, the cost of the office and collecting establishment exceeded one-quarter of the whole expenditure of the year. In all towns the total expenditure was less than Rs. 5,000, and in eight of them it was less than Rs. 3,000. In such cases Rule 2 of the Account Rules framed under section 82 of the Act, which is quoted in the margin, makes any large reduction in establishment impossible. The Commissioner

Kotrang	... 28·1	Debhatta	... 42·3
Bansbaria	... 27·74	Chanduria	... 35·9
North Dum-Dum	25·1	Netrakona	... 23·8
Baduria	... 25·3	Nalchiti	... 28·9
Taki	... 34·6	Lalganj	... 33·6
Birnagore	... 27·7	Colgong	... 26·6
Moheshpur	... 29·1	Jhalda	... 25·5

"In no case shall the same person compile the municipal accounts and superintend the collection of the rates and other municipal income."

of Dacca during the year under review drew attention to this rule, and suggested that towns the income of which was small should be exempted from its operation. In view, however, of the fact that defalcations are especially frequent in small municipalities, which are usually far removed from head-quarters and necessarily receive but little official supervision, the Lieutenant-Governor was unwilling to remove this important safeguard against embezzlements and malpractices.

43. *The Prevention of Fire.*—The decrease of expenditure under this head from Rs. 37,116 to Rs. 27,406 was due to the fact that the contribution formerly made by the Cossipur-Chitpur Municipality to the Calcutta Fire Brigade was reduced to nearly one-half by the passing of the Licensed Warehouse and Fire Brigade Bill of 1893. In the city of Patna a considerable sum, amounting to Rs. 3,038, was for the first time shown under this head.

44. *Lighting.*—The expenditure increased from Rs. 1,52,825 in 1892-93 to Rs. 1,66,167 in the year under report. The increase was shared by all Divisions except those of Chittagong and Patna, and was due chiefly to the increase in the number of lights. In thirty-three towns there was no expenditure under this head. Whatever opinion may be held as to the advisability of street-lighting in small rural municipalities, there can be no room for doubt as to its necessity in the towns named in the margin, in all of which the population exceeds 10,000, but in which nevertheless nothing was spent on street lighting during the year: especially is this neglect a matter for wonder in North and South Barrackpore, each of which contains a population of over 20,000 persons.

South Barrackpore.	Madhubani.
North Barrckpore.	Roserah.
Nasirabad.	Jajpur.
Barh.	Hazaribagh.

45. *Water-supply.*—Under this head Rs. 1,55,684 were spent against Rs. 2,16,467 in the previous year. The decrease was in capital expenditure only. In the Burdwan Division the considerable falling off was due to less outlay having been incurred during the year on the extension of the water-works in the Burdwan Municipality. In the Dacca Division the heavy decrease was owing to the fact that but little capital expenditure was required to complete the water-works at Nasirabad which were opened during the year. The increase in the Presidency Division from Rs. 5,753 to Rs. 31,479 arises from the cost incurred in connecting Maniktola with the Calcutta system. The only other towns in which water-works exist are Dacca, Darjeeling, Kurseong and Bhagalpur. The water-works at Arrah, the cost of which is to be met partly by the Municipality, partly by the District Board, and partly from contributions, were completed and opened by His Honour the Lieutenant-Governor shortly after the close of the year under review. No expenditure, however, on this account appears under this head in the accounts of 1893-94, as the work is being carried out by a joint committee of representatives from the District Board and the Municipality, and not by the Municipality itself, and the contribution of the Municipality was not paid over until after the close of the year.

46. It was thought desirable during the year to appoint a committee to enquire into the purity of the water supplied by the Darjeeling Municipality, of which Mr. Nolan, the Commissioner of the Division, was chosen President. Since the close of the year the Municipal Commissioners have applied to Government for a loan to enable them to carry out the recommendations of the Committee.

47. The Hooghly Municipal Commissioners have completed an agreement with the East Indian Railway Company under which water drawn from the river by the Company will be conveyed into municipal tanks when required at a cost of $4\frac{1}{2}$ annas per thousand gallons, but Mr. Duke, the Magistrate, writes that he fears the Commissioners do not seriously intend to raise the funds necessary to carry out the scheme. The extensive scheme for the supply of filtered water to Howrah made some progress, and Rs. 14,627 were spent in surveying a site for the head works and on other preliminary arrangements: since the close of the year the detailed plans have been approved, a contract with Messrs. Burn and Company has been concluded, and a loan of fifteen lakhs for carrying out the work sanctioned. Negotiations for the supply of water to the Cossipur-Chitpur Municipality from the Calcutta mains have long been in progress, and there at length seems to be some prospect of

their satisfactory conclusion. Mr. Kimber, the Engineer of the Calcutta Corporation, was engaged during the year in working out a comprehensive scheme for the supply of water to the suburban Municipalities on the left bank of the Hooghly. The experiments which were conducted last year at Gaya, in order to ascertain whether a sufficient supply of water could be obtained beneath the sandy bed of the river Falgu to provide the town with pure water, were prosecuted during the year under report, and the result is said to be very promising.

48. The schemes described in the foregoing paragraph are expensive and ambitious, and of a character which can only be attempted in large and prosperous Municipalities. Those which more nearly affect the health and welfare of the masses in most towns are the construction and repair of tanks and wells and their cleansing and protection from contamination. It is satisfactory to note that this class of expenditure rose from Rs. 38,678 in 1892-93 to Rs. 46,417 during the year under review. Besides the Raniganj and Jessore tanks already mentioned in paragraph 38, the most important works are as follows. The Municipal Commissioners of Khulna pumped up water from tanks into settling reservoirs, and two new reservoirs were constructed during the year. In Rangpur one of Norton's tube-wells was sunk. The water-supply of the town of Pabna is said to be very defective, and a scheme for its improvement has been prepared by the Municipal Commissioners. There are reserved tanks in all the municipalities of Backergunge, and the Magistrate reports that the inhabitants of these places now appreciate the good water thus provided.

49. The purity of the water-supply of the town of Puri, which is derived solely from tanks and wells, is a matter not of local but of provincial if not imperial importance, since upon it largely depends the well-being of hundreds of thousands of Hindu pilgrims from every part of India. Surgeon-Captain Dyson, Officiating Sanitary Commissioner of Bengal, inspected the town in August 1893, and wrote as follows: "The inferior quality of the water which these wells contain is now, as it has been for years past, the great sanitary evil of Puri"; and of the Svetgunga, the most important tank in the town, resorted to by thousands of pilgrims who drink of the water and wash in it, he writes: "When I examined the tank the water was of a rich green colour, giving off a most offensive smell, and the Chemical Examiner, who has recently analysed it, reports that it 'resembles liquid sewage,' which is not surprising considering the various forms of the worst pollution to which it has been subjected for seven centuries." Some steps have since been taken towards improving the wells: the owners of some have been induced to clean and improve them, and six wells belonging to the municipality have been condemned and closed. The attempts made to cleanse the Svetgunga tank have been less successful. The Sanitary Commissioner recommended the purchase of a pump in order to empty the tank, and the Rani of Puri, the Superintendent of the temple, to whom the tank belongs, promised in October 1893 to contribute Rs. 3,000 to the cost of the operation. The Lieutenant-Governor regrets to hear that, notwithstanding renewed promises, she has as yet paid nothing, and in consequence the pump has not yet been purchased. It is impossible to allow the proprietor of any tank by neglect of this character to endanger, not merely the health and lives of neighbouring inhabitants, but that of every town of India from which the pilgrims come. It may be necessary to adopt coercive measures under section 200 of the Municipal Act, to compel the proprietress to cleanse the tank, but His Honour trusts that before action is taken the Superintendent of the temple will recognise her responsibility in the matter.

50. To the provision and maintenance of a good water-supply in every town the Lieutenant-Governor attaches the greatest importance, for he considers that Municipal Commissioners can confer no greater benefit on their fellow-townsmen. The researches of medical science year by year establish more clearly the close connection between zymotic diseases and a contaminated water-supply, while on the other hand the measures which are required to place potable water within the reach of the public are in most cases simple and inexpensive and call for little other expenditure than that of energy, forethought and care. In Bihar it is from wells that the public water-supply

is chiefly drawn, and on this subject the Commissioner of Patna writes:—"In most municipalities in Bihar a good supply of wholesome drinking water can, I have no doubt, under proper arrangements, be obtained from wells. I am of opinion that all that is necessary is that selected wells among those existing should be thoroughly cleaned out and care taken to keep them in order in future, and that new wells should be sunk on sites well removed from contaminated surroundings. Some simple and popular means should also be adopted for raising the water, in place of the miscellaneous collection of ropes and utensils, brought from no one knows what nest of uncleanliness and disease, which is at present used for the purpose." In Bengal tanks are more generally used, and the Lieutenant-Governor fears that the following remarks of the Commissioner of the Presidency Division are only too true:—"Many of the municipal towns have apparently never had a good supply of drinking water, but in many there are capital tanks which could easily have been preserved for drinking purposes. Often no attempt has been made to do this. New tanks are asked for and taken in hand, but stringent measures to keep the tanks free from pollution, when made, are equally needed, and on that very point the Municipal Commissioners often show themselves completely indifferent." Once the urgent necessity of reform has been recognised, no municipality which fails to introduce it will be able to rebut the charge of apathy:—the best methods of preserving water from pollution are well known, and in case of doubt or difficulty the Sanitary Department will readily render advice or assistance: the amended Municipal Act has defined and largely increased the powers of Municipal Commissioners over the water-supply; a new body of Municipal Commissioners has lately been formed which for three years will control the destinies of the municipalities in these provinces, and the Lieutenant-Governor lays upon them as a grave and important responsibility the paramount duty of providing for their fellow-townsmen the inestimable benefit of a pure water supply.

51. *Drainage.*—Out of the large sum of Rs. 2,86,684 devoted to drainage the greater portion was spent in the Patna and Muzaffarpur municipalities; namely, Rs. 1,58,962 in the former and Rs. 32,008 in the latter. If these two towns are left out of consideration, it appears that the capital expenditure on drainage works amounted to Rs. 30,051 in 1893-94, and the cost of maintenance to Rs. 65,663, as compared with Rs. 33,876 and Rs. 69,311, respectively, in the previous year. Again, if the expenditure in each Division is examined, it will appear that besides Patna, Dacca alone shows any considerable increase (Rs. 5,823), while Burdwan, Rajshahi, and Orissa devoted considerably less than in the previous year to this purpose.

52. The total expenditure in the city of Patna was Rs. 1,59,063. The progress made appears to be satisfactory and the Commissioner writes:—

"A thorough system of drainage on scientific principles is being carried out in Patna city under the supervision of Mr. Salmon, the District Engineer. A very considerable portion of the work has already been done, and it is hoped that the remainder will be finished very shortly. The necessity of some system of flushing the drains regularly is being already felt, and the subject must at once receive the careful attention of the Commissioners."

The cost of the drainage works in progress in the town of Muzaffarpur is estimated at Rs. 99,080, which is being met partly by a loan of Rs. 60,000 from Government, and partly from subscriptions. Excluding these two towns, only the nine municipalities noted in the margin incurred any considerable expenditure on drainage, and in all but the first four, the expenditure falls under the head of maintenance and repairs. In Burdwan the scheme commenced in 1892-93 appears to have made little progress. The Baradanda drainage work in Puri is said to have been nearly completed. The new main channel from Serampore to Konnagar was completed during the year, but the Commissioners instead of rendering it effective by connecting it with the internal drainage of the town have spent on other objects a sum Rs. 10,000 saved out of the Government loan granted for the main channel. The Commissioner will be asked to report separately on the subject.

	Rs.
Manicktola	2,495
Darjeeling	8,102
Dacca	6,818

South Barrackpore ...	3,156
Berhampore	3,145
Nasirabad	5,598
Gaya	2,108
Cuttack	2,013

53. In last year's Resolution the Lieutenant-Governor noticed the activity of the Municipal Commissioners in several towns in having levels taken and drainage schemes prepared, and he is glad to find that this activity is unabated. In Hooghly, Dainhat, Bally, Badyabati, Uttarpara, Baruipur, Ranaghat, Nadia, Kushtia, Kumarkhali, and Bogra, levels have been taken, and in the first four towns and in Krishnagar schemes have been actually prepared. But the Lieutenant-Governor regrets to notice in many cases a great unwillingness to proceed further, so that the schemes are suspended, and on the survey no action is taken. There are indeed noteworthy exceptions; both Dinajpur and Jalpaiguri have taken loans and intend to push through the work, and in Comilla, also, matters are progressing. The plea put forward for inaction usually is that the schemes are too expensive. It cannot be expected that capital expenditure can be met from current income; either it must be paid for from savings, or a loan must be taken from Government, and of the two plans the latter is obviously preferable. A perusal of the Divisional reports, however, discloses many cases in which the alleged inability of the Commissioners to take a loan could apparently be removed by the more efficient administration of their existing resources. In many cases municipal dues are not collected, or considerable sums are spent on higher education, while in others the Commissioners, even if they administer judiciously the funds available, are unwilling to increase taxation even where it is admitted to be unreasonably low, as in Darbhanga. Where these conditions prevail it no doubt becomes hard to find money for improvements, but the Lieutenant-Governor trusts that the new body of Commissioners will take a broader view of their duties and will endeavour to administer their resources to the greatest advantage of the Municipality, not hesitating to ask for a loan which can be repaid on easy terms when an important reform necessitates a special effort.

54. *Conservancy (including road watering) and latrines.*—The expenditure under this head amounted to Rs. 8,40,849, as compared with Rs. 8,41,573 in 1892-93. There was an increase in all Divisions except those of the Presidency, Orissa, and Chota Nagpur, but the variation in each case was unimportant, save for the decrease of Rs. 19,637 in the first-named Division and an increase of Rs. 13,253 in that of Burdwan. In that Division all the towns except six spent more than in the previous year, and in none of the six was the falling off such as to call for special notice. The increase is most noticeable in Midnapore (Rs. 1,799), and Howrah (Rs. 7,321). It is said in the local reports that the work of removing the night-soil in Howrah is carried on with a fair degree of efficiency, but this is hardly in accord with the report of the Officiating Sanitary Commissioner, who inspected the town in September 1893, nor with that of Surgeon-Captain Vaughan, Deputy Sanitary Commissioner, who inspected the trenching-grounds after the close of the year. After conclusively showing that the existing provision for the cleansing of privies and the removal of sewage was entirely inadequate, the Officiating Sanitary Commissioner made in the closing paragraph of his report certain definite recommendations, the most important of which related to the increase of the number of mehtars and of sewage carts employed by the Municipality. This report was forwarded for the consideration of the Commissioners, and after some hesitation and delay caused by the opposition of some of their number, the Board, in March of the current year, decided to adopt the enhanced scale of latrine fees required to meet the cost of these improvements. The Lieutenant-Governor is gratified to learn that since the close of the year the Commissioners have given further evidence of the sincerity of their desire to improve the sanitary state of the town, by applying for a loan from Government, part of which is to be used in carrying out the most important improvements suggested in Dr. Dyson's report.

55. In the Presidency Division several towns show a considerable decrease in expenditure, notably Cossipore-Chitpur (Rs. 10,545), Maniktola (Rs. 9,387); in both cases it is ascribed to abnormal outlay in the year 1892-93 for trenching-grounds and other matters connected with conservancy. All the districts of the Dacca Division show an increase except Backerganj, where there was an unusual expenditure in 1892-93. In Chittagong the variations in expenditure are insignificant. Patna and Gaya alone of the towns in the Patna

Division show an increase, due in the former case to the sweepers' establishment having been strengthened and in the latter to the purchase of new conservancy and water-carts. The Lieutenant-Governor is pleased to notice that a very considerable number of municipalities purchased conservancy carts during the year, and thus avoided what the Commissioner of Burdwan justly terms "the objectionable system of conveying the night-soil on the heads of mehtars."

56. The proportion of expenditure on conservancy seems generally sufficient except in the following towns :—

Khirpai	... 4·5	Satkhira	... 4·6
Chandrakona	... 8·3	Debhatta	... 3·2
Baruipur	... 6·	Chanduria	... 2·1
Joynagar	... 5·8	Bazitpur	... 1·01
Baduria	... 9·3	Jhalokati	... 9·3
Taki	... 4·8	Patuakhali	... 3·5
Meherpur	... 9·4	Cox's Bazar	... 5·4
Moheshpur	... 9·2	Sitamarhi	... 9·54

The Lieutenant-Governor trusts that more attention will be paid to this important branch of municipal work in these towns during the current year.

57. In compliance with the orders contained in Circular No. 2M., dated the 12th January 1894, all the Commissioners, except those of Rajshahi and Chota Nagpur Division, have given some account of the systems in vogue for the disposal of nightsoil. The immediate cause which led to the issue of the circular was a report by Surgeon-Captain Moir, the Deputy Sanitary Commissioner, on the disgraceful state of the South Suburban and South Dum-Dum trenching grounds. The Lieutenant-Governor does not propose to review in this place the important information thus collected under this head, but will forward for the information of the Sanitary Commissioner the remarks of the Divisional Commissioners on the subject. His Honour is satisfied, on the whole, with the increased attention paid to this matter during the year. Much, however, remains to be done, and it is hoped that the blots pointed out in the Commissioners' reports will be removed during the current year.

58. *Hospitals and Dispensaries.*—In the year under review Rs. 2,82,189 were spent from municipal funds on hospitals as compared with Rs. 2,74,125 in 1892-93. The increase occurred in all Divisions except Rajshahi, Chittagong, and Bhagalpur, and was most noticeable in the Dacca Division, where it amounted to Rs. 7,332, or 19·5 per cent. In Chittagong the falling off was largest, namely Rs. 3,073. The towns noted in the margin show the most considerable fluctuations as compared with the expenditure of the previous year. A new dispensary was opened in Cossipore-Chitpur and an in-patient ward at Satkhira. A ward for Europeans was added to the Mitford Hospital at Dacca, a cholera ward to the Sitamarhi Hospital, and a female ward to the Nasirabad dispensary, the building being constructed in the latter case at the cost of a lady zamindar of Muktagacha. In Chittagong it is proposed to construct a general hospital on the Rangmehal Hill, at the joint expense of the Municipality, the District Board, and the Port Trust, and a loan of Rs. 45,000 was granted to the Municipality for the purpose: the plans are now under the consideration of Government. In paragraph 49 of the Resolution on the reports for 1892-93, attention was drawn to the fact that in nineteen municipalities no expenditure was incurred on medical relief; this description applies now only to the fifteen municipalities in the margin. For some of these towns it may be urged that they are too small to keep up a dispensary, but this plea cannot be accepted in behalf of such a town as Sonamukhi, where there is a population of 13,462, and where Rs. 665 or 14 per cent. of the expenditure was devoted in 1893-94 to higher education. In even the smallest municipalities the Lieutenant-Governor hopes to see a dispensary opened, unless one is already in existence supported from other sources, and when the funds of the Commissioners will not suffice for its entire support, they should apply for assistance to the District Board.

	Rs.

Sahebganj	... — 1,148
Chittagong	... — 1,971

Kutwa.	Joynagar.	Muktagacha.
Sonamukhi.	Goverdanga.	Tangail.
Kharar.	Kandi.	Nalchitti.
Kotrang.	Moheshpur.	Tikari.
Baranagor.	Debhatta.	Lalganj.

59. Besides Nasirabad which has been referred to above, other towns have during the year provided further facilities for giving medical aid to women. At Berhampore a hospital for secluded ladies has been started by the liberality of the mother of the Kassimbazar ward. The Municipality of Khulna has sanctioned a contribution of Rs. 100 and an annual subscription of Rs. 60 towards the cost of a zenana hospital in that town, and in Jessore a female ward is to be added to the dispensary, both the District Board and Municipality having agreed to contribute to the cost. A plan and estimate for a female ward in the Krishnagar dispensary have been sanctioned, and Babu Nafar Chandra Pal Chaudhury has offered a contribution of Rs. 2,500 for the work. Arrangements were made in Hooghly town for opening a hospital in connection with the Lady Dufferin Fund, and since the close of the year it has been opened. The Balasore Municipality also contributes to the support of a newly-opened dispensary for women.

60. *Vaccination.*—The statement in Appendix H gives all information in regard to vaccination. Two hundred and six vaccinators were entertained at a cost of Rs. 18,713. They performed 90,502 operations, of which 83,373 were primary and 7,129 revaccinations; of the primary operations 85 per cent. are reported to have been successful. Each operator vaccinated on an average 439 persons, and the average cost of each operation was 3 annas 10 pies. As compared with the previous year, the number of vaccinators and the number of operations was fewer; the average cost was higher; the number of operations performed by each man was larger. Of the total municipal population 3·05 per cent. were vaccinated (omitting revaccinations) as compared with 3·1 in the previous year. The provisions of the Compulsory Vaccination Act were in force in all municipalities in the province, but they require to be more effectually worked. With a total municipal population of 2,727,620, the annual number of births (at the low rate of 40 per mille) cannot be less than 1,09,100, and the number of primary vaccinations ought not to fall below that figure.

61. *Public Works.*—The expenditure on Public Works decreased from Rs. 5,56,127 in 1892-93 to Rs. 5,47,823 in the year under review. The following statement shows how this sum has been spent in the two years:—

	Establishment.	Buildings.	Roads.	Stores.	Total.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1892-93 ...	61,028	46,358	4,40,297	8,444	5,56,127
1893-94 ...	64,490	45,940	4,31,451	5,942	5,47,823

There is always a certain amount of uncertainty as to what expenditure should be debited to Public Works establishment. The Commissioner of Chittagong, for instance, reports that during the year under report Rs. 1,013 were transferred to this head in the Comilla Municipality on account of the pay of the sub-overseer hitherto shown under a different head. The instructions given to District Boards in Circular No. 2TM., dated the 27th June 1894, should be followed as far as possible in the case of municipalities. The fluctuations in establishment in no case call for special comment. The fluctuations in expenditure on roads occurred mainly in the Burdwan, Presidency, and Bhagalpur Divisions, there having been an increase of Rs. 12,751 in the first-named, and a decrease of Rs. 10,197 and Rs. 13,029 in the two last-named Divisions. Expenditure under this head must necessarily vary from year to year, but it is hard to believe that the roads in Jangipur required no repairs; no money, however, appears to have been spent on them. The heavy falling off in the various towns of the Bhagalpur Division is said to have been due to repairs being unnecessary in Monghyr, Jamalpur, and Purnea, to the failure on the part of the contractor in the Bhagalpur Municipality to supply stones, to the want of funds in English

Bazar and Sahibganj and to the unusual expenditure incurred in Old Malda in 1892-93 for the purchase of a roller. The Magistrate of Monghyr, however, does not endorse the Chairman's opinion as to repairs to roads being unnecessary, and if in fact the roads required repair, it will prove false economy to have neglected them. On buildings the following towns showed comparatively large expenditure:—Darjeeling (Rs. 6,792), Narainganj (Rs. 4,269), Gaya (Rs. 4,091), Patna (Rs. 2,522). In Darjeeling the municipal office was enlarged at a cost of Rs. 4,804; most of the expenditure in Narainganj was also devoted to the construction of a new municipal office. Expenditure in Gaya appears to have been on repairs only; that in Patna partly on the construction of a slaughter-house and partly on alterations to the municipal office. Dainhat and Tamluk also spent money on new municipal buildings.

62. *Public Instruction.*—The expenditure on education, as shown in Form III, will not agree with the figures in Appendix I, as the former represents the gross expenditure, including what is met from the fees paid by scholars, whereas the latter shows the net expenditure only, together with the class of school to which it was granted. It is satisfactory to note that but for a few insignificant variations, the figures in Appendix I agree with the subsidiary table appended to the report of the Director of Public Instruction. The total expenditure amounts to Rs. 93,201 as compared with Rs. 91,504 in 1892-93; that on primary education to Rs. 48,379 as against Rs. 33,024 in the previous year. The following statement will show that in every Division there was a marked increase under this head:—

Division.	Total expenditure on primary education.		Increase.	Percentage of increase.	Ratio of expenditure on primary education to total ordinary income.
	1892-93.	1893-94.			
1	2	3	4	5	6
	Rs.	Rs.	Rs.		
Burdwan	8,113	8,940	827	10·1	1·9
Presidency	7,193	10,313	3,120	43·3	3·7
Rajshahi	1,981	3,627	1,646	83·0	1·8
Dacca	942	2,354	1,412	149·8	1·1
Chittagong	536	1,215	679	126·6	2·1
Patna	7,691	12,416	4,725	61·4	2·9
Bhagalpur	3,049	4,402	1,353	44·3	3·02
Orissa	2,464	3,225	761	30·8	4·2
Chotta Nagpur	1,055	1,887	832	78·8	3·0
Total ...	33,024	48,379	15,355	46·4	2·3

63. On more than one occasion the wishes of Government in respect of primary education have been clearly expressed. It has been laid down as an approximate standard for the guidance of municipalities that provision should be made for the primary education of not less than half the male population of school-going age at the rate of 10 annas a head, which the returns show to be the average yearly net cost of the education of pupils of this class in Bengal. At the same time, in recognition of the many and various objects among which municipal funds have to be distributed, it was prescribed that any municipality which devoted as much as 3·2 per cent. of its ordinary annual income to this purpose might fairly be held to have performed its duty. The statement above shows that there has been a satisfactory increase in the contributions to this very important object, and this advance the Lieutenant-Governor cordially acknowledges: he is further gratified to learn from reports received from Commissioners in reply to a circular issued on the subject, that a still further advance is to be looked for in the current year. The prescribed minimum of 3·2 per

cent. has, it is true, not yet been attained throughout the province, but on the whole the progress is satisfactory. In only one municipality, namely the South Suburban, as compared with seventeen in the previous year, was no expenditure incurred on primary education; but in the following towns less than one per cent. of the income was devoted to this object:—

Burdwan.	Cossipur-Chitpur.	Darjeeling.	Muktagacha.
Uttarpara.	Baranagar.	Dacca.	Nasirabad.
Howrah.	Naihati.	Narainganj.	Muzaffarpur.
			Lohardaga.

The whole matter has been fully treated in the Resolution of the General Department, No. 3394, dated the 1st October 1894, and it is only necessary here to say that the Lieutenant-Governor trusts that in all municipalities where due provision was not made in the year under report for the education of the rising generation, the Commissioners will use their best endeavours to carry out the wishes of Government in the current year.

64. *Loans.*—The following new loans to municipalities were sanctioned and drawn during 1893-94:—Rs. 8,000 for acquiring a tank in Howrah, Rs. 25,000 for the provision of a filtered water-supply in Maniktala, Rs. 60,000 for drainage works in Muzaffarpur town, Rs. 20,000 for the Baradanda drainage works in Puri. Of the two last, only Rs. 45,000 and Rs. 5,000 respectively were taken up during the year. Altogether Rs. 2,98,000 were drawn as loans during 1893-94; this sum including, besides those above mentioned, Rs. 1,58,000 the first instalment of the loan for the Patna drainage works, and Rs. 12,000 taken by Howrah to pay off old gas bills. A loan of one lakh to the Arrah Municipality for water-works was sanctioned during the year, and Rs. 18,000 for the drainage scheme in Jalpaiguri, but the amounts were not drawn until after the close of the year.

65. *Embezzlements.*—Few embezzlements are reported to have occurred during the year, but it is feared that the list given below is not exhaustive, as the reports of the Commissioners of Rajshahi, Chittagong, Bhagalpur, Orissa, and Chota Nagpur are silent on the subject. No defalcations were discovered in the Burdwan Division. In the Presidency Division three are mentioned, which are still under enquiry. In Debhatta the tax-daroga committed suicide, and on enquiry being made, his account books and a sum of Rs. 209 were found to be missing. The Commissioner's inspection in Satkhira brought to light an embezzlement of Rs. 60 by the clerk, and further defalcations are feared. Two sircars are reported to have made away with municipal money in Maniktala, but no details have been given. In Dacca and Mymensingh two tax-collectors embezzled Rs. 296 and Rs. 50-8 respectively. Both have since died. From Jhalokati in the Backergunge district, the municipal accountant, who was also head-master of the English school, took leave for three days, and did not again return; on his accounts being examined, a sum of Rs. 32 was found to have been misappropriated. A tax-collector in Patna embezzled Rs. 535 and absconded. In most cases the Municipal Commissioners have no one but themselves to blame when these defalcations occur. They are engendered by laxity in enforcing the rules of account, and are fostered by neglect to take proper security from officers entrusted with the handling of money. The duty of the Commissioners in this matter is clearly set before them in Rule 7 of the Account Rules published by the notification of the Government of Bengal, dated the 7th February 1891, and until those orders are vigorously enforced, some municipalities every year will have to bewail the irretrievable loss of public money.

66. *Working of the Porters and Dandiwallahs' Act in Darjeeling.*—The Deputy Commissioner reports as follows:—"This law is carefully worked, and there is a close supervision of porters and dandiwallahs. A special officer is employed to look after and prosecute offenders, and complaints are growing less." The number of porters and dandiwallahs registered was 980 in 1893-94 against 1,021 in the previous year; the prosecutions numbered 51, and the fines Rs. 52-12, which is less than in the previous year.

67. *Inspections.*—In paragraph 61 of the resolution on the working of municipalities during 1890-91, it was suggested that Magistrates and Sub-divisional Officers should make inspections of the Municipalities within their

jurisdiction and submit their reports to Divisional Commissioners, and that similarly Commissioners when they made inspections should forward a copy of their notes to Government. In pursuance of this suggestion the Commissioner of Dacca submitted five reports on towns which he had inspected, the Commissioner of Chota Nagpur four, the Commissioner of Rajshahi three, the Commissioners of the Orissa and Presidency Divisions two each, and the Commissioner of Burdwan one. The reports generally were instructive and carefully prepared, particularly those of the Commissioner of Dacca (Mr. Luttman-Johnson), but in some instances it was found that the recommendations made to the Municipal Commissioners were not sufficiently definite; and in order to cure this defect, and to enable the Lieutenant-Governor to see at a glance what action had been taken on the recommendation, Sir Antony MacDonnell, who was then officiating as Lieutenant-Governor, directed in circular No. 10T.M., dated 1st July 1893, that the reports should be accompanied by a statement which should show categorically the points in regard to which the Commissioner thought that reform was needed, together with a note by the Chairman explaining what has been done in pursuance of the recommendation. This statement has since been prepared and forwarded in most cases; and though the procedure naturally delays the submission of the report to Government, the result in the end is to save much correspondence. The Lieutenant-Governor trusts that the Commissioners of Patna, Bhagalpur, and Chittagong, who submitted no reports during the year under review, will endeavour to do so during the current year.

68. *General working of the Act during the year.*—The following observations are taken from the report of Mr. Dutt, the Officiating Commissioner of Burdwan:—

"My opinion of municipal administration in this Division is embodied in the remarks which I have made in this report, especially under the heads of Drainage, Tanks, Conservancy, and Public Health. Municipal Commissioners are slow in taking the initiative, especially in matters which require special or scientific knowledge, or necessitate much outlay; but I have generally found them willing and even anxious to accept our suggestions and friendly help, and animated by a sincere desire to do the work which they have undertaken. The slow progress in sanitary improvements is considered the weak point in municipal administration; but officers who were District Magistrates ten or twelve years ago know that the progress was not quicker when we were Chairmen. Dirty tanks are private properties, and cannot be filled up or cleaned without a great deal of difficulty, and schemes of drainage require time to prepare and money to carry out. I have stated before that in some instances the schemes of drainage prepared by municipalities have been rejected by the Sanitary Board, and that in other instances the schemes approved by the Board are so expensive as to be utterly beyond the means of the towns for which they were intended. It is not the fault of the municipalities concerned that these schemes have not yet been carried into execution. I have suggested what appears to me the proper remedy. Large municipalities will be willing, I believe, to appoint special sanitary engineers, selected by the Sanitary Board, for preparing practicable schemes of drainage, and the improvement of tanks, of conservancy, and general sanitary arrangements. And such officers will bring these municipalities into closer contact with the Sanitary Board, and thus facilitate the reforms required by the Board and the Sanitary Commissioner. I believe Municipal Commissioners are sincerely anxious to accept all practicable schemes of improvement."

69. Mr. Williams, Officiating Commissioner of the Presidency Division, writes as follows:—

"I did not take charge of the Division till after the close of the year, and have not, therefore, seen as much of the working of the municipalities as I should have liked. Judging, too, by the district officers' reports, I have not inspected the best, and perhaps I was wrong in anticipating that municipalities near Calcutta would set an example in municipal government to their comrades in the mufassal. Some of those that I have seen are not a success, not so much by reason of any misgovernment as of their situation, and many of those which are in existence at the present time ought never to have been constituted municipalities. * * * * Again, the position of others is such that they should have been formed into two or more municipalities instead of one. * * * *

"In this Division, as elsewhere, I find many gentlemen keen and earnest in their work, and anxious to improve matters, but often helpless through the force of circumstances. Nevertheless, it seems that municipal administration is advancing, though often in spite of the Commissioners themselves. Drains are gradually being extended. The water-supply is by degrees being improved. Primary education is being insisted on in every municipality. Conservancy arrangements are slowly developing, but how slowly the unwillingness of a progressing town like Ranaghat to abolish well privies is an example. More money is being allotted to dispensaries.

"The great drawback to municipal improvements is the fear the Commissioners stand in of their servants and of their constituents. Many of them freely acknowledge that the taxation per head in their towns is far below what it should be, yet they do not dare to submit a properly-revised assessment list. They equally admit that the bad collections are often due to the laziness or incompetency or dishonesty of the collecting staff, but one very seldom finds them fining or otherwise punishing them. If not checked by a supervising authority, one would often find the establishments steadily increasing, and also the individual's pay, without any corresponding reason."

* * * * * * * *

70. Mr. Nolan, Commissioner of Rajshahi, says shortly:—

"My own opinion is that the municipalities worked well during the year. The people are much attached to the form of local government."

71. The following are the comments of Mr. Luttman-Johnson, Commissioner of Dacca:—

"Further experience confirms me in the view I expressed last year. Our municipal administration is not by any means perfect. We have been, I think, too ambitious. But some administration is better than none—than mere chaos. I think, so far as Eastern Bengal is concerned, the inhabitants of the tracts to which Act III (B.C.) of 1884 has been applied, * * * * * * have many advantages over the inhabitants of other tracts. For instance, if they want a well, they can, through their Municipal Board, get one dug. * * * * And on the whole I think the gentlemen, who are good enough to devote their time free of charge to the good of their neighbours by serving on Municipal Boards, perform the duties of their office in a manner, when all the circumstances are considered, highly creditable to them."

72. Mr. Waller, Officiating Commissioner of Chittagong, concludes his report with these words:—

"As remarked by Mr. Oldham, municipal self-government has not so far taken kindly to the soil of this division of Eastern Bengal. Comilla has retrograded, owing to the want of a dictator; while Chittagong is coming to the front under the guidance of a popular but self-reliant Chairman, who thinks less of rules and sanctions than of producing some desirable result. The Noakhali Commissioners have probably, under the influence of a Bengali District Officer, done something, but still, while they admit that the introduction of Part IX has become a necessity, have not, as the present Officiating District Officer expresses it, the courage of their convictions and default in their duty for fear of incurring unpopularity among the rate-payers. Perhaps it is hardly fair to expect them to undergo the risk of being boycotted, until public opinion among the people generally has begun to assimilate the idea that there is such a thing as duty, and that persons who honestly try to do it on principle should not be persecuted, but considered more worthy of honour."

73. The following is extracted from the report of Mr. Forbes, Commissioner of Patna:—

"During my inspection tours and in disposing of budget proposals, I have given as much time and attention as possible to municipal matters. There has, I consider, on the whole, during the past year, been a distinct improvement generally in municipal administration; although it is no doubt very true, as remarked by Mr. Marindin, that everything depends upon the energy with which the Chairman and Vice-Chairman throw themselves into the work and the lead they give in the right direction to their fellow-Commissioners. As a rule I have found that the Municipal Commissioners are ready to listen to advice and to support any proposals which they see to be just and proper and conceived in the public interests. As an example, I may instance the wisdom and good feeling shown by the Commissioners of the Patna Municipality in accepting my own and the District Magistrate's recommendation to appoint a salaried assessor, although when first mooted the proposal was not regarded with favour. The experiment has succeeded, and the propriety of the measure is, I believe, now recognized on all sides. In other municipalities in many various matters, such as conservancy, drainage, dispensary administration, the question of primary education, the supply of oil for the lanterns of the Municipal Police, the reduction of expenditure on establishments and the like, I have almost invariably found that the District Officers and myself have met with willing and effective support. The only municipalities which merit unfavourable notice in this regard are Darbhanga and Muzaffarpur, especially the former, as will be observed from the remarks in certain foregoing paragraphs of this report. In both cases, however, I have every hope that the Commissioners will, on reconsideration, listen to wiser counsels."

74. Mr. Toynbee, Officiating Commissioner of Bhagalpur, writes:—

"As I took charge of the Division only fifteen days before the close of the year under report, my remarks are based chiefly on those of the District Officers and on what I have seen of the municipal administration to date. The weakest points of it appear to be—(i) the neglect

of outdoor supervision, (ii) the want of some uniform plan of assessment, and (iii) laxity in making collections. There seems to be a tendency to an increase of establishments without a corresponding increase in their efficiency, and in the results of their work. It is not reasonable to expect that either an official or unofficial Chairman or Vice-Chairman can spend every morning out-of-doors looking after all the municipal arrangements. The best solution of the difficulty appears to be—where any municipality can afford it—to appoint a paid Secretary or Vice-Chairman, who is also something of an Engineer, and who would also look after collections. In the matter of assessment it is hoped that the new Municipal Act will provide a remedy for the present unsatisfactory state of affairs. For the execution of any real and lasting municipal improvements, such as drainage and water-works, the only feasible plan seems to be to raise loans, and it is to be regretted that Municipal Committees in general should hesitate to adopt this mode of raising the necessary funds, and of making the next generation pay for the advantages it will derive from such works. Monghyr is badly in need of a drainage scheme, but the Municipal Commissioners hesitate to incur the responsibility of raising the necessary funds. Speaking generally, it does not seem that municipal administration has made any real progress towards increased efficiency during the year under report."

75. Mr. Cooke, the Officiating Commissioner of Orissa, writes:—

"On the whole, the Act seems to have worked well in all the municipalities in the Division. In the case of the Cuttack Municipality I was not favourably impressed with the office work; the office appeared to be under-manned, and not to have any clerk of the requisite ability to deal with the affairs of a large office. On the other hand, I can compliment the Chairman, Dr. Zorab, on the state of the roads and drains, and on the manner in which, with the assistance of some of the Uriya Commissioners, he contrives to widen roads without recourse to the Land Acquisition Act."

76. Mr. Grimley, the Commissioner of Chota Nagpur, sums up the year's work with these remarks:—

"In a backward country like Chota Nagpur, municipal rule is an exotic of necessarily slow growth, and with alien administrators, mostly pleaders, mukhtears, petty traders or money-lenders, who have their own business to attend to, and who, by virtue of their occupation, are not brought into close sympathetic relations with the people, it was hardly to be expected that the rate of development would be otherwise than moderate. The rate-payers themselves do not appear to be much impressed by what is being done for them by the Municipal Commissioners, for in the few contested elections the paucity of voters shows how little they value the privilege of the franchise; they are not sufficiently advanced to understand the system, and the advantages it confers upon them, and in civic matters are wont to look for aid and protection to the Deputy Commissioner or Commissioner instead of gathering round the City Fathers as their natural guardians and protectors. But notwithstanding this lack of keen and stirring interest in municipal affairs, there has been a certain amount of progress—prominently in Daltonganj—thanks to the Chairman, Mr. Bright, and the business of the year has generally been conducted in a satisfactory manner, and without any unreasonable display of party feeling. There is still, however, room for improvement in some municipalities in various respects, such as road-making, conservancy arrangements, the extended application of funds to the requirements of primary education, and especially the punctual collection of the taxes. More outdoor supervision by the Commissioners themselves, or some one who can be trusted to exercise strict authority on their behalf, is also desirable. The subordinate establishments want constant overlooking to keep them up to the mark, and this is the kind of work which the Commissioners individually as a rule do not appreciate."

77. The Lieutenant-Governor has been impressed with the care and attention which mark the reports of the Divisional Commissioners on the municipal administration of the past year, and with the general sagacity of the remarks they have recorded: occasionally in the extracts quoted above and in the observations which occur in this Resolution, unfavourable comment has found a place, but it is never to be forgotten that those are the best friends of local government who most honestly indicate its failings. The results of this year's administration fully vindicate this principle: many of the suggestions made in previous resolutions have been cordially adopted; in places where medical expenditure was insufficient, it has been increased; a broader view has been taken of the duty of municipalities in respect of elementary education; something has been done towards improving drainage and water-supply; and increased activity has been shown in the preparation of schemes for the execution of these important reforms. It is likely that still greater progress would have been made along these lines had not the counsels

of the Commissioners been clouded by the shadow of impending elections; but when it is remembered that municipal business throughout the province is conducted by gentlemen who, with few exceptions, give gratuitously time and trouble which they can often ill spare, the Lieutenant-Governor recognises that a great measure of success has been attained, and that as a whole the Commissioners have deserved well of their fellow-countrymen. At the present moment a vista of still further usefulness opens before them. The amendments of the Municipal Act have been designed to improve their position, and the new body of Commissioners enter upon their period of office with larger opportunities and a fairer horizon than their predecessors. The Lieutenant-Governor repeats his aspiration that more general attention should be paid to the four cardinal requirements of a municipal population—water-supply, drainage, conservancy, and primary education; and that greater vigour should be thrown into the administration generally by the more punctual collection of municipal dues, by a closer observance of account rules and a more complete supervision of subordinates.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE FOREST ADMINISTRATION REPORT OF THE LOWER PROVINCES OF BENGAL FOR THE YEAR 1893-94.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 17th December 1894.

RESOLUTION.—No. 5671—For.

READ—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1893-94.

Read again—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1892-93, and Government Resolution thereon.

General.

This report is submitted by Mr. A. E. Wild, who joined the circle as Conservator of Forests on the 8th April 1894, and is the first embracing the new forest year from the 1st July to the 30th June. It was due on the 1st October, and reached the hands of Government on the 9th November 1894. The delay is attributed partly to the short acquaintance of the Conservator with the details of the working of the Circle, and partly to the fact that it was necessary for purposes of comparison to reduce many of the figures given in last year's report, which covered a period of 15 months, from the 1st April 1892 to the 30th June 1893, to an average of 12 months, or to prepare actuals. The report is tinged by criticism of the past administration of the department, and without wishing to discourage reform or to imply that forest administration in Bengal is not capable of much improvement, the Lieutenant-Governor regrets that the attitude adopted by Mr. Wild should have led in some instances to invidious prominence being given to mistakes of a trivial character, occurring in the time of his predecessor. It is necessary also to say that the report is twice the length prescribed in section 266 of the Forest Department Code, and somewhat technical and bewildering in its minute sub-division. On the other hand it is evident that much pains have been bestowed on its preparation, and it bears witness in several places to the attention which Mr. Wild is devoting to the careful scrutiny of forest statistics and accounts and the correct preparation of prescribed returns.

Extension and Constitution of Forests.

2. The following statement shows the areas of the several classes of State Forests at the close of the year:—

	At commencement of the year.	Added.	Excluded.	At close of the year.	Percentage—	
					Of total forest area.	Of the area of the provinces.
1	2	3	4	5	6	7
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Reserved	5,703	460	332	5,831	45	3·7
Protected	3,071	.....	12	3,059	24	1·9
Unclassed	4,034	1	1	4,034	31	2·6
Total ...	12,808	461	345	12,924	100	8·2

Reserved Forests.

3. The reservation of the Ramgarh-Sitakund Forests in the district of Chittagong added 133 square miles to the area of Reserved Forests, bringing the total to 5,831 square miles against 5,703 square miles at the beginning of the year, the net increase being reduced by recomputation to 128 square miles.

Protected and Unclassed State Forests.

4. The area of Protected Forests was reduced from 3,071 square miles at the commencement of the year to 3,059 square miles at its close, by the transfer of 12 square miles of land in the Sundarbans Forests to the Civil Department for purposes of cultivation. The areas of the Protected Forests in the districts of Chota Nagpur except Singhbhum are still unknown, and are not included in the foregoing figures. Since the close of the year all waste lands, the property of Government in the Sonthal Parganas, have been declared "Protected

Forests," and rules have been approved for their management, but the area thus brought under the Forest Act is again unknown. A small area of 363 acres in the Kurseong Division, acquired by the Public Works Department for the prevention of landslips at the Paglajhora on the Darjeeling-Himalayan Railway, and made over to the Forest Department for conservation, was added to the "Unclassed State of Forests," which cover 4,034 square miles, lying, with the exception of this addition, entirely in the Chittagong Hill Tracts.

Settlements.

5. In the present report the Conservator has eliminated from the total area shown in former reports as finally settled those areas not actually settled under the Forest Act, which it was customary to place in this category, because no detailed settlement of them under that Act was considered necessary. The area finally settled as shown in the present report is thus 2,827 square miles against 5,498 square miles in the previous report. This is possibly a more precise statement of the facts, but it must not be forgotten that much of the unsettled area has been Government Forest for so long that it is now unnecessary to apply to it the formal settlement procedure of the Forest Act. As regards the Forests of the Palamau Division, the Conservator appears to be mistaken in saying that they are not settled under the existing law. It was decided not to carry out a settlement under the Forest Act, because these forests are practically settled already under other laws. In the case of the Sunderbans Forests, which were reserved in 1879, there can be little question now of outstanding rights in them, and their settlement under the Act, which had been ordered, was therefore countermanded. In fine, if it is necessary to be precise, State Forests may for the present purpose be divided into three categories:—

1. Areas which do not require settlement under the Forest Act.
2. Areas finally settled under that Act.
3. Areas remaining to be settled.

It may be added, for the Conservator's future guidance, that an Annual Report is not the place in which to discuss such a question as whether a particular forest should or should not be brought under settlement.

6 Turning now to the actual work of the year, 667 square miles were in course of settlement at the beginning of the year, and 741 square miles were subsequently taken up. Out of the total of 1,408 square miles, 477 square miles were settled during the year including the Ramgarh-Sitakund Forest in Chittagong, all the unsettled Reserves of the Jalpaiguri Division, and most of those of the Buxa Division. The remainder includes other extensive forest areas in Chittagong aggregating 733 square miles, which it is proposed to reserve under the Act.

Survey.

7. No new survey work was done during the year by either the Survey Department or the Forest Survey Branch of the Government of India. Mr. Wild has made a praiseworthy attempt to prepare form No. 49, which illustrates the state of survey work in the circle, and the Lieutenant-Governor shares his hope that it may be found possible to prepare the statement with greater accuracy in future. It would appear that only 447 square miles of Reserved Forest in the Jalpaiguri and Buxa Forest Divisions, recently mapped by the Survey Department, have been specially surveyed with interior details, while 2,092 square miles of Reserved and 2,248 square miles of Protected Forest in the Sundarbans are included in ordinary District Surveys. Boundaries have been laid down by the Forest Survey Branch for 532 square miles of Reserved Forest in Singhbhum, and by local officers for 1,706 square miles of Reserved Forest and one square mile of Unclassed Forest. The total area which has not been surveyed in any way is 6,086 square miles, viz 1,242 of Reserved, 811 of Protected, and 4,033 square miles of Unclassed Forest.

Working Plans.

8. Some progress was made in this branch of forest administration. As in the previous year, there are 4,378* square miles of forests under regulated management and 1,822 square miles which do not require regular plans. Plans were in course of preparation during the year for 225 square miles, and there remain 2,465 square miles of Reserved and Protected Forests, and 4,034 square miles of Unclassed State Forests, for which Working Plans have still to be prepared.

* Excluding 12 square miles transferred from the Sundarbans Forests to the Civil Department.

Communications and buildings.

9. The expenditure incurred under this head during the year, as compared with the preceding 15 months, is shown in the table below extracted from the Conservator's Report :—

	Buildings.		Roads and Bridges.		Total.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
New construction	8,778	21,757	10,049	5,998	18,827	27,755
Repairs	9,675	10,435	3,721	6,885	13,396	17,320
Unapportioned	168	... ...	4,721	1,633	4,889	1,633
Total ...	18,621	32,192	18,491	14,516	37,112	46,708

The increased cost on buildings is chiefly due to the construction of the Forest office at Khulna, on which a sum of Rs. 9,080 was spent. Little progress was made in the construction of new roads, only 51 miles having been completed against 114 miles in the 15 months ending June 1895. This falling off is to be regretted, as the opening of communications is essential to the development of the forest revenue—a fact which is recognized in paragraph 72 of the report, which contains the following remarks :—"There is no doubt that although the extraction of forest produce is and may continue to be entirely in the hands of purchasers, still the want of communications is one of the great drawbacks the forests in Bengal have to contend with in the matter of disposal of the material they produce." The attention of the Conservator's is invited to the observations on this subject made in paragraph 9 of the Resolution recorded by Government last year.

Breaches of Forest Law.

10. The number of cases taken to Court was 126, against 175 in the previous 15 months (reducible to an average of 140 for 12 months), and convictions were obtained in 109 cases, or 86 per cent., against 88 per cent. The number of cases compounded under section 67 of the Indian Forest Act was 982 (involving 1,516 persons), and the amount of compensation received was Rs. 5,753, giving an average of Rs. 5-13-9 for each case and Rs. 3-12-9 for each person, against Rs. 1,179 (reducible to an average of 945 for 12 months) in the previous 15 months. There was a large increase in the number of such cases in the Tista Division, attributed to the practice of rewarding informers. A considerable decrease in the Sundarbans Division is ascribed to a better observance of the law.

Forest fires.

11. Protective measures against fire were adopted in 1,871 square miles, or 32 per cent. of the total area of Reserved Forests in the Circle, against 1,889 square miles specially protected in the preceding year.

The most important event of the year was the failure of these protective measures. The total area burnt amounted to 689 square miles, or 37 per cent. of the area protected, against 17 square miles, or one per cent. in the previous year. This unfortunate result, which the Conservator describes as abnormal and unprecedented, is not to be ascribed solely to want of success in the Singhbhum Division. Large areas were burnt in Palamau and Angul, and almost every Division contributes something to the general failure.

The following remarks are taken from the Conservator's report :—

"A little consideration of the above figures, aided with the statement given in Appendix B, showing the results of fire protection for the last 18 years, will show what little effect special measures have so far attained, and that from a practical point of view we are yet almost entirely at the mercy of the seasons. Moral persuasion and the power of the law seem, however, to have been but little used, and it is hoped, when the incalculable amount of damage such disastrous fires must do is fully realized by the district authorities, that with their help and in such degree as energy and determination is shown by them, coupled with a firm administration of the law, success in our endeavours will be ensured, and the amelioration of the evil attained. Fire-protection is essentially a measure in which the cordial co-operation and aid of District Officers must be enlisted. Without the influence such officers can and ought to bring to bear on the surrounding ignorant population, the expenditure

of lakhs of rupees on the part of the Forest Officers in special protective measures must remain as futile as previous records show it to have done. It is not sufficient to preserve a forest from fire for one year; to be of real use the protection must be permanent, and that we cannot relax our attention, it must be remembered that in a few hours the work, care, and expense of years may all be lost.

"The importance and magnitude of the matter are clearly evident when it is realized that during the last 18 years no less a sum than Rs. 2,07,749 has been spent on the safeguarding of 1,889 square miles of forest, with the result that in the eighteenth year no less than 689 square miles of this area has been burnt."

In regard to Singhbhum the Conservator observes:—

"In Singhbhum, where the whole area of the reserved forests, 732 square miles, was attempted to be protected, the disasters of the year were by far the heaviest; in spite of an expenditure of Rs. 1,535 or Rs. 2 per square mile on 869 miles of fire-paths, and the employment of 72 special watchers, no less than 86 per cent., or 629 square miles of the area taken in hand, was burnt as against 8 acres last year. There seems no doubt that this misfortune was due to the lawlessness of the surrounding population, which, seizing the opportunity of, it cannot but be thought, a lax establishment and of a most unusual dry season, and so a most favourable one to it, appears to have carried out its wilful designs without hindrance in a most thorough, but to us most ruinous, manner, for no more reason than that it should thereby obtain ample employment in the collecting of a more abundant crop of sabai grass. Not a single arrest has been made, and the damage sustained by Government has gone without the slightest punishment; nor does it seem that the aid of the district authorities was invoked or given, except in the distribution, at the beginning of the season, of notices which have been mere waste paper. The Divisional Officer, Mr. Chester, was, however, in very bad health, and not equal to his duties, though he had the help of two assistants."

The Lieutenant-Governor is surprised to learn that in Singhbhum no effectual attempt was made to check this enormous waste. Even if his aid was not invoked, the Deputy Commissioner should have brought offenders to justice if they could be identified, or failing that, he should have adopted other measures for the control of the population. His Honour observes that the Conservator has taken steps to keep himself informed of the occurrence of such cases and in view of the gravity of the circumstances disclosed, His Honour desires that until further orders a special report may be submitted to Government concerning every serious fire in a State Forest, as it occurs, showing how it originated and what measures were taken to punish the offenders. His Honour also approves of the Conservator's order that in respect of offences by fire compensation should not be accepted under section 67 of the Forest Act.

Gross yield and outturn of forest produce.

12. The outturn of timber from all sources exceeded 47 lakhs of cubic feet and that of fuel 133 lakhs of cubic feet, while 171 lakhs of bamboos, and minor produce other than bamboos to the value of Rs. 1,22,990 complete the tale of the produce of the Bengal forests during the year. Reducing the figures for the 15 months covered by the report for 1892-93 to an average for 12 months, the corresponding quantities for the previous year are for timber nearly 65 lakhs, for fuel 117½ lakhs, for bamboos 141½ lakhs, and for other minor produce Rs. 98,565. The foregoing figures exclude the estimate made of the consumption of forest produce by the Government raiyats in the Khurda Estate, which is a mere guess. Of the total outturn, departmental operations accounted for only 81,133 cubic feet of timber, 69,052 cubic feet of fuel, and 8,584 bamboos, while 46 lakhs of cubic feet of timber, 132 lakhs of cubic feet of fuel, and 171 lakhs of bamboos were removed by purchasers.

Mica.

13. Among the items included under the head "Minor produce other than bamboos" is mica, regarding which the Conservator writes:—

"The Hazaribagh mica mines, chiefly situated in the reserved and protected forests of that district, form the principal source of supply for the export trade. In 1890 the mines of the Hazaribagh district employed 11,163 persons during the working season, or an average of 1,819 persons daily, and gave an outturn of 4,020 maunds valued at Rs. 1,07,146. The majority of the mines are worked by Messrs. Christian and Company, under leases granted by the Deputy Commissioner of Hazaribagh, at an aggregate rental credited to the Forest Department of Rs 9,692. They cover a total area of 22·57 acres, the total output for the year under report being estimated at 2,710 maunds, the revenue realized amounting to Rs. 8,029."

It may be observed that the so-called mica mines are not under the control of the Forest Department, and that mica would not ordinarily be regarded as a forest product if the Government of India had not directed that it should be so classed.

14. The receipts for the forest year amounted to Rs. 7,73,096 against a expenditure of Rs. 3,98,389, leaving a balance of Rs. 3,74,707, and compare with those of the preceding five years thus:—

Financial Results.

Year (Financial).	Receipts. Rs.	Charges. Rs.	Surplus. Rs.
1888-89	6,76,907	3,75,471	3,01,436
1889-90	7,68,718	3,90,265	3,78,453
1890-91	7,27,392	4,14,005	3,13,387
1891-92	7,89,553	4,22,930	3,66,623
1892-93	7,44,882	3,81,608	3,63,274
1893-94	8,01,611	4,04,043	3,97,568

The revenue and surplus are the highest on record since the formation of the Department.

15. The following table shows the results in each division for the past two financial years:—

Divisions.	Receipts.		Charges.		Surplus.		Deficit.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Darjeeling	68,384	60,487	50,942	55,043	17,442	5,444	.....	.....
Tista	19,905	13,643	23,632	23,369	.....	.....	3,727	9,726
Kurseong	19,706	18,456	21,039	21,719	.....	.....	1,333	3,313
Jalpaiguri	29,189	40,185	21,049	25,705	.....	14,480	480	.....
Buxa	12,556	10,185	23,295	23,165	.....	.....	10,739	12,980
Direction	16,176	13,436	40,324	42,901	.....	.....	24,148	29,245
Palamau	1,134	2,318	10,808	9,637	.....	.....	9,674	7,319
Singhbhum	35,354	28,638	32,791	43,115	2,563	.....	.....	14,482
Angul	2,771	4,741	9,941	12,176	.....	.....	7,170	7,435
Puri	15,528	20,953	13,294	18,795	2,234	7,158	.....	.....
Sundarbans	4,35,368	4,91,163	89,987	1,06,156	3,45,381	3,85,007	.....	.....
Chittagong	88,798	97,261	35,900	27,262	52,898	69,999	.....	.....
Kusi Drift	13	.....	.....	.....	13	.....	.....	.....
Total ...	7,44,882	8,01,611	3,81,608	4,04,043	4,20,525	4,82,088	57,251	84,520
Net surplus ...	.....	.....	.....	.....	3,63,274	3,97,568	.....	.....

With reference to the preceding table, the Conservator observes that the Sunderbans and Chittagong Divisions have mainly contributed to the success of the year, while the remaining Divisions, with the exception of Darjeeling and Puri, which did little more than pay their way, were worked at a loss. It is apparent, therefore, that the most profitable Divisions were those in which least has been done by the Department to improve the resources of nature and in which those resources were the largest. The forests of Darjeeling, which have a considerable demand for fuel to supply, should prove more remunerative.

16. The Circle was in charge of Mr. E. G. Chester from the 1st to the 13th July 1893, during the absence on privilege leave of Mr. E. P. Dansey. The latter held charge from the 14th July 1893 to the 22nd February 1894, when he proceeded on 8 months' furlough and was succeeded temporarily by Mr. Davis. Mr. Wild, the present Conservator, took charge on the 8th April 1894. The tours made by these officers covered a period of 158 days, during which seven Divisional Offices were inspected. In the previous 15 months the Conservator was on tour for 293 days.

Miscellaneous.

The Lieutenant-Governor regrets that so many changes should have been necessary in the *personnel* of the officers in charge of the different Forest Divisions. Only four Divisions were under the same officer throughout the year, and in Chittagong no less than six officers held successive charge. As the Conservator observes, constant changes of this nature are detrimental to good work. But in a service numerically weak, the members of which are liable to be incapacitated by ill-health, it is difficult to avoid them. The Conservator writes:—

"Out of a Controlling Staff of 15 Deputy and Assistant Conservators and 7 Extra Assistant Conservators,—22 officers,—by no means excessive, even when all are effective, one Extra Assistant Conservatorship was unfilled, one Deputy Conservator was away for the whole year and one Assistant for eleven months, while six others were absent for periods of two to three months; one death during the yearha salso again to be recorded."

17. In conclusion the Lieutenant-Governor desires to thank Mr. Wild for the evident zeal with which he has entered upon his duties as Conservator of this Circle.

Order.—Ordered that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending 17th December 1894.

Burdwan.—Rainfall nil. Weather seasonable. Harvesting of *aman* rice continues. *Rabi* crops doing well. Price of common rice 10 to 19 seers per rupee in the district. Fodder and water sufficient. Condition of cattle satisfactory.

Midnapore.—Rainfall nil. Winter rice being reaped. *Rabi* sown. Sugarcane good. Outlook bright. Price of common rice 14 to 21 seers per rupee. Water and fodder abundant.

24-Parganas.—Rainfall nil. Weather seasonable, but cloudy in the latter part of the week. Prospects of crops good. Harvesting of *aman* going on. *Rabi* crops progressing well. Rice sells at—

	Srs.	
Sadar	11 to 13	per rupee.
Barasat	15	
Basirhat	14½	
Diamond-Harbour	16	

Condition of cattle good. Fodder and water sufficient.

Murshidabad.—Rainfall nil. Weather dry and cool. Harvesting of *aman* continues. Sowing of *rabi* crops finished. Indigo, mulberry and sugarcane doing well. Common rice sells at 14 seers per rupee. Fodder and water sufficient.

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* going on. Prospects of crops good. Cultivation of *rabi* still continues. Common rice sells at from 14 to 18 seers per rupee. Fodder and water sufficient.

Dinajpur.—Rainfall nil. State and prospects of crops good. Price of common rice 13 to 14 seers per rupee. No outbreak of any disease among the cattle, nor any complaint for fodder and water.

Rangpur.—Rainfall nil. Weather seasonable. Prospects of *aman* good. It is being reaped. Sowing of mustard and potato nearly finished, and transplanting of tobacco going on. Common rice 9 to 17 seers per rupee.

Pabna.—Rainfall nil. Weather clear and cool. Prospects of standing crops good Harvesting of *aman* rice continues. Common rice sells at 13 seers per rupee. Fodder and water-supply sufficient.

Dacca.—Rainfall nil. Harvesting of *aman* continues; prospects good. *Rabi* crops thriving, but recent rain has done some damage to them. Price of common rice 12 to 18 seers per rupee. Fodder available. No cattle-disease.

Chittagong.—Rainfall 1·44. Weather variable, being latterly cloudy and rainy. Reaping of *aman* continues, but crops somewhat damaged by rain. *Rabi* cultivation in progress. Prices have slightly risen. Water and fodder sufficient.

Patna.—Rainfall nil. Paddy still being harvested. Threshing has commenced in most villages. *Rabi* and poppy sowings approaching completion. Rice selling at—

Sadar		18	per rupee.
Barh	(Old) ...	13	
	(New) ...	18	
Dinapore		11 to 14½	
Bihar		20½	

Gaya.—Rainfall nil. Weather seasonable. Harvesting of paddy, pressing of sugarcane, irrigation of *rabi* and weeding of poppy fields continue. Prices about normal. Fodder and water sufficient.

Champaran.—Rainfall nil. Weather cool with foggy mornings. Paddy harvest progressing. Weeding of *rabi* commenced. Poppy seedlings germinating. Prospects fair. Common rice selling at 18 seers per rupee. Fodder and water-supply sufficient.

Darbhanga.—Report not received.

Bhagalpur.—Rainfall nil. Weather seasonable. *Rabi* sowings completed; prospects good. Harvesting of paddy in progress; outturn satisfactory.

Purnea.—Rainfall nil. Harvesting of *aghani* going on. Prospects of *rabi* promising. Common rice 15 to 20 seers per rupee. No cattle-disease.

Cuttack.—Report not received.

Hazaribagh.—Rainfall nil. Weather cold and fair. Poppy doing well. Prospects of *rabi* crops good. Common rice selling from 15 to 25 seers per rupee.

General Summary.—Little rain fell during the week except in parts of East Bengal, where it is reported to have done some injury to the crops. In other respects agricultural prospects continue favourable. The harvesting of winter rice is in progress, and a satisfactory outturn is expected. *Rabi* crops and poppy are nearly all sown, and the young plants are doing well. Sugarcane and other standing crops are promising. No cattle-disease is reported. The price of common rice continues generally normal.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT;
The 18th December 1894.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

The total fall from 1st January to 15th December 1894	48·66
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·52

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; ≡ fog; o, overcast; g, gloomy.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period fo
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10.
mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in que
stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

the week ending Saturday, the 15th of December 1894.

N.B.—The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater.
The observing cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head District observations of rainfall the normal for the past ten years. The means of the district are the numerical average of the rainfall returned received in the district, i.e., from total rainfall at the subdivisional

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are nting the correspondi g spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0 inch of rain has fallen.

CALCUTTA, *the 18th December* 1894.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 15TH OF DECEMBER 1894.

THE cold wave of dry air following in the rear of a barometric depression had reached Bengal at the end of the last week, and hence conditions were of fairly strongly pronounced cold weather character. At the commencement of the present week, therefore, on the 9th instant, pressure was rising moderately in Bengal, and was in considerable excess, while a steady dry northerly wind current was giving decidedly low temperature and humidity, and these were also steadily decreasing, while the sky was almost cloudless, and rainfall was absent except perhaps in the hills. On the 9th, however, the first indications of a new barometric depression approaching Lower Sind were shown. On the 10th the changes were of little importance in Bengal, but the depression had advanced from Lower Sind into Rajputana, and the centre was near Ajmere. On the 11th the depression had advanced in an east-south-easterly direction, and was near Sutna, while a secondary depression of moderate depth had formed in the North-West Punjab, so that weather was very disturbed over North-Western India. Conditions in Bengal also began to show the effects of this disturbance, and pressure fell briskly over the province, the fall at some stations equalling more than a tenth of an inch, while temperature and humidity began to increase briskly. On the 12th the two depressions in North-Western India began to fill up, or pass away in an easterly direction, and pressure fell moderately over West and South-West Bengal. The temperature and humidity changes on this day were variable, but cloud proportion increased largely in Bengal. On the 13th the low pressure over Bengal began to fill up slowly, though the pressure was still in considerable defect over the province generally. Temperature had increased rapidly, and humidity and cloud proportion remained high. On the 14th the increase of pressure continued briskly at the great majority of stations, and pressure became in slight excess except over Orissa, where pressure was still decidedly low. Temperature also continued high and was usually in excess by from about 2° to 3°. Skies were moderately clouded, and humidity was very high, and a few local showers were reported at the eastern stations. On the 15th, or the last day of the week, pressure had fallen generally at the central and eastern stations, and again weather continued disturbed and showers were rather numerous at the eastern stations. The sky also continued moderately clouded, and humidity was very high, while temperature had increased, and the mean for the day had become in excess at many stations by more than 5°.

Pressure.—The mean pressure for the week, notwithstanding the influence of the depression and disturbed weather, has been nearly normal, for the variations at different parts of the week have been of almost opposite character. Indeed about twenty stations report slightly defective pressure for the week, and almost the same number slight excess pressure. The variations do not, however, average more than 0·01 inch; hence the pressure for the province has been practically normal.

Temperature.—The mean temperature of the province for the week has been 0·5° above the normal, the excess having been largest in North Bengal and Bihar. This excess has to a great extent been brought about by high night or minimum temperatures, for the day temperatures have been usually in defect.

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperatures, which have been generally in defect by about 1° or 2°, while on the other hand the night or minimum temperatures have in most cases been rather largely in excess, the average excess at such stations as Cuttack, Patna, Gaya, Purnea and Darjeeling equalling about 3° or 4°.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 15th of December 1894.

	Normal mean maximum temperature for the week ending 15th December.	Actual mean maximum temperature for the week ending 15th December 1894.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 15th December.	Actual mean minimum temperature for the week ending 15th December 1894.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 15th December.	Actual mean daily temperature for the week ending 15th December 1894.	Variation of actual mean from the normal.

FINAL REPORT ON THE BHADOI CROPS IN BENGAL, 1894.

The following is published for general information.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

REVENUE DEPT.,
The 21st December 1894.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Bhadoi Crops in Bengal, 1894.

Explanatory.—The classification of crops adopted in this report differs from that given in the final report of the *bhadoi* crops in Bengal, 1893. The change has already been explained in the first forecast of this year's *bhadoi* crops, which was published on the 24th September 1894. The present report furnishes a review of all the *bhadoi* or rainy season crops grown in these Provinces. These may be considered under the two heads—*bhadoi* food crops and *bhadoi* non-food crops. Of the former, the most important are *bhadoi* paddy, Indian corn, and millets. The cultivation of *bhadoi* paddy prevails chiefly in Bengal proper and Orissa, and that of Indian corn and millets in Bihar and Chota Nagpur. Among *bhadoi* non-food crops, the most important are jute, indigo, and cotton. No separate figures have been furnished for jute and cotton in the present return, as special reports are published by this Department on these crops.

2. *Character of the season.*—The character of the season up to the middle of September last was described in the summary of the district returns given in the preliminary forecast of the *bhadoi* crops issued last September. Up to that time, the rainfall was on the whole favourable, though in some parts slightly deficient. A slight contraction was estimated in the area sown this year as compared with the corresponding area of 1893; but it appears from the revised estimates now furnished by District Officers, that there has been in fact a slight increase. It would thus appear, that the want of rain at the time of sowing, referred to in the preliminary report, did not appreciably affect the area cultivated with *bhadoi* crops, and it is probable that the area brought under *bhadoi* cultivation this season is much the same as that of last year.

In the preliminary forecast of September, the prospects of the crop were reported to be good. From the returns now received from District Officers, it appears that the prospects were not overrated. On comparing the present returns with the preliminary estimates, it will be seen that better yields have been reported for 14 districts; for 29 districts, the previous estimates have been repeated, while for two districts only (Murshidabad and Hazaribagh) is the outturn less than was anticipated.

3. *Area cultivated.*—The district estimates of the area cultivated with *bhadoi* crops in the current and last year, as reported in the preliminary forecast, remain unaltered with a few minor exceptions. The total area sown this year would appear from the appended returns to be 15,682,100 acres against 15,587,600 acres estimated to have been cultivated last year. The same returns show that the *bhadoi* food crops of the current year occupy about 77 per cent. of the total *bhadoi* area, the *bhadoi* non-food crops about 23 per cent., and *bhadoi paddy* about 46 per cent. These percentages differ slightly from those shown in the first forecast; the difference is due to a revision of estimates by District Officers.

4. *Character of the crop.*—On reference to the statement attached to the report, it will be seen that out of the 45 districts of these Provinces, seven districts report a full average (16 annas) or more than a full average crop; 26 others report the crop as varying from 12 to less than 16 annas, and 11 as varying from 8 to less than 12 annas. There is only one district, viz. Manbhum, where the crop is reported to be less than 8 annas. The Deputy Commissioner of this district reports an excessive rainfall and want of clear weather. On comparing the district estimates of outturn this year with those for 1893, it will appear that 33 districts report the crop to be better than the crop of 1893, four districts report it to be equal, and eight report it to be worse. The general yield of *bhadoi* crops is thus considerably better than that of last year. In the preliminary forecast, the outturn was estimated at 15 annas; this figure has certainly been reached, and the crop may be considered as about an average one.

N. N. BANERJEI.

Assistant Director of the Dept. of Land Records and Agriculture, Bengal.

Countersinged.

R. NATHAN.

For Director of the Dept. of Land Records and Agriculture, Bengal.

The 11th December 1894.

Final Report on the Bhadoi Crops of Bengal, 1894.

District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi crops.*	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year under each specified bhadoi crop* in acres.	Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan ...	1,726,080	1,283,800	*Bhadoi* paddy ...	173,700	171,500	172,700	12½	13½	Owing to sufficient rain this year, there has been a good outturn of *bhadoi* crops in the Sadar, Katwa, and Raniganj subdivisions. In the Kalna subdivision, a 16-anna outturn of *bhadoi* paddy was expected, but about 12½ per cent. of the crop sown was submerged by flood. In the Katwa subdivision, heavy rainfall, just before the harvesting season with floods in the Bhagirathi and Adjai, affected the outturn to a certain extent.	
			Indian corn (maize) ...	3,000	3,000	3,000	14	14		
			Other cereals and pulses.	8,100	7,400	7,700	13½	13½

							Annas.	Annas.		
Bankura ...	1,677,440	642,800	*Bhadoi* paddy	44,300	41,300	43,200	} 16	14	Owing to scanty rainfall in March, April, and May, and excessive rainfall in subsequent months, the outturn has been injured.	
			Indian corn (maize) ...	300	300	300		11		
			Other cereals and pulses.	5,000	5,000	3,000		12		
			Other food-crops (*e.g.*, vegetables).	500	500	300	16	13		
			Indigo	2,800	2,800	2,700		12½		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	3,900	3,900	3,600		12		
			Total ...	56,900	53,940	53,100	16	13		
Midnapore ...	3,292,800	2,111,500	*Bhadoi* paddy	343,800	100,800	110,200	11	11	The explanations given in the preliminary forecast hold good in this case.	
			Bajra		6,000	6,000	.....	14		
			Mandua		1,800	1,800	.....	14		
			Indian corn (maize) ...		24,000	21,000	12	14		
			Other cereals and pulses.		9,460	45,400	9	10		
			Other food-crops (*e.g.*, vegetables).		8,700	23,500	10	11½		
			Indigo		35,300	40,600	10	11		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.		47,800	43,200	10	11		
			Total ...	343,800	233,800	294,700	11	12		

Rajshahi ...	1,539,952	1,085,900	*Bhadoi* paddy	105,500	104,200	104,800	13½	13½	The outturn, as it was expected in the preliminary forecast, is better than that of last year, owing to a comparatively favourable distribution of rain at the time of sowing. Had the favourable weather continued till the end, a 16 anna crop might have been expected in all cases. The cultivation was not like the previous year stopped by the heavy fall of rain at the time of sowing; hence the area sown this year shows a little increase.
			Other food-crops (*e.g.*, vegetables).	1,600	1,600	1,600	10	13	
			Indigo	9,600	9,600	9,000	14	14	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	111,900	104,500	109,500	12½	13½	
			Total ...	228,600	219,900	224,900	13	15	
Dinajpur ...	2,634,880	1,745,000	*Bhadoi* paddy	128,000	128,000	128,000	18	9	There was no alteration in the weather conditions noted in the first forecast.
			Jowar	7,000	7,000	7,600	.....	18	
			Mandua	7,000	7,000	7,000	.....	10	
			Indigo	100	100	100	.....	10	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	99,500	106,500	107,600	16	12	
			Total ...	241 600	248,600	249,700	17	12	
Jalpaiguri ...	1,895,881	983,200	*Bhadoi* paddy	182,700	191,400	186,100	14	13	The decrease in the outturn is due to want of rain in some parts and to excessive rain in other parts of the district. In the preliminary forecast, the areas under cotton were not included under those for non-food-crops. They are now included.
			Indian corn (maize)...	2,000	1,000	2,000	10	10	
			Other cereals and pulses.	4,500	1,500	4,500	10	11	
			Other food-crops (*e.g.*, vegetables).	5,200	.....	5,200	...	11	
			Other non-food-crops, including jute and cotton, as shown in the special forecast.	85,900	83,700	86,100	13	13	
			Total ...	284,300	277,600	283,900	12	12	
Darjeeling ...	744,960	189,400	*Bhadoi* paddy	32,300	32,500	32,500	14	13	Want of seasonable rainfall accounts for the decrease in outturn this year.
			Mandua	7,700	5,300	5,300	14	14	
			Indian corn (maize)	17,700	22,200	22,200	15	14

Estimated area *this year under each specified bhadoi crop* in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Rangpur ...	2,231,040	1,602,700	*Bhadoi* paddy ...	275,400	285,100	275,400	16	15	Owing to insufficient rainfall, the outturn is below the average. The estimate in the preliminary forecast was much below the mark.	
			Indian corn (maize) ...	100	100	100	16	16		
			Other cereals and pulses.	91,000	91,200	91,000	13	12		
			Other food-crops (*e.g.*, vegetables).	23,700	23,700	23,700	12	12		
			Indigo ...	7,700	6,600	6,600	16	14		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	286,300	295,300	235,300	13½	14		
			Total ...	684,200	702,000	632,100	14½	13½		
Bogra ...	929,000	421,000	*Bhadoi* paddy ...	140,000	175,000	105,000	10	8	The decrease in the area sown this year is due to insufficient rainfall at the time of sowing; the decrease in the outturn is due to the damage done to the plants by the continued drought which immediately followed the sowing. The scanty rainfall of June and July did not allow the plants to grow healthy, but subsequent showers, however, especially those that fell during the month of August, greatly benefited the lowland plants.	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	76,000	75,000	75,000	12	14		
			Total ...	216,000	250,000	180,000	14½	10½		

Hooghly ...	1,066,050	702,300	*Bhadoi* paddy ...	92,300	50,300	51,500	11	11	The outturn will be the same as was shown in the preliminary forecast. It might have been higher had not the recent heavy rains damaged the crops. In the Howrah Sub-division, the area cultivated this year is less than that of last year, owing to insufficient rainfall at the time of sowing, but the outturn is better and is due to subsequent rainfall.	The Collector remarks that his impression is that Sub-divisional Officers have shown the maximum area cultivated last year as the normal, while in fact the area cultivated this year is probably quite normal. He is making an enquiry on the subject.

							Annas.	Annas.		
Jessore ...	1,872,000	1,116,500	*Bhadoi* paddy	314,500	280,000	314,100	10	17	The difference in the areas under "other food-crops" and "other non-food-crops" between this and the preliminary forecast is due to inclusion of lands erroneously excluded in the first instance. The area under indigo has slightly fallen below last year's owing to the closure of a few factories in Magura. The outturn is better than last year's, but worse than normal, owing to incessant rainfall at the manufacturing season. The increase in the outturn of paddy is due to seasonable rainfall.	
			Other cereals and pulses.	9,100	6,500	8,800	10	13		
			Other food-crops (*e.g.*, vegetables).	18,800	15,200	16,800	7	15		
			Indigo	17,800	16,900	16,800	4	10		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	48,500	35,100	39,500	7	15		
			Total ...	408,700	354,000	396,000	9½	16		
Khulna ...	3,103,942, including 317,440 acres of land on account of boundary khals and rivers in Sundarbans.	870,000	*Bhadoi* paddy ...	56,400	48,500	52,600	8	17	The better outturn of the crop is due to seasonable and well distributed rainfall this year.	
			Other cereals and pulses.	3,200	3,200	3,200	12	16		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	29,800	28,600	24,800	9	15		
			Total ...	89,400	80,300	80,600	8½	16		

Pabna	1,176,960	882,500	*Bhadoi* paddy	125,300	123,500	124,000	10	11	There is nothing to add to the remarks made before in the preliminary forecast of *bhadoi crops*.
			Other cereals and pulses.	20,400	18,400	18,400	8	9	
			Other food-crops (*e.g.*, vegetables).	102,000	108,800	108,800	9	10	
			Indigo	100	100	100	4	12	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	212,800	226,100	203,100	12	14	
			Total ...	460,500	476,900	454,400	10½	11	
Dacca	1,790,080	997,700	*Bhadoi* paddy	174,900	162,500	165,500	7½	15½	As explained in the preliminary forecast, the decrease in the area of other cereals and pulses is owing to increase in area under paddy, other food-crops and jute. Owing to timely and sufficient rainfall, and also to floods having risen slowly till August, the outturn was better than last year's.
			Other cereals and pulses.	1,000	500	300	6	9	
			Other food-crops (*e.g.*, vegetables).	62,700	37,200	43,300	11	12	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	219,300	208,700	211,200	9½	14	
			Total ...	457,900	408,900	420,300	9	14½	
Mymensingh ...	4,052,480	2,465,700	*Bhadoi* paddy ...	360,400	353,600	353,600	12	15	This year's outturn will be better than last year's, owing to the better distribution of rain. The cultivation of jute increased owing to the favourable weather.
			Other cereals and pulses.	58,900	58,900	58,900			
			Other food-crops (*e.g.*, vegetables).	41,500	36,500	36,500			
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	572,300	514,900	560,600			
			Total ...	1,033,100	963,900	1,009,600	12	15

REGULATIONS FOR 1895 OF THE FOREST SERVICE BRANCH IN COOPER'S HILL COLLEGE.

No. 5781For.

THE following is published for general information.

REVENUE DEPT., FOREST,
The 24th December, 1894.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

Circular No. 29 F.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests), dated Calcutta, the 7th December 1894.

READ the following extract from a despatch from Her Majesty's Secretary of State, forwarding copies of the Regulations for 1895 of the Forest Service Branch in Cooper's Hill College:—

No. 136 (Revenue), dated London, the 20th September 1894.

From—THE RIGHT HON'BLE H. H. FOWLER, *Her Majesty's Secretary of State for India,*

To—His Excellency the Right Hon'ble the Governor General of India in Council.

I FORWARD, herewith, for the information of Your Excellency's Government, ten copies of the Regulations for admission to the Forest Service Branch at Cooper's Hill College for the year 1895.

* * * * *

Regulations for the Forest Service Branch of the Royal Indian Engineering College Cooper's Hill, for 1895.

[*Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.*]

STAFF OF THE COLLEGE.*

President, General Sir ALEXANDER TAYLOR, G.C.B., R.E.
Secretary, Lieutenant-Colonel W. J. BOYES.
Bursar, J. P. PASCO, Esq., R.N. (retired).
Chaplain, Rev. C. CROSLEGH, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. HEATH, Esq., Assoc. Mem. Inst. C.E.
Professor of Surveying, Major-General E. H. COURTNEY, R.E.
Instructor in Geometrical Drawing, ARTHUR HICKS, Esq.
Lecturer in Accounts, J. C. HURST, Esq.
Instructor in Freehand Drawing, RUSSELL DOWSON, Esq.

Mathematical Branch.

Professor of Applied Mathematics, G. M. MINCHIN, Esq., M.A.
Professor of Pure Mathematics, A. LODGE, Esq., M.A., Fereday Fellow of St. John's College, Oxon.

Natural Science Branch.

Professor of Chemistry, HERBERT MCLEOD, Esq., F.R.S.
Professor of Physics, W. N. STOCKER, Esq., M.A., Fellow of Brasenose College, Oxon.
Lecturer in Geology and Mineralogy, Professor H. G. SEELEY, F.R.S.

Forestry Branch.

Principal Professor of Forestry, W. SCHLICH, Esq., Ph.D., C.I.E., late Inspector-General of Forests to the Government of India.
Assistant Professor of Forestry, W. R. FISHER, Esq., B.A., late Conservator of Forests, Northern India.
Professor of Botany, H. MARSHALL WARD, Esq., M.A., S.D., F.R.S., F.L.S., Fellow of Christ's College, Cambridge.
Lecturer on Entomology, W. F. H. BLANDFORD, Esq., M.A., Fellow of Christ's College, Cambridge.
Lecturer on Chemistry of Soils and Vegetation, A. H. CHURCH, Esq., M.A., F.R.S.
Instructor in German, T. H. DITTEL, Esq.
Lecturer on Forest Law, B. H. BADEN POWELL, Esq., C. I. E., late of the Indian Civil Service.
Director of Practical Study in Forestry on the Continent, Sir DIETRICH BRANDIS, K.C.I.E., Ph.D., F.R.S., late Inspector-General of Forests to the Government of India.†

* The staff of the College is only given in so far as it concerns the Forest Branch.
† Sir D. Brandis is not on the staff of the College.

[*The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.*]

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. The examination usually takes place towards the end of June, and candidates may undergo the written part of their examination in London, Edinburgh, or Dublin, or at any of the provincial centres at which the simultaneous examination of candidates for admission to the Royal Military College, Sandhurst, is to be held. A list of the probable centres may be obtained from the Civil Service Commissioners at any time after March 1895. The oral and practical parts of the examination will be held in London only.

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India; the figures as regards each particular year will be advertised from time to time. *In 1895 there will be six appointments offered for competition. It is possible that after 1895 recruits for the Indian Forest Service will be selected from Cooper's Hill College students at the end of their first year's course of study.*

4. Candidates for the Indian Forest Department are selected under the following arrangements:—

(*a*) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India, he will forfeit his appointment.

(*b*) An applicant must send * to the Revenue Department of the India Office, on or before the 15th day of May of the year in which he proposes to compete:—

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct during the last four years.

(*c*) Applicants will have to appear before a Medical Board † at the India Office, particular stress being laid upon good vision and hearing. A physical test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance.

(*d*) The applicants who have sucessfully passed the medical examination and the physical test, will be required to undergo an examination before the Civil Service Commissioners** in the following subjects†† (Classes I to III), marks being assigned as follows:—

CLASS I.—OBLIGATORY SUBJECTS.‡

	Marks.	
1. Mathematics (lower), *viz.* Algebra up to and including the Binomial Theorem; the theory and the use of logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the solution of Triangles; and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2. English composition	1,000	
3. German (400 for colloquial)	2,000	

* There is no form of application; the documents specified in clauses (1) and (2) should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London.

† With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:—

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11 New Burlington Street.

** A fee of 2*l.* is required from candidates at the written examination in London, and 3*l.* from candidates examined elsewhere. Candidates examined at a college or school will probably be required to pay a local fee (in order to defray the expenses of superintendence), as to which they should obtain early information from the college or school authorities. The fee payable to the Civil Service Commissioners must be paid by means of stamps of the specified amount. Instructions on this point will be issued to candidates about ten days before the examination.

†† Reprints of the papers set at previous examinations, together with tables of the marks assigned to the candidates, are published by the Civil Service Commissioners, and can be obtained through any bookseller. The price of each reprint is one shilling.

‡ Attention is invited to the appended Syllabus, giving further details regarding the extent and character of the

	Marks.	
Class II.—Optional Subjects.		
4. Mathematics (higher), including Analytical Geometry, Conic Sections, Statics, and Dynamics	2,000	A candidate may take any two, but not more than two, of the optional subjects. Under "Optional Subjects" Nos. 9, 10, 11, and 12, the examination will be partly practical.
5. French (400 for colloquial)	2,000	
6. Latin	2,000	
7. Greek	2,000	
8. English History. There will be set: one general paper; one paper limited to a fixed period, which will be from the year 1760 to the year 1815 for the examination of 1895	2,000	
9. Botany, *viz.*, the elementary parts of vegetable morphology, histology, and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on vegetable palæontology or on the geographical distribution of plants	2,000	
10. Chemistry, *viz.*, the elements of Inorganic Chemistry	2,000	
11. Physics. Elementary properties of Electricity, Magnetism, Heat, Light, and Sound	2,000	
12. Physical Geography and Geology, chiefly economic; including the recognition of the more familiar minerals and rocks, and their properties and uses	2,000	
Class III.—Additional Subjects.		
13. Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects.
14. Geometrical Drawing	300	

(*e*) From the competitors who attain the abovementioned minima of marks in obligatory subjects, and satisfy the requisite conditions in other respects, the Secretary of State will select candidates in order of merit as probationers to enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the Indian Forest Service extends over about three years, divided into seven terms and the period of study in foreign forests. During seven terms the candidates will prosecute their studies mainly at the College, and during the period of foreign study, which may last for five or six months, they will visit, under suitable supervision, such Continental forests as may be selected for the purpose. Excursions may also be made for purposes of instruction, both during term time and during part of the vacations.

6. Each annual session begins in September and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer, except at the end of the visit to the Continent, when the vacation will be shorter.

7. A charge of 61*l.* is made for each of the seven terms spent at the College; for the period of foreign study the charge is 150*l.* for each student. The amounts must be paid terminally in advance to the Bank of England for the first seven terms, and the amount due for the period of foreign study must be paid before the period begins. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due. A student will not be allowed to come into residence or to start for his foreign study of forests until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College, as caution money, to cover charges incurred by him for damage to books, instruments, etc., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging, with washing, up to a cost of 2*s.* a week, and ordinary medical attendance

while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the maximum expenditure on such account being 10*s*. per diem), (2) travelling expenses, and (3) fees to local Forest officers, etc.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study at present comprises the following subjects :—

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry.
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry*, theoretical and practical, in all its branches.

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the foreign study, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College ; and should the result be unsatisfactory, he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in Forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution, and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed, before leaving the College, to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made at the discretion of the Secretary of State for India, after consulting the President of the College and the Principal Professor of Forestry, to the several Provinces according to the needs of the public service. The distribution will be made on the understanding that officers are at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month, and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the Service for the time being. The more favourable pension rules have recently been extended to Forest officers appointed from England, who are thus placed on an equality with Public Works officers appointed from Cooper's Hill College. Any Forest officer who has rendered not less than three years' approved service as head of his department has also been made eligible for an

* For details *see* Royal Indian Engineering College, Calendar.

extra pension of Rs. 1,000 per annum. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office; the principal rules, however, are contained in the Abstract of the Civil Service Regulations as given in the "India Office List" or the "India List" published, respectively, by Messrs. Harrison and Sons, 59 Pall Mall, and Messrs. W. H. Allen & Co., 13 Waterloo Place, S.W., either of which can be procured through any bookseller.

18. Every candidate, before proceeding to India, will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

GENERAL RULES.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions under personal charge of one of the Professors or Instructors selected by the President, such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College Diploma in Forestry or special certificates showing in what subjects they have followed the instruction, and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may

be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

INDIA OFFICE:
November, 1894.

FOREST EXAMINATION.

SYLLABUS.

CLASS I.

Mathematics.—The extent of the Examination will be as follows:—

(*a*) Algebra, up to and including the binomial theorem, the theory and use of logarithms;

(*b*) Euclid, Books I to IV and VI;

(*c*) Plane Trigonometry, up to and including solution of triangles, and mensuration.

English Composition.—The standard of positive merit will be looked for in logical arrangement of thought, and in accuracy and propriety of expression, but large deductions of marks will be made for faults of writing and spelling.

Candidates are also warned that, for similar faults in the use of the English language, similar deductions will be made from the marks obtained in the German papers in Class I.

German.—There will be translations of unseen passages from German into English, and from English into German; the passages for translation will be taken, mainly, from standard authors, and a few simple questions may be asked, on the passages set, as to the structure and character of the language, and allusions of obvious and general interest. The *vivâ voce* examination will include dictation.

CLASS II.

ANY TWO SUBJECTS MAY BE TAKEN UP.

Higher Mathematics.—*** In all the following subjects great importance will be attached to accuracy in numerical results.

Further questions and problems on the subjects of the Examination in Mathematics, Class I.

And in addition—

Statics: The equilibrium of forces acting in one plane and of parallel forces, the centre of gravity, the mechanical powers, and friction. (The graphical or geometrical method of treating such problems should be studied as well as the analytical. No application of the differential calculus to Statics will be required.)

Dynamics: Uniform, uniformly accelerated, and uniform circular motion, falling bodies and projectiles *in vacuo*, collisions and work. (Analytical methods of solution, but not the use of the differential calculus, will be involved.)

Analytical Geometry: Problems on straight line and circle.

Conic Sections: Elementary properties, with easy problems both on the analytical and geometrical methods.

French.—The passages for translation will be taken mainly from standard authors, and in other respects the Examination will proceed on the same lines as in German.

Latin.—Passages selected from the authors usually read in schools will be set for translation into English. Passages from English authors will be given for translation into Latin prose and verse, but candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the grammar of the language, and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the Examination will proceed on the same lines as in Latin.

English History.—The General Paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the General Paper.

Botany, Chemistry, Physics, Physical Geography, and Geology.—The standard of Examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, etc. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the Examination.

Chemistry will be limited to elements of inorganic chemistry.

Physics will include elementary properties of electricity, magnetism, heat, light, and sound.

Geology, chiefly economic, including the recognition of the more familiar minerals and rocks, and their properties and uses.

CLASS III.

BOTH SUBJECTS MAY BE TAKEN UP.

Drawing, Freehand.

Drawing, Geometrical.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely, 100 out of the maximum allotted to each subject, is assigned for handwriting.

ORDER.—Ordered that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

Ordered, also, that these papers be published in the Supplement to the *Gazette of India.*

[True Extract.]

E. D. MACLAGAN,

Under-Secretary to the Government of India.

WEATHER AND CROP REPORT.

For the week ending 24th December 1894.

Burdwan.—Rainfall nil. Weather seasonable. Prospects of crops continue favourable. Price of common rice 10 to 19 seers per rupee in the district.

Midnapore.—Rainfall nil. Weather seasonable. Reaping of winter rice continues. *Rabi* germinating well. Prospects of crops continue bright. Rice selling from 16 to 21 seers per rupee. Fodder and water abundant.

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of crops good. Harvesting of *aman* continues. *Rabi* crops doing well. Rice sells at—

	Srs.	Ch.	
Sadar	11 to 13	0	per rupee.
Barasat	15	0	
Basirhat	16	9	
Diamond-Harbour	16	0	

Condition of cattle good. Fodder and water sufficient.

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues. Cultivation of *rabi* crops going on. Common rice sells from 14 to 20 seers per rupee. Fodder and water sufficient.

Murshidabad.—Rainfall nil. Weather seasonable. Prospects of crops favourable. Fodder sufficient. Rice 15 seers per rupee.

Dinajpur.—Rainfall 0·04. Harvesting of *haimanti* rice is nearly half over. Rice 13 to 14 seers per rupee. No outbreak of cattle-disease nor any complaint for fodder and drinking water.

Rangpur.—Rainfall 0·59. Weather seasonable. *Aman* harvest in progress. Tobacco and mustard doing well. Prospects favourable. Common rice 9 to 13 seers per rupee.

Pabna.—Rainfall nil. Weather clear and cool. Prospects of crops good. Harvesting of *aman* in progress. Common rice selling at 13 seers per rupee. Fodder and water supply sufficient.

Dacca.—Rainfall nil. Harvesting of *aman* continues; prospects good. *Rabi* crops thriving. Fodder available. No cattle-disease. Common rice selling from 12 to 18 seers per rupee.

Chittagong.—Rainfall nil. Weather seasonable. Harvesting of *aman* and cultivation for *rabi* crops continue. Spring crops are being sown in places. Prospects of crops fair. Prices steady. Water and fodder sufficient.

Patna.—Rainfall nil. Harvesting of rice still in progress. *Rabi* and poppy sowings nearly finished. Prospects promising. Common rice selling at—

	Srs.	
Sadar	18	per rupee.
Bihar	20	
Dinapore	11 to 14½	

Gaya.—Rainfall nil. Harvesting of paddy and pressing of sugarcane continue. Poppy promising. *Rabi* crops doing well. Prices about normal. Fodder and water ample.

Champaran.—Rainfall nil. Weather cold and seasonable. Reaping of paddy progressing. Poppy plants healthy. Weeding of *rabi* going on. Common rice selling at 18 seers per rupee. Fodder and water sufficient.

Darbhanga.—Rainfall nil. Harvesting of winter rice almost completed. *Rabi* looks promising. Prices remain stationary. Fodder for cattle plentiful.

Bhagalpur.—Rainfall nil. Weather seasonable. Paddy harvest nearly over, with results above average. *Rabi* sowings completed; young crops germinating well. Coarse rice 20 seers per rupee.

Purnea.—Rainfall nil. Weather comfortably cool. Harvesting of *aghani* in full progress. *Rabi* prospects good. Common rice 17 to 20 seers per rupee. No cattle-disease.

Cuttack.—Report not received.

Hazaribagh.—Rainfall nil. Weather seasonable. Poppy sowings nearly over; prospects good. Harvesting of paddy and *kurthi* completed. *Rabi* crops promise well. Common rice 15 to 20 seers per rupee. Water and fodder ample.

General Summary.—There was no rain during the week with the exception of a few light showers in North Bengal. Agricultural prospects continue favourable. The harvesting of winter rice continues and in some districts is approaching completion. A good outturn is indicated. *Rabi*, poppy and other cold-weather sowings are nearly over. Cattle are in good condition. The price of common rice continues generally normal, and shows a tendency to fall in some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 25th December 1894.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

* Mean of 6 days. † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

e week ending Saturday, the 22nd of December 1894.

Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 10th October 1894. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received the corresponding space is left blank. If any of the returns are wanting the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 22ND OF DECEMBER 1894.

DURING the previous week Bengal had again been affected by a barometric depression, the effects of which had not entirely passed away from the province on the 15th or the last day of that week. The sky on that date was moderately clouded, temperature and humidity were high, and indeed the mean temperature for the 15th was in excess at many stations by more than 5°. Rain was also being received at some stations in East Bengal. On the 16th, or the first day of the week under review, these disturbed conditions apparently passed away in an easterly direction, and pressure began to rise and temperature to fall at the western stations, while temperature continued to rise, skies remained rather heavily clouded, and a few local showers were reported at the extreme south-eastern stations. On the 17th pressure increased slowly over the whole province, and conditions began to be more settled, as skies began to clear at the eastern stations, though still a few local showers were reported in South-East Bengal. On this day, however, a brisk fall of temperature set in over the whole province, though temperature was still generally above the normal. On the 18th pressure again rose slowly to moderately, while temperature fell briskly, and the same changes occurred on the 19th, when the temperatures recorded over the province were fairly normal. On the 19th, however, a diffused barometric depression or disturbance appeared, which was affecting Baluchistan and North-Western India, and this on the 20th had advanced rapidly towards the Central Provinces and Bandelkhand. Bengal on this day was scarcely affected by the depression, as pressure and temperature were almost steady. On the 21st, however, the depression from Bandelkhand had advanced very rapidly about 500 miles in an easterly direction, and its centre was in the eastern central district of Bengal. Hence conditions changed considerably in Bengal, and particularly in the northern districts, as there was a rapid increase in humidity, temperature and cloud proportion, and a brisk fall of pressure. Showers were also reported on the morning of the 21st in Chota Nagpur, and during the 21st light to moderate showers were received in North Bengal and particularly in the hills, and light to moderate snow-storms were also reported to have occurred at Darjeeling and Gnatong, which falls were included in the report for the 22nd instant. On the morning of the 22nd apparently the depression over Bengal had either filled up or had again passed away in an easterly direction, for pressure had increased slightly to briskly, while skies were clearing and temperature and humidity were falling considerably. Hence the effects of the depression had again passed away on the 22nd, and fine settled weather again obtained over the province.

Pressure.—The mean pressure for the week has been in excess of the normal usually by about 0·03″ to 0·05.″

Temperature.—The mean temperature for the week for the whole province has been 2° above the normal, and the excess has been largest in East and North Bengal, where it has averaged nearly 3°, and smallest in Orissa, where it has equalled only 1·5.°

The actual temperatures registered during the week and their variations from the normal temperature of the present season are clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. The variations, it will be seen, have been considerable in the day or maximum temperatures, which have been generally in excess by about 1° or 2°, while the night or minimum temperatures have in most cases been rather largely in excess, the excess at such stations as Patna and Chittagong equalling about 5° and 6°.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 22nd of December 1894.

	Normal mean maximum temperature for the week ending 22nd December.	Actual mean maximum temperature for the week ending 22nd December 1894.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 22nd December.	Actual mean minimum temperature for the week ending 22nd December 1894.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 22nd December.	Actual mean daily temperature for the week ending 22nd December 1894.	Variation of actual mean from the normal.

Darjeeling	48·1	50·2	+2·1	36·1	37·6	+1·5	42·1	43·9	+1·8

Rainfall.—The only rainfall of importance which has occurred during the week has been in East Bengal, which has averaged 0·22 inch. In this division the heaviest falls have occurred in the district of Noakhali, which has received 0·99 inch, and in Backergunge which has received 0·61 inch. Over the remainder of the province rainfall has been almost absent, but some local showers of no practical importance have occurred in Chota Nagpur and South-West Bengal.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 22nd of December 1894:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average fall of the corresponding period for 24 years, Surveyor-General's Office		0·01
The total fall from 1st January to 22nd December 1894		48·66
The average fall of the corresponding period for 24 years, Surveyor-General's Office		65·53

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, id from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, rmerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in e Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

d., dew.
